HN2 [↑] Title 33 U.S.C. § 1369(b)(1)(F) authorizes "any interested person" to seek review in this court of an EPA decision "issuing or denying any permit under section 1342 of this title." "Any interested person" means any person that satisfies the injury-in-fact requirement for Article III standing. See *Natural Resources Defense Council, Inc. v. EPA*, 966 F.2d 1292, 1297 (9th Cir. 1992) [*NRDC II*]. It is undisputed that Petitioners satisfy that requirement. Petitioners allege that "members of Defenders and the Club use and enjoy ecosystems

affected by storm water discharges and sources thereof governed by the above-referenced permits," and no other party disputes those facts. See *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 565-66, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992) **HN3** [↑] ("[A] plaintiff claiming injury from environmental damage must use the area affected by the challenged activity."); see also *NRDC II*, 966 F.2d at 1297 ("NRDC claims, inter alia, that [the] EPA has delayed unlawfully promulgation of storm water regulations and that its regulations, as published, inadequately control storm water [**6] contaminants. NRDC's allegations . . . satisfy the broad standing requirement applicable here.").

Intervenors argue, however, that they were not parties when this action was filed and that this court cannot redress Petitioners' injury without them. Their real contention appears to be that they are indispensable parties under *Federal Rule of Civil Procedure* 19. We need not consider that contention, however, because in fact Intervenor have been permitted to intervene in this action and to present their position fully. In the circumstances, Intervenor have suffered no injury.

DISCUSSION

A. Standard of Review

HN4 [↑] The Administrative Procedures Act (APA), 5 U.S.C. §§ 701-06, provides our standard of review for the EPA's decision to issue a permit. See *American Mining Congress v. EPA*, 965 F.2d 759, 763 (9th Cir. 1992). Under the APA, we generally review such a decision to determine whether it was "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law." 5 U.S.C. § 706(2)(A).

On questions of statutory interpretation, we follow the approach from *Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc.*, 467 U.S. 837, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984). [**7] See *NRDC II*, 966 F.2d at 1297 (so holding). In *Chevron*, 467 U.S. at 842-44, the Supreme Court devised a two-step process for reviewing an

administrative agency's interpretation of a statute that it administers. *See also Bicycle Trails Council of Marin v. Babbitt*, 82 F.3d 1445, 1452 (9th Cir. 1996) ("The **HN5** [↑] Supreme Court has established a two-step process for reviewing an agency's construction of a statute it administers."). Under the first step, we employ "traditional tools of statutory construction" to determine whether Congress has expressed its intent unambiguously on the question before the court. *Chevron*, 467 U.S. at 843 n.9. "If the intent of Congress is clear, that is the end of the matter; for the court, as well as the agency, must give effect to the unambiguously expressed intent of Congress." *Id.* at 842-43 (footnote omitted). If, instead, Congress has left a gap for the administrative agency to fill, we proceed to step two. *See id.* at 843. At step two, we must uphold the administrative regulation unless it is "arbitrary, capricious, or manifestly contrary to the statute." *Id.* at 844.

[**8] [*1163] B. Background

HN6 [↑] The CWA generally prohibits the "discharge of any pollutant," 33 U.S.C. § 1311(a), from a "point source" into the navigable waters of the United States. *See* 33 U.S.C. § 1362(12)(A). An entity can, however, obtain an NPDES permit that allows for the discharge of some pollutants. *See* 33 U.S.C. § 1342(a)(1).

HN7 [↑] Ordinarily, an NPDES permit imposes effluent limitations on such discharges. *See* 33 U.S.C. § 1342(a)(1) (incorporating effluent limitations found in 33 U.S.C. § 1311). First, a permit-holder "shall . . . achieve . . . effluent limitations . . . which shall require the application of the best practicable control technology [BPT] currently available." 33 U.S.C. § 1311(b)(1)(A). Second, a permit-holder "shall . . . achieve . . . any more stringent limitation, including those necessary to meet water quality standards, treatment standards or schedules of compliance, established pursuant to any State law or regulations (under authority preserved by section 1370 of this title)." 33 U.S.C. § 1311 [**9] (b)(1)(C) (emphasis

added). Thus, although the BPT requirement takes into account issues of practicability, *see Rybachek v. EPA*, 904 F.2d 1276, 1289 (9th Cir. 1990), the EPA also "is under a specific obligation to require that level of effluent control which is needed to implement existing water quality standards without regard to the limits of practicability," *Oklahoma v. EPA*, 908 F.2d 595, 613 (10th Cir. 1990) (internal quotation marks omitted), *rev'd on other grounds sub nom. Arkansas v. Oklahoma*, 503 U.S. 91, 117 L. Ed. 2d 239, 112 S. Ct. 1046 (1992). *See also Ackels v. EPA*, 7 F.3d 862, 865-66 (9th Cir. 1993) (similar).

The EPA's treatment of storm-water discharges has been the subject of much debate. Initially, the EPA determined that such discharges generally were exempt from the requirements of the CWA (at least when they were uncontaminated by any industrial or commercial activity). *See* 40 C.F.R. § 125.4 (1975).

The Court of Appeals for the District of Columbia, however, invalidated that regulation, holding that "the EPA Administrator does not have authority to exempt categories of point sources from [**10] the permit requirements of § 402 [33 U.S.C. § 1342]." *Natural Resources Defense Council, Inc. v. Costle*, 186 U.S. App. D.C. 147, 568 F.2d 1369, 1377 (D.C. Cir. 1977). "Following this decision, [the] EPA issued proposed and final rules covering storm water discharges in 1980, 1982, 1984, 1985 and 1988. These rules were challenged at the administrative level and in the courts." *American Mining Congress*, 965 F.2d at 763.

Ultimately, in 1987, Congress enacted the Water Quality Act amendments to the CWA. *See NRDC II*, 966 F.2d at 1296 ("Recognizing both the environmental threat posed by storm water runoff and [the] EPA's problems in implementing regulations, Congress passed the Water Quality Act of 1987 containing amendments to the CWA.") (footnotes omitted). Under the Water Quality Act,

from 1987 until 1994,¹ most entities discharging storm water did not need to obtain a permit. *See* 33 U.S.C. § 1342(p).

[**11] Although the Water Quality Act generally did not require entities discharging storm water to obtain a permit, it did require such a permit for discharges "with respect to which a permit has been issued under this section before February 4, 1987," 33 U.S.C. § 1342(p)(2)(A); discharges "associated with industrial activity," 33 U.S.C. § 1342(p)(2)(B); discharges from a "municipal separate sewer system serving a population of [100,000] or more," 33 U.S.C. § 1342(p)(2)(C) & (D); and "[a] discharge for which the Administrator . . . determines that the stormwater discharge contributes to a violation of a water quality standard or is a significant contributor of pollutants to waters of the United States," 33 U.S.C. § 1342(p)(2)(E).

[*1164] When a permit is required for the discharge of storm water, the Water Quality Act sets two different standards:

(A) Industrial discharges

Permits for discharges associated with industrial activity shall meet all applicable provisions of this section *and* section 1311 of this title.

(B) Municipal discharge

Permits for discharges from municipal [****12**] storm sewers -

(i) may be issued on a system- or jurisdiction-wide basis;

(ii) shall include a requirement to effectively prohibit non-stormwater discharges into the storm sewers; and

(iii) *shall require controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices,*

control techniques and system, design and engineering methods, and such other provisions as the Administrator . . . determines appropriate for the control of such pollutants.

HN8^(↑) 33 U.S.C. § 1342(p)(3) (emphasis added).

C. *Application of Chevron*

The EPA and Petitioners argue that the Water Quality Act is ambiguous regarding whether Congress intended for municipalities to comply strictly with state water-quality standards, under 33 U.S.C. § 1311(b)(1)(C). Accordingly, they argue that we must proceed to step two of *Chevron* and defer to the EPA's interpretation that the statute does require strict compliance. *See Zimmerman v. Oregon Dep't of Justice*, 170 F.3d 1169, 1173 (9th Cir. 1999) ("At step two, we must uphold the administrative regulation unless it is arbitrary, capricious, or [****13**] manifestly contrary to the statute.") (citation and internal quotation marks omitted), *petition for cert. filed*, No. 99-243 (Aug. 10, 1999).

Intervenors and *amici*, on the other hand, argue that the Water Quality Act expresses Congress' intent unambiguously and, thus, that we must stop at step one of *Chevron*. *See, e.g., National Credit Union Admin. v. First Nat'l Bank & Trust Co.*, 522 U.S. 479, 118 S. Ct. 927, 938-39, 140 L. Ed. 2d 1 (1998) ("Because we conclude that Congress has made it clear that the *same* common bond of occupation must unite each member of an occupationally defined federal credit union, we hold that the NCUA's contrary interpretation is impermissible under the first step of *Chevron*." (emphasis in original); *Sierra Club v. EPA*, 118 F.3d 1324, 1327 (9th Cir. 1997) ("Congress has spoken clearly on the subject and the regulation violates the provisions of the statute. Our inquiry ends at the first prong of *Chevron*."). We agree with Intervenors and *amici*: For the reasons discussed below, the Water Quality Act unambiguously demonstrates that Congress did not require municipal storm-sewer discharges to

¹ As enacted, the Water Quality Act extended the exemption to October 1, 1992. Congress later amended the Act to change that date to October 1, 1994. *See* Pub. L. No. 102-580.

comply **[**14]** strictly with 33 U.S.C. § 1311(b)(1)(C). That being so, we end our inquiry at the first step of the *Chevron* analysis.

"Questions **HN9**[↑] of congressional intent that can be answered with 'traditional tools of statutory construction' are still firmly within the province of the courts" under *Chevron. NRDC II*, 966 F.2d at 1297 (citation omitted). "Using our 'traditional tools of statutory construction,' *Chevron*, 467 U.S. at 843 n.9, 104 S. Ct. 2778, when interpreting a statute, we look first to the words that Congress used." *Zimmerman*, 170 F.3d at 1173 (alterations, citations, and internal quotation marks omitted). "Rather than focusing just on the word or phrase at issue, we look to the entire statute to determine Congressional intent." *Id.* (alterations, citations, and internal quotation marks omitted).

As is apparent, Congress expressly required *industrial* storm-water discharges to comply with the requirements of 33 U.S.C. § 1311. See 33 U.S.C. § 1342(p)(3)(A) ("Permits for discharges associated with industrial activity *shall meet all applicable* **[**15]** *provisions of this section and section 1311 of this title.*") (emphasis added). By incorporation, then, industrial **[*1165]** storm-water discharges "*shall . . . achieve . . . any more stringent limitation, including those necessary to meet water quality standards, treatment standards or schedules of compliance, established pursuant to any State law or regulation (under authority preserved by section 1370 of this title).*" 33 U.S.C. § 1311(b)(1)(C) (emphasis added); see also Sally A. Longroy, *The Regulation of Storm Water Runoff and its Impact on Aviation*, 58 J. Air. L. & Com. 555, 565-66 (1993) ("Congress further *singled out* industrial storm water dischargers, all of which are on the high-priority schedule, and requires them to satisfy all provisions of section 301 of the CWA [33 U.S.C. § 1311]. . . . Section 301 further mandates that NPDES permits include requirements that receiving waters meet water quality based standards.") (emphasis added). In other words, industrial discharges must comply strictly with state water-quality standards.

Congress chose not to include a similar provision for municipal **[**16]** storm-sewer discharges. Instead, Congress required municipal storm-sewer discharges "to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques and system, design and engineering methods, and such other provisions as the Administrator . . . determines appropriate for the control of such pollutants." 33 U.S.C. § 1342(p)(3)(B)(iii).

The EPA and Petitioners argue that the difference in wording between the two provisions demonstrates ambiguity. That argument ignores precedent respecting the reading of statutes. Ordinarily, "where **HN10**[↑] Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion." *Russello v. United States*, 464 U.S. 16, 23, 78 L. Ed. 2d 17, 104 S. Ct. 296 (1983) (citation and internal quotation marks omitted); see also *United States v. Hanousek*, 176 F.3d 1116, 1121 (9th Cir. 1999) (stating the same principle), *petition for cert. filed*, No. 98-323 (Aug. 23, 1999). Applying that familiar **[**17]** and logical principle, we conclude that Congress' choice to require industrial storm-water discharges to comply with 33 U.S.C. § 1311, but not to include the same requirement for municipal discharges, must be given effect. When we read the two related sections together, we conclude that 33 U.S.C. § 1342(p)(3)(B)(iii) does not require municipal storm-sewer discharges to comply strictly with 33 U.S.C. § 1311(b)(1)(C).

Application of that principle is significantly strengthened here, because 33 U.S.C. § 1342(p)(3)(B) is not merely silent regarding whether municipal discharges must comply with 33 U.S.C. § 1311. Instead, § 1342(p)(3)(B)(iii) replaces the requirements of § 1311 with the requirement that municipal storm-sewer dischargers "reduce the discharge of pollutants to the maximum extent practicable, including management practices,

control techniques and system, design and engineering methods, and such other provisions as the Administrator . . . determines appropriate for the control of such pollutants." 33 U.S.C. § 1342(p)(3)(B)(iii). **[**18]** In the circumstances, the statute unambiguously demonstrates that Congress did not require municipal storm-sewer discharges to comply strictly with 33 U.S.C. § 1311(b)(1)(C).

Indeed, the EPA's and Petitioners' interpretation of 33 U.S.C. § 1342(p)(3)(B)(iii) would render that provision superfluous, a result that we prefer to avoid so as to give effect to all provisions that Congress has enacted. See *Government of Guam ex rel. Guam Econ. Dev. Auth. v. United States*, 179 F.3d 630, 634 (9th Cir. 1999) ("This **HN11**^[↑] court generally refuses to interpret a statute in a way that renders a provision superfluous."), *as amended*, 1999 U.S. App. LEXIS 18691, 1999 WL 604218 (9th Cir. Aug. 12, 1999). Section 1342(p)(3)(B)(iii) creates a lesser standard than § 1311. Thus, if § 1311 continues to apply to municipal storm-sewer discharges, **[**1166]** the more stringent requirements of that section always would control.

Contextual clues support the plain meaning of § 1342(p)(3)(B)(iii), which we have described above. **HN12**^[↑] The Water Quality Act contains other provisions that undeniably exempt certain discharges from the permit requirement altogether (and therefore from **[**19]** § 1311). For example, "the Administrator shall not require a permit under this section for discharges composed entirely of return flows from irrigated agriculture." 33 U.S.C. § 1342(l)(1). Similarly, a permit is not required for certain storm-water runoff from oil, gas, and mining operations. See 33 U.S.C. § 1342(l)(2). Read in the light of those provisions, Congress' choice to exempt municipal storm-sewer discharges from strict compliance with § 1311 is not so unusual that we should hesitate to give effect to the statutory text, as written.

Finally, our interpretation of § 1342(p)(3)(B)(iii) is

supported by this court's decision in *NRDC II*. There, the petitioner had argued that "the EPA has failed to establish substantive controls for municipal storm water discharges as required by the 1987 amendments." *NRDC II*, 966 F.2d at 1308. This court disagreed with the petitioner's interpretation of the amendments:

Prior to 1987, municipal storm water dischargers were subject to the same substantive control requirements as industrial and other types of storm water. In the 1987 amendments, *Congress retained the **[**20]** existing, stricter controls for industrial storm water dischargers but prescribed new controls for municipal storm water discharge.*

Id. (emphasis added). The court concluded that, under 33 U.S.C. § 1342(p)(3)(B)(iii), "*Congress did not mandate a minimum standards approach.*"

Id. (emphasis added). The question in *NRDC II* was not whether § 1342(p)(3)(B)(iii) required strict compliance with state water-quality standards, see 33 U.S.C. § 1311(b)(1)(C). Nonetheless, the court's holding applies equally in this action and further supports our reading of 33 U.S.C. § 1342(p).

In conclusion, the text of 33 U.S.C. § 1342(p)(3)(B), the structure of the Water Quality Act as a whole, and this court's precedent all demonstrate that Congress did not require municipal storm-sewer discharges to comply strictly with 33 U.S.C. § 1311(b)(1)(C).

D. *Required Compliance with 33 U.S.C. § 1311(b)(1)(C)*

We are left with Intervenors' contention that the EPA may not, under the CWA, require strict compliance with state water-quality **[**21]** standards, through numerical limits or otherwise. We disagree.

Although Congress did not require municipal storm-sewer discharges to comply strictly with § 1311(b)(1)(C), § 1342(p)(3)(B)(iii) states that "permits for discharges from municipal storm

sewers . . . shall require . . . *such other provisions as the Administrator . . . determines appropriate for the control of such pollutants.*" (Emphasis added.) That provision gives the EPA discretion to determine what pollution controls are appropriate. As this court stated in *NRDC II*, "Congress HN13 [↑] gave the administrator discretion to determine what controls are necessary. . . . NRDC's argument that the EPA rule is inadequate cannot prevail in the face of the clear statutory language." 966 F.2d at 1308.

Under that discretionary provision, the EPA has the authority to determine that ensuring strict compliance with state water-quality standards is necessary to control pollutants. The EPA also has the authority to require less than strict compliance with state water-quality standards. The EPA has adopted an interim approach, which "uses best management practices (BMPs) in first-round storm water permits . . . to provide ****22** for the attainment of water quality standards." The EPA applied that approach to the permits at issue here. Under 33 U.S.C. § 1342(p)(3)(B)(iii), the EPA's choice to include ***1167** either management practices or numeric limitations in the permits was within its discretion. *See NRDC II*, 966 F.2d at 1308 ("Congress did not mandate a minimum standards approach or specify that [the] EPA develop minimal performance requirements."). In the circumstances, the EPA did not act arbitrarily or capriciously by issuing permits to Intervenors.

PETITION DENIED.

Case Summary

Procedural Posture

Plaintiff building industry association filed an administrative appeal with defendant California Water Resources Control Board (State Water Board) regarding the Board's issuance of a comprehensive municipal storm sewer permit. The Board denied the appeal. The association then petitioned for a writ of mandate, asserting numerous claims. The Superior Court of San Diego County, California, found the association failed to prove its claims.

Overview

The association argued that the permit violated federal law because it allowed the State Water Board and a regional water board to impose municipal storm sewer control measures more stringent than a federal standard known as "maximum extent practicable" set forth in 33 U.S.C.S. § 1342(p)(3)(B)(iii). The instant court held the language of § 1342(p)(3)(B)(iii) communicates the basic principle that the

Environmental Protection Agency, and/or a state approved to issue a National Pollution Discharge Elimination System (NPDES) permit, retains the discretion to impose "appropriate" water pollution controls in addition to those that come within the definition of "maximum extent practicable." The NPDES permit did not violate federal law. The water boards had the authority to include a permit provision requiring compliance with the more stringent state water quality standards.

Outcome

The judgment was affirmed.

HN1[↓] Effluent Limitations

The Clean Water Act employs the basic strategy of prohibiting pollutant emissions from "point sources" unless the party discharging the pollutants obtains a National Pollution Discharge Elimination System (NPDES) permit. It is unlawful for any person to discharge a pollutant without obtaining a permit and complying with its terms. 33 U.S.C.S. § 1311(a). An NPDES permit is issued by the Environmental Protection Agency or by a state that has a federally-approved water quality program. 33 U.S.C.S. § 1342(a), (b). Before an NPDES is issued, the federal or state regulatory agency must follow an extensive administrative hearing procedure. 40 C.F.R. §§ 124.3, 124.6, 124.8,

124.10. NPDES permits are valid for five years. 33 U.S.C.S. § 1342(b)(1)(B).

HN2[↓] Point Sources

The Clean Water Act defines a "point source" to be any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, or vessel or other floating craft, from which pollutants are or may be discharged. 33 U.S.C.S. § 1362(14).

HN3[↓] Beneficial Use

Under the Clean Water Act, the proper scope of the

controls in a National Pollution Discharge Elimination System (NPDES) permit depends on the applicable state water quality standards for the affected water bodies. Each state is required to develop water quality standards that establish the desired condition of a waterway. A water quality standard for any given water segment has two components: (1) the designated beneficial uses of the water body; and (2) the water quality criteria sufficient to protect those uses. As enacted in 1972, the Act mandated that an NPDES permit require compliance with state water quality standards and that this goal be met by setting forth a specific "effluent limitation," which is a restriction on the amount of pollutants that may be discharged at the point source. 33 U.S.C.S. §§ 1311, 1362(11).

HN4[↓] Licenses

In 1987, Congress amended the Clean Water Act to add provisions that specifically concerned National Pollution Discharge Elimination System (NPDES)

permit requirements for storm sewer discharges. 33 U.S.C.S. § 1342(p). In these amendments, enacted as part of the Water Quality Act of 1987, Congress distinguished between industrial and municipal storm water discharges. With respect to municipal storm water discharges, Congress clarified that the Environmental Protection Agency had the authority to fashion NPDES permit requirements to meet water quality standards without specific numerical effluent limits and instead to impose controls to reduce the discharge of pollutants to the maximum extent practicable. 33 U.S.C.S. § 1342(p)(3)(B)(iii).

HN10[↓] Mandamus

Where a party has been aggrieved by a final decision of a regional water board for which the California Water Resources Control Board denies review, Cal. Code Civ. Proc. § 1094.5 governs the writ of mandate proceedings, and the superior court must exercise its independent judgment in examining the evidence and resolving factual disputes. Cal. Water Code § 13330(d). In exercising its independent judgment, a trial court must afford a strong presumption of correctness concerning the administrative findings, and the party challenging the administrative decision bears the burden of convincing the court that the administrative findings are contrary to the weight of the evidence.

HN11[↓] De Novo Review

In reviewing the trial court's factual determinations on the administrative record, an appellate court applies a substantial evidence standard. However, in reviewing the trial court's legal determinations, an appellate court conducts a de novo review. Thus, the appellate court is not bound by the legal

determinations made by the state or regional agencies or by the trial court, but it must give appropriate consideration to an administrative agency's expertise underlying its interpretation of an applicable statute.

Environmental Law > Water Quality > General Overview

HN12[↓] It is well settled that the Clean Water Act authorizes states to impose water quality controls that are more stringent than are required under federal law, 33 U.S.C.S. § 1370, and California law specifically allows the imposition of controls more stringent than federal law, Cal. Water Code § 13377.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A building industry association filed an administrative appeal with the State Water Resources Control Board regarding the board's issuance of a comprehensive municipal storm sewer permit. The board denied the appeal. The association then petitioned for a writ of mandate, asserting numerous claims. Three environmental groups intervened as defendants. The trial court found the association failed to prove its claims. The association argued that the permit violated federal law because it allowed the state water board and a regional water board to impose municipal storm sewer control measures more stringent than a federal standard known as "maximum extent practicable" under 33 U.S.C. § 1342(p)(3)(B)(iii). (Superior Court of San Diego County, No. GIC 780263, Wayne L. Peterson, Judge.)

The Court of Appeal affirmed. The court held the

language of § 1342(p)(3)(B)(iii) communicates the basic principle that the Environmental Protection Agency, and or a state approved to issue a National Pollution Discharge Elimination System (NPDES) permit, retains the discretion to impose “appropriate” water pollution controls in addition to those that come within the definition of “maximum extent practicable.” The NPDES permit did not violate federal law. The water boards had the authority to include a permit provision requiring compliance with the more stringent state water quality standards. (Opinion by Haller, J., with Benke, Acting P. J., and Aaron, J., concurring.) [*867]

CALIFORNIA OFFICIAL REPORTS HEADNOTES

Classified to California Digest of Official Reports

CA(1)[↓] (1)

Pollution and Conservation Laws § 5—Water Pollution—Clean Water Act—Regulatory Permit—Municipal Storm Sewer Control Measures.

A regulatory permit issued by the State Water Resources Control Board allowing it and a regional water board to impose municipal storm sewer control measures more stringent than a federal standard known as “maximum extent practicable,” set forth in 33 U.S.C. § 1342(p)(3)(B)(iii), did not violate federal law.

[4 Witkin, Summary of Cal. Law (9th ed. 1987) Real Property, § 69.]

CA(2)[↓] (2)

Pollution and Conservation Laws § 5—Water Pollution—Clean Water Act—NPDES Permits.

The Clean Water Act (33 U.S.C. 1251 et seq.)

employs the basic strategy of prohibiting pollutant emissions from “point sources” unless the party discharging the pollutants obtains a National Pollution Discharge Elimination System (NPDES) permit. Pursuant to 33 U.S.C. § 1311(a), it is unlawful for any person to discharge a pollutant without obtaining a permit and complying with its terms. Pursuant to 33 U.S.C. § 1342(a) and (b) an NPDES permit is issued by the Environmental Protection Agency or by a state that has a federally-approved water quality program. Pursuant to 40 C.F.R. §§ 124.3, 124.6, 124.8, 124.10, before an NPDES is issued, the federal or state regulatory agency must follow an extensive administrative hearing procedure. Pursuant to 33 U.S.C. § 1342(b)(1)(B), NPDES permits are valid for five years.

CA(3)[↓] (3)

Pollution and Conservation Laws § 5—Water Pollution—Clean Water Act—NPDES Permits.

Under the Clean Water Act (33 U.S.C. § 1251 et seq.), the proper scope of the controls in a National Pollution Discharge Elimination System (NPDES) permit depends on the applicable state water quality standards for the affected water bodies. Each state is required to develop water quality standards that establish the desired condition of a waterway. A water quality standard for any given water segment has two components: (1) the designated beneficial uses of the water body; and (2) the water quality criteria sufficient to protect those uses. As enacted in 1972, 33 U.S.C. §§ 1311, 1362(11) of the Act mandated that an NPDES permit require compliance with state water quality standards and that this goal be met by setting forth a specific “effluent limitation,” which is a restriction on the amount of pollutants that may be discharged at the point source.

[*868] CA(4)[↓] (4)

Pollution and Conservation Laws § 5—Water

Pollution—Clean Water Act—NPDES Permits.

In 1987, Congress amended the Clean Water Act (33 U.S.C. 1251 et seq.), to add provisions, specifically, 33 U.S.C. § 1342(p), that specifically concerned National Pollution Discharge Elimination System (NPDES) permit requirements for storm sewer discharges. In these amendments, enacted as part of the Water Quality Act of 1987 (33 U.S.C. § 251 et seq.), Congress distinguished between industrial and municipal storm water discharges. With respect to municipal storm water discharges, Congress clarified in 33 U.S.C. § 1342(p)(3)(B)(iii) that the Environmental Protection Agency had the authority to fashion NPDES permit requirements to meet water quality standards without specific numerical effluent limits and instead to impose controls to reduce the discharge of pollutants to the maximum extent practicable.

CA(5)[↓] (5)**Pollution and Conservation Laws § 5—Water Pollution—Waste Discharge Requirements.**

Pursuant to Wat. Code, § 13374, the waste discharge requirements issued by the regional water boards ordinarily also serve as National Pollution Discharge Elimination System permits under federal law.

CA(6)[↓] (6)**Pollution and Conservation Laws § 5—Water Pollution—Writ of Mandate—Exercise of Independent Judgment.**

Where a party has been aggrieved by a final decision of a regional water board for which the State Water Resources Control Board denies review, Code Civ. Proc., § 1094.5, governs the writ of mandate proceedings, and the superior court must, pursuant to Wat. Code, § 13330, subd. (d), exercise its independent judgment in examining the

evidence and resolving factual disputes. In exercising its independent judgment, a trial court must afford a strong presumption of correctness concerning the administrative findings, and the party challenging the administrative decision bears the burden of convincing the court that the administrative findings are contrary to the weight of the evidence.

CA(7)[↓] (7)**Appellate Review § 144—Scope of Review—Questions of Law and Fact—Factual Determinations—Substantial Evidence Standard—De Novo Review.**

In reviewing the trial court's factual determinations on the administrative record, an appellate court applies a substantial evidence standard. However, in reviewing the trial court's legal determinations, an appellate court conducts a de novo review. Thus, the appellate court is not bound by the legal determinations made by the state or regional agencies or by the trial court, but it must give appropriate consideration to an administrative agency's expertise underlying its interpretation of an applicable statute.

[*869] CA(8)[↓] (8)**Pollution and Conservation Laws § 5—Water Pollution—Clean Water Act—More Stringent State Controls.**

It is well settled that the Clean Water Act (33 U.S.C. § 1251 et seq.) authorizes states to impose water quality controls that are more stringent than are required under federal law, 33 U.S.C. § 1370, and California law specifically allows the imposition of controls more stringent than federal law, Wat. Code, § 13377.

CA(9)[↓] (9)**Pollution and Conservation Laws § 5—Water**

Pollution—Clean Water Act—NPDES Permits.

The language of 33 U.S.C. § 1342(p)(3)(B)(iii) does communicate the basic principle that the Environmental Protection Agency (and/or a state approved to issue a National Pollution Discharge Elimination System permit) retains the discretion to impose “appropriate” water pollution controls in addition to those that come within the definition of “maximum extent practicable.”

CA(10)[↓] (10)**Statutes § 21—Construction—Legislative Intent.**

While punctuation and grammar should be considered in interpreting a statute, neither is controlling unless the result is in harmony with the clearly expressed intent of the Legislature. If the statutory language is susceptible to more than one reasonable interpretation, a court must also look to a variety of extrinsic aids, including the ostensible objects to be achieved, the evils to be remedied, the legislative history, public policy, contemporaneous administrative construction, and the statutory scheme of which the statute is a part.

CA(11)[↓] (11)**Pollution and Conservation Laws § 5—Water Pollution—Clean Water Act—NPDES Permits.**

With respect to National Pollution Discharge Elimination System (NPDES) permits, the legislative purpose underlying the Water Quality Act of 1987 (33 U.S.C. § 251 et seq.), and 33 U.S.C. § 1342(p) in particular, supports that Congress intended to provide the Environmental Protection Agency (or the regulatory agency of an approved state) the discretion to require compliance with water quality standards in a municipal storm sewer NPDES permit, particularly where that compliance will be achieved primarily through an iterative process.

CA(12)[↓] (12)**Statutes § 44—Construction—Administrative—Judicial Deference.**

A court is required to give substantial deference to an administrative interpretation of a statute.

CA(13)[↓] (13)**Appellate Review § 135—Scope of Review—Presumptions.**

All judgments and orders are presumed correct, and persons challenging them must affirmatively show reversible error.

[*870] CA(14)[↓] (14)**Appellate Review § 108—Briefs—Requisites—Reference to Record—Party Challenging Sufficiency of Evidence—Summarization of All Material Evidence Required.**

A party challenging the sufficiency of evidence to support a judgment must summarize (and cite to) all of the material evidence, not just the evidence favorable to his or her appellate positions.

CA(15)[↓] (15)**Administrative Law § 116—Judicial Review and Relief—Scope of Review—Abuse of Discretion—Administrative Permit.**

The party challenging the scope of an administrative permit has the burden of showing the agency abused its discretion or its findings were unsupported by the facts.

CA(16)[↓] (16)**Pollution and Conservation Laws § 5—Water Pollution—Industrial Storm Water Dischargers—**

Best Available Technology Economically Achievable.

BAT is an acronym for “best available technology economically achievable,” which is a technology-based standard for industrial storm water dischargers that focuses on reducing pollutants by treatment or by a combination of treatment and best management practices.

Counsel: Latham & Watkins, David L. Mulliken, Eric M. Katz, Paul N. Singarella, Kelly E. Richardson and Daniel P. Brunton for Plaintiffs and Appellants.

Bill Lockyer, Attorney General, Mary Hackenbracht, Assistant Attorney General, Carol A. Squire, David Robinson and Deborah Fletcher, Deputy Attorneys General, for Defendants and Respondents.

David S. Beckman, Heather L. Hoecherl, Anjali I. Jaiswal and Dan L. Gildor for Interveners and Respondents.

Marco Gonzalez for Intervener and Respondent San Diego BayKeeper.

Law Offices of Rory Wicks and Rory R. Wicks for Surfrider Foundation, Waterkeeper Alliance, The Ocean Conservancy, Heal the Bay, Environmental Defense Center, Santa Monica BayKeeper, Orange County CoastKeeper, Ventura CoastKeeper, Environmental Health Coalition, CalBeach Advocates, San Diego Audubon Society, Endangered Habitats League and Sierra Club as Amici Curiae on behalf [***2] of Defendants and Respondents and Interveners and Respondents.

Judges: Haller, J., with Benke, Acting P. J., and Aaron, J., concurring.

Opinion by: HALLER [*871]

Opinion

[**130] **HALLER, J.**—This case concerns the environmental regulation of municipal storm

sewers that carry excess water runoff to lakes, lagoons, rivers, bays, and the ocean. The waters flowing through these sewer systems have accumulated numerous harmful pollutants that are then discharged into the water body without receiving any treatment. To protect against the resulting water quality impairment, federal and state laws impose regulatory controls on storm sewer discharges. In particular, municipalities and other public entities are required to obtain, and comply with, a regulatory permit limiting the quantity and quality of water runoff that can be discharged from these storm sewer systems.

In this case, the California Regional Water Control Board, San Diego Region, (Regional Water Board) conducted numerous public hearings and then issued a comprehensive municipal storm sewer permit governing 19 local public entities. Although these entities did not bring an administrative challenge to the permit, one business organization, the Building Industry [***3] Association of San Diego County (Building Industry), filed an administrative appeal with the State Water Resources Control Board (State Water Board). After making some modifications to the permit, the State Water Board denied the appeal. Building Industry then petitioned for a writ of mandate in the superior court, asserting numerous claims, including that the permit violates state and federal law because the permit provisions are too stringent and impossible to satisfy. Three environmental groups intervened as defendants in the action. After a hearing, the trial court found Building Industry failed to prove its claims and entered judgment in favor of the administrative agencies (the Water Boards) and the intervener environmental groups.

CA(1)[↑] (1) On appeal, Building Industry's main contention is that the regulatory permit violates federal law because it allows the Water Boards to impose municipal storm sewer control measures more stringent than a federal standard known as “maximum extent practicable.” (33 U.S.C. §

1342(p)(3)(B)(iii).² [**131] In the published portion of this opinion, we reject this contention, and conclude the Water Boards had the authority to include [***4] a permit provision requiring compliance with state water quality standards. In the unpublished portion of the opinion, we find Building Industry's additional contentions to be without merit. We affirm the judgment.

[*872] RELEVANT BACKGROUND INFORMATION

I. Summary of Relevant Clean Water Act Provisions

Before setting forth the factual background of this particular case, it is helpful to summarize the federal and state statutory schemes for regulating municipal storm sewer discharges.³

[***5] A. Federal Statutory Scheme

When the United States Congress first enacted the Federal Water Pollution Control Act in 1948, the Congress relied primarily on state and local enforcement efforts to remedy water pollution problems. (*Middlesex Cty. Sewerage Auth. v. Sea Clammers* (1981) 453 U.S. 1, 11 [69 L. Ed. 2d 435, 101 S. Ct. 2615]; *Tahoe-Sierra Preservation Council v. State Water Resources Control Bd.* (1989) 210 Cal. App. 3d 1421, 1433 [259 Cal. Rptr. 132].) However, by the early 1970's, it became apparent that this reliance on local enforcement was ineffective and had resulted in the "accelerating environmental degradation of rivers, lakes, and streams" (*Natural Resources Defense Council,*

Inc. v. Costle (D.C. Cir. 1977) 568 F.2d 1369, 1371 (*Costle*); see *EPA v. State Water Resources Control Board* (1976) 426 U.S. 200, 203 [48 L. Ed. 2d 578, 96 S. Ct. 2022].) In response, in 1972 Congress substantially amended this law by mandating compliance with various minimum technological effluent standards established by the federal government and creating a comprehensive regulatory scheme to implement these laws. (See *EPA v. State Water Resources Control Board, supra*, 426 U.S. at pp. 204–205.) [***6] The objective of this law, now commonly known as the Clean Water Act, was to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters." (§ 1251(a).)

HN1[↑] CA(2)[↑] (2) The Clean Water Act employs the basic strategy of prohibiting pollutant emissions from "point sources"⁴ unless the party discharging the pollutants obtains a permit, known as an NPDES⁵ permit. (See *EPA v. State Water Resources Control Board, supra*, 426 U.S. at p. 205.) It is "unlawful [*873] for any person to discharge a pollutant without obtaining a permit and complying with its terms." (*Ibid.*; see § 1311(a); *Costle, supra*, 568 [**132] F.2d at p. 1375.) An NPDES permit is issued by the United States Environmental Protection Agency (EPA) or by a state that has a federally approved water quality program. (§ 1342(a), (b); *EPA v. State Water Resources Control Board, supra*, 426 U.S. at p. 209.) Before an NPDES is issued, the federal or state regulatory agency must follow an extensive administrative hearing procedure. (See 40 C.F.R. §§ 124.3, 124.6, 124.8, 124.10; see generally Wardzinski et al., *National Pollutant Discharge Elimination System* [***7] *Permit Application and*

² Further statutory references are to title 33 of the United States Code, unless otherwise specified.

³ The systems that carry untreated urban water runoff to receiving water bodies are known as "[m]unicipal separate storm sewer" systems (40 C.F.R. § 122.26(b)(8)), and are often referred to as "MS4s" (40 C.F.R. § 122.30). For readability, we will identify these systems as municipal storm sewers. To avoid confusion in this case, we will generally use descriptive names, rather than initials or acronyms, when referring to parties and concepts.

⁴ **HN2[↑]** The Clean Water Act defines a "point source" to be "any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, or vessel or other floating craft, from which pollutants are or may be discharged." (§ 1362(14).)

⁵ NPDES stands for National Pollution Discharge Elimination System.

Issuance Procedures, in *The Clean Water Act Handbook* (Evans edit., 1994) pp. 72–74 (Clean Water Act Handbook).) NPDES permits are valid for five years. (§ 1342(b)(1)(B).)

HN3 **CA(3)** (3) Under the Clean Water Act, the proper scope of the controls in an NPDES permit depends on the applicable state water quality standards for the affected water bodies. (See *Communities for a Better Environment v. State Water Resources Control Bd.* (2003) 109 Cal.App.4th 1089, 1092 [1 Cal. Rptr. 3d 76].) Each state is required to develop water quality standards that establish “the desired [***8] condition of a waterway.” (*Ibid.*) A water quality standard for any given water segment has two components: (1) the designated beneficial uses of the water body; and (2) the water quality criteria sufficient to protect those uses. (*Ibid.*) As enacted in 1972, the Clean Water Act mandated that an NPDES permit require compliance with state water quality standards and that this goal be met by setting forth a specific “effluent limitation,” which is a restriction on the amount of pollutants that may be discharged at the point source. (§§ 1311, 1362(11).)

Shortly after the 1972 legislation, the EPA promulgated regulations exempting most municipal storm sewers from the NPDES permit requirements. (*Costle, supra*, 568 F.2d at p. 1372; see *Defenders of Wildlife v. Browner* (9th Cir. 1999) 191 F.3d 1159, 1163 (*Defenders of Wildlife*).) When environmental groups challenged this exemption in federal court, the Ninth Circuit held a storm sewer is a point source and the EPA did not have the authority to exempt categories of point sources from the Clean Water Act's NPDES permit requirements. (*Costle, supra*, 568 F.2d at pp. 1374–1383.) [***9] The *Costle* court rejected the EPA's argument that effluent-based storm sewer regulation was administratively infeasible because of the variable nature of storm water pollution and the number of affected storm sewers throughout the country. (*Id.* at pp. 1377–1382.) Although the court acknowledged the practical problems relating to storm sewer regulation, the court found the EPA

had the flexibility under the Clean Water Act to design regulations that would overcome these problems. (*Id.* at pp. 1379–1383.)

[*874] During the next 15 years, the EPA made numerous attempts to reconcile the statutory requirement of point source regulation with the practical problem of regulating possibly millions of diverse point source discharges of storm water. (*Defenders of Wildlife, supra*, 191 F.3d at p. 1163; see Gallagher, *Clean Water Act in Environmental Law Handbook* (Sullivan edit., 2003) p. 300 (Environmental Law Handbook); Eisen, *Toward a Sustainable Urbanism: Lessons from Federal Regulation of Urban Stormwater Runoff* (1995) 48 *Wash. U. J. Urb. & Contemp. L.* 1, 40–41 (*Regulation of Urban Stormwater Runoff*).)

CA(4) (4) Eventually, **HN4** in 1987, Congress amended the [***10] Clean Water Act to add provisions that specifically concerned NPDES permit requirements for storm sewer discharges. (§ 1342(p); see *Defenders of Wildlife, supra*, [***133] 191 F.3d at p. 1163; *Natural Resources Defense Council v. U.S. E.P.A.* (1992) 966 F.2d 1292, 1296.) In these amendments, enacted as part of the *Water Quality Act of 1987*, Congress distinguished between industrial and municipal storm water discharges. With respect to *industrial* storm water discharges, Congress provided that NPDES permits “shall meet all applicable provisions of this section and section 1311 [requiring the EPA to establish effluent limitations under specific timetables]” (§ 1342(p)(3)(A).) With respect to *municipal* storm water discharges, Congress clarified that the EPA had the authority to fashion NPDES permit requirements to meet water quality standards without specific numerical effluent limits and instead to impose “controls to reduce the discharge of pollutants to the maximum extent practicable” (§ 1342(p)(3)(B)(iii); see *Defenders of Wildlife, supra*, 191 F.3d at p. 1163.) Because the statutory language pertaining to municipal [***11] storm sewers is at the center of this appeal, we quote the relevant portion of the statute in full:

“**HN5**[↑] (B) ... Permits for discharges from municipal storm sewers—

“(i) may be issued on a system- or jurisdiction-wide basis;

“(ii) shall include a requirement to effectively prohibit non-stormwater discharges into the storm sewers; and

“(iii) shall require controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques and system, design and engineering methods, and such other provisions as the Administrator or the State determines appropriate for the control of such pollutants.” (§ 1342(p)(3)(B).) To ensure this scheme would be administratively workable, Congress placed a moratorium on many new types of required stormwater permits until 1994 (§ 1342(p)(1)), and created a phased approach to necessary municipal [*875] stormwater permitting depending on the size of the municipality (§ 1342(p)(2)(D)). (See *Environmental Defense Center, Inc. v. U.S. E.P.A.* (9th Cir. 2003) 344 F.3d 832, 841–842.)

B. State Statutory Scheme

Three years before the 1972 Clean Water Act, the California Legislature enacted [***12] its own water quality protection legislation, the Porter-Cologne Water Quality Control Act (Porter-Cologne Act), seeking to “attain the highest water quality which is reasonable” (Wat. Code, § 13000.) The Porter-Cologne Act created the State Water Board to formulate statewide water quality policy and established nine regional boards to prepare water quality plans (known as basin plans) and issue permits governing the discharge of waste. (Wat. Code, §§ 13100, 13140, 13200, 13201, 13240, 13241, 13243.) The Porter-Cologne Act identified these permits as “waste discharge requirements,” and provided that the waste discharge requirements must mandate compliance with the applicable regional water quality control

plan. (Wat. Code, §§ 13263, subd. (a), 13377, 13374.)

Shortly after Congress enacted the Clean Water Act in 1972, the California Legislature added chapter 5.5 to the Porter-Cologne Act, for the purpose of adopting the necessary federal requirements to ensure it would obtain EPA approval to issue NPDES permits. (Wat. Code, § 13370, subd. (c).) As part of these amendments, the Legislature provided that the state and regional water boards “**HN6**[↑] shall, as required or authorized [***13] by the [Clean Water Act], issue waste discharge requirements ... which apply and ensure compliance with all applicable provisions [**134] [of the Clean Water Act], together with any more stringent effluent standards or limitations necessary to implement water quality control plans, or for the protection of beneficial uses, or to prevent nuisance.” (Wat. Code, § 13377.) Water Code section 13374 provides that “**HN7**[↑] [t]he term ‘waste discharge requirements’ as referred to in this division is the equivalent of the term ‘permits’ as used in the [Clean Water Act].”

CA(5)[↑] (5) California subsequently obtained the required approval to issue NPDES permits. (*WaterKeepers Northern California v. State Water Resources Control Bd.* (2002) 102 Cal.App.4th 1448, 1453 [126 Cal. Rptr. 2d 389].) Thus, **HN8**[↑]] the waste discharge requirements issued by the regional water boards ordinarily also serve as NPDES permits under federal law. (Wat. Code, § 13374.)

II. The NPDES Permit at Issue in this Case

Under its delegated authority and after numerous public hearings, in February 2001 the Regional Water Board issued a 52-page NPDES permit [*876] and Waste Discharge Requirements (the Permit) governing municipal storm sewers owned [***14] by San Diego County, the San Diego Unified Port District, and 18 San Diego-area

cities (collectively, Municipalities).⁶ The first 10 pages of the Permit contain the Regional Water Board's detailed factual findings. These findings describe the manner in which San Diego-area water runoff absorbs numerous harmful pollutants and then is conveyed by municipal storm sewers into local waters without any treatment. The findings state that these storm sewer discharges are a leading cause of water quality impairment in the San Diego region, endangering aquatic life and human health. The findings further state that to achieve applicable state water quality objectives, it is necessary not only to require municipalities to comply with existing pollution-control technologies, but also to require compliance with applicable "receiving water limits" (state water quality standards) and to employ an "iterative process" of "development, implementation, monitoring, and assessment" to improve existing technologies.

[**15] Based on these factual findings, the Regional Water Board included in the Permit several overall prohibitions applicable to municipal storm sewer discharges. Of critical importance to this appeal, these prohibitions concern two categories of restrictions. First, the Municipalities are prohibited from discharging those pollutants "which have not been reduced to the *maximum extent practicable ...*"⁷ (Italics added). Second,

⁶ Under the Clean Water Act, entities responsible for NPDES permit conditions pertaining to their own discharges are referred to as "copermitees." (40 C.F.R. § 122.26(b)(1).) For clarity and readability, we shall refer to these entities as Municipalities.

⁷ The Permit does not precisely define this phrase, and instead, in its definition section, contains a lengthy discussion of the variable nature of the maximum extent practicable concept, referred to as MEP. A portion of this discussion is as follows: "[T]he definition of MEP is dynamic and will be defined by the following process over time: municipalities propose their definition of MEP by way of their [local storm sewer plan]. Their total collective and individual activities conducted pursuant to the [plan] becomes their proposal for MEP as it applies both to their overall effort, as well as to specific activities (e.g., MEP for street sweeping, or MEP for municipal separate storm sewer maintenance). In the absence of a proposal acceptable to the [Regional Water Board], the [Regional Water Board] defines MEP." The definition also identifies several factors that are "useful" in determining whether an entity has achieved the maximum extent practicable standard, including "Effectiveness,"

the Municipalities [**135] are prohibited from discharging pollutants "which cause or contribute to exceedances of receiving water quality objectives ..." and/or that "cause or contribute to the violation of water quality standards ..." This second category of restrictions (referred to in this opinion as the Water Quality Standards provisions) essentially provide that a municipality may not discharge pollutants if those pollutants would cause the receiving water body to exceed the applicable water quality standard. It is these latter restrictions that are challenged by Building Industry in this appeal.

[**16] [**877] Part C of the Permit (as amended) qualifies the Water Quality Standards provisions by detailing a procedure for enforcing violations of those standards through a step-by-step process of "timely implementation of control measures ..." known as an "iterative" process. Under this procedure, when a municipality "caus[es] or contribute[s] to an exceedance of an applicable water quality standard," the municipality must prepare a report documenting the violation and describing a process for improvement and prevention of further violations. The municipality and the regional water board must then work together at improving methods and monitoring progress to achieve compliance. But the final provision of Part C states that "Nothing in this section shall prevent the [Regional Water Board] from enforcing any provision of this Order while the [municipality] prepares and implements the above report."

In addition to these broad prohibitions and enforcement provisions, the Permit requires the Municipalities to implement, or to require businesses and residents to implement, various pollution control measures referred to as "best management practices," which reflect techniques for preventing, [**17] slowing, retaining or absorbing pollutants produced by stormwater runoff. These best management practices include

"Regulatory Compliance," "Public Acceptance," "Cost," and "Technical Feasibility."

structural controls that minimize contact between pollutants and flows, and nonstructural controls such as educational and public outreach programs. The Permit also requires the Municipalities to regulate discharges associated with new development and redevelopment and to ensure a completed project will not result in significantly increased discharges of pollution from storm water runoff.

III. *Administrative and Trial Court Challenges*

After the Regional Water Board issued the Permit, the Building Industry, an organization representing the interests of numerous construction-related businesses, filed an administrative challenge with the State Water Board. Although none of the Municipalities joined in the administrative appeal, Building Industry claimed its own independent standing based on its assertion that the Permit would impose indirect obligations on the regional building community. (See Wat. Code, § 13320 [permitting any “aggrieved person” to challenge regional water board action].) Among its numerous contentions, Building Industry argued that the Water [***18] Quality Standards provisions in the Permit require strict compliance with state water quality standards beyond what is “practicable” and therefore violate federal law.

In November 2001, the State Water Board issued a written decision rejecting Building Industry's appeal after making certain modifications to the Permit. (Cal. Wat. Resources Control Bd. Order WQ2001-15 (Nov. 15, 2001).) Of particular relevance here, the State Water [*878] Board modified the Permit to make clear that the iterative enforcement process applied to the Water Quality Standards provisions in the Permit. But the State Water Board did not delete the Permit's [**136] provision stating that the Regional Water Board retains the authority to enforce the Water Quality Standards provisions even if a Municipality is engaged in this iterative process.

Building Industry then brought a superior court action against the Water Boards, challenging the

Regional Board's issuance of the Permit and the State Water Board's denial of Building Industry's administrative challenge.⁸ Building Industry asserted numerous legal claims, including that the Water Boards: (1) violated the Clean Water Act by imposing a standard greater [***19] than the “maximum extent practicable” standard; (2) violated state law by failing to consider various statutory factors before issuing the Permit; (3) violated the California Environmental Quality Act (CEQA) by failing to prepare an environmental impact report (EIR); and (4) made findings that were factually unsupported.

Three environmental organizations, San Diego BayKeeper, Natural Resources Defense Council, and California CoastKeeper (collectively, Environmental Organizations), [***20] requested permission to file a complaint in intervention, seeking to uphold the Permit and asserting a direct and substantial independent interest in the subject of the action. Over Building Industry's objections, the trial court permitted these organizations to file the complaint and enter the action as parties-interveners.

After reviewing the lengthy administrative record and the parties' briefs, and conducting an oral hearing, the superior court ruled in favor of the Water Boards and Environmental Organizations (collectively, respondents). Applying the independent judgment test, the court found Building Industry failed to meet its burden to

⁸ Several other parties were also named as petitioners: Building Industry Legal Defense Foundation, California Business Properties Association, Construction Industry Coalition for Water Quality, San Diego County Fire Districts Association, and the City of San Marcos. However, because these entities were not parties in the administrative challenge, the superior court properly found they were precluded by the administrative exhaustion doctrine from challenging the administrative agencies' compliance with the federal and state water quality laws. Although these entities were named as appellants in the notice of appeal, they are barred by the exhaustion doctrine from asserting appellate contentions concerning compliance with federal and state water quality laws. However, as to any other claims (such as CEQA), these entities are proper appellants. For ease of reference and where appropriate, we refer to the appellants collectively as Building Industry.

establish the State Water Board abused its discretion in approving the Permit or that the administrative findings are contrary to the weight of the evidence. In particular, the court found Building Industry failed to establish the Permit requirements were “impracticable under federal law or unreasonable under state law,” and noted that there was evidence showing the Regional Water Board considered many practical aspects of the regulatory [*879] controls before issuing the Permit. Rejecting Building Industry's legal arguments, the court also stated that [***21] under federal law the Water Boards had the discretion “to require strict compliance with water quality standards” or “to require less than strict compliance with water quality standards.” The court also sustained several of respondents' evidentiary objections, including to documents relating to the legislative history of the Clean Water Act.

Building Industry appeals, challenging the superior court's determination that the Permit did not violate the federal Clean Water Act. In its appeal, Building Industry does not reassert its claim that the Permit violates state law, except for its contentions pertaining to CEQA.

DISCUSSION

I. *Standard of Review*

HN9[↑] **CA(6)**[↑] (6) A party aggrieved by a final decision of the State Water Board may obtain review of the decision by filing a timely [**137] petition for writ of mandate in the superior court. (Wat. Code, § 13330, subd. (a).) **HN10**[↑] Code of Civil Procedure section 1094.5 governs the proceedings, and the superior court must exercise its independent judgment in examining the evidence and resolving factual disputes. (Wat. Code, § 13330, subd. [***22] (d).) “In exercising its independent judgment, a trial court must afford a strong presumption of correctness concerning the administrative findings, and the party challenging the administrative decision bears the burden of convincing the court that the administrative findings are contrary to the weight of the

evidence.” (*Fukuda v. City of Angels* (1999) 20 Cal.4th 805, 817 [85 Cal. Rptr. 2d 696, 977 P.2d 693].)

HN11[↑] **CA(7)**[↑] (7) In reviewing the trial court's factual determinations on the administrative record, a Court of Appeal applies a substantial evidence standard. (*Fukuda v. City of Angels, supra*, 20 Cal.4th at p. 824.) However, in reviewing the trial court's legal determinations, an appellate court conducts a de novo review. (See *Alliance for a Better Downtown Millbrae v. Wade* (2003) 108 Cal.App.4th 123, 129 [133 Cal. Rptr. 2d 249].) Thus, we are not bound by the legal determinations made by the state or regional agencies or by the trial court. (See *Yamaha Corp. of America v. State Bd. of Equalization* (1998) 19 Cal.4th 1, 7–8 [78 Cal. Rptr. 2d 1, 960 P.2d 1031].) But we must give appropriate consideration to an administrative agency's expertise underlying its interpretation of an applicable statute. ⁹ (*Ibid.*)

[***23]

[*880] II. *Water Boards' Authority to Enforce Water Quality Standards in NPDES Permit*

Building Industry's main appellate contention is very narrow. Building Industry argues that two provisions in the Permit (the Water Quality Standards provisions) violate federal law because they prohibit the Municipalities from discharging runoff from storm sewers if the discharge would cause a water body to exceed the applicable water

⁹ We note that in determining the meaning of the Clean Water Act and its amendments, federal courts generally defer to the EPA's statutory construction if the disputed portion of the statute is ambiguous. (See *Chevron U.S.A. v. Natural Res. Def. Council, Inc.* (1984) 467 U.S. 837, 842–844 [81 L. Ed. 2d 694, 104 S. Ct. 2778] (*Chevron*).) However, the parties do not argue this same principle applies to a *state agency's* interpretation of the Clean Water Act. Nonetheless, under governing state law principles, we do consider and give due deference to the Water Boards' statutory interpretations in this case. (See *Yamaha Corp. of America v. State Bd. of Equalization, supra*, 19 Cal.4th at pp. 7–8.)

quality standard established under state law.¹⁰ Building Industry contends that under federal law the “maximum extent practicable” standard is the “exclusive” measure that may be applied to municipal storm sewer discharges and a regulatory agency may not require a Municipality to comply with a state water quality standard if the required controls exceed a “maximum extent practicable” standard.

[***24] In the following discussion, we first reject respondents' contentions that Building Industry waived these arguments by failing to raise a substantial evidence challenge to the court's factual findings and/or [**138] to reassert its state law challenges on appeal. We then focus on the portion of the Clean Water Act (§ 1342(p)(3)(B)(iii)) that Building Industry contends is violated by the challenged Permit provisions. On our de novo review of this legal issue, we conclude the Permit's Water Quality Standards provisions are proper under federal law, and Building Industry's legal challenges are unsupported by the applicable statutory language, legislative purpose, and legislative history.

A. Building Industry Did Not Waive the Legal Argument

Respondents (the Water Boards and Environmental Organizations) initially argue that Building Industry waived its right to challenge the Permit's consistency with the maximum extent practicable standard because Building Industry did not challenge the trial court's *factual* findings that Building Industry failed to prove any of the Permit requirements were “impracticable” or “unreasonable.”

In taking this position, respondents misconstrue the [***25] nature of Building Industry's appellate

contention challenging the Water Quality Standards provisions. Building Industry's contention concerns the scope of the authority given to the Regional Water Board under the Permit terms. Specifically, [*881] Building Industry argues that the Regional Water Board does not have the authority to require the Municipalities to adhere to the applicable water quality standards because federal law provides that the “maximum extent practicable” standard is the exclusive standard that may be applied to storm sewer regulation. This argument—concerning the proper scope of a regulatory agency's authority—presents a purely legal issue, and is not dependent on the court's factual findings regarding the practicality of the specific regulatory controls identified in the Permit.

Respondents alternatively contend that Building Industry waived its right to challenge the propriety of the Water Quality Standards provisions under federal law because the trial court found the provisions were valid under state law and Building Industry failed to reassert its state law challenges on appeal. Under the particular circumstances of this case, we conclude Building Industry did [***26] not waive its rights to challenge the Permit under federal law.

CA(8)[↑] (8) Although **HN12[↑]** it is well settled that the Clean Water Act authorizes states to impose water quality controls that are more stringent than are required under federal law (§ 1370; see *PUD No. 1 of Jefferson Cty. v. Washington Dept. of Ecology* (1994) 511 U.S. 700, 705 [128 L. Ed. 2d 716, 114 S. Ct. 1900]; *Northwest Environmental Advocates v. Portland* (9th Cir. 1995) 56 F.3d 979, 989), and California law specifically allows the imposition of controls more stringent than federal law (Wat. Code, § 13377), the Water Boards made a tactical decision in the superior court to assert the Permit's validity based solely on federal law, and repeatedly made clear they were not seeking to justify the Permit requirements based on the Boards' independent authority to act under state law. On appeal, the Water Boards continue to rely primarily on federal

¹⁰ These challenged Permit provisions state “Discharges from [storm sewers] which cause or contribute to exceedances of receiving water quality objectives for surface water or groundwater are prohibited” (Permit, § A.2), and “Discharges from [storm sewers] that cause or contribute to the violation of water quality standards ... are prohibited” (Permit, § C.1).

law to uphold the Permit requirements, and their assertions that we may decide the matter based solely on state law are in the nature of asides rather than direct arguments. On this record, it would be improper to rely solely on state law to uphold the challenged Permit provisions. [***27]

B. The Water Quality Standards Requirement Does Not Violate Federal Law

We now turn to Building Industry's main substantive contention on appeal—[**139] that the Permit's Water Quality Standards provisions (fn. 10, *ante*) violate federal law. Building Industry's contention rests on its interpretation of the 1987 Water Quality Act amendments containing NPDES requirements for municipal storm sewers. The portion of the relevant statute reads: “(B) ... Permits for discharges from municipal storm sewers ... [¶] ... [¶] (iii) shall require controls to reduce the discharge of pollutants to the *maximum extent practicable, including* management practices, control techniques and [*882] system, design and engineering methods, and such other provisions as the [EPA] Administrator or the State determines appropriate for the control of such pollutants.” (§ 1342(p)(3)(B)(iii), italics added.)

1. Statutory Language

Focusing on the first 14 words of subdivision (iii), Building Industry contends the statute means that the maximum extent practicable standard sets the upper limit on the type of control that can be used in an NPDES permit, and that each of the phrases following the [***28] word “*including*” identify examples of “maximum extent practicable” controls. (§ 1342(p)(3)(B)(iii), italics added.) Building Industry thus reads the final “and such other provisions” clause as providing the EPA with the authority only to include *other* types of “maximum extent practicable” controls in an NPDES storm sewer permit.

Respondents counter that the term “including”

refers only to the three identified types of pollution control procedures—(1) “management practices”; (2) “control techniques”; and (3) “system, design and engineering methods”—and that the last phrase, “*and such other provisions as the Administrator or the State determines appropriate for the control of such pollutants,*” provides the EPA (or the approved state regulatory agency) the specific authority to go beyond the maximum extent practicable standard to impose effluent limitations or water-quality based standards in an NPDES permit. In support, respondents argue that because the word “system” in section 1342(p)(3)(B)(iii) is singular, it necessarily follows from parallel-construction grammar principles that the word “system” is part of the phrase “system, design and engineering methods” rather [***29] than the phrase “control techniques and system.” Under this view and given the absence of a comma after the word “techniques,” respondents argue that the “and such other provisions” clause cannot be fairly read as restricted by the “maximum extent practicable” phrase, and instead the “and such other provisions” clause is a separate and distinct clause that acts as a second direct object to the verb “require” in the sentence. (§ 1342(p)(3)(B)(iii).)

Building Industry responds that respondents' proposed statutory interpretation is “not logical” because if the “and such other provisions” phrase is the direct object of the verb “require,” the sentence would not make sense. Building Industry states that “permits” do not generally “require” provisions; they “include” or “contain” them.

CA(9)[¶] (9) As a matter of grammar and word choice, respondents have the stronger position. The second part of Building Industry's proposed interpretation—“control techniques and system, design and engineering methods”—without a comma after the word “techniques” does not logically serve as a [*883] parallel construct with the “and such other provisions” clause. Moreover, we disagree that the “and such other provisions” [***30] clause cannot be a direct object to the word “require.” (§ 1342(p)(3)(B)(iii).)

Although it is not the clearest way of articulating the concept, **HN13** [↑] the language of section 1342(p)(3)(B)(iii) does communicate the **[**140]** basic principle that the EPA (and/or a state approved to issue the NPDES permit) retains the discretion to impose “appropriate” water pollution controls in addition to those that come within the definition of “ ‘maximum extent practicable.’ ” (*Defenders of Wildlife, supra*, 191 F.3d at pp. 1165–1167.) We find unpersuasive Building Industry’s reliance on several statutory interpretation concepts, *ejusdem generis*, *noscitur a sociis*, and *expressio unius est exclusion alterius*, to support its narrower statutory construction.

2. Purpose and History of Section 1342(p)(3)(B)(iii)

CA(10) [↑] **(10)** Further, “**HN14** [↑] [w]hile punctuation and grammar should be considered in interpreting a statute, neither is controlling unless the result is in harmony with the clearly expressed intent of the Legislature.” (*In re John S.* (2001) 88 Cal.App.4th 1140, 1144, fn. 1 [106 Cal. Rptr. 2d 476]; see *Estate of Coffee* (1941) 19 Cal.2d 248, 251 [120 P.2d 661].) If the statutory language is susceptible **[**31]** to more than one reasonable interpretation, a court must also “look to a variety of extrinsic aids, including the ostensible objects to be achieved, the evils to be remedied, the legislative history, public policy, contemporaneous administrative construction, and the statutory scheme of which the statute is a part.” (*Nolan v. City of Anaheim* (2004) 33 Cal.4th 335, 340 [14 Cal. Rptr. 3d 857, 92 P.3d 350].)

HN15 [↑] **CA(11)** [↑] **(11)** The legislative purpose underlying the Water Quality Act of 1987, and section 1342(p) in particular, supports that Congress intended to provide the EPA (or the regulatory agency of an approved state) the discretion to require compliance with water quality standards in a municipal storm sewer NPDES permit, particularly where, as here, that compliance will be achieved primarily through an iterative process.

Before section 1342(p) was enacted, the courts had long recognized that the EPA had the authority to require a party to comply with a state water quality standard even if that standard had not been translated into an effluent limitation. (See *EPA v. State Water Resources Control Board, supra*, 426 U.S. at p. 205, fn. 12; *PUD No. 1 of Jefferson Cty. v. Washington Dept. of Ecology, supra*, 511 U.S. at p. 715; **[**32]** *Northwest Environmental Advocates v. Portland* (9th Cir. 1995) 56 F.3d 979, 987; *Natural Resources Defense Council v. U.S.E.P.A.* (9th Cir. 1990) 915 F.2d 1314, 1316.) Specifically, section 1311(b)(1)(C) gave the regulatory agency the authority to impose “any more stringent limitation, including those necessary to meet water quality standards,” and section 1342(a)(2) provided that “[t]he [EPA] Administrator shall **[*884]** prescribe conditions for [NPDES] permits to assure compliance” with requirements identified in section 1342(a)(1), which encompass state water quality standards. The United States Supreme Court explained that when Congress enacted the 1972 Clean Water Act, it retained “[w]ater quality standards ... as a supplementary basis for effluent limitations, ... so that numerous point sources despite individual compliance with effluent limitations, may be further regulated to prevent water quality from falling below acceptable levels. ... ” (*EPA v. State Water Resources Control Board, supra*, 426 U.S. at p. 205, fn. 12; see also *Arkansas v. Oklahoma* (1992) 503 U.S. 91, 101 [117 L. Ed. 2d 239, 112 S. Ct. 1046].)

There **[**33]** is nothing in section 1342(p)(3)(B)(iii)’s statutory language or legislative history showing that Congress intended to eliminate this discretion when it amended the Clean Water Act in 1987. **[**141]** To the contrary, Congress added the NPDES storm sewer requirements to strengthen the Clean Water Act by making its mandate correspond to the practical realities of municipal storm sewer regulation. As numerous commentators have pointed out, although Congress was reacting to the physical differences between municipal storm water runoff and other pollutant

discharges that made the 1972 legislation's blanket effluent limitations approach impractical and administratively burdensome, the primary point of the legislation was to address these administrative problems while giving the administrative bodies the tools to meet the fundamental goals of the Clean Water Act in the context of stormwater pollution. (See *Regulation of Urban Stormwater Runoff*, *supra*, 48 Wash. U. J. Urb. & Contemp. L. at pp. 44–46; Environmental Law Handbook, *supra*, at p. 300; Clean Water Act Handbook, *supra*, at pp. 62–63.) In the 1987 congressional debates, the Senators and Representatives emphasized the need to prevent the widespread and escalating problems [***34] resulting from untreated storm water toxic discharges that were threatening aquatic life and creating conditions dangerous to human health. (See Remarks of Sen. Durenberger, 133 Cong. Rec. 1279 (Jan. 14, 1987); Remarks of Sen. Chaffee, 133 Cong. Rec. S738 (daily ed. Jan 14, 1987); Remarks of Rep. Hammerschmidt, 133 Cong. Rec. 986 (Jan. 8, 1987); Remarks of Rep. Roe, 133 Cong. Rec. 1006, 1007 (Jan. 8, 1987); Remarks of Sen. Stafford, 132 Cong. Rec. 32381, 32400 (Oct. 16, 1986).) This legislative history supports that in identifying a maximum extent practicable standard Congress did not intend to substantively bar the EPA/state agency from imposing a more stringent water quality standard if the agency, based on its expertise and technical factual information and after the required administrative hearing procedure, found this standard to be a necessary and workable enforcement mechanism to achieving the goals of the Clean Water Act.

To support a contrary view, Building Industry relies on comments by Minnesota Senator David Durenberger during the lengthy congressional [*885] debates on the 1987 Water Quality Act amendments. ¹¹ [***36] (132 Cong.

¹¹ We agree with Building Industry that the trial court's refusal to consider this legislative history on the basis that it was not presented to the administrative agencies was improper. However, this error was not prejudicial because we apply a de novo review standard in interpreting the relevant statutes.

Rec. 32400 (Oct. 16, 1986); 133 Cong. Rec. S752 (daily [***35] ed. Jan. 14, 1987.) In the cited portions of the Congressional Record, Senator Durenberger states that NPDES permits “shall require controls to reduce the discharge of pollutants to the maximum extent practicable. Such controls include management practices, control techniques and systems, design and engineering methods, and such other provisions, as the Administrator determines appropriate for the control of pollutants in the stormwater discharge.” (*Ibid.*) When viewing these statements in context, it is apparent that the Senator was merely paraphrasing the words of the proposed statute and was not intending to address the issue of whether the maximum extent practicable standard was a regulatory ceiling or whether he believed the proposed amendments limited the EPA's existing discretion. ¹²

[**142] Building Industry's reliance on comments made by Georgia Representative James Rowland, who participated in drafting the 1987 Water Quality Act amendments, is similarly unhelpful. During a floor debate on the proposed amendments, Representative Rowland noted that cities have “millions of” stormwater discharge points and emphasized the devastating financial burden on cities if they were required to obtain a permit for each of these points. (133 Cong. Rec. 522 (daily ed. Feb. 3, 1987).) Representative Rowland then explained [***37] that the amendments would address this problem by “allow[ing] communities to obtain far less costly single jurisdictionwide permits.” (*Ibid.*) Viewed in context, these comments were directed at the need for statutory provisions permitting the EPA to issue jurisdiction-

¹² In the cited remarks, Senator Durenberger in fact expressed his dissatisfaction with the EPA's prior attempts to regulate municipal storm sewers. He pointed out, for example, that “[r]unoff from municipal separate storm sewers and industrial sites contain significant values of both toxic and conventional pollutants,” and that despite the Clean Water Act's “clear directive,” the EPA “has failed to require most stormwater point sources to apply for permits which would control the pollutants in their discharge.” (133 Cong. Rec. 1274, 1279–1280 (daily ed. Jan. 14, 1987).)

wide permits thereby preventing unnecessary administrative costs to the cities, and do not reflect a desire to protect cities from the cost of complying with strict water quality standards when deemed necessary by the regulatory agency.

3. Interpretations by the EPA and Other Courts

CA(12)[↑] (12) Our conclusion that Congress intended section 1342(p)(3)(B)(iii) to provide the regulatory agency with authority to impose standards stricter than a “maximum extent practicable” standard is consistent with interpretations by [*886] the EPA and the Ninth Circuit. In its final rule promulgated in the Federal Register, the EPA construed section 1342(p)(3)(B)(iii) as providing the administrative agency with the authority to impose water-quality standard controls in an NPDES permit if appropriate under the circumstances. Specifically, the EPA stated this statutory provision requires “controls to reduce the discharge of pollutants to the [***38] maximum extent practicable, and where necessary water quality-based controls” (55 Fed.Reg. 47990, 47994 (Nov. 16, 1990), italics added.) **HN16[↑]** We are required to give substantial deference to this administrative interpretation, which occurred after an extensive notice and comment period. (See *ibid.*; Chevron, supra, 467 U.S. at pp. 842–844.)

The only other court that has interpreted the “such other provisions” language of section 1342(p)(3)(B)(iii) has reached a similar conclusion. (Defenders of Wildlife, supra, 191 F.3d at pp. 1166–1167.) In Defenders of Wildlife, environmental organizations brought an action against the EPA, challenging provisions in an NPDES permit requiring several Arizona localities to adhere to various best management practice controls without requiring numeric effluent limitations. (*Id.* at p. 1161.) The environmental organizations argued that section 1342(p) did not allow the EPA to issue NPDES permits without requiring strict compliance with effluent limitations. (Defenders of Wildlife, supra, at p.

1161.) Rejecting this argument, the Ninth Circuit found section 1342(p)(3)(B)(iii)'s statutory language “unambiguously [***39] demonstrates that Congress did not require [***143] municipal storm-sewer discharges to comply strictly” with effluent limitations. (Defenders of Wildlife, supra, at p. 1164.)

But in a separate part of the opinion, the Defenders of Wildlife court additionally rejected the reverse argument made by the affected municipalities (who were the interveners in the action) that “the EPA may not, under the [Clean Water Act], require strict compliance with state water-quality standards, through numerical limits or otherwise.” (Defenders of Wildlife, supra, 191 F.3d at p. 1166.) The court stated: “Although Congress did not require municipal storm-sewer discharges to comply strictly with [numerical effluent limitations], § 1342(p)(3)(B)(iii) states that ‘[p]ermits for discharges from municipal storm sewers ... shall require ... such other provisions as the Administrator ... determines appropriate for the control of such pollutants.’ (Emphasis added.) That provision gives the EPA discretion to determine what pollution controls are appropriate. ... [¶] Under that discretionary provision, the EPA has the authority to determine that ensuring [***40] strict compliance with state water-quality standards is necessary to control pollutants. The EPA also has the authority to require less than strict compliance with state water-quality standards Under 33 U.S.C. § 1342(p)(3)(B)(iii), the EPA's choice to include either management practices or numeric limitations in the permits was within its discretion. [Citations.]” (Defenders of Wildlife, supra, 191 F.3d at pp. 1166–1167, second italics added.) Although dicta, this [*887] conclusion reached by a federal court interpreting federal law is persuasive and is consistent with our independent analysis of the statutory language.¹³

¹³ Building Industry's reliance on two other Ninth Circuit decisions to support a contrary statutory interpretation is misplaced. (See Natural Res. Def. Council, Inc. v. U.S.E.P.A., supra, 966 F.2d at p. 1308; Environmental Defense Center, Inc. v. U.S. E.P.A. (9th Cir.

[***41] To support its interpretation of section 1342(p)(3)(B)(iii), Building Industry additionally relies on the statutory provisions addressing nonpoint source runoff (a diffuse runoff not channeled through a particular source), which were also part of the 1987 amendments to the Clean Water Act. (§ 1329.) In particular, Building Industry cites to section 1329(a)(1)(C), which states, “The Governor of each State shall ... prepare and submit to the [EPA] Administrator for approval, a report which ... [¶] ... [¶] describes the process ... for identifying best management practices and measures to control each [identified] category ... of nonpoint sources and ... to reduce, to the *maximum extent practicable*, the level of pollution resulting from such category” (Italics added.) Building Industry argues that because this “nonpoint source” statutory language expressly identifies only the maximum extent practicable standard, we must necessarily conclude that Congress meant to similarly limit the storm sewer point source pollution regulations to the maximum extent practicable standard.

The logic underlying this analogy is flawed because the critical language in the [***42] two statutory provisions is different. In the nonpoint source statute, Congress chose to include only the maximum extent practicable standard (§ 1329(a)(1)(C)); whereas in the municipal storm sewer provisions, Congress elected to include the “and such other provisions” clause (§ 1342(p)(3)(B)(iii)). This difference leads to the reasonable inference that Congress had a different intent when it enacted the two statutory provisions. Moreover, because of a fundamental difference between point and nonpoint source pollution, Congress has historically treated the two types of pollution differently and has subjected each type to entirely different requirements. (See Pronsolino v. Nastri (9th Cir. 2002) 291 F.3d 1123, 1126–1127.) Given this different treatment, it would be improper

2003) 344 F.3d 832.) Neither of these decisions addressed the issue of the scope of a regulatory agency's authority to exceed the maximum extent practicable standard in issuing NPDES permits for municipal storm sewers.

to presume Congress intended to apply the same standard in both statutes. Building Industry's citation to comments during the 1987 congressional debates regarding nonpoint source regulation does [**144] not support Building Industry's contentions.

[*888] 4. *Contention that it is “Impossible” for Municipalities to Meet Water Quality Standards*

We also reject Building Industry's arguments woven throughout [***43] its appellate briefs, and emphasized during oral arguments, that the Water Quality Standards provisions violate federal law because compliance with those standards is “impossible.” The argument is not factually or legally supported.

CA(13)[↑] (13) First, there is no showing on the record before us that the applicable water quality standards are unattainable. The trial court specifically concluded that Building Industry failed to make a factual showing to support this contention, and Building Industry does not present a proper appellate challenge to this finding sufficient to warrant our reexamining the evidence. HN17[↑] All judgments and orders are presumed correct, and persons challenging them must affirmatively show reversible error. CA(14)[↑] (14) (Walling v. Kimball (1941) 17 Cal.2d 364, 373 [110 P.2d 58].) HN18[↑] A party challenging the sufficiency of evidence to support a judgment must summarize (and cite to) *all* of the material evidence, not just the evidence favorable to his or her appellate positions. (In re Marriage of Fink (1979) 25 Cal.3d 877, 887–888 [160 Cal. Rptr. 516, 603 P.2d 881]; People v. Dougherty (1982) 138 Cal. App. 3d 278, 282 [188 Cal. Rptr. 123].) Building Industry has made [***44] no attempt to comply with this well-established appellate rule in its briefs.

In a supplemental brief, Building Industry attempted to overcome this deficiency by asserting that “[t]he record clearly establishes that [the Water Quality Standards provisions] are unattainable

during the period the permit is in effect.” This statement, however, is not supported by the proffered citation or by the evidence viewed in the light most favorable to the respondents. Further, the fact that many of the Municipalities' storm sewer discharges currently violate water quality standards does not mean that the Municipalities cannot comply with the standards during the five-year term of the Permit. Additionally, Building Industry's assertions at oral argument that the trial court never reached the impossibility issue and/or that respondents' counsel conceded the issue below are belied by the record, including the trial court's rejection of Building Industry's specific challenge to the proposed statement of decision on this very point.¹⁴

[***45] CA(15)[↑] (15) We reject Building Industry's related argument that it was respondents' burden to affirmatively show it is feasible to satisfy each of the applicable Water Quality Standards provisions. HN19[↑] The party challenging the scope of an administrative permit, such as an NPDES, has the burden of [*889] showing the agency abused its discretion or its findings were unsupported by the facts. (See *Fukuda v. City of Angels*, *supra*, 20 Cal.4th at p. 817; *Huntington Park Redevelopment Agency v. Duncan* (1983) 142 Cal. App. 3d 17, 25 [190 Cal. Rptr. 744].) Thus, it was not respondents' burden to affirmatively demonstrate it was possible for the Municipalities to meet the Permit's requirements.

Building Industry alternatively contends it was not required to challenge the facts underlying the trial court's determination that the Permit requirements were feasible [**145] because the court's determination was wrong as a matter of law. Specifically, Building Industry asserts that a Permit requirement that is more stringent than a “maximum extent practicable” standard is, by definition, “not practicable” and therefore

“technologically impossible” to achieve under any circumstances. Building [***46] Industry relies on a dictionary definition of “practicable,” which provides that the word means “ ‘something that can be done; feasible,’ ” citing the 1996 version of “Webster's Encyclopedic Unabridged Dictionary.”

CA(16)[↑] (16) This argument is unpersuasive. The federal maximum extent practicable standard is not defined in the Clean Water Act or applicable regulations, and thus the Regional Water Board properly included a detailed description of the term in the Permit's definitions section. (See *ante*, fn. 7.) As broadly defined in the Permit, the maximum extent practicable standard is a highly flexible concept that depends on balancing numerous factors, including the particular control's technical feasibility, cost, public acceptance, regulatory compliance, and effectiveness. This definition conveys that the Permit's maximum extent practicable standard is a term of art, and is not a phrase that can be interpreted solely by reference to its everyday or dictionary meaning. Further, the Permit's definitional section states that the maximum extent practicable standard “considers economics and is generally, but not necessarily, less stringent than BAT.” (Italics added.) HN20[↑] BAT is an acronym [***47] for “best available technology economically achievable,” which is a technology-based standard for industrial storm water dischargers that focuses on reducing pollutants by treatment or by a combination of treatment and best management practices. (See *Texas Oil & Gas Ass'n v. U.S. E.P.A.* (5th Cir. 1998) 161 F.3d 923, 928.) If the maximum extent practicable standard is generally “less stringent” than another Clean Water Act standard that relies on available technologies, it would be unreasonable to conclude that anything more stringent than the maximum extent practicable standard is necessarily impossible. In other contexts, courts have similarly recognized that the word “practicable” does not necessarily mean the most that can possibly be done. (See *Nat. Wildlife Federation v. Norton* (E.D.Cal. 2004) 306 F. Supp. 2d 920, 928, fn. 12 [“[w]hile the meaning of the term ‘practicable’ in

¹⁴ Because we are not presented with a proper appellate challenge, we do not address the trial court's factual determinations in this case concerning whether it is possible or practical for a Municipality to achieve any specific Permit requirement.

the [Endangered Species Act] is not entirely clear, the term does not simply equate to ‘possible’ ”]; *Primavera Familienstiftung v. Askin* (S.D.N.Y. 1998) 178 F.R.D. [*890] 405, 409 [noting that “impracticability does not mean impossibility, but rather difficulty [***48] or inconvenience”].)

We additionally question whether many of Building Industry's “impossibility” arguments are premature on the record before us. As we have explained, the record does not support that any required control is, or will be, impossible to implement. Further, the Permit allows the Regional Water Board to enforce water quality standards during the iterative process, but does not impose any obligation that the board do so. Thus, we cannot determine with any degree of certainty whether this obligation would ever be imposed, particularly if it later turns out that it is not possible for a Municipality to achieve that standard.

Finally, we comment on Building Industry's repeated warnings that if we affirm the judgment, all affected Municipalities will be in immediate violation of the Permit because they are not now complying with applicable water quality standards, subjecting them to immediate and substantial civil penalties, and leading to a potential “shut down” of public operations. These doomsday arguments are unsupported. The Permit makes clear that Municipalities [**146] are required to adhere to numerous specific controls (none of which are challenged in this case) and [***49] to comply with water quality standards through “timely implementation of control measures” by engaging in a cooperative iterative process where the Regional Water Board and Municipality work together to identify violations of water quality standards in a written report and then incorporate approved modified best management practices. Although the Permit allows the regulatory agencies to enforce the water quality standards during this process, the Water Boards have made clear in this litigation that they envision the ongoing iterative process as the centerpiece to achieving water quality standards. Moreover, the regulations

provide an affected party reasonable time to comply with new permit requirements under certain circumstances. (See 40 C.F.R. § 122.47.) There is nothing in this record to show the Municipalities will be subject to immediate penalties for violation of water quality standards.

We likewise find speculative Building Industry's predictions that immediately after we affirm the judgment, citizens groups will race to the courthouse to file lawsuits against the Municipalities and seek penalties for violation of the Water Quality Standards provisions.¹⁵ As noted, the applicable [***50] laws provide time for an affected entity to comply with new standards. Moreover, although we do not reach the enforcement issue in this case, we note the [*891] Permit makes clear that the iterative process is to be used for violations of water quality standards, and gives the Regional Water Board the discretionary authority to enforce water quality standards during that process. Thus, it is not at all clear that a citizen would have standing to compel a municipality to comply with a water quality standard despite an ongoing iterative process. (See § 1365(a)(1)(2).) [***51]

III.–VII.* [NOT CERTIFIED FOR PUBLICATION]

DISPOSITION

Judgment affirmed. Appellants to pay respondents' costs on appeal.

Benke, Acting P. J., and Aaron, J., concurred.

A petition for a rehearing was denied January 4, 2005, and the opinion was modified to read as printed above. Appellants' petition for review by the Supreme Court was denied March 30, 2005.

¹⁵ The Clean Water Act allows a citizen to sue a discharger to enforce limits contained in NPDES permits, but requires the citizen to notify the alleged violator, the state, and the EPA of its intention to sue at least 60 days before filing suit, and limits the enforcement to nondiscretionary agency acts. (See § 1365(a)(1)(2).)

* See footnote, *ante*, page 866.

Baxter, J., and Brown, J., were of the opinion that the petition should be granted. [***52]

THE STATE OF CALIFORNIA et al., Defendants and Appellants

Subsequent History: [***1] As Modified March 10, 1987. A petition for a rehearing was denied March 17, 1987, and appellants' petition for review by the Supreme Court was denied May 14, 1987. Eagleson, J., did not participate therein.

Prior History: Superior Court of Los Angeles County, No. C437471, Norman L. Epstein, Judge; No. C514623 and No. C515319, Jack T. Ryburn, Judge.

Disposition: As modified, the judgment is affirmed. Respondents to recover costs on appeal.

Core Terms

reimbursement, appropriations, funds, costs, Budget, local agency, state-mandated, executive order, trial court, modified, parties, offset, collateral estoppel, writ of mandate, orders, state mandate, proceedings, account number, expenditures, compliance, invalid, reasonably available, appropriate fund, local government, new program, forfeitures, provisions, contends, deleted, fines

Case Summary

Procedural Posture

Appellant state challenged the judgments of the Superior Court of Los Angeles County (California), which ordered appellant to reimburse respondent county for state-mandated costs in three consolidated appeals.

Overview

Respondent county purchased protective clothing and equipment for firefighters within its employ as required by Cal. Code Regs. tit. 8, §§ 3401- 3409 (1978). Respondent argued that it was entitled to reimbursement from appellant state for these expenditures because they constituted a state-mandated "new program" or "higher level of service" under Cal. Rev. & Tax. Code §§ 2207 and 2231 and Cal. Const. art. XIII B, § 6. Respondent filed a test claim with the California State Board of Control (board) for these costs and the board determined that there was a state mandate and that respondent should have been reimbursed. Appellant did not seek judicial review of the decision and respondent filed a petition for writ of mandate and complaint for declaratory judgment. The trial court issued a writ of mandate and ordered appellant to pay the costs. On appeal, three cases were consolidated. The court affirmed with modifications and held that appellant had waived its right to challenge the board's findings and also was collaterally estopped from doing so. The court also held that the expenditures were pursuant to a new program within the meaning of Cal. Const. art. XIII B, § 6.

Outcome

The court affirmed the judgments, ordering appellant state to reimburse respondent county for state-mandated costs because appellant was collaterally estopped from challenging findings of the California State Board of Control and because the reimbursement was for a new program within the meaning of the California Constitution. The court modified the judgments primarily to command the comptroller to draw warrants if necessary.

The right to reimbursement is triggered when the local agency incurs costs mandated by the state in either complying with a new program or providing an increased level of service of an existing program. Cal. Rev. & Tax. §§ 2207, 2231.

Civil Procedure > ... > Responses > Defenses,
Demurrers & Objections > Waiver &
Preservation of Defenses

HN5 [↓] Defenses, Demurrers & Objections, Waiver & Preservation of Defenses

Waiver occurs where there is an existing right; actual or constructive knowledge of its existence; and either an actual intention to relinquish it, or conduct so inconsistent with an intent to enforce the right as to induce a reasonable belief that it has been waived. A right that is waived is lost forever. The doctrine of waiver applies to rights and privileges afforded by statute.

Judgments > Estoppel > General Overview

HN7[↓] Decisions, Collateral Estoppel

The doctrine of collateral estoppel applies to a final adjudication of an administrative agency of statutory creation so as to preclude relitigation of the same issues in a subsequent criminal case. Collateral estoppel applies to such prior adjudications where three requirements are met: (1) the administrative agency acts in a judicial capacity; (2) it resolves disputed issues properly before it; and (3) all parties are provided with the opportunity to fully and fairly litigate their claims.

Administrative Law > ... > Formal Adjudicatory
Procedure > Hearings > General Overview

Governments > Local
Governments > Administrative Boards

HN8[↓] Formal Adjudicatory Procedure, Hearings

The California State Board of Control (board) exercises quasi-judicial powers in adjudging the validity of claims against the State of California and is the sole administrative remedy available to local agencies seeking reimbursement for state-mandated costs. Cal. Rev. & Tax. Code § 2250. Board examiners have the power to administer oaths, examine witnesses, issue subpoenas, and

receive evidence. Cal. Gov't Code § 13911. The hearings are adversarial in nature and allow for the presentation of evidence by claimant, the Department of Finance, and any other affected agency. Cal. Rev. & Tax. Code § 2252.

Civil Procedure > ... > Preclusion of
Judgments > Estoppel > Collateral Estoppel

HN9[↓] Estoppel, Collateral Estoppel

The courts have held that the agents of the same government are in privity with each other, since they represent not their own rights but the right of the government.

Civil Procedure > ... > Preclusion of
Judgments > Estoppel > Collateral Estoppel

HN10[↓] Estoppel, Collateral Estoppel

A prior judgment on a question of law decided by a court is conclusive in a subsequent action between the same parties where both causes involved arise out of the same subject matter or transaction, and where holding the judgment to be conclusive will not result in an injustice.

Administrative Law > Agency
Adjudication > Decisions > Collateral Estoppel

HN25 **Local Governments, Finance**

The concept of federally mandated costs has provided local agencies with a financial escape valve ever since passage of the Property Tax Relief Act of 1972 (Act), 1972 Cal. Stat. ch. 1406, § 1 at 2931. That Act limited local governments' power to levy property taxes, while requiring that they be reimbursed by the state for providing compulsory increased levels of service or new programs. However, under Cal. Rev. & Tax. Code § 2271, costs mandated by the federal government are not subject to reimbursement and local governments are permitted to levy taxes in addition to the maximum property tax rate to pay such costs.

HN22 **State & Territorial Governments, Finance**

HN26 **Local Governments, Finance**

The limitation on local government's ability to raise

property taxes, and the duty of the state to reimburse for state-mandated costs, is a part of Cal. Const. art. XIII B, § 6, which directs state subvention similar in nature to that required by the preexisting provisions of Cal. Rev. & Tax. Code §§ 2207, 2231.

Governments > Local Governments > Finance

HN27[↓] Local Governments, Finance

Cal. Rev. & Tax. Code § 2206 defines nonreimbursable costs mandated by the federal government to include the following: costs resulting from enactment of a state law or regulation where failure to enact such law or regulation to meet specific federal program or service requirements would result in substantial monetary penalties or loss of funds to public or private persons in the state.

Governments > Legislation > Interpretation

HN28[↓] Legislation, Interpretation

Interpretation of statutory language is purely a judicial function. Legislative declarations are not binding on the courts and are particularly suspect when they are the product of an attempt to avoid financial responsibility.

Governments > Legislation > Interpretation

HN29[↓] Legislation, Interpretation

See Cal. Const. art. IV, § 9.

Governments > Legislation > Interpretation

HN30[↓] Legislation, Interpretation

The single subject rule essentially requires that a statute have only one subject matter and that the

subject be clearly expressed in the statute's title. The rule's primary purpose is to prevent "log-rolling" in the enactment of laws. This disfavored practice occurs where a provision unrelated to a bill's main subject matter and title is included in it with the hope that the provision will remain unnoticed and unchallenged. By invalidating these unrelated clauses, the single subject rule prevents the passage of laws which otherwise might not have passed had the legislative mind been directed to them. However, in order to minimize judicial interference in the legislature's activities, the single subject rule is to be construed liberally. A provision violates the rule only if it does not promote the main purpose of the act or does not have a necessary and natural connection with that purpose.

Governments > Legislation > Effect & Operation > Operability

Governments > Legislation > Effect & Operation > General Overview

Governments > Legislation > Effect & Operation > Retrospective Operation

HN31[↓] Effect & Operation, Operability

A retroactive statute is one that relates back to a previous transaction and gives that transaction a legal effect different from that which it had under the law when it occurred. Absent some clear policy requiring the contrary, statutes modifying liability in civil cases are not to be construed retroactively.

Governments > State & Territorial Governments > Finance

HN32[↓] State & Territorial Governments, Finance

See 1981 Cal. Stat. ch. 99, § 28.40 at 606; 1983 Cal. Stat. ch. 324, § 26 at 1504; 1984 Cal. Stat. ch. 258, § 26.00.

Governments > State & Territorial
Governments > Finance

HN33[↓] State & Territorial Governments, Finance

Cal. Const. art. XIV, § 4 concerns the power to enact workers' compensation statutes and regulations. It does not focus on the issue of reimbursement for state-mandated costs, which is covered by Cal. Rev. & Tax. Code §§ 2207, 2231, and Cal. Const. art. XIII B, § 6. Since these latter provisions do not effect a pro tanto repeal of the legislature's plenary power over workers' compensation law, they do not conflict with Cal. Const. art. XIV, § 4.

Governments > State & Territorial
Governments > Finance

HN34[↓] State & Territorial Governments, Finance

Under Cal. Const. art. XIII B, § 6(c), the legislature may reimburse mandates enacted prior to January 1, 1975, and must reimburse mandates passed after that date, but does not have to begin such reimbursement until the effective date of article XIII B which is July 1, 1980. In other words, the amendment of article XIII B, § 6(c) operates on "window period" mandates even though the reimbursement process may not actually commence until later.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court, in separate proceedings brought by three counties against the state for reimbursement of funds expended by the counties in complying with a state order to provide protective clothing and equipment for county fire fighters, issued writs of mandate compelling the state to reimburse the counties. Previously, the counties had filed test claims with the State Board of Control for reimbursement of similar expenses. The board determined that there was a state mandate and the counties should be reimbursed. The state did not seek judicial review of the board's decision. Thereafter, a local government claims bill, Sen. Bill No. 1261 (Stats. 1981, ch. 1090, p. 4191) was introduced to provide appropriations to pay some of the counties' claims for the state-mandated costs. After various amendments, the legislation was enacted into law without the appropriations. The

counties then sought reimbursement by filing petitions for writs of mandate and complaints for declaratory relief. (Superior Court of Los Angeles County, No. C437471, Norman L. Epstein, Judge; No. C514623 and No. C515319, Jack T. Ryburn, Judge.)

In a consolidated appeal, the Court of Appeal affirmed with certain modifications. It held that, by failing to seek judicial review of the board's decision, the state had waived its right to contest the board's finding that the counties' expenditures were state mandated. Similarly, it held that the state was collaterally estopped from attacking the board's findings. It also held that the executive orders requiring the expenditures constituted the type of "program" that is subject to the constitutional imperative of subvention under Cal. Const., art. XIII B, § 6. The court also held that the trial courts had not ordered an appropriation in violation of the separation of powers doctrine, and that the trial courts correctly determined that certain legislative disclaimers, findings, and budget control language did not exonerate the state from its constitutionally and statutorily imposed obligation to reimburse the counties' state-mandated costs. Further, the court held that the trial courts properly authorized the counties to satisfy their claims by offsetting fines and forfeitures due to the state, and that the counties were entitled to interest. (Opinion by Eagleson, J., with Ashby, Acting P. J., and Hastings, J., concurring.)

Headnotes

CA(1a)[↓] (1a) CA(1b)[↓] (1b)

Estoppel and Waiver § 23—Waiver—Trial and Appeal—Failure to Seek Judicial Review of Administrative Decision—Waiver of Right to Contest Findings.

--In a proceeding by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to

county fire fighters, the state waived its right to contest findings made by the State Board of Control in a previous proceeding. The board found that the costs were state-mandated and that the county was entitled to reimbursement. The state failed to seek judicial review of the board's decision, and the statute of limitations applicable to such review had passed. Moreover, the state, through its agents, had acquiesced in the board's findings by seeking an appropriation to satisfy the validated claims, which, however, was rebuffed by the Legislature.

CA(2)[↓] (2)

Estoppel and Waiver § 19—Waiver—Requisites.

--Waiver occurs where there is an existing right; actual or constructive knowledge of its existence; and either an actual intention to relinquish it, or conduct so inconsistent with an intent to enforce the right as to induce a reasonable belief that it has been waived. A right that is waived is lost forever. The doctrine of waiver applies to rights and privileges afforded by statute.

CA(3a)[↓] (3a) CA(3b)[↓] (3b) CA(3c)[↓] (3c) CA(3d)[↓] (3d)

Judgments § 81—Res Judicata—Collateral Estoppel—County's Action for Reimbursement of State-mandated Costs—Findings of State Board of Control.

--In a proceeding brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the state was collaterally estopped from attacking the findings made, in a previous proceeding, by the State Board of Control that the costs were state-mandated and that the county was entitled to reimbursement. The issues were fully litigated before the board. Similarly, although the state was not a party to the board hearings, it was in privity with those state agencies

which did participate. Moreover, a determination of conclusiveness would not work an injustice.

CA(4)[↓] (4)

Judgments § 81—Res Judicata—Collateral Estoppel—Elements.

--In order for the doctrine of collateral estoppel to apply, the issues in the two proceedings must be the same, the prior proceeding must have resulted in a final judgment on the merits, and the parties or their privies must be involved.

CA(5)[↓] (5)

Judgments § 84—Res Judicata—Collateral Estoppel—Identity of Parties—Privity—Governmental Agents.

--The agents of the same government are in privity with each other for purposes of collateral estoppel, since they represent not their own rights but the right of the government.

CA(6)[↓] (6)

Judgments § 96—Res Judicata—Collateral Estoppel—Matters Concluded—Questions of Law.

--A prior judgment on a question of law decided by a court is conclusive in a subsequent action between the same parties where both causes involved arose out of the same subject matter or transaction, and where holding the judgment to be conclusive will not result in an injustice.

CA(7)[↓] (7)

State of California § 11—Fiscal Matters—Reimbursement to County for State-mandated Costs—New Programs.

--A "new program," for purposes of determining whether the program is subject to the constitutional

imperative of subvention under Cal. Const., art. XIII B, § 6, is one which carries out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state.

CA(8)[↓] (8)

State of California § 7—Actions—Reimbursement of County Funds for State-mandated Costs—New Programs.

--In an action brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with state executive orders to provide protective clothing and equipment to county fire fighters, the trial court properly determined that the executive orders constituted the type of "new program" that was subject to the constitutional imperative of subvention under Cal. Const., art. XIII B, § 6. Fire protection is a peculiarly governmental function. Also, the executive orders manifest a state policy to provide updated equipment to all fire fighters, impose unique requirements on local governments, and do not apply generally to all residents and entities in the state, but only to those involved in fire fighting.

CA(9)[↓] (9)

Constitutional Law § 37—Doctrine of Separation of Powers—Violations of Doctrine—Judicial Order of Appropriation.

--In a proceeding brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the trial court's judgment granting the writ was not in violation of the separation of powers doctrine. The court order did not directly compel the Legislature to appropriate funds or to pay funds not yet appropriated, but

merely affected an existing appropriation.

CA(10)[↓] (10)

Constitutional Law § 40—Distribution of Governmental Powers—Between Branches of Government—Judicial Power and Its Limits—Order Directing Treasurer to Pay on Already Appropriated Funds.

--Once funds have been appropriated by legislative action, a court transgresses no constitutional principle when it orders the State Controller or other similar official to make appropriate expenditures from such funds. Thus, a judgment which ordered the State Controller to draw warrants and directed the State Treasurer to pay on already-appropriated funds permissibly compelled performance of a ministerial duty.

CA(11)[↓] (11)

State of California § 12—Fiscal Matters—Appropriations—Reimbursement to County for State-mandated Costs.

--Appropriations affected by a court order need not specifically refer to the particular expenditure in question in order to be available. Thus, in a proceeding brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the funds appropriated for the Department of Industrial Relations for the prevention of industrial injuries and deaths of state workers were available for reimbursement, despite the fact that the funds were not specifically appropriated for reimbursement. The funds were generally related to the nature of costs incurred by the county.

CA(12a)[↓] (12a) CA(12b)[↓] (12b)

Fires and Fire Districts § 2—Statutes and

Ordinances—County Compliance With State Executive Order to Provide Protective Equipment—Federal Mandate.

--A county's purchase of protective clothing and equipment for its fire fighters was not the result of a federally mandated program so as to relieve the state of its obligation (Cal. Const., art. XIII B, § 6) to reimburse the county for the cost of the purchases. The county had made the purchase in compliance with a state executive order. The federal government does not have jurisdiction over local fire departments and there are no applicable federal standards for local government structural fire fighting clothing and equipment. Hence, the county's obedience to the state executive orders was not federally mandated.

CA(13)[↓] (13)

Statutes § 20—Construction—Judicial Function—Legislative Declarations.

--The interpretation of statutory language is purely a judicial function. Legislative declarations are not binding on the courts and are particularly suspect when they are the product of an attempt to avoid financial responsibility.

CA(14a)[↓] (14a) CA(14b)[↓] (14b)

Statutes § 10—Title and Subject Matter—Single Subject Rule.

--In a proceeding brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters (Cal. Admin. Code, tit. 8, §§ 3401-3409), the trial court properly invalidated, as violating the single subject rule, the budget control language of Stats. 1981, ch. 1090, § 3. The express purpose of ch. 1090 was to increase funds available for reimbursing certain claims. The budget control language, on the other hand, purported to make the

reimbursement provisions of Rev. & Tax. Code, § 2207, and former Rev. & Tax. Code, § 2231, unavailable to the county. Because the budget control language did not reasonably relate to the bill's stated purpose, it was invalid.

CA(15)[↓] (15)

Statutes § 10—Title and Subject Matter—Single Subject Rule.

--The single subject rule essentially requires that a statute have only one subject matter and that the subject be clearly expressed in a statute's title. The rule's primary purpose is to prevent "logrolling" in the enactment of laws, which occurs where a provision unrelated to a bill's main subject matter and title is included in it with the hope that the provision will remain unnoticed and unchallenged. By invalidating these unrelated clauses, the single subject rule prevents the passage of laws which might otherwise not have passed had the legislative mind been directed to them. However, in order to minimize judicial interference in the Legislature's activities, the single subject rule is to be construed liberally. A provision violates the rule only if it does not promote the main purpose of the act or does not have a necessary and natural connection with that purpose.

CA(16)[↓] (16)

Statutes § 5—Operation and Effect—Retroactivity—Reimbursement to County for State-mandated Costs.

--The budget control language of Stats. 1981, ch. 1090, § 3, which purported to make the reimbursement provisions of Rev. & Tax. Code, § 2207 and former Rev. & Tax. Code, § 2231, unavailable to a county seeking reimbursement (Cal. Const., art. XIII B, § 6) for expenditures made in purchasing state-required protective clothing and equipment for county fire fighters (Cal. Admin. Code, tit. 8, §§ 3401-3409), was invalid as a

retroactive disclaimer of the county's right to reimbursement for debts incurred in prior years.

CA(17)[↓] (17)

State of California § 13—Fiscal Matters—Limitations on Disposal—Reimbursement to Counties for State-mandated Costs.

--The budget control language of § 28.40 of the 1981 Budget Act and § 26.00 of the 1983 and 1984 Budget Acts did not exonerate the state from its constitutional and statutory obligations to reimburse a county for the expenses incurred in complying with a state mandate to purchase protective clothing and equipment for county fire fighters. The language was invalid in that it violated the single subject rule, attempted to amend existing statutory law, and was unrelated to the Budget Acts' main purpose of appropriating funds to support the annual budget.

CA(18)[↓] (18)

Constitutional Law § 4—Legislative Power to Create Workers' Compensation System—Effect on County's Right to Reimbursement.

--Cal. Const., art. XIV, § 4, which vests the Legislature with unlimited plenary power to create and enforce a complete workers' compensation system, does not affect a county's right to state reimbursement for costs incurred in complying with state-mandated safety orders.

CA(19)[↓] (19)

Constitutional Law § 7—Mandatory, Directory, and Self-executing Provisions—Subvention Provisions—County Reimbursement for Statemandated Costs.

--The subvention provisions of Cal. Const., art. XIII B, § 6, operate so as to require the state to reimburse counties for state-mandated costs

incurred between January 1, 1975, and June 30, 1980. The amendment, which became effective on July 1, 1980, provided that the Legislature "may, but need not," provide reimbursement for mandates enacted before January 1, 1975. Nevertheless, the Legislature must reimburse mandates passed after that date, even though the state did not have to begin reimbursement until the effective date of the amendment.

CA(20)[↓] (20)

Mandamus and Prohibition § 5—Mandamus—Conditions Affecting Issuance—Exhaustion of Administrative Remedies—County Reimbursement for State-mandated Costs.

--A county's right of action in traditional mandamus to compel reimbursement for state-mandated costs did not accrue until the county had exhausted its administrative remedies. The exhaustion of remedies occurred when it became unmistakably clear that the legislative process was complete and that the state had breached its duty to reimburse the county.

CA(21)[↓] (21)

Mandamus and Prohibition § 13—Mandamus—Conditions Affecting Issuance—Existence and Adequacy of Other Remedy.

--A party seeking relief by mandamus is not required to exhaust a remedy that was not in existence at the time the action was filed.

CA(22a)[↓] (22a) CA(22b)[↓] (22b)

State of California § 7—Actions—Reimbursement to County for State-mandated Costs—County's Right to Offset Fines and Forfeitures Due to State.

--In a proceeding by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to

provide protective clothing and equipment for county fire fighters, the trial court did not err in authorizing the county to satisfy its claims by offsetting fines and forfeitures due to the state. The order did not impinge upon the Legislature's exclusive power to appropriate funds or control budget matters.

CA(23)[↓] (23)

Equity § 5—Scope and Types of Relief—Offset.

--The right to offset is a long-established principle of equity. Either party to a transaction involving mutual debits and credits can strike or balance, holding himself owing or entitled only to the net difference. Although this doctrine exists independent of statute, its governing principle has been partially codified in Code Civ. Proc., § 431.70 (limited to cross-demands for money).

CA(24)[↓] (24)

State of California § 7—Actions—Reimbursement to County for State-mandated Costs—State's Use of Statutory Offset Authority.

--In a proceeding brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the trial court did not err in enjoining the exercise of the state's statutory offset authority (Gov. Code, § 12419.5) until the county was fully reimbursed. In view of the state's manifest reluctance to reimburse, and its otherwise unencumbered statutory right of offset, the trial court was well within its authority to prevent this method of frustrating the county's collection efforts from occurring.

CA(25)[↓] (25)

State of California § 7—Actions—Reimbursement

to County for State-mandated Costs—State's Right to Revert or Dissipate Undistributed Appropriations.

--In a proceeding brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the trial court properly enjoined, and was not precluded by Gov. Code, § 16304.1, from enjoining, the state from directly or indirectly reverting the reimbursement award sum from the general fund line item accounts, and from otherwise dissipating that sum in a manner that would make it unavailable to satisfy the court's judgment in favor of the county.

CA(26)[↓] (26)

Parties § 2—Indispensable Parties—County Auditor Controller—County Action to Collect Reimbursement From State.

--In an action brought by a county for a writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the county auditor-controller was not an indispensable party whose absence would result in a loss of the trial court's jurisdiction. The auditor-controller was an officer of the county and was subject to the direction and control of the county board of supervisors. He was indirectly represented in the proceedings because his principal, the county, was the party litigant. Additionally, he claimed no personal interest in the action and his pro forma absence in no way impeded complete relief.

CA(27)[↓] (27)

Parties § 2—Indispensable Parties—Fines and Forfeitures—County Action to Collect Reimbursement From State.

--In an action brought by a county for a writ of mandate to compel reimbursement by the state for costs expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the funds created by the collected fines and forfeitures which the county was allowed to offset to satisfy its claims against the state were not "indispensable parties" to the litigation. The action was not an in rem proceeding, and the ownership of a particular stake was not in dispute. Complete relief could be afforded without including the specified funds as a party.

CA(28)[↓] (28)

Interest § 4—Interest on Judgments—County Action for Reimbursement of State-mandated Costs—State Reliance on Invalid Statute.

--An invalid statute voluntarily enacted and promulgated by the state is not a defense to its obligation to pay interest on damages under Civ. Code, § 3287, subd. (a). Thus, in an action brought by a county for writ of mandate to compel reimbursement by the state for funds expended in complying with a state order to provide protective clothing and equipment to county fire fighters, the state could not avoid its obligation to pay interest on the funds by relying on invalid budget control language which purported to restrict payment on reimbursement claims.

CA(29)[↓] (29)

Appellate Review § 127—Review—Scope and Extent—Interpretation of Statutes.

--An appellate court is not limited by the interpretation of statutes given by the trial court.

CA(30)[↓] (30)

Appellate Review § 162—Determination of Disposition of Cause—Modification—Action Against State—Appropriation.

--In an action against the state, an appellate court is empowered to add a directive that the trial court order be modified to include charging orders against funds appropriated by subsequent budget acts.

Counsel: John K. Van de Kamp, Attorney General, N. Eugene Hill, Assistant Attorney General, Marilyn K. Mayer and Carol Hunter, Deputy Attorneys General, for Defendants and Appellants.

De Witt Clinton, County Counsel, Amanda F. Susskind, Deputy County Counsel, Ross & Scott, William D. Ross and Diana P. Scott, for Plaintiffs and Respondents.

Judges: Opinion by Eagleson, J., with Ashby, Acting P. J., and Hastings, J., concurring.

Opinion by: EAGLESON

Opinion

[*529] [**799] These consolidated appeals arise from three separate trial court proceedings concerning the heretofore unsuccessful efforts of various local agencies to secure reimbursement of state-mandated costs.

Case No. 2d Civ. B006078 (Carmel Valley et al. case) was the first matter decided by the trial [***2] court. The memorandum of decision in that case was judicially noticed by the trial court which heard the consolidated matters in 2d Civ. B011941 (Rincon et al. case) and 2d Civ. B011942 (County of Los Angeles case). Issues common to all three cases will be discussed together [*530] under the County of Los Angeles appeal, while issues unique to the other two appeals will be considered separately.

We identify the parties to the various proceedings in footnote 1. ¹ For literary convenience, however,

¹ 2d Civ. B006078: The petitioners below and respondents on appeal are Carmel Valley Fire Protection District, City of Anaheim, Aptos

we will refer to all appellants as the State and all respondents as the County unless otherwise indicated.

[***3] Appeal In Case No. 2 Civil B011942

(County of Los Angeles Case)

Facts and Procedural History

County employs fire fighters for whom it purchased protective clothing and equipment, as required by title 8, California Administrative Code, sections 3401-3409, enacted in 1978 (executive orders). County argues that it is entitled to State reimbursement for these expenditures because they constitute a state-mandated "new program" or "higher level of service." County relies on Revenue and Taxation Code section 2207 ² [***4] and

Fire Protection District, Citrus Heights Fire Protection District, Fair Haven Fire Protection District, City of Glendale, City of San Luis Obispo, County of Santa Barbara and Ventura County Fire Protection District.

The respondents below and appellants here are State of California, Kenneth Cory and Jesse Marvin Unruh.

2d Civ. B011941: The petitioners below and respondents on appeal are Rincon Del Diablo Municipal Water District, Twenty-Nine Palms Water District, Alpine Fire Protection District, Bonita-Sunnyside Fire Protection District, Encinitas Fire Protection District, Fallbrook Fire Protection District, City of San Luis Obispo, Montgomery Fire Protection District, San Marcos Fire Protection District, Spring Valley Fire Protection District, Vista Fire Protection District and City of Coronado.

Respondents below and appellants here are State of California, State Department of Finance, State Department of Industrial Relations, State Board of Control, Kenneth Cory, State Controller, Jesse Marvin Unruh, State Treasurer, and Mark H. Bloodgood, Auditor-Controller, County of Los Angeles.

2d Civ. B011942: The County of Los Angeles is the petitioner below and respondent on appeal. Respondents below and appellants here are State of California, State Department of Finance, State Department of Industrial Relations, Kenneth Cory, and Jesse Marvin Unruh.

All respondents on appeal are conceded to be "local agencies," as defined in Revenue and Taxation Code section 2211.

² HNI[↑] The pertinent parts of Revenue and Taxation Code section 2207 provide: "'Costs mandated by the state' means any increased costs which a local agency is required to incur as a result

former [*531] section 2231,³ and California Constitution, article XIII B, section 6⁴ to support its claim.

[***5] [**800] County filed a test claim with the State Board of Control (Board) for these costs incurred during fiscal years 1978-1979 and 1979-1980.⁵ After hearings were held on the matter, the Board determined on November 20, 1979, that there was a state mandate and that County should be reimbursed. State did not seek judicial review of this quasi-judicial decision of the Board.

Thereafter, a local government claims bill, Senate Bill Number 1261 (Stats. 1981, ch. 1090, p. 4191) (S.B. 1261) was introduced to provide

of the following: [para.] (a) Any law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program; [para.] (b) Any executive order issued after January 1, 1973, which mandates a new program; [para.] (c) Any executive order issued after January 1, 1973, which (i) implements or interprets a state statute and (ii), by such implementation or interpretation, increases program levels above the levels required prior to January 1, 1973. . . ."

³ HN2 [↑] The pertinent parts of former Revenue and Taxation Code section 2231, subdivision (a) provide: "The state shall reimburse each local agency for all 'costs mandated by the state', as defined in Section 2207." This section was repealed (Stats. 1986, ch. 879, § 23), and replaced by Government Code section 17561. We will refer to the earlier code section.

⁴ HN3 [↑] The pertinent parts of section 6, article XIII B of the California Constitution, enacted by initiative measure, provide: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [para.] . . . [para.] (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975." This constitutional amendment became effective July 1, 1980.

⁵ County filed its test claim pursuant to former Revenue and Taxation Code section 2218, which was repealed by Statutes 1986, chapter 879, section 19.

Additionally, the Board is no longer in existence. The Commission on State Mandates has succeeded to these functions. (Gov. Code, §§ 17525, 17630.)

appropriations to pay some of County's claims for these state-mandated costs. This bill was amended by the Legislature to delete all appropriations for the payment of these claims. Other claims [***6] of County not provided for in S.B. 1261 were contained in another local government claims bill, Assembly Bill Number 171 (Stats. 1982, ch. 28, p. 51) (A.B. 171). The appropriations in this bill were deleted by the Governor. Both pieces of legislation, sans appropriations, were enacted into law.⁶

On September 21, 1984, following these legislative rebuffs, County sought reimbursement by filing a petition for writ of mandate (Code Civ. Proc., § 1085) and complaint for declaratory relief. After appropriate responses were filed and a hearing was held, the court executed a judgment on February 6, 1985, granting a peremptory writ of mandate. A writ of mandate was issued and other findings and orders made. It is from this judgment of [*532] February 6, 1985, that State appeals. The relevant portions of the judgment are set forth verbatim below.⁷

⁶The final legislation did include appropriations for other local agencies on other types of approved claims.

⁷"1. The Court adjudges and declares that funds appropriated by the Legislature for the State Department of Industrial Relations for the Prevention of Industrial Injuries and Deaths of California Workers within the Department's General Fund may properly be and should be spent for the reimbursement of state-mandated costs incurred by Petitioner as established in this action.

"2. A peremptory writ of mandamus shall issue under the seal of this Court, commanding Respondent State of California, through its Department of Finance, to give notification in writing as specified in Section 26.00 of the Budget Act of 1984 (Chapter 258, Statutes of 1984) of the necessity to encumber funds in conformity [with] this order and, unless the Legislature approves a bill that would enact a general law, within 30 days of said notification that would obviate the necessity of such payment, Respondent [Kenneth] Cory, the State Controller of the State of California, or his successors in office, if any, shall draw warrants on funds appropriated for the State Department of Industrial Relations for the 1984-85 Budget Year in account numbers 8350-001-001, 8350-001-452, 8350-001-453, and 8350-001-890 as implemented in Chapter 258 Statutes of 1984, sufficient to satisfy the claims of Petitioner, plus interest, as set forth in the motion and accompanying writ of mandamus. Said writ shall also issue against Jessie [*sic*] Marvin Unruh, the State Treasurer of

the State of California, and his successors in office, if any, commanding him to make payment on the warrants drawn by Respondent Kenneth Cory.

"3. Pending the final disposition of this proceeding, or the payment of the applicable reimbursement claims and interest as set forth herein, Respondents, and each of of [*sic*] them, their successors in office, agents, servants and employees and all persons acting in concert [or] participation with them, are hereby enjoined and restrained from directly or indirectly expending from the 1984-85 General Fund Budget of the State Department of Industrial Relations as is more particularly described in paragraph number 2 hereinabove, any sums greater than that which would leave in said budget at the conclusion of the 1984-85 fiscal year an amount less than the reimbursement amounts on the aggregate amount of \$ 307,685 in this case, together with interest at the legal rate through payment of said reimbursement amounts. Said amounts are hereinafter referred to collectively as the 'reimbursement award sum'.

"4. Pending the final disposition of this proceeding or the payment of the reimbursement award sum at issue herein, Respondents, and each of them, their successors in office, agents, servants and employees, and all persons acting in concert or participation with them, are hereby enjoined and restrained from directly or indirectly reverting the reimbursement award sum from the General Fund line-item accounts of the Department of Industrial Relations to the General Funds of the State of California and from otherwise dissipating the reimbursement award sum in a manner that would make it unavailable to satisfy this Court's judgment.

"5. In addition to the foregoing relief, Petitioner is entitled to offset amounts sufficient to satisfy the claims of Petitioner, plus interest, against funds held by Petitioner as fines and forfeitures which are collected by the local Courts, transferred to the Petitioner and remitted to Respondents on a monthly basis. Those fines and forfeitures are levied, and their distribution provided, as set forth in Penal Code Sections 1463.02, 1463.03, 14[6]3.5[a], and 1464; Government Code Sections 13967, 26822.3 and 72056, Fish and Game Code Section 13100; Health and Safety Code Section 11502 and Vehicle Code Sections 1660.7, 42004, and 41103.5.

"6. The Court adjudges and declares that the State has a continuing obligation to reimburse Petitioner for costs incurred in fiscal years subsequent to its claim for expenditures in the 1978-79 and 1979-80 fiscal years as set forth in the petition and the accompanying motion for the issuance of a writ of mandate.

"7. The Court adjudges and declares that deletion of funding and prohibition against accepting claims for expenditures incurred as a result of the state-mandated program of Title 8, California Administrative Code **Sections 3401 through 3409** as contained in Section 3 of Chapter [1090], Statutes of 1981 were invalid and unconstitutional.

"8. The Court adjudges and declares that the expenditures incurred by Petitioner as a result of the state-mandated program of Title 8, California Administrative Code **Sections 3401 through 3409** were not the result of any federally mandated program.

[***7] [*533] [**801] Contentions

State advances two basic contentions. It first asserts that the costs incurred by County are not state mandated because they are not the result of a "new program," and do not provide a "higher level of service." Either or both of these requirements are the sine qua non of reimbursement. Second, assuming a "new program" or "higher level of service" exists, portions of the trial court order aimed at assisting the reimbursement process were made in excess of the court's jurisdiction.

These contentions are without merit. We modify and affirm all three judgments.

Discussion

I

Issue of State Mandate

The threshold question is whether County's expenditures are state mandated. HN4^[↑] The right to reimbursement is triggered when the local agency incurs "costs mandated by the state" in either complying with a "new program" or providing "an increased level of service of an existing program." ⁸ State advances many theories as to why the Board erred in concluding that these

"9. A peremptory writ of mandamus shall issue under the seal of this Court commanding Respondent State Board of Control, or its successor-in-interest, to hear and approve the claims of Petitioner for costs incurred in complying with the state-mandated program of Title 8, California Administrative Code **Sections 3401 through 3409** subsequent to fiscal year 1979-80.

"

"11. The Court [adjudges] and declares that the State Respondents are prohibited from offsetting, or attempting to implement an offset against moneys due and owing Petitioner until Petitioner is completely reimbursed for all of its costs in complying with the state mandate of Title 8, California Administrative Code **Sections 3401 through 3409.**"

⁸This language is taken from Revenue and Taxation Code section 2207 and former section 2231. Article XIII B, section 6 refers to "higher" level of service rather than "increased" level of service. We perceive the intent of the two provisions to be identical. The parties also use these words interchangeably.

expenditures are state-mandated costs. One of these arguments is whether the executive orders are a "new program" as that phrase has been recently defined by our Supreme Court in County [***8] of Los Angeles [**802] v. State of California (1987) 43 Cal.3d 46 [233 Cal.Rptr. 38, 729 P.2d 202].

[*534] As we shall explain, State has waived its right to challenge the Board's findings and is also collaterally estopped from doing so. Additionally, although State is not similarly precluded from raising issues presented by the *State of California* case, we conclude that the executive orders are a "new program" within the meaning of article XIII B, section 6.

A. Waiver

CA(1a)[↑] (1a) We initially conclude that State has waived its right to contest the Board's findings. **CA(2)[↑] (2)** **HN5[↑]** Waiver occurs where there is an existing right; actual or constructive knowledge of its existence; and either an actual [***9] intention to relinquish it, or conduct so inconsistent with an intent to enforce the right as to induce a reasonable belief that it has been waived. (*Medico-Dental etc. Co. v. Horton & Converse* (1942) 21 Cal.2d 411, 432 [132 P.2d 457]; *Loughan v. Harger-Haldeman* (1960) 184 Cal.App.2d 495, 502-503 [7 Cal.Rptr. 581].) A right that is waived is lost forever. (*L.A. City Sch. Dist. v. Landier Inv. Co.* (1960) 177 Cal.App.2d 744, 752 [2 Cal.Rptr. 662].) The doctrine of waiver applies to rights and privileges afforded by statute. (*People v. Murphy* (1962) 207 Cal.App.2d 885, 888 [24 Cal.Rptr. 803].)

CA(1b)[↑] (1b) State now contends to be an aggrieved party and seeks to dispute the Board's findings. However it failed to seek judicial review of that November 20, 1979 decision (Code Civ. Proc., § 1094.5) as authorized by former Revenue and Taxation Code section 2253.5. The three-year statute of limitations applicable to such review has long since passed. (*Green v. Obledo* (1981) 29 Cal.3d 126, 141, fn. 10 [172 Cal.Rptr. 206, 624

P.2d 256]; Code Civ. Proc., § 338, subd. 1.)

In addition, State, through its agents, acquiesced in the Board's findings [***10] by seeking an appropriation to satisfy the validated claims. (Former Rev. & Tax. Code, § 2255, subd. (a).) On September 30, 1981, S.B. 1261 became law. On February 12, 1982, A.B. 171 was enacted. Appropriations had been stripped from each bill. State did not then seek review of the Board determinations even though time remained before the three-year statutory period expired. This inaction is clearly inconsistent with any intent to contest the validity of the Board's decision and results in a waiver.

B. Administrative Collateral Estoppel

CA(3a)[↑] (3a) We next conclude that State is collaterally estopped from attacking the Board's findings. **CA(4)[↑] (4)** Traditionally, **HN6[↑]** collateral estoppel has been applied to bar relitigation of an issue decided in a prior court proceeding. In order for the doctrine to apply, the issues in the two proceedings must [*535] be the same, the prior proceeding must have resulted in a final judgment on the merits, and the same parties or their privies must be involved. (*People v. Sims* (1982) 32 Cal.3d 468, 484 [186 Cal.Rptr. 77, 651 P.2d 321].)

HN7[↑] The doctrine was extended in *Sims* to apply to a final adjudication of an administrative agency of statutory [***11] creation so as to preclude relitigation of the same issues in a subsequent criminal case. Our Supreme Court held that collateral estoppel applies to such prior adjudications where three requirements are met: (1) the administrative agency acted in a judicial capacity; (2) it resolved disputed issues properly before it; and (3) all parties were provided with the opportunity to fully and fairly litigate their claims. (*Id.* at p. 479.) All of the elements of administrative collateral estoppel are present here.

CA(3b)[↑] (3b) **HN8[↑]** The Board was created by the state Legislature to exercise quasi-judicial

powers in adjudging the validity of claims against the State. (*County of Sacramento v. Loeb* (1984) 160 Cal.App.3d 446, 452 [206 Cal.Rptr. 626].) At the time of the hearings, the Board proceedings were the sole administrative remedy available to local agencies seeking reimbursement for state-mandated costs. (Former Rev. & [**803] Tax. Code, § 2250.) Board examiners had the power to administer oaths, examine witnesses, issue subpoenas, and receive evidence. (Gov. Code, § 13911.) The hearings were adversarial in nature and allowed for the presentation of evidence by the claimant, the Department [***12] of Finance, and any other affected agency. (Former Rev. & Tax. Code, § 2252.)

The record indicates that the state mandate issues in this case were fully litigated before the Board. A representative of the state Division of Occupational Safety and Health and the Department of Industrial Relations testified as to why County's costs were not state mandated. Representatives of the various claimant fire districts in turn offered testimony contradicting that view. The proceedings culminated in a verbatim transcript and a written statement of the basis for the Board's decision.

State complains, however, that some of the traditional elements of the collateral estoppel doctrine are missing. In particular, State argues that it was not a party to the Board hearings and was not in privity with those state agencies which did participate.

CA(5)[↑] (5) HN9[↑] "[The] courts have held that the agents of the same government are in privity with each other, since they represent not their own rights but the right of the government. [Fn. omitted.]" (*Lerner v. Los Angeles City Board of Education* (1963) 59 Cal.2d 382, 398 [29 Cal.Rptr. 657, 380 P.2d 97].) CA(3c)[↑] (3c) As we stated in our introduction of the parties [***13] in this case, the party [*536] known as "State" is merely a shorthand reference to the various state agencies and officials named as defendants below. Each of these defendants is an agent of the State of

California and had a mutual interest in the Board proceedings. They are thus in privity with those state agencies which did participate below (e.g., Occupational Safety and Health Division).

It is also clear that even though the question of whether a cost is state mandated is one of law (*City of Merced v. State of California* (1984) 153 Cal.App.3d 777, 781 [200 Cal.Rptr. 642]), subsequent litigation on that issue is foreclosed here. CA(6)[↑] (6) HN10[↑] A prior judgment on a question of law decided by a court is conclusive in a subsequent action between the same parties where both causes involved arose out of the same subject matter or transaction, and where holding the judgment to be conclusive will not result in an injustice. (*City of Los Angeles v. City of San Fernando* (1975) 14 Cal.3d 199, 230 [123 Cal.Rptr. 1, 537 P.2d 1250]; *Beverly Hills Nat. Bank v. Glynn* (1971) 16 Cal.App.3d 274, 286-287 [93 Cal.Rptr. 907]; Rest.2d Judgments, § 28, p. 273.)⁹

[***14] CA(3d)[↑] (3d) Here, the basic issues of state mandate and the amount of reimbursement arose out of County's required compliance with the executive orders. In either forum -- Board or court -- the claims and the evidentiary and legal determination of their validity would be considered in similar fashion.

Furthermore, a determination of conclusiveness would not work an injustice. As we have noted, the Board was statutorily created to consider the validity of the various claims now being litigated. Processing of reimbursement claims in this manner was the only administrative remedy available to County. If we were to grant State's request and review the Board's determination de novo, we would, in any event, adhere to the well-settled principle of affording "great weight" to "the contemporaneous administrative construction of the enactment by those charged with its enforcement . . ." (*Coca-Cola Co. v. State Bd. of Equalization*

⁹ As it happened, the entire Board determination involved a question of law since the dollar amount of the claimed reimbursement was not disputed.

(1945) 25 Cal.2d 918, 921 [156 P.2d 1].)

HN11[↑] There is no policy reason to limit the application of the collateral estoppel doctrine to successive court proceedings. In *City and County of San Francisco v. Ang* (1979) 97 Cal.App.3d 673, 679 [159 Cal.Rptr. [***15] 56], the doctrine was applied to bar relitigation in a subsequent civil proceeding of a zoning issue previously decided by a city board of permit appeals. We similarly hold [***804] that the questions of law decided by the Board are binding in all of the subsequent civil proceedings presented here. State therefore is collaterally [*537] estopped to raise the issues of state mandate and amount of reimbursement in this appeal.

C. Executive Orders -- A "New Program" Under Article XIII B, Section 6

CA(7)[↑] (7) The recent decision by our Supreme Court in *County of Los Angeles v. State of California, supra*, 43 Cal.3d at p. 49 presents a new issue not previously considered by the Board or the trial court. That question is whether the executive orders constitute the type of "program" that is subject to the constitutional imperative of subvention under article XIII B, section 6. ¹⁰ We conclude that they are.

[***16] In *State of California*, the Court concluded that the term "program" has two alternative meanings: "programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and

¹⁰State is not precluded from raising this new issue on appeal.

HN12[↑] Questions of law decided by an administrative agency invoke the collateral estoppel doctrine only when a determination of conclusiveness will not work an injustice. Likewise, the doctrine of waiver is inapplicable if a litigant has no actual or constructive knowledge of his rights. Since the *State of California* rule had not been announced at the time of the Board or trial court proceedings herein, the doctrines of waiver and collateral estoppel are inapplicable to State on this particular issue. Both parties have been afforded additional time to brief the matter.

entities in the state." (*Id.* at p. 56, italics added.) Although only one of these findings is necessary to trigger reimbursement, both are present here.

CA(8)[↑] (8) First, **HN13**[↑] fire protection is a peculiarly governmental function. (*County of Sacramento v. Superior Court* (1972) 8 Cal.3d 479, 481 [105 Cal.Rptr. 374, 503 P.2d 1382].) "Police and fire protection are two of the most essential and basic functions of local government." (*Verreos v. City and County of San Francisco* (1976) 63 Cal.App.3d 86, 107 [133 Cal.Rptr. 649].) This classification is not weakened by State's assertion that there are private sector fire fighters who are also subject to the executive orders. Our record on this point is incomplete because the issue was not presented below. Nonetheless, we have no difficulty in concluding as a matter of judicial notice that the overwhelming [***17] number of fire fighters discharge a classical governmental function. ¹¹

[*538] The second, and alternative, prong of the *State of California* definition is also satisfied. The executive orders manifest a state policy to provide updated equipment to all fire fighters. Indeed, compliance with the executive orders is compulsory. The requirements imposed on local governments are also unique because fire fighting is overwhelmingly engaged in by local agencies. Finally, the orders do not apply generally to all residents [***18] and entities in the State but only to those involved in fire fighting.

These facts are distinguishable from those presented in *State of California*. There, the court held that a state-mandated increase in workers' compensation benefits did not require state subvention because the costs incurred by local

¹¹ County suggests that to the extent private fire brigades exist, they are customarily part-time individuals who perform the function on a part-time basis. As such, they are excluded by the balance of the definitional term in title 8, California Administrative Code section 3402, which provides, in pertinent part: ". . . The term [fire fighter] does not apply to emergency pick-up labor or other persons who may perform first-aid fire extinguishment as collateral to their regular duties."

agencies were only an incidental impact of laws that applied generally to all state residents and entities (i.e., to all workers and all governmental and nongovernmental employers). Governmental employers in that setting were indistinguishable from private employers who were obligated through insurance [**805] or direct payment to pay the statutory increases.

State of California only defined the scope of the word "program" as used in California Constitution, article XIII B, section 6. We apply the same interpretation to former Revenue and Taxation Code section 2231 even though the statute was enacted much earlier. The pertinent language in the statute is identical to that found in the constitutional provision and no reason has been advanced to suggest that it should be construed differently. In any event, HN14 [↑] a different interpretation must fall before a constitutional [***19] provision of similar import. (*County of Los Angeles v. Payne* (1937) 8 Cal.2d 563, 574 [66 P.2d 658].)

II

Issue of Whether Court Orders Exceeded Its Jurisdiction

A. *The Court Has Not Ordered an Appropriation in Violation of the Separation of Powers Doctrine*

CA(9) [↑] (9) State begins its general attack on the judgment by citing the longstanding principle that a court order which directly compels the Legislature to appropriate funds or to pay funds not yet appropriated violates the separation of powers doctrine. (Cal. Const., art. III, § 3; art. XVI, § 7; *Mandel v. Myers* (1981) 29 Cal.3d 531, 540 [174 Cal.Rptr. 841, 629 P.2d 935].) ¹² State [*539]

¹² HN16 [↑] Article III, section 3 of the California Constitution provides: "The powers of state government are legislative, executive, and judicial. Persons charged with the exercise of one power may not exercise either of the others except as permitted by this Constitution."

HN17 [↑] Article XVI, section 7 of the California Constitution provides: "Money may be drawn from the Treasury only through an

observes (and correctly so) that the relevant constitutional HN15 [↑] (art. XIII B, § 6) and statutory (Rev. & Tax. Code, § 2207 & former § 2231) provisions are not appropriations measures. (See *City of Sacramento v. California State Legislature* (1986) 187 Cal.App.3d 393, 398 [231 Cal.Rptr. 686].) Since State otherwise discerns no manifest legislative intent to appropriate funds to pay County's claims (*City & County of S. F. v. Kuchel* (1948) 32 Cal.2d 364, 366 [196 P.2d 545]), it concludes that the [***20] judgment unconstitutionally compels performance of a legislative act.

State further argues that the judiciary's ability to reach an existing agency-support appropriation (State Department of Industrial Relations) (fn. 7, [para.] 1, *ante*) has been approved in only two contexts. First, the court can order payment from an existing appropriation, the expenditure of which has been legislatively prohibited by an unconstitutional or unlawful restriction. (*Committee to Defend Reproductive Rights v. Cory* (1982) 132 Cal.App.3d 852, 856 [183 Cal.Rptr. [***21] 475].) Second, once an adjudication has finally determined the rights of the parties, the court may compel satisfaction of the judgment from a current unexpended, unencumbered appropriation which administrative agencies routinely have used for the purpose in question. (*Mandel v. Myers, supra*, 29 Cal.3d at p. 544.) State insists that these facts are not present here.

County rejoins that a writ of traditional mandate (Code Civ. Proc., § 1085) is the correct method of compelling State to perform a clear and present ministerial legal obligation. (*County of Sacramento v. Loeb, supra*, 160 Cal.App.3d at pp. 451-452.) The ministerial obligation here is contained in California Constitution, article XIII B, section 6 and in Revenue and Taxation Code section 2207 and former section 2231. These provisions require State to reimburse local agencies

appropriation made by law and upon a Controller's duly drawn warrant."

for state-mandated costs.

We reject State's general characterization of the judgment by noting that it only affects an existing appropriation. It declares (fn. 7, para. 1, *ante*) that only funds already "*appropriated* by the Legislature for the State Department of Industrial Relations for the Prevention of Industrial Injuries [***22] and Deaths of California Workers within the Department's General Fund" [**806] shall be spent for reimbursement of County's state-mandated costs. (Italics added.) There is absolutely no language purporting to require the Legislature to enact appropriations or perform any other act that might violate separation of powers principles. CA(10)[↑] (10) By simply ordering the State Controller to draw warrants and directing the State Treasurer to pay on already appropriated funds (fn. 7, para. 2, *ante*), the judgment permissibly compels performance of a ministerial duty: HN18[↑] "[Once] funds have already been appropriated by legislative action, a court transgresses no constitutional principle when it orders the State Controller or other similar official to make appropriate expenditures [*540] from such funds. [Citations.]" (*Mandel v. Myers, supra*, 29 Cal.3d at p. 540.)

As we will discuss in further detail below, the subject funds (fn. 7, para. 1, *ante*) were saddled with an unconstitutional restriction (fn. 7, para. 7, *ante*). However, *Mandel* establishes that such a restriction does not necessarily infect the entire appropriation. There, the Legislature had improperly prohibited [***23] the use of budget funds to pay a court-ordered and administratively approved attorney's fees award. The court reasoned that HN19[↑] as long as appropriated funds were "reasonably available for the expenditures in question, the separation of powers doctrine poses no barrier to a judicial order directing the payment of such funds." (*Id.* at p. 542.) The court went on to find that money in a general "operating expenses and equipment" fund was, by both the Budget Act's terms and prior administrative practice, reasonably available to pay the attorney's fees award.

Contrary to State's argument, *Mandel* does not require that past administrative practice support a judgment for reimbursement from an otherwise available appropriation. Although there was evidence of a prior administrative practice of paying counsel fees from funds in the "operating expenses and equipment" budget, this fact was not the main predicate of the court's holding. Rather, the decisive factor was that the budget item in question functioned as a "catchall" appropriation in which funds were still reasonably available to satisfy the State's adjudicated debt. (*Id.* at pp. 543-544.)

Another illustration of this principle [***24] is found in *Serrano v. Priest* (1982) 131 Cal.App.3d 188 [182 Cal.Rptr. 387]. Plaintiffs in that case secured a judgment against the State of California for \$ 800,000 in attorney's fees. The judgment was not paid, and subsequent proceedings were brought against State to satisfy the judgment. The trial court directed the State Controller to pay the \$ 800,000 award, plus interest, from funds appropriated by the Legislature for "operating expenses and equipment" of the Department of Education, Superintendent of Public Instruction and State Board of Education. (*Id.* at p. 192.) This court affirmed that order even though there was no evidence that the agencies involved had ever paid court-ordered attorney's fees from that portion of the budget. Relying on *Mandel*, we concluded that funds were reasonably available from appropriations enacted in the Budget Act in effect at the time of the court's order, as well as from similar appropriations in subsequent budget acts.

CA(11)[↑] (11) State also incorrectly asserts that the appropriations affected by the court's order must specifically refer to the particular expenditure in question in order to be available. This notion was summarily [***25] dismissed in *Mandel v. Myers, supra*, 29 Cal.3d at pp. 543-544. Likewise, in *Committee to Defend [*541] Reproductive Rights v. Cory, supra*, 132 Cal.App.3d at pp. 857-858, the court decreed that payments for Medi-Cal abortions could properly be ordered from monies

appropriated for other Medi-Cal services, even though this use had been specifically prohibited by the Legislature.

Applying these various principles here, we note that the judgment (fn. 7, para. 2, *ante*) identified funds in account numbers 8350-001-001, 8350-001-452, 8350-001-453 and [**807] 8350-001-890 as being available for reimbursement. Within these 1984-1985 account appropriations for the Department of Industrial Relations were monies for Program 40, the Prevention of Industrial Injuries and Deaths of California Workers. The evidence clearly showed that the remaining balances on hand would cover the cost of reimbursement. Since it is conceded that the fire fighting protective clothing and equipment in this case was purchased to prevent deaths and injuries to fire fighters, these funds, although not specifically appropriated for the reimbursement in question, were generally related to [***26] the nature of costs incurred by County and are therefore reasonably available for reimbursement.

B. Legislative Disclaimers, Findings and Budget Control Language Are No Defense to Reimbursement

As a general defense against the order to reimburse, State insists that the Legislature has itself concluded that the claimed costs are not reimbursable. This determination took the combined form of disclaimers, findings and budget control language. State interprets this self-serving legislation, as well as the legislative and gubernatorial deletions, as forever sweeping away State's obligation to reimburse the state-mandated costs at issue. Consequently, any order that ignores these restrictions on payment would amount to a court-ordered appropriation. As we shall conclude, these efforts are merely transparent attempts to do indirectly that which cannot lawfully be done directly.

The seminal legislation that gave rise to the 1978 executive orders was enacted by HN20[↑] Statutes 1973, chapter 993, and is labeled the California Occupational Safety and Health Act (Cal/OSHA).

It is modeled after federal law and is designed to assure safe working conditions for all California workers. A [***27] legislative disclaimer appearing in HN21[↑] section 106 of that bill reads: "No appropriation is made by this act . . . for the reimbursement of any local agency for any costs that may be incurred by it in carrying on any program or performing any service required to be carried on . . ." The stated reason for this decision not to appropriate was that the cost of implementing the act was "minimal on a statewide basis in relation to the effect on local tax rates." (Stats. 1973, ch. 993, § 106, p. 1954.)

[*542] Again, in 1974, HN22[↑] the Legislature stated: "Notwithstanding Section 2231 of the Revenue and Taxation Code, there shall be no reimbursement pursuant to this section, nor shall there be an appropriation made by this act, because the Legislature finds that this act and any executive regulations or safety orders issued pursuant thereto merely implement federal law and regulations." (Stats. 1974, ch. 1284, § 106, p. 2787.) This statute amended section 106 of Statutes 1973, chapter 993, and was a post facto change in the stated legislative rationale for not providing reimbursement.

Presumably because of the large number of reimbursement claims being filed, the Legislature subsequently [***28] used budget control language to confirm that compliance with the executive orders should not trigger reimbursement. Some of this legislation was effective September 30, 1981, as part of a local agency and school district reimbursement bill. The control language provided that HN23[↑] "[the] Board of Control shall not accept, or submit to the Legislature, any more claims pursuant to . . . Sections 3401 to 3409, inclusive, of Title 8 of the California Administrative Code." (Stats. 1981, ch. 1090, § 3, p. 4193.)¹³

Further control language was inserted in the 1981,

¹³ When Governor Brown deleted the appropriations from A.B. 171, he stated that he was relying on the pronouncements in Statutes 1974, chapter 1284 and Statutes 1981, chapter 1090.

1983 and 1984 Budget Acts. HN24 (Stats. 1981, ch. 99, § 28.40, p. 606; Stats. 1983, ch. 324, § 26.00, p. 1504; Stats. 1984, ch. 258, § 26.00.) This language prohibits encumbering appropriations to reimburse costs incurred under the executive orders, except under certain limited [***29] circumstances.

CA(12a) (12a) State first challenges the trial court's finding that expenditures mandated by the [***808] executive orders were not the result of a federally mandated program (fn. 7, para. 8, *ante*), despite the legislative finding in Statutes 1974, chapter 1284, section 106. We agree with the court's decision that there was no federal mandate.

The significance of this no-federal-mandate finding is revealed by examining past changes in the statutory definition of state-mandated costs. As thoroughly discussed in *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182, 196-197 [203 Cal.Rptr. 258] disapproved on other grounds in *County of Los Angeles v. State of California, supra*, 43 Cal.3d at p. 58, fn. 10, HN25 the concept of federally mandated costs has provided local agencies with a financial escape valve ever since passage of the "Property Tax Relief Act of 1972." (Stats. 1972, ch. 1406, § 1, p. 2931.) That act limited local governments' power to levy property taxes, while requiring that they be reimbursed by the State for providing compulsory increased levels of service or [*543] new programs. However, under Revenue and Taxation Code section [***30] 2271, "costs mandated by the federal government" were not subject to reimbursement and local governments were permitted to levy taxes in addition to the maximum property tax rate to pay such costs.

On November 6, 1979, HN26 the limitation on local government's ability to raise property taxes, and the duty of the State to reimburse for state-mandated costs, became a part of the California Constitution through the initiative process. Article XIII B, section 6, enacted at that time, directs state subvention similar in nature to that required by the

preexisting provisions of Revenue and Taxation Code section 2207 and former section 2231. As a defense against this duty to reimburse local agencies, the Legislature began to insert disclaimers in bills which mandated costs on local agencies. It also amended HN27 Revenue and Taxation Code section 2206 to expand the definition of nonreimbursable "costs mandated by the federal government" to include the following: "costs resulting from enactment of a state law or regulation where failure to enact such law or regulation to meet specific federal program or service requirements would result in substantial monetary penalties or loss of funds to public [***31] or private persons in the state."

In applying this definition here, State offers nothing more than the bare legislative finding contained in Statutes 1974, chapter 1284, section 106. State contends that a federally mandated cost cannot, by definition, be a state-mandated cost. Therefore, if the cost is federally mandated, local agency reimbursement is not required. CA(13) (13) (See fn. 14.) Although State's argument is correct in the abstract, neither the facts nor federal law supports the underlying assumption that there is a federal mandate.¹⁴

[***32] CA(12b) (12b) Both the Board and the court had in evidence a letter from a responsible official of the federal Occupational Safety and Health Administration (OSHA). The letter emphasizes the independence of state and federal

¹⁴ We address this subject only because the trial court found that the costs were not federally mandated. Actually, State cannot raise this issue on appeal because of the waiver and administrative collateral estoppel doctrines. We note, however, where there is a quasi-judicial finding that a cost is state mandated, there is an implied finding that the cost is not federally mandated; the two concepts are mutually exclusive.

Moreover, our task is aided by the fact that HN28 interpretation of statutory language is purely a judicial function. Legislative declarations are not binding on the courts and are particularly suspect when they are the product of an attempt to avoid financial responsibility. (*City of Sacramento v. State of California, supra*, 156 Cal.App.3d at pp. 196-197.)

OSHA standards: "OSHA does not have jurisdiction over the fire departments of any political subdivision of a state whether the state has elected to have its own state plan under the OSHA act or not. . . . [para.] More specifically, in 1978, the State of California promulgated standards applicable to fire departments in California. Therefore, California standards, rather than [*544] federal OSHA standards, are applicable to fire departments in that state. . . ." This theme is also reflected in a section of [**809] OSHA which expressly disclaims jurisdiction over local agencies such as County. (29 U.S.C. § 652(5).) Accordingly, as a matter of law, there are no federal standards for local government structural fire fighting clothing and equipment.

In short, while the Legislature's enactment of Cal/OSHA to comply with federal OSHA standards is commendable, it certainly was not compelled. Consequently, County's obedience to the 1978 executive orders is not [***33] federally mandated.

CA(14a)[↑] (14a) The trial court also properly invalidated the budget control language in Statutes 1981, chapter 1090, section 3 (fn. 7, [para.] 7, *ante*) because it violated the single subject rule.¹⁵ This legislative restriction purported to make the reimbursement provisions of Revenue and Taxation Code section 2207 and former section 2231 unavailable to County.

CA(15)[↑] (15) HN30[↑] The single subject rule essentially requires that a statute have only one subject matter and that the subject be clearly expressed in the statute's title. The rule's primary purpose is to prevent "log-rolling" in the enactment of laws. This disfavored practice [***34] occurs where a provision unrelated to a bill's main subject

matter and title is included in it with the hope that the provision will remain unnoticed and unchallenged. By invalidating these unrelated clauses, the single subject rule prevents the passage of laws which otherwise might not have passed had the legislative mind been directed to them. (Planned Parenthood Affiliates v. Swoap (1985) 173 Cal.App.3d 1187, 1196 [219 Cal.Rptr. 664].) However, in order to minimize judicial interference in the Legislature's activities, the single subject rule is to be construed liberally. A provision violates the rule only if it does not promote the main purpose of the act or does not have a necessary and natural connection with that purpose. (Metropolitan Water Dist. v. Marquardt (1963) 59 Cal.2d 159, 172-173 [28 Cal.Rptr. 724, 379 P.2d 28].)

CA(14b)[↑] (14b) The stated purpose of chapter 1090 is to increase funds available for reimbursing certain claims. It describes itself as an "act making an appropriation to pay claims of local agencies and school districts for additional reimbursement for specified state-mandated local costs, awarded by the State Board of Control, and declaring the [***35] urgency thereof, to take effect immediately." (Stats. 1981, ch. 1090, p. 4191.) There is nothing in this introduction [*545] alerting the reader to the fact that the bill prohibits the Board from entertaining claims pursuant to the Cal/OSHA executive orders. The control language does not modify or repeal these orders, nor does it abrogate the necessity for County's continuing compliance therewith. It simply places County's claims reimbursement process in limbo.

This special appropriations bill is similar in kind to appropriations in an annual budget act. Observations that have been made in connection with the enactment of a budget bill are appropriate here. "[The] annual budget bill is particularly susceptible to abuse of [the single subject] rule. 'History tells us that the general appropriation bill presents a special temptation for the attachment of riders. It is a necessary and often popular bill which is certain of passage. If a rider can be

¹⁵ HN29[↑] Article IV, section 9 of the California Constitution reads: "A statute shall embrace but one subject, which shall be expressed in its title. If a statute embraces a subject not expressed in its title, only the part not expressed is void. A statute may not be amended by reference to its title. A section of a statute may not be amended unless the section is re-enacted as amended."

attached to it, the rider can be adopted on the merits of the general appropriation bill without having to depend on its own merits for adoption.' [Citation.]" (*Planned Parenthood Affiliates v. Swoap, supra*, 173 [***36] Cal.App.3d at p. 1198.) Therefore, the annual budget bill must only concern the subject of appropriations to support the annual budget and may not constitutionally be used to substantively amend or change existing statutory law. (*Association for Retarded Citizens v. Department of Developmental Services* (1985) 38 Cal.3d 384, 394 [211 Cal.Rptr. 758, 696 P.2d 150].) We see no reason to apply a [**810] less stringent standard to a special appropriations bill. Because the language in chapter 1090 prohibiting the Board from processing claims does not reasonably relate to the bill's stated purpose, it is invalid.

CA(16)[↑] (16) The budget control language in chapter 1090 is also invalid as a retroactive disclaimer of County's right to reimbursement for debts incurred in prior years. This legislative technique was condemned in *County of Sacramento v. Loeb, supra*, 160 Cal.App.3d at p. 446. There, the Legislature had enacted a Government Code section which prohibited using appropriations for any purpose which had been denied by any formal action of the Legislature. The State attempted to use this code section to uphold a special appropriations bill which had deleted County's Board-approved [***37] claims for costs which were incurred prior to the enactment of the code section. The court held that the code section did not apply retroactively to defeat County's claims: **HN31[↑]** "A retroactive statute is one which relates back to a previous transaction and gives that transaction a legal effect different from that which it had under the law when it occurred. . . . 'Absent some clear policy requiring the contrary, statutes modifying liability in civil cases are not to be construed retroactively.'" (*Id.* at p. 459, quoting *Robinson v. Pediatric Affiliates Medical Group, Inc.* (1979) 98 Cal.App.3d 907, 912 [159 Cal.Rptr. 791].) Similarly, the control language in chapter 1090 does not apply retroactively to County's prior, Board-approved claims.

[*546] CA(17)[↑] (17) Finally, the control language in section 28.40 of the 1981 Budget Act and section 26.00¹⁶ of the 1983 and 1984 Budget Acts does not work to defeat County's claims. (Stats. 1981, ch. 99, § 28.40, p. 606; Stats. 1983, ch. 324, § 26.00, p. 1504; Stats. 1984, ch. 258, § 26.00.) This section is comprised of both substantive and procedural provisions. We are concerned primarily with those portions that purport to exonerate [***38] State from its constitutionally and statutorily imposed obligation to reimburse County's state-mandated costs.

[***39] The writ of mandate directed compliance with the procedural provisions of these sections and is not a point of dispute on appeal. Subsection (a) affords the Legislature one last opportunity to appropriate funds which are to be encumbered for the purpose of paying state-mandated costs, an invitation repeatedly rejected. Subsection (b) directs that the Department of Finance notify the chairpersons of the appropriate committees in each house and chairperson of the Joint Legislative Budget Committee of the need to encumber funds. Presumably, the objective of this procedure is to give the Legislature another opportunity to amend or repeal substantive legislation requiring local agencies to incur state-mandated costs. Again, the Legislature declined to act. Legislative action pursuant to subsection (b) could arguably ameliorate the plight of local agencies prospectively, but would be of no practical

¹⁶ **HN32[↑]** Each of these sections contains the following language: "No funds appropriated by this act shall be encumbered for the purpose of funding any increased state costs or local governmental costs, or both such costs, arising from the issuance of an executive order as defined in section 2209 of the Revenue and Taxation Code or subject to the provisions of section 2231 of the Revenue and Taxation Code, unless (a) such funds to be encumbered are appropriated for such purpose, or (b) notification in writing of the necessity of the encumbrance of funds available to the state agency, department, board, bureau, office, or commission is given by the Department of Finance, at least 30 days before such encumbrance is made, to the chairperson of the committee in each house which considers appropriations and the Chairperson of the Joint Legislative Budget Committee, or such lesser time as the chairperson of the committee, or his or her designee, determines."

assistance to a local agency creditor seeking reimbursement for costs already incurred. section 4.

The first portion of each section, however, imposes a budgetary restriction on encumbering appropriated funds to reimburse for state-mandated costs arising out of compliance with the executive orders, [***40] absent a specific appropriation pursuant to subparagraph (b). For the reasons stated above, this substantive language is invalid under the single subject rule. It attempts [**811] to amend existing statutory law and is unrelated to the Budget Acts' main purpose of appropriating funds to support the annual budget. (*Association for Retarded Citizens v. Department of Developmental Services, supra*, 38 Cal.3d at p. 394.) Now unfettered by invalid restrictions, the appropriations involved in this case are reasonably available for reimbursement.

[*547] C. *The Legislature's Plenary Power to Regulate Worker Safety Does Not Affect the Right to Reimbursement*

CA(18)[↑] (18) State contends that article XIV, section 4 of the California Constitution vests the Legislature with unlimited plenary power to create and enforce a complete workers' compensation system. It postulates that the Legislature may determine that the interest in worker safety and health is furthered by requiring local agencies to bear the costs of safety devices. This non sequitur is advanced without citation of authority.

HN33[↑] Article XIV, section 4 concerns the power to enact workers' compensation statutes and regulations. [***41] It does not focus on the issue of reimbursement for state-mandated costs, which is covered by Revenue and Taxation Code section 2207 and former section 2231, and article XIII B, section 6. Since these latter provisions do not effect a pro tanto repeal of the Legislature's plenary power over workers' compensation law (see *County of Los Angeles v. State of California, supra*, 43 Cal.3d 46), they do not conflict with article XIV,

Moreover, even though the reimbursement issue has come before the Legislature repeatedly since 1972, no law has been enacted to exempt compliance with workers' compensation executive orders from the mandatory reimbursement provisions of Revenue and Taxation Code section 2207 and former section 2231. Likewise, article XIII B, section 6 does not provide an exception to the obligation to reimburse local agencies for compliance with these safety orders.

D. *Pre-1980 Claims Are Reimbursable Under Article XIII B, Section 6, Effective July 1, 1980*

CA(19)[↑] (19) State further argues that to the extent County's claims for fiscal years 1978-1979 and 1979-1980 are predicated on the subvention provisions of article XIII B, section 6, they fall within a [***42] "window period" of nonreimbursement. This assertion emanates from section 6, subdivision (c), which states that the Legislature "[may], but need not," provide reimbursement for mandates enacted before January 1, 1975. State reasons that because the constitutional amendment did not become effective until July 1, 1980, claims for costs incurred between January 1, 1975 and June 30, 1980, need not be reimbursed.

This notion was rejected in *City of Sacramento v. State of California, supra*, 156 Cal.App.3d at p. 182 on behalf of local agencies seeking reimbursement of unemployment insurance costs mandated by a 1978 statute. Basing its decision on well-settled principles of constitutional interpretation [*548] and upon a prior published opinion of the Attorney General, the court interpreted HN34[↑] section 6, subdivision (c) as follows: "[The] Legislature may reimburse mandates enacted prior to January 1, 1975, and must reimburse mandates passed after that date, but does not have to begin such reimbursement until the effective date of article XIII B (July 1, 1980)." (*Id.* at p. 191, italics in original.) In other words, the amendment operates on "window period" mandates [***43] even

though the reimbursement process may not actually commence until later.

We agree with this reasoning and find costs incurred by County under the 1978 executive orders subject to reimbursement under the Constitution.

E. Claims Under Revenue and Taxation Code Section 2207 and Former Section 2231 Are Not Time-barred

CA(20)[↑] (20) State collaterally asserts that to the extent County bases its claims on Revenue and Taxation Code section 2207 and former [**812] section 2231, they are barred by Code of Civil Procedure sections 335 and 338, subdivision 1. This omnibus challenge to the order directing payment has no merit.

HN35[↑] Code of Civil Procedure section 335 is a general introductory section to the statute of limitations for all matters except recovery of real property. Code of Civil Procedure section 338, subdivision 1 requires "[an] action upon a liability created by statute" to be commenced within three years.

HN36[↑] A claimant does not exhaust its administrative remedies and cannot come under the court's jurisdiction until the legislative process is complete. (County of Contra Costa v. State of California (1986) 177 Cal.App.3d 62, 77 [222 Cal.Rptr. 750].) Here, County pursued [**44] its remedy before the Board and prevailed. Thereafter, as required by law, appropriate legislation was introduced. Both the Board hearings and the subsequent efforts to secure legislative appropriations were part of the legislative process. (Former Rev. & Tax. Code, § 2255, subd. (a).) It was not until the legislation was enacted sans appropriations on September 30, 1981 (S.B. 1261) and February 12, 1982 (A.B. 171) that it became unmistakably clear that this process had ended and State had breached its duty to reimburse. At these respective moments of breach, County's right of action in traditional mandamus accrued. County's

petition was filed on September 21, 1984, within the three-year statutory period. ¹⁷ (Lerner v. Los Angeles City Board of Education, supra, 59 Cal.2d at p. 398.)

[**45] [*549] F. Government Code Section 17612's Remedy for Unfunded Mandates Does Not Supplant the Court's Order

State continues its general attack on the order directing payment by arguing that the Legislature has "defined" the remedy available to a local agency if a mandate is unfunded. That remedy is found in HN37[↑] Government Code section 17612, subdivision (b) and reads: "If the Legislature deletes from a local government claims bill funding for a mandate, the local agency . . . may file in the Superior Court of the County of Sacramento an action in declaratory relief to declare the mandate unenforceable and enjoin its enforcement." (Italics added.) (See also former Rev. & Tax. Code, § 2255, subd. (c), eff. Oct. 1, 1982.)

State hints that this procedure is the only remedy available to a local agency if funding is not provided. At oral argument, State admitted that this declaration of enforceability and injunction against enforcement would be prospective only. This remedy would provide no relief to local agencies which have complied with the executive orders.

We conclude that Government Code section 17612, subdivision (b) is inapplicable here because it did not become [**46] operative until January 1, 1985. It was not in place when the Board rendered its decision on November 20, 1979; when funding was deleted from S.B. 1261 (Sept. 30, 1981) and A.B. 171 (Feb. 12, 1982); or when this litigation commenced on September 21, 1984. CA(21)[↑] (21) A party is not required to exhaust a remedy that was not in existence at the time the action was

¹⁷Technically, Statute has waived the statute of limitations defense because it was not raised in its answer. (Ventura County Employees' Retirement Association v. Pope (1978) 87 Cal.App.3d 938, 956 [151 Cal.Rptr. 695].)

filed. (*Ross v. Superior Court* (1977) 19 Cal.3d 899, 912, fn. 9 [141 Cal.Rptr. 133, 569 P.2d 727].) To abide by this post facto legislation now would condone legislative interference in a specific controversy already assigned to the judicial branch for resolution. (*Serrano v. Priest, supra*, 131 Cal.App.3d at p. 201.)

Also, **HN38**[↑] this remedy is purely a discretionary course of action. By using the permissive word "may," the Legislature did not intend to override article XIII B, section 6 and Revenue and Taxation Code section 2207 and former section 2231. These constitutional and statutory imprimaturs each impose upon the State an obligation to reimburse for state-mandated **[**813]** costs. Once that determination is finally made, the State is under a clear and present ministerial duty to reimburse. In the absence of **[***47]** compliance, traditional mandamus lies. (Code Civ. Proc., § 1085.)¹⁸

[*550] G. *The Court's Order Properly Allows County the Right of Offset*

CA(22a)[↑] **(22a)** As the first in a series of objections to portions of the judgment which assist in the reimbursement process, State argues that the court has improperly authorized County to satisfy its claims by offsetting fines and forfeitures due to State. (Fn. 7, para. 5, *ante*.) The fines and forfeitures are those found in Penal Code sections 1463.02, 1463.03, 1463.5a and 1464; Government Code sections 13967, 26822.3 and [***48] 72056; Fish and Game Code section 13100; Health and Safety Code section 11502; and Vehicle Code

sections 1660.7, 42004 and 41103.5.¹⁹

Broadly speaking, these statutes require County to periodically transfer all or part of the fines and forfeitures collected by it for specified law violations to the State Treasury. They are to be held there "to the credit" of various state agencies, or for payment into specific funds. State contends that since these statutes require mandatory, regular transfers and do not expressly permit diversion for other purposes, the court **[***49]** had no power to allow County to offset. State cites no authority for this contention.

CA(23)[↑] **(23)** **HN41**[↑] The right to offset is a long-established principle of equity. Either party to a transaction involving mutual debits and credits can strike a balance, holding himself owing or entitled only to the net difference. (*Kruger v. Wells Fargo Bank* (1974) 11 Cal.3d 352, 362 [113 Cal.Rptr. 449, 521 P.2d 441, 65 A.L.R.3d 1266].) Although this doctrine exists independent of statute, its governing principle has been partially codified (Code Civ. Proc., § 431.70) (limited to cross-demands for money).

The doctrine has been applied in favor of a local agency against the State. In *County of Sacramento v. Lackner* (1979) 97 Cal.App.3d 576 [159 Cal.Rptr.1], for example, the court of appeal upheld a trial court's decision to grant a writ of mandate that ordered funds awarded the County under a favorable judgment to be offset against its current liabilities to the State under the Medi-Cal program. The court stated that such an order does not interfere with the "Legislature's control over the 'submission, approval and enforcement of budgets . . .'" (*Id.* at p. 592, quoting Cal. Const., art. [***50] IV, § 12, subd. (e).)

¹⁸ We leave undecided the question of whether this type of legislation could ever be held to override California Constitution, article XIII B, section 6. **HN39**[↑] The Constitution of the State is supreme. Any statute in conflict therewith is invalid. (*County of Los Angeles v. Payne, supra*, 8 Cal.2d at p. 574.)

Similarly, **HN40**[↑] former Revenue and Taxation Code section 2255, subdivision (c) cannot abrogate the constitutional directive to reimburse.

¹⁹ At oral argument, County conceded that the order authorizing offset of Fish and Game Code section 13100 fines and forfeitures is inappropriate. These collected funds must be spent exclusively for protection, conservation, propagation or preservation of fish, game, mollusks, or crustaceans, and for administration and enforcement of laws relating thereto, or for any such purpose. (Cal. Const., art. XVI, § 9; 20 Ops. Cal. Atty. Gen. 110 (1952).)

CA(22b)[↑] (22b) The order herein likewise does not impinge upon the Legislature's exclusive power to appropriate funds or control budget matters. The identified [*551] fines and forfeitures are collected by the County for statutory law violations. Some of these funds remain with the County, while others are transferred to the State. State's portions are uncertain as to amount and date of transfer. State does not come into actual possession of these funds until they are transferred. State's holding of these funds "to the credit" of a particular agency, or for payment to a specific fund, does not commence until their receipt. Until that time, they are unencumbered, unrestricted and subject to offset.

H. State's Use of its Statutory Offset Authority Was Properly Enjoined

CA(24)[↑] (24) State further contends that the trial court exceeded its jurisdiction by enjoining [*814] the exercise of State's statutory offset authority until County is fully reimbursed. (Fn. 7, para. 11, *ante*.)²⁰ This order complemented that portion of the order discussed, *infra*, which allowed County to temporarily offset fines and forfeitures as an aid in the reimbursement process. [***51]

State correctly observes that it has not unlawfully used its offset authority during the course of this dispute. However, State has not needed to do so because it has adopted other means of avoiding payment on County's claims. In view of State's manifest reluctance to reimburse, and its otherwise unencumbered statutory right [***52] of offset, the trial court was well within its authority to prevent this method of frustrating County's collection

²⁰ **HN42[↑]** Government Code section 12419.5 provides: "The Controller may, in his discretion, offset any amount due a state agency from a person or entity, against any amount owing such person or entity by any state agency. The Controller may deduct from the claim, and draw his warrants for the amounts offset in favor of the respective state agencies to which due, and, for any balance, in favor of the claimant. . . . The amount due any person or entity from the state or any agency thereof is the net amount otherwise owing such person or entity after any offset as in this section provided." (See also *Tyler v. State of California* (1982) 134 Cal.App.3d 973, 975-976 [185 Cal.Rptr. 49].)

efforts from occurring. (See *County of Los Angeles v. State of California* (1984) 153 Cal.App.3d 568 [200 Cal.Rptr. 394].)

I. The Injunction Against Reversion or Dissipation of Undisbursed Appropriations Is Proper

CA(25)[↑] (25) State continues that the order (fn. 7, para. 4, *ante*) enjoining it from directly or indirectly reverting the reimbursement award sum from the general fund line item accounts, and from otherwise dissipating that sum in a manner that would make it unavailable to satisfy this court's judgment, violates Government Code section 16304.1.²¹ This section reverts undisbursed [*552] balances in any appropriation to the fund from which the appropriation was made. No authority is cited for State's proposition. To the contrary, *County of Sacramento v. Loeb, supra*, 160 Cal.App.3d at pp. 456-457 expressly confirms this type of ancillary remedy as a legitimate exercise of the court's authority to assist in collecting on an adjudicated debt, the payment of which has been delayed all too long.

[***53] That portion of the order restraining reversion is particularly innocuous because it only affects undisbursed balances in an appropriation. At the time of reversion, it is crystal clear that these remaining funds are unneeded for the primary purpose for which appropriated; otherwise, they would not exist. Moreover, that portion of the order restraining dissipation of the reimbursement award sum in a manner that would make it unavailable to satisfy a court's judgment is similarly

²¹ **HN43[↑]** Government Code section 16304.1 provides: "Disbursements in liquidation of encumbrances may be made before or during the two years following the last day an appropriation is available for encumbrance Whenever, during [such two-year period], the Director of Finance determines that the project for which the appropriation was made is completed and that a portion of the appropriation is not necessary for disbursements, such portion shall, upon order of the Director of Finance, revert to and become a part of the fund from which the appropriation was made. Upon the expiration of two years . . . following the last day of the period of its availability, the undisbursed balance in any appropriation shall revert to and become a part of the fund from which the appropriation was made. . . ."

a proper exercise of the court's authority. By not reimbursing County for the state-mandated costs, State would be contravening its constitutional and statutory obligations to subvent. To the extent it is not reimbursed, County would be compelled, contrary to law, to bear the cost of complying with a state-imposed obligation.

J. The Auditor Controller and the Specified Funds Are Not Indispensable Parties

CA(26)[↑] (26) CA(27)[↑] (27) State next contends that the Auditor Controller of Los Angeles County and the "specified" fines and forfeitures County was allowed to offset are indispensable [**815] parties. Failure to join them in the action or to serve them with process purportedly renders the trial court's order void [***54] as in excess of its jurisdiction. ²² State cites only the general statutory definition of an indispensable party (Code Civ. Proc., § 389) to support this assertion.

HN45[↑] The Auditor Controller is an officer [***55] of the County and is subject to the [***553] direction and control of the County board of supervisors. (Gov. Code, §§ 24000, subds. (d), (e), 26880; L.A. County Code, § 2.10.010.) He is indirectly represented in these proceedings because his principal, the County, is the party litigant. Additionally, he claims no personal interest in the fines and forfeitures and his pro forma absence in no way impedes complete relief.

The funds created by the collected fines and

forfeitures also are not indispensable parties. This is not an in rem proceeding, and the ownership of a particular stake is not in dispute. Rather, this is an action to compel a ministerial obligation imposed by law. Complete relief may be afforded without including the specified funds as a party.

K. County is Entitled to Interest

CA(28)[↑] (28) State insists that an award of interest to County unfairly penalizes State for not paying claims which it was prohibited by law from paying under Statutes 1981, chapter 1090, section 3. This argument is unavailing.

HN46[↑] Civil Code section 3287, subdivision (a) allows interest to any person "entitled to recover damages certain, or capable of being made certain by calculation . . . [***56] . ." Interest begins on the day that the right to recover vests in the claimant. By its own terms, this section applies to any judgment debtor, "including the state . . . or any political subdivision of the state."

The judgment orders interest at the legal rate from September 30, 1981, for reimbursement funds originally contained in S.B. 1261, and from February 12, 1982, for the funds originally contained in A.B. 171. These are the respective dates that the bills were enacted without appropriations. As we concluded earlier, County's cause of action did not arise and its right to recover did not vest until this legislative process was complete. County offers no authority to suggest that any other vesting date is appropriate.

Furthermore, State cannot avoid its obligation to pay interest by relying on the invalid budget control language in Statutes 1981, chapter 1090, section 3.

HN47[↑] "An invalid statute voluntarily enacted and promulgated by the state is not a defense to its obligation to pay interest under Civil Code section 3287, subdivision (a)." (Olson v. Cory (1983) 35 Cal.3d 390, 404 [197 Cal.Rptr. 843, 673 P.2d 720].)

Appeal in Case No. 2 Civil B011941

²² HN44[↑] Code of Civil Procedure section 389, subdivision (a) provides: "A person who is subject to service of process and whose joinder will not deprive the court of jurisdiction over the subject matter of the action shall be joined as a party in the action if (1) in his absence complete relief cannot be accorded among those already parties or (2) he claims an interest relating to the subject of the action and is so situated that the disposition of the action in his absence may (i) as a practical matter impair or impede his ability to protect that interest or (ii) leave any of the persons already parties subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations by reason of his claimed interest. If he has not been so joined, the court shall order that he be made a party."

(Rincon et al. Case)

The procedural history and legal issues raised in the *Rincon et al.* appeal are essentially similar to those discussed in the County of Los Angeles matter.

[*554] County, although not a party to this underlying trial court proceeding, filed a test claim with the Board. All parties agree that County represented the interests of the named respondents here.

The Board action resulted in a finding of state-mandated costs. It further found that Rincon et al. were entitled to reimbursement [*816] in the amount of \$ 39,432. After the Legislature and the Governor, respectively, deleted the funding from the two appropriations bills, S.B. 1261 and A.B. 171, Rincon et al. filed a petition for writ of mandate and declaratory relief. This action was consolidated for hearing in the trial court with the action in B011942 (County of Los Angeles matter). The within judgment was also signed, filed and entered on February 6, 1985. The reimbursement order was directed against the 1984-1985 budget appropriations. State appeals from that judgment.

The court here included a judicial determination that the Board, or its successors, hear and approve the claims of certain other [*58] respondents for costs incurred in connection with the state-mandated program. (Fn. 7, para. 9, *ante.*) This special directive was necessary because the claims of these respondents (petitioners below) have not yet been determined.²³ Since we have ruled that State is barred by the doctrines of waiver and administrative collateral estoppel from raising the state mandate issue, the validity of these claims becomes a question of law susceptible to but one conclusion, and mandamus properly lies. (*County of Sacramento v. Loeb, supra*, 160 Cal.App.3d at p. 453.) This portion of the order also underscores, for the Board's edification, the determination that the statutory restriction on the Board authority to

²³ Responding to the budget control language directing it to refuse to process these claims, the Board declined to hear these matters.

proceed is invalid.²⁴

[**59] Once again, our determinations and conclusions in the County of Los Angeles matter are equally applicable here.

Appeal in Case No. 2 Civil B006078

(Carmel Valley et al.)

Again, the procedural history and legal issues raised in this appeal are essentially similar to those discussed in the County of Los Angeles matter.

County filed a test claim with the Board. All parties agree that the County represented the interests of the named respondents here.

[*555] On December 17, 1980, the Board found that a state mandate existed and that specific amounts of reimbursement were due several respondents totalling \$ 159,663.80. Following the refusal of the Legislature to appropriate funds for reimbursement, Carmel Valley et al. filed a petition for writ of mandate and declaratory relief on January 3, 1983. Judgment was entered on May 23, 1984. The reimbursement order was directed against 1983-1984 budget appropriations.

The judgment differs from the other two because it does not decree a specific reimbursement amount. The trial court determined that even though the Board had approved the claims, the State was not precluded from contesting that determination. The court's reasons [*60] were that the State, in its answer, had denied that the money claimed was actually spent, and that Board approval had not been implemented by subsequent legislation. The court concluded that the reimbursement process, of which the Board action was an intrinsic part, was "aborted."

We disagree with this portion of the court's analysis. The moment S.B. 1261 and A.B. 171

²⁴ Because certain claims have not yet been processed, we assume that the issue of the amount of reimbursement may still be at large. Our record is not clear on this point.

were enacted into law without appropriations, Carmel Valley et al. had exhausted their administrative remedies and were entitled to seek a writ of mandate. At the time of trial, State was barred by the doctrines of waiver and administrative collateral estoppel from contesting the state mandate issue or the amount of reimbursement. The trial court therefore should have rendered a judgment for the amount of reimbursement. Having failed to do so, this fact-finding responsibility falls upon this court. Although we [**817] ordinarily are not equipped to handle this function, the writ of mandate in this case identifies the amount of the approved claims as \$ 159,663.80. We accordingly will amend the judgment to reflect that amount.

The trial court also predicated its judgment for Carmel Valley et al. solely on the [***61] basis of Revenue and Taxation Code section 2207 and former section 2231. In doing so, the court did not have the benefit of the decision in City of Sacramento v. State of California, supra, 156 Cal.App.3d at p. 182.²⁵ That case held that mandates passed after January 1, 1975, must be reimbursed pursuant to article XIII B, section 6 of the California Constitution, but that reimbursement need not commence until July 1, 1980. In light of this rule, we conclude that the trial court's decision ordering reimbursement is also supported by article XIII B, section 6.

[*556] State raises another point specific to this particular appeal. In its answer to the writ petition, State admitted that the local agency expenditures were state mandated. [***62] Consequently, the issue was not contested at the trial court level. However, State vigorously contends here that it is not bound by its trial court admissions because the state mandate issue is purely a question of law.

²⁵The decision in City of Sacramento, supra, was filed just one day before the trial court signed the written order in this case. The Revenue and Taxation Code sections on which the court relied were operational before the costs claimed in this case were incurred.

CA(29)[↑] (29) State is correct in contending that HN48[↑] an appellate court is not limited by the interpretation of statutes given by the trial court. (City of Merced v. State of California, supra, 153 Cal.App.3d at p. 781.) However, State's victory on this point is Pyrrhic. Regardless of how the issue is characterized, State is precluded from contesting the Board findings on appeal because of the independent application of the doctrines of waiver and administrative collateral estoppel. These doctrines would also have applied at the trial court level if State's answer had raised the issue of state mandate in the first instance.

We also reject State's argument, advanced for the first time on appeal, that the executive orders of 1978 initially implement legislation enacted prior to January 1, 1975, and that state reimbursement is therefore discretionary. (Cal. Const., art. XIII B, § 6, subd. (c).) Again, State is barred by the doctrines of waiver and administrative collateral [***63] estoppel from arguing that costs incurred under the executive orders are not subject to reimbursement.

State continues that the Carmel Valley judgment against the Department of Industrial Relations is erroneous. Since the department was never made a party in the suit, nor served with process, the resulting judgment reflects a denial of due process and is in excess of the court's jurisdiction. (See Code Civ. Proc., § 389; fn. 22, ante.)

This assertion is but a variant of the same argument advanced in the County of Los Angeles case, supra, which we rejected as meritless. The department is part of the State of California. (Lab. Code, § 50.) State extensively argued the department's position and even offered into evidence a declaration from the chief of fiscal accounting of the department. As stated earlier, agents of the same government are in privity with each other. (People v. Sims, supra, 32 Cal.3d at p. 487.)

Ross v. Superior Court, supra, 19 Cal.3d at p. 899 demonstrates how, HN49[↑] through the notion of privity, a government agent can be held in contempt for knowingly violating a court order

issued against another agent of the same government. There, [***64] a court in an earlier proceeding had decided that defendant Department of Health and Welfare must pay unlawfully withheld welfare benefits to qualified recipients. The County Board of Supervisors, [*557] who were not parties to this action, knew about the court's order but refused to comply. The Supreme Court affirmed a trial court decision holding the Board in contempt for violating the [**818] order directing payment. The court reasoned that, as an agent of the Department of Health and Welfare, the Board did not collectively or individually need to be named as a party in order to be bound by a court order of which they had actual knowledge.

The determinations and conclusions in the County of Los Angeles case are likewise applicable here.

Modification of Judgments in All Three Appeals

The trial court judgments ordering reimbursement from specific account appropriations were entered many months ago. We will affirm these judgments and thereby validate the trial courts' determination that funds already appropriated for the State Department of Industrial Relations were reasonably available for payment at the time of the courts' orders.

Due to the passage of time, we requested [***65] State at oral argument to confirm whether the appropriations designated in the respective judgments are still available for encumbrance. State's counsel responded by rearguing that the weight of the evidence did not support the trial courts' findings that specific funds were reasonably available for reimbursement. Counsel further hinted that the funds may not actually be available.

We hope that counsel for the State is mistaken. But in order to emphasize our strong and unequivocal determination that the local agency petitioners be promptly reimbursed, we will take judicial notice of the enactment of the 1985-1986 Budget Act (Stats. 1985, ch. 111) and the 1986-1987 Budget Act (Stats. 1986, ch. 186). (*Serrano v. Priest, supra*,

131 Cal.App.3d at p. 197.) Both acts appropriate money for the State Department of Industrial Relations and fund the identical account numbers referred to in the trial courts' judgments. They are:

 [Go to table 1](#)

CA(30)[↑] (30) HN50[↑] An appellate court is [***66] empowered to add a directive that the trial court order be modified to include charging orders against funds appropriated by subsequent budget acts. (*Serrano v. Priest, supra*, 131 Cal.App.3d at pp. 198, 201.) We do so here with respect to all three judgments.

[*558] 2d Civ. B011942 (*County of Los Angeles Case*)

The judgment is modified as follows:

(1) The following sentence is added to paragraph 2: "If the hereinabove described funds are not available for reimbursement, the warrants shall be drawn against funds in the same account numbers enacted in the 1985-86 and 1986-87 Budget Acts."

(2) The words "Fish and Game Code Section 13100" are deleted from paragraph 5.

(3) The peremptory writ of mandate is modified to command the Controller to draw warrants, if necessary, against the same account numbers identified in the judgment as appropriated by the 1985-1986 and 1986-1987 Budget Acts.

As modified, the judgment is affirmed. Respondents to recover costs on appeal.

2d Civ. B011941 (*Rincon et al. Case*)

The judgment is modified as follows:

(1) The following sentence is added to paragraph 2: "If the hereinabove described funds are not available [***67] for reimbursement, the warrants shall be drawn against funds in the same account numbers enacted in the 1985-86 and 1986-87 Budget Acts."

[819]** (2) The peremptory writ of mandate is modified to command the Controller to draw warrants, if necessary, against the same account numbers identified in the judgment as appropriated by the 1985-1986 and 1986-1987 Budget Acts.

As modified, the judgment is affirmed. Respondents to recover costs on appeal.

2d Civ. B006078 (Carmel Valley et al. Case)

The judgment is modified as follows:

[*559] (1) The following sentences are added to paragraph 2: "The reimbursement amounts total \$ 159,663.80. If the hereinabove described funds are not available for reimbursement, the warrants shall be drawn against funds in the same account numbers enacted in the 1985-86 and 1986-87 Budget Acts."

(2) The peremptory writ of mandate is modified to command the Controller to draw warrants, if necessary, against the same account numbers identified in the judgment as appropriated by the 1985-1986 and 1986-1987 Budget Acts.

As modified, the judgment is affirmed. Respondents to recover costs on appeal.

Case Summary

Procedural Posture

Plaintiff cities sought review of a judgment of the Court of Appeal of California, Second Appellate District, Division Three, holding that Cal. Water Code §§ 13241 and 13263 required a regional water control quality board to take into account economic considerations when it adopted water quality standards in a basin plan but not when the board set specific pollutant restrictions in wastewater discharge permits intended to satisfy those standards.

Overview

The cities owned three treatment plants that discharged wastewater under National Pollutant Discharge Elimination System permits issued by the regional board. The court held that whether the regional board should have complied with Cal. Water Code §§ 13263 and 13241 of California's Porter-Cologne Water Quality Control Act, Cal. Water Code § 13000 et seq., by taking into account "economic considerations," such as the costs the permit holder would incur to comply with the numeric pollutant restrictions set out in the permits depended on whether those restrictions met or exceeded the requirements of the federal Clean

Water Act, 33 U.S.C.S. § 1251 et seq. To comport with the principles of federal supremacy, California law could not authorize California's regional boards to allow the discharge of pollutants into the navigable waters of the United States in concentrations that would exceed the mandates of federal law. The federal Clean Water Act did not prohibit a state, when imposing effluent limitations that were more stringent than required by federal law, from taking into account the economic effects of doing so.

Outcome

The court affirmed the judgment of the court of appeal, reinstating the wastewater discharge permits to the extent that the specified numeric limitations on chemical pollutants were necessary to satisfy federal Clean Water Act requirements for treated wastewater. The court remanded for further proceedings to determine whether the pollutant limitations in the permits met or exceeded federal standards.

HN3[↓] Clean Water Act, Water Quality Standards

The Clean Water Act, 33 U.S.C.S. § 1251 et seq., provides for two sets of water quality measures. Effluent limitations are promulgated by the Environmental Protection Agency and restrict the quantities, rates, and concentrations of specified substances which are discharged from point

sources. 33 U.S.C.S. §§ 1311, 1314. Water quality standards are, in general, promulgated by the states and establish the desired condition of a waterway. 33 U.S.C.S. § 1313. These standards supplement effluent limitations so that numerous point sources, despite individual compliance with effluent limitations, may be further regulated to prevent water quality from falling below acceptable levels.

Governments > Legislation > Interpretation

HN9 **Legislation, Interpretation**

When construing any statute, the reviewing court's task is to determine the legislature's intent when it enacted the statute so that the court may adopt the construction that best effectuates the purpose of the law. In doing this, the court looks to the statutory language, which ordinarily is the most reliable indicator of legislative intent.

Environmental Law > ... > Enforcement > Discharge Permits > Effluent Limitations

Environmental Law > Water Quality > General Overview

HN10 **Discharge Permits, Effluent Limitations**

Cal. Water Code § 13263 directs regional boards, when issuing wastewater discharge permits, to take into account various factors including those set out in Cal. Water Code § 13241. Listed among the § 13241 factors is economic considerations. Cal. Water Code § 13241(d).

Environmental Law > ... > Enforcement > Discharge Permits > Effluent Limitations

Environmental Law > Water Quality > General Overview

HN11 **Discharge Permits, Effluent Limitations**

Cal. Water Code § 13377 specifies that wastewater discharge permits issued by California's regional boards must meet the federal standards set by federal law. In effect, § 13377 forbids a regional board's consideration of any economic hardship on the part of the permit holder if doing so would result in the dilution of the requirements set by Congress in the Clean Water Act. That act prohibits the discharge of pollutants into the navigable waters of the United States unless there is compliance with federal law, 33 U.S.C.S. § 1311(a), and publicly operated wastewater treatment plants must comply with the act's clean water standards, regardless of cost. 33 U.S.C.S. §§ 1311(a), (b)(1)(B), (C), 1342(a)(1), (3).

Constitutional Law > Supremacy Clause > General Overview

Environmental Law > Water Quality > General Overview

HN12 **Constitutional Law, Supremacy Clause**

Because Cal. Water Code § 13263 cannot authorize what federal law forbids, it cannot authorize a regional board, when issuing a wastewater discharge permit, to use compliance costs to justify pollutant restrictions that do not comply with federal clean water standards. Such a construction of § 13263 would not only be inconsistent with federal law, it would also be inconsistent with the Legislature's declaration in Cal. Water Code § 13377 that all discharged wastewater must satisfy federal standards. Moreover, under the federal Constitution's Supremacy Clause, U.S. Const. art. VI, cl. 2, a state law that conflicts with federal law is without effect. To comport with the principles of federal supremacy, California law cannot authorize the state's regional boards to allow the discharge of pollutants into the navigable waters of the United

States in concentrations that would exceed the mandates of federal law.

Act > Enforcement > General Overview

HN13 Discharge Permits, Effluent Limitations

The federal Clean Water Act, 33 U.S.C.S. § 1251 et seq., reserves to the states significant aspects of water quality policy, 33 U.S.C.S. § 1251(b), and it specifically grants the states authority to "enforce any effluent limitation" that is not "less stringent" than the federal standard, 33 U.S.C.S. § 1370. It does not prescribe or restrict the factors that a state may consider when exercising this reserved authority, and thus it does not prohibit a state when imposing effluent limitations that are more stringent than required by federal law—from taking into account the economic effects of doing so.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court ruled that California law required a regional water quality control board to weigh the economic burden on a wastewater treatment facility against the expected environmental benefits of reducing pollutants in the wastewater discharge. The cities owned three treatment plants that discharged wastewater under National Pollutant Discharge Elimination System permits issued by the regional board. (Superior Court of Los Angeles

County, Nos. BS060960 and BS060957, Dzintra I. Janavs, Judge.) The Court of Appeal, Second Dist., Div. Three, Nos. B150912, B151175 and B152562, concluded that Wat. Code, §§ 13241 and 13263, required a regional board to take into account "economic considerations" when it adopted water quality standards in a basin plan but not when the regional board set specific pollutant restrictions in wastewater discharge permits intended to satisfy those standards.

The Supreme Court affirmed the judgment of the Court of Appeal, reinstating the wastewater discharge permits in part and remanding for further proceedings. The court held that whether the regional board should have complied with Wat. Code, §§ 13263 and 13241, of California's Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 et seq., by taking into account "economic considerations," such as the costs the permit holder would incur to comply with the numeric pollutant restrictions set out in the permits, depended on whether those restrictions met or exceeded the requirements of the federal Clean Water Act, 33 U.S.C. § 1251 et seq. To comport with the principles of federal supremacy, California law could not authorize California's regional boards to allow the discharge of pollutants into the navigable waters of the United States in concentrations that would exceed the mandates of federal law. The federal Clean Water Act did not prohibit a state, when imposing effluent limitations that were more stringent than required by **[*614]** federal law, from taking into account the economic effects of doing so. (Opinion by Kennard, J., with George, C. J., Baxter, Werdegar, Chin, and Moreno, JJ., concurring. Concurring opinion by Brown, J. (see p. 629).)

Headnotes

CA(1) (1)

**Pollution and Conservation Laws § 5—Water—
"Basin Plans."**

Whereas the State Water Resources Control Board establishes statewide policy for water quality control, Wat. Code, § 13140, the regional boards formulate and adopt water quality control plans for all areas within a region, Wat. Code, § 13240. Under Wat. Code, § 13050, subd. (j), the regional boards' water quality plans, called "basin plans," must address the beneficial uses to be protected as well as water quality objectives, and they must establish a program of implementation. Basin plans must be consistent with state policy for water quality control under Wat. Code, § 13240.

CA(2)[↓] (2)

Pollution and Conservation Laws § 5—Water— Federal and State Standards.

Under 33 U.S.C. § 1370, of the federal Clean Water Act, 33 U.S.C. § 1251 et seq., each state is free to enforce its own water quality laws so long as its effluent limitations are not less stringent than those set out in the Clean Water Act.

CA(3)[↓] (3)

Pollution and Conservation Laws § 5—Water— Federal and State Standards.

The Clean Water Act, 33 U.S.C. § 1251 et seq., provides for two sets of water quality measures. Pursuant to 33 U.S.C. §§ 1311 and 1314, effluent limitations are promulgated by the Environmental Protection Agency and restrict the quantities, rates, and concentrations of specified substances which are discharged from point sources. Water quality standards are, in general, promulgated by the states and establish the desired condition of a waterway under 33 U.S.C. § 1313. These standards supplement effluent limitations so that numerous point sources, despite individual compliance with effluent limitations, may be further regulated to prevent water quality from falling below acceptable levels.

CA(4)[↓] (4)

Pollution and Conservation Laws § 5—Water— Federal and State Standards.

The Environmental Protection Agency (EPA) provides states with substantial guidance in the drafting of water quality standards. Moreover, the Clean Water Act, 33 U.S.C. § 1251 et seq., requires, inter alia, that state authorities periodically review water quality [***615**] standards and secure the EPA's approval of any revisions in the standards. If the EPA recommends changes to the standards and the state fails to comply with that recommendation, 33 U.S.C. § 1313(c), authorizes the EPA to promulgate water quality standards for the state.

CA(5)[↓] (5)

Pollution and Conservation Laws § 5—Water— National Pollutant Discharge Elimination System.

Part of the federal Clean Water Act, 33 U.S.C. § 1251 et seq., is the National Pollutant Discharge Elimination System (NPDES), the primary means for enforcing effluent limitations and standards under the Clean Water Act. Title 33 U.S.C. § 1342(a), (b), of the NPDES sets out the conditions under which the federal Environmental Protection Agency or a state with an approved water quality control program can issue permits for the discharge of pollutants in wastewater. Under California law, Wat. Code, § 13374, wastewater discharge requirements established by the regional boards are the equivalent of the NPDES permits required by federal law.

CA(6)[↓] (6)

Statutes § 21—Construction—Legislative Intent.

When construing any statute, the reviewing court's task is to determine the Legislature's intent when it

enacted the statute so that the court may adopt the construction that best effectuates the purpose of the law. In doing this, the court looks to the statutory language, which ordinarily is the most reliable indicator of legislative intent.

CA(7)[↓] (7)

Pollution and Conservation Laws § 5—Water— Wastewater Discharge Permits—Economic Considerations.

Wat. Code, § 13263, directs regional boards, when issuing wastewater discharge permits, to take into account various factors, including those set out in Wat. Code, § 13241. Listed among the § 13241 factors is economic considerations, in § 13241, subd. (d).

CA(8)[↓] (8)

Pollution and Conservation Laws § 5—Water— Wastewater Discharge Permits—Economic Considerations.

Wat. Code, § 13377, specifies that wastewater discharge permits issued by California's regional boards must meet the federal standards set by federal law. In effect, § 13377 forbids a regional board's consideration of any economic hardship on the part of the permit holder if doing so would result in the dilution of the requirements set by Congress in the Clean Water Act. That act prohibits the discharge of pollutants into the navigable waters of [*616] the United States unless there is compliance with federal law (33 U.S.C. § 1311(a)), and publicly operated wastewater treatment plants must comply with the act's clean water standards under 33 U.S.C. §§ 1311(a), (b)(1)(B) and (C), 1342(a)(1) and (3), regardless of cost.

CA(9)[↓] (9)

Pollution and Conservation Laws § 5—Water— Wastewater Discharge Permits—Economic

Considerations.

Because Wat. Code, § 13263, cannot authorize what federal law forbids, it cannot authorize a regional board, when issuing a wastewater discharge permit, to use compliance costs to justify pollutant restrictions that do not comply with federal clean water standards. Such a construction of § 13263 would not only be inconsistent with federal law, it would also be inconsistent with the Legislature's declaration in Wat. Code, § 13377, that all discharged wastewater must satisfy federal standards. Moreover, under the federal Constitution's supremacy clause, U.S. Const., art. VI, a state law that conflicts with federal law is without effect. To comport with the principles of federal supremacy, California law cannot authorize the state's regional boards to allow the discharge of pollutants into the navigable waters of the United States in concentrations that would exceed the mandates of federal law.

CA(10)[↓] (10)

Pollution and Conservation Laws § 5—Water— Federal and State Standards.

The federal Clean Water Act, 33 U.S.C. § 1251 et seq., reserves to the states significant aspects of water quality policy under 33 U.S.C. § 1251(b), and it specifically grants the states authority to enforce any effluent limitation that is not less stringent than the federal standard under 33 U.S.C. § 1370. It does not prescribe or restrict the factors that a state may consider when exercising this reserved authority, and thus it does not prohibit a state—when imposing effluent limitations that are more stringent than required by federal law—from taking into account the economic effects of doing so. Thus, a regional board, when issuing a wastewater discharge permit, may not consider economic factors to justify imposing pollutant restrictions that are less stringent than the applicable federal standards require. When, however, a regional board is considering whether to make the pollutant

restrictions in a wastewater discharge permit more stringent than federal law requires, California law allows the board to take into account economic factors, including the wastewater discharger's cost of compliance.

Opinion by: KENNARD [**864]

Opinion

KENNARD, J.—Federal law establishes national water quality standards but allows the states to enforce their own water quality laws so long as they comply with federal standards. Operating within this federal-state framework, California's nine Regional Water Quality Control Boards establish water quality policy. They also issue permits for the discharge of treated wastewater; these permits specify the maximum allowable concentration of chemical [****4] pollutants in the discharged wastewater.

The question here is this: When a regional board issues a permit to a wastewater treatment facility, must the board take into account the facility's costs of complying with the board's restrictions on pollutants in the wastewater to be discharged? The trial court ruled that California law required a regional board to weigh the economic burden on the facility against the expected environmental benefits of reducing pollutants in the wastewater discharge. The Court of Appeal disagreed. On petitions by the municipal operators of three wastewater treatment facilities, we granted review.

We reach the following conclusions: Because both California law and federal law require regional boards to comply with federal clean water standards, and because the supremacy clause of the United States Constitution requires state law to yield to federal law, a regional board, when issuing a wastewater discharge permit, may not consider economic factors to justify imposing pollutant restrictions that are *less stringent* than the applicable federal standards require. When, however, a regional board is considering whether to make the pollutant restrictions in [****5] a wastewater discharge permit *more stringent* than federal law requires, California law allows the board to take into account economic [**865] factors, including the wastewater discharger's cost of compliance. We remand this case for further proceedings to determine whether the pollutant

limitations in the permits challenged here meet or exceed federal standards.

[*619] I. Statutory Background

The quality of our nation's waters is governed by a “complex statutory and regulatory scheme ... that implicates both federal and state administrative responsibilities.” (*PUD No. 1 of Jefferson County v. Washington Department of Ecology* (1994) 511 U.S. 700, 704 [128 L. Ed. 2d 716, 114 S. Ct. 1900].) We first discuss California law, then federal law.

A. California Law

In California, the controlling law is the Porter-Cologne Water Quality Control Act (Porter-Cologne Act), which was enacted in 1969. (Wat. Code, § 13000 et seq., added by Stats. 1969, ch. 482, § 18, p. 1051.)¹ Its goal is “to attain the highest water [***307] quality which is reasonable, considering all demands being made and to be made on those waters and the total values involved, beneficial and [****6] detrimental, economic and social, tangible and intangible.” (§ 13000.) The task of accomplishing this belongs to the State Water Resources Control Board (State Board) and the nine Regional Water Quality Control Boards; together the State Board and the regional boards comprise “the principal state agencies with primary responsibility for the coordination and control of water quality.” (§ 13001.) As relevant here, one of those regional boards oversees the Los Angeles region (the Los Angeles Regional Board).²

¹ Further undesignated statutory references are to the Water Code.

² The Los Angeles water region “comprises all basins draining into the Pacific Ocean between the southeasterly boundary, located in the westerly part of Ventura County, of the watershed of Rincon Creek and a line which coincides with the southeasterly boundary of Los Angeles County from the ocean to San Antonio Peak and follows thence the divide between San Gabriel River and Lytle Creek drainages to the divide between Sheep Creek and San Gabriel River

[****7] CA(1)[↑] (1) HN1[↑] Whereas the State Board establishes statewide policy for water quality control (§ 13140), the regional boards “formulate and adopt water quality control plans for all areas within [a] region” (§ 13240). The regional boards’ water quality plans, called “basin plans,” must address the beneficial uses to be protected as well as water quality objectives, and they must establish a program of implementation. (§ 13050, subd. (j).) Basin plans must be consistent with “state policy for water quality control.” (§ 13240.)

B. Federal Law

In 1972, Congress enacted amendments (Pub.L. No. 92-500 (Oct. 18, 1972) 86 Stat. 816) to the Federal Water Pollution Control Act (33 U.S.C. § 1251 et seq.), which, as amended in 1977, is commonly known as the Clean [*620] Water Act. The Clean Water Act is a “comprehensive water quality statute designed to ‘restore and maintain the chemical, physical, and biological integrity of the Nation’s waters.’” (*PUD No. 1 of Jefferson County v. Washington Dept. of Ecology, supra*, 511 U.S. at p. 704, quoting 33 U.S.C. § 1251(a).) The act’s national goal was to eliminate by the year 1985 [****8] “the discharge of pollutants into the navigable waters” of the United States. (33 U.S.C. § 1251(a)(1).) To accomplish this goal, the act established “effluent limitations,” which are restrictions on the “quantities, rates, and concentrations of chemical, physical, biological, and other constituents”; these effluent limitations allow the discharge of pollutants only when the water has been satisfactorily treated to conform with federal water quality standards. (33 U.S.C. §§ 1311, 1362(11).)

CA(2)[↑] (2) HN2[↑] Under the federal Clean Water Act, each state is free to enforce its own water quality laws so long as its effluent limitations are not “less stringent” than those set out in the Clean Water Act. (33 U.S.C. § 1370.) This led the

California Legislature in 1972 to amend the state’s Porter-Cologne Act “to ensure consistency with the requirements for state programs implementing the Federal Water Pollution Control Act.” (§ 13372.)

[**866] CA(3)[↑] (3) Roughly a dozen years ago, the United States Supreme Court, in *Arkansas v. Oklahoma* (1992) 503 U.S. 91 [117 L. Ed. 2d 239, 112 S. Ct. 1046], described the distinct roles of the state and federal agencies [****9] in enforcing water quality: “The Clean Water Act anticipates a partnership between the States and the Federal Government, animated by a shared objective: ‘to restore and maintain the chemical, physical, and biological integrity of the Nation’s waters.’ 33 U.S.C. § 1251(a). Toward [***308] this end, HN3[↑] [the Clean Water Act] provides for two sets of water quality measures. ‘Effluent limitations’ are promulgated by the [Environmental Protection Agency (EPA)] and restrict the quantities, rates, and concentrations of specified substances which are discharged from point sources.³ See §§ 1311, 1314. ‘[W]ater quality standards’ are, in general, promulgated by the States and establish the desired condition of a waterway. See § 1313. These standards supplement effluent limitations ‘so that numerous point sources, despite individual compliance with effluent limitations, may be further regulated to prevent water quality from falling below acceptable levels.’ *EPA v. California ex rel. State Water Resources Control Bd.*, 426 U.S. 200, 205, n. 12 [48 L. Ed. 2d 578, 96 S. Ct. 2022, 2025, n. 12] (1976).

[****10] [*621] CA(4)[↑] (4) “HN5[↑] The EPA provides States with substantial guidance in the drafting of water quality standards. See generally 40 CFR pt. 131 (1991) (setting forth model water quality standards). Moreover, [the Clean Water Act] requires, *inter alia*, that state authorities periodically review water quality

drainages.” (§ 13200, subd. (d).)

³ A “HN4[↑] point source” is “any discernible, confined and discrete conveyance” and includes “any pipe, ditch, channel ... from which pollutants ... may be discharged.” (33 U.S.C. § 1362 (14).)

standards and secure the EPA's approval of any revisions in the standards. If the EPA recommends changes to the standards and the State fails to comply with that recommendation, the Act authorizes the EPA to promulgate water quality standards for the State. 33 U.S.C. § 1313(c).” (*Arkansas v. Oklahoma, supra*, 503 U.S. at p. 101.)

CA(5)[↑] (5) HN6[↑] Part of the federal Clean Water Act is the National Pollutant Discharge Elimination System (NPDES), “[t]he primary means” for enforcing effluent limitations and standards under the Clean Water Act. (*Arkansas v. Oklahoma, supra*, 503 U.S. at p. 101.) The NPDES sets out the conditions under which the federal EPA or a state with an approved water quality control program can issue permits for the discharge of pollutants in wastewater. (33 U.S.C. § 1342(a) & (b).) In California, wastewater [****11] discharge requirements established by the regional boards are the equivalent of the NPDES permits required by federal law. (§ 13374.)

With this federal and state statutory framework in mind, we now turn to the facts of this case.

II. Factual Background

This case involves three publicly owned treatment plants that discharge wastewater under NPDES permits issued by the Los Angeles Regional Board.

The City of Los Angeles owns and operates the Donald C. Tillman Water Reclamation Plant (Tillman Plant), which serves the San Fernando Valley. The City of Los Angeles also owns and operates the Los Angeles-Glendale Water Reclamation Plant (Los Angeles-Glendale Plant), which processes wastewater from areas within the City of Los Angeles and the independent cities of Glendale and Burbank. Both the Tillman Plant and the Los Angeles-Glendale Plant discharge wastewater directly into the Los Angeles River, now a concrete-lined flood control channel that runs through the City of Los Angeles, ending at the Pacific Ocean. The State Board and the Los

Angeles Regional Board consider the Los Angeles River to be a navigable water of the United States for purposes of the federal Clean Water [****12] Act.

The third plant, the Burbank Water Reclamation Plant (Burbank Plant), is owned and operated by the City of Bur [***309] bank, serving residents and businesses within that city. The Burbank Plant discharges wastewater into the Burbank Western Wash, which drains into the Los Angeles River.

[*622] All three plants, which together process hundreds of millions of gallons of sewage [**867] each day, are tertiary treatment facilities; that is, the treated wastewater they release is processed sufficiently to be safe not only for use in watering food crops, parks, and playgrounds, but also for human body contact during recreational water activities such as swimming.

In 1998, the Los Angeles Regional Board issued renewed NPDES permits to the three wastewater treatment facilities under a basin plan it had adopted four years earlier for the Los Angeles River and its estuary. That 1994 basin plan contained general narrative criteria pertaining to the existing and potential future beneficial uses and water quality objectives for the river and estuary.⁴ The narrative criteria included municipal and domestic water supply, swimming and other recreational water uses, and fresh water habitat. The plan further provided: [****13] “All waters shall be maintained free of toxic substances in concentrations that are toxic to, or that produce detrimental physiological responses in human, plant, animal, or aquatic life.” The 1998 permits sought to reduce these narrative criteria to specific numeric requirements setting daily maximum limitations for more than 30 pollutants present in

⁴ This opinion uses the terms “narrative criteria” or descriptions, and “numeric criteria” or effluent limitations. Narrative criteria are broad statements of desirable water quality goals in a water quality plan. For example, “no toxic pollutants in toxic amounts” would be a narrative description. This contrasts with numeric criteria, which detail specific pollutant concentrations, such as parts per million of a particular substance.

the treated wastewater, measured in milligrams or micrograms per liter of effluent.⁵

[****14] The Cities of Los Angeles and Burbank (Cities) filed appeals with the State Board, contending that achievement of the numeric requirements would be too costly when considered in light of the potential benefit to water quality, and that the pollutant restrictions in the NPDES permits were unnecessary to meet the narrative criteria described in the basin plan. The State Board summarily denied the Cities' appeals.

Thereafter, the Cities filed petitions for writs of administrative mandate in the superior court. They alleged, among other things, that the Los Angeles Regional Board failed to comply with sections 13241 and 13263, part of California's Porter-Cologne Act, because it did not consider the economic burden on the Cities in having to reduce substantially the pollutant content of their discharged wastewater. They also alleged that compliance with the pollutant restrictions set out in the NPDES permits issued by the regional [*623] board would greatly increase their costs of treating the wastewater to be discharged into the Los Angeles River. According to the City of Los Angeles, its compliance costs would exceed \$ 50 million annually, representing more than 40 percent of its entire budget [****15] for operating its four wastewater treatment plants and its sewer system; the City of Burbank estimated its added costs at over \$ 9 million annually, a nearly 100 percent increase above its \$ 9.7 million annual budget for wastewater treatment.

[**310] The State Board and the Los Angeles Regional Board responded that sections 13241 and 13263 do not require consideration of costs of compliance when a regional board issues a NPDES permit that restricts the pollutant content of discharged wastewater.

⁵ For example, the permits for the Tillman and Los Angeles-Glendale Plants limited the amount of fluoride in the discharged wastewater to 2 milligrams per liter and the amount of mercury to 2.1 micrograms per liter.

The trial court stayed the contested pollutant restrictions for each of the three wastewater treatment plants. It then ruled that sections 13241 and 13263 of California's Porter-Cologne Act required a regional board to consider costs of compliance not only when it adopts a basin or water quality plan but also when, as here, it issues an NPDES permit setting the allowable pollutant content of a treatment plant's discharged wastewater. The court found no evidence that the Los Angeles Regional Board had considered economic factors at either stage. Accordingly, the trial court granted the Cities' petitions for writs of mandate, and it ordered the Los Angeles Regional Board to vacate the contested restrictions [****16] on pollutants in the wastewater discharge permits issued to the three municipal plants here and to conduct hearings [**868] to consider the Cities' costs of compliance before the board's issuance of new permits. The Los Angeles Regional Board and the State Board filed appeals in both the Los Angeles and Burbank cases.⁶

The Court of Appeal, after consolidating the cases, reversed the trial court. It concluded that sections 13241 and 13263 require a regional board to take into account "economic [****17] considerations" when it adopts water quality standards in a basin plan but not when, as here, the regional board sets specific pollutant restrictions in wastewater discharge permits intended to satisfy those standards. We granted the Cities' petition for review.

[*624] III. Discussion

⁶ Unchallenged on appeal and thus not affected by our decision are the trial court's rulings that (1) the Los Angeles Regional Board failed to show how it derived from the narrative criteria in the governing basin plan the specific numeric pollutant limitations included in the permits; (2) the administrative record failed to support the specific effluent limitations; (3) the permits improperly imposed daily maximum limits rather than weekly or monthly averages; and (4) the permits improperly specified the manner of compliance.

A. Relevant State Statutes

The California statute governing the issuance of *wastewater permits* by a regional board is section 13263, which was enacted in 1969 as part of the Porter-Cologne Act. (See *ante*, at p. 619.) Section 13263 provides in relevant part: “**HN7**[↑] *The regional board, after any necessary hearing, shall prescribe requirements as to the nature of any proposed discharge [of wastewater]. The requirements shall implement any relevant water quality control plans that have been adopted, and shall take into consideration the beneficial uses to be protected, the water quality objectives reasonably required for that purpose, other waste discharges, the need to prevent nuisance, and the provisions of Section 13241.*” (§ 13263, subd. (a), italics added.)

Section 13241 states: “**HN8**[↑] Each regional board shall establish such water quality objectives in water quality control [****18] plans as in its judgment will ensure the reasonable protection of beneficial uses and the prevention of nuisance; however, it is recognized that it may be possible for the quality of water to be changed to some degree without unreasonably affecting beneficial uses. Factors to be considered by a regional board in establishing water quality objectives shall include, but not necessarily be limited to, all of the following:

[**311] “(a) Past, present, and probable future beneficial uses of water.

“(b) Environmental characteristics of the hydrographic unit under consideration, including the quality of water available thereto.

“(c) Water quality conditions that could reasonably be achieved through the coordinated control of all factors which affect water quality in the area.

“(d) *Economic considerations.*

“(e) The need for developing housing within the region.

“(f) The need to develop and use recycled water.” (Italics added.)

The Cities here argue that section 13263's express reference to section 13241 requires the Los Angeles Regional Board to consider section 13241's listed factors, notably “[e]conomic considerations,” before issuing NPDES permits requiring specific pollutant reductions [****19] in discharged effluent or treated wastewater.

[*625] Thus, at issue is language in section 13263 stating that when a regional board “prescribe[s] requirements as to the nature of any proposed discharge” of treated wastewater it must “take into consideration” certain factors including “the provisions of Section 13241.” According to the Cities, this statutory language requires that a regional board make an independent evaluation of the section 13241 factors, including “economic considerations,” before restricting the pollutant content in an NPDES permit. This was the view expressed in the trial court's ruling. The Court of Appeal rejected that view. It held that a regional board need consider the section 13241 factors only when it adopts a basin or water quality plan, but not when, as in this case, it issues a wastewater discharge [**869] permit that sets specific numeric limitations on the various chemical pollutants in the wastewater to be discharged. As explained below, the Court of Appeal was partly correct.

B. Statutory Construction

CA(6)[↑] (6) **HN9**[↑] When construing any statute, our task is to determine the Legislature's intent when it enacted the statute “so that we may adopt the construction that [****20] best effectuates the purpose of the law.” (*Hassan v. Mercy American River Hospital* (2003) 31 Cal.4th 709, 715 [3 Cal. Rptr. 3d 623, 74 P.3d 726]; see *Esberg v. Union Oil Co.* (2002) 28 Cal.4th 262, 268 [121 Cal. Rptr. 2d 203, 47 P.3d 1069].) In doing this, we look to the statutory language, which ordinarily is “the most reliable indicator of

legislative intent.” (*Hassan, supra*, at p. 715.)

CA(7)[↑] (7) As mentioned earlier, our Legislature's 1969 enactment of the Porter-Cologne Act, which sought to ensure the high quality of water in this state, predated the 1972 enactment by Congress of the precursor to the federal Clean Water Act. Included in California's original Porter-Cologne Act were sections 13263 and 13241. **HN10[↑]** Section 13263 directs regional boards, when issuing wastewater discharge permits, to take into account various factors, including those set out in section 13241. Listed among the section 13241 factors is “[e]conomic considerations.” (§ 13241, subd. (d).) The plain language of sections 13263 and 13241 indicates the Legislature's intent in 1969, when these statutes were enacted, that a regional board consider the cost of compliance when setting effluent limitations in a wastewater discharge permit.

Our ******21** construction of sections 13263 and 13241 does not end with their plain statutory language, however. We must also analyze them in the context of the statutory scheme of which they are a part. (*State Farm Mutual Automobile Ins. Co. v. Garamendi* (2004) 32 Cal.4th 1029, 1043 [**12****312**] Cal. Rptr. 3d 343, 88 P.3d 71[.] Like sections 13263 and 13241, section 13377 is part of the Porter-Cologne Act. But unlike the former two statutes, section 13377 was ***626** not enacted until 1972, shortly after Congress, through adoption of the Federal Water Pollution Control Act Amendments, established a comprehensive water quality policy for the nation.

CA(8)[↑] (8) **HN11[↑]** Section 13377 specifies that wastewater discharge permits issued by California's regional boards must meet the federal standards set by federal law. In effect, section 13377 forbids a regional board's consideration of any economic hardship on the part of the permit holder if doing so would result in the dilution of the requirements set by Congress in the Clean Water Act. That act prohibits the discharge of pollutants into the navigable waters of the United States

unless there is compliance with federal law (33 U.S.C. § 1311(a)), and publicly operated wastewater ******22** treatment plants such as those before us here must comply with the act's clean water standards, regardless of cost (see *id.*, §§ 1311(a), (b)(1)(B) & (C), 1342(a)(1) & (3)). **HN12[↑]** **CA(9)[↑]** (9) Because section 13263 cannot authorize what federal law forbids, it cannot authorize a regional board, when issuing a wastewater discharge permit, to use compliance costs to justify pollutant restrictions that do not comply with federal clean water standards. **7****24** Such a construction of section 13263 would not only be inconsistent with federal law, it would also be inconsistent with the Legislature's ****870** declaration in section 13377 that all discharged wastewater must satisfy federal standards. ⁸ This was also the conclusion of the Court of Appeal. Moreover, under the federal Constitution's supremacy clause (art. VI), a state law that conflicts with federal law is “ ‘without

⁷ The concurring opinion misconstrues both state and federal clean water law when it describes the issue here as “whether the Clean Water Act prevents or prohibits the regional water board from considering economic factors to justify pollutant restrictions *that meet the clean water standards in more cost-effective and economically efficient ways.*” (Conc. opn. of Brown, J., *post*, at p. 629, some italics added.) This case has nothing to do with meeting federal standards in more cost effective and economically efficient ways. State law, as we have said, allows a regional board to consider a permit holder's compliance cost to *relax* pollutant concentrations, as measured by numeric standards, for pollutants in a wastewater discharge permit. (§§ 13241 & 13263.) Federal law, by contrast, as stated above in the text, “prohibits the discharge of pollutants into the navigable waters of the United States unless there is compliance with federal law (33 U.S.C. § 1311(a)), and publicly operated wastewater treatment plants such as those before us here must comply with the [federal] act's *clean water standards, regardless of cost* (see *id.*, §§ 1311(a), (b)(1)(B) & (C), 1342(a)(1) & (3).” (Italics added.)

⁸ As amended in 1978, section 13377 provides for the issuance of waste discharge permits that comply with federal clean water law “together with any more stringent effluent standards or limitations necessary to implement water quality control plans, or for the protection of beneficial uses, or to prevent nuisance.” We do not here decide how this provision would affect the cost-consideration requirements of sections 13241 and 13263 when more stringent effluent standards or limitations in a permit are justified for some reason independent of compliance with federal law.

effect.’ ” (*Cipollone v. Liggett Group, Inc.* (1992) 505 U.S. 504, 516 [120 L. Ed. 2d 407, 112 S. Ct. 2608]; see Dowhal v. SmithKline Beecham Consumer Healthcare (2004) 32 Cal.4th 910, 923 [12 Cal. Rptr. 3d 262, 88 P.3d 1].) To comport with the principles of federal supremacy, California law cannot authorize this [*627] state's regional boards to allow the discharge of pollutants [****23] into the navigable waters of the United States in concentrations that would exceed the mandates of federal law.

[***313] Thus, in this case, whether the Los Angeles Regional Board should have complied with sections 13263 and 13241 of California's Porter-Cologne Act by taking into account “economic considerations,” such as the costs the permit holder will incur to comply with the numeric pollutant restrictions set out in the permits, depends on whether those restrictions meet or exceed the requirements of the federal Clean Water Act. We therefore remand this matter for the trial court to resolve that issue.

C. Other Contentions

The Cities [****25] argue that requiring a regional board at the wastewater discharge permit stage to consider the permit holder's cost of complying with the board's restrictions on pollutant content in the water is consistent with federal law. In support, the Cities point to certain provisions of the federal Clean Water Act. They cite section 1251(a)(2) of title 33 United States Code, which sets, as a national goal “*wherever attainable*,” an interim goal for water quality that protects fish and wildlife, and section 1313(c)(2)(A) of the same title, which requires consideration, among other things, of waters' “*use and value for navigation*” when revising or adopting a “water quality standard.” (Italics added.) These two federal statutes, however, pertain not to permits for wastewater discharge, at issue here, but to establishing water quality standards, not at issue here. Nothing in the federal Clean Water Act

suggests that a state is free to disregard or to weaken the federal requirements for clean water when an NPDES permit holder alleges that compliance with those requirements will be too costly.

CA(10)[↑] (10) At oral argument, counsel for amicus curiae National Resources Defense Council, which argued on [****26] behalf of California's State Board and regional water boards, asserted that the federal Clean Water Act incorporates state water policy into federal law, and that therefore a regional board's consideration of economic factors to justify greater pollutant concentration in discharged wastewater would conflict with the federal act even if the specified pollutant restrictions were not less stringent than those required under federal law. We are not persuaded. **HN13[↑]** The federal Clean Water Act reserves to the states significant aspects of water quality policy (33 U.S.C. § 1251(b)), and it specifically grants the states authority to “enforce any effluent limitation” that is not “*less stringent*” than the federal standard (33 U.S.C. § 1370, italics added). It does not prescribe or restrict the factors that a state may consider when exercising this reserved authority, and thus it does not prohibit [*628] a state—when imposing effluent limitations that are *more stringent* than required by federal law—from taking into account the economic effects of doing so.

Also at oral argument, counsel for the Cities asserted that if the three municipal wastewater treatment facilities ceased [****27] releasing their treated wastewater into the concrete channel that makes up the Los Angeles River, it would (other than during the rainy season) contain no water at all, and thus would not be a “navigable water” of the [**871] United States subject to the Clean Water Act. (See *Solid Waste Agency v. United States Army Corps of Engineers* (2001) 531 U.S. 159, 172 [148 L. Ed. 2d 576, 121 S. Ct. 675] [“The term ‘navigable’ has at least the import of showing us what Congress had in mind as its authority for enacting the CWA: its traditional jurisdiction over waters that were or had been navigable in fact or

which could reasonably be so made.”].) It is unclear when the Cities first raised this issue. The Court of Appeal did not discuss it in its opinion, and the Cities did not seek rehearing on this ground. (See Cal. Rules of Court, rule [***314] 28(c)(2).) Concluding that the issue is outside our grant of review, we do not address it.

Conclusion

Through the federal Clean Water Act, Congress has regulated the release of pollutants into our national waterways. The states are free to manage their own water quality programs so long as they do not compromise the federal clean [****28] water standards. When enacted in 1972, the goal of the Federal Water Pollution Control Act Amendments was to *eliminate* by the year 1985 the discharge of pollutants into the nation's navigable waters. In furtherance of that goal, the Los Angeles Regional Board indicated in its 1994 basin plan on water quality the intent, insofar as possible, to remove from the water in the Los Angeles River toxic substances in amounts harmful to humans, plants, and aquatic life. What is not clear from the record before us is whether, in limiting the chemical pollutant content of wastewater to be discharged by the Tillman, Los Angeles-Glendale, and Burbank wastewater treatment facilities, the Los Angeles Regional Board acted only to implement requirements of the federal Clean Water Act or instead imposed pollutant limitations that exceeded the federal requirements. This is an issue of fact to be resolved by the trial court.

Disposition

We affirm the judgment of the Court of Appeal reinstating the wastewater discharge permits to the extent that the specified numeric limitations on chemical pollutants are necessary to satisfy federal Clean Water Act requirements for treated wastewater. [****29] The Court of Appeal is directed to remand this [*629] matter to the trial court to decide whether any numeric limitations, as

described in the permits, are “more stringent” than required under federal law and thus should have been subject to “economic considerations” by the Los Angeles Regional Board before inclusion in the permits.

George, C. J., Baxter, J., Werdegar, J., Chin, J., and Moreno, J., concurred.

Concur by: BROWN

Concur

BROWN, J., Concurring.—I write separately to express my frustration with the apparent inability of the government officials involved here to answer a simple question: How do the federal clean water standards (which, as near as I can determine, are the state standards) prevent the state from considering economic factors? The majority concludes that because “the supremacy clause of the United States Constitution requires state law to yield to federal law, a regional board, when issuing a wastewater discharge permit, may not consider economic factors to justify imposing pollutant restrictions that are *less stringent* than the applicable federal standards require.” (Maj. opn., *ante*, at p. 618.) That seems a pretty self-evident proposition, but not a useful one. [****30] The real question, in my view, is whether the Clean Water Act prevents or prohibits the regional water board from considering economic factors to justify pollutant restrictions that *meet* the clean water standards in more cost-effective and economically efficient ways. I can see no reason why a federal law—which purports to be an example of cooperative federalism—would decree such a result. I do not think the majority's reasoning is at fault here. Rather, the agencies involved seemed to have worked hard to make this simple question impenetrably obscure.

A brief review of the statutory framework at issue is necessary to understand my concerns. [***315]

[**872] I. Federal Law

“In 1972, Congress enacted the Federal Water Pollution Control Act (33 U.S.C. § 1251 et seq.), commonly known as the Clean Water Act (CWA) [Citation.] ... [¶] Generally, the CWA ‘prohibits the discharge of any pollutant except in compliance with one of several statutory exceptions. [Citation.]’ ... The most important of those exceptions is pollution discharge under a valid NPDES [National Pollution Discharge Elimination System] permit, which can be issued either by the Environmental [****31] Protection Agency (EPA), or by an EPA-approved state permit program such as California’s. [Citations.] NPDES permits are valid for five years. [Citation.] [¶] Under the CWA’s NPDES permit system, the states are required to develop *water quality standards*. [Citations.] A water quality standard ‘establish[es] the desired condition of a waterway.’ [Citation.] A water quality standard for any [*630] given waterway, or ‘water body,’ has two components: (1) the designated beneficial uses of the water body and (2) the *water quality criteria* sufficient to protect those uses. [Citations.] [¶] Water quality criteria can be either *narrative* or *numeric*. [Citation.]” (*Communities for a Better Environment v. State Water Resources Control Bd.* (2003) 109 Cal.App.4th 1089, 1092–1093 [1 Cal. Rptr. 3d 76].)

With respect to satisfying water quality standards, “a polluter must comply with *effluent limitations*. The CWA defines an effluent limitation as ‘any restriction established by a State or the [EPA] Administrator on quantities, rates, and concentrations of chemical, physical, biological, and other constituents which are discharged from point sources into navigable waters, [****32] the waters of the contiguous zone, or the ocean, including schedules of compliance.’ [Citation.] ‘Effluent limitations are a means of *achieving* water quality standards.’ [Citation.] [¶] NPDES permits establish effluent limitations for the polluter. [Citations.] CWA’s NPDES permit system provides for a two-step process for the establishing of

effluent limitations. First, the polluter must comply with *technology-based effluent limitations*, which are limitations based on the best available or practical technology for the reduction of water pollution. [Citations.] [¶] Second, the polluter must also comply with more stringent *water quality-based effluent limitations* (WQBEL’s) where applicable. In the CWA, Congress ‘supplemented the “technology-based” effluent limitations with “water quality-based” limitations “so that numerous point sources, despite individual compliance with effluent limitations, may be further regulated to prevent water quality from falling below acceptable levels.” ’ [Citation.] [¶] The CWA makes WQBEL’s applicable to a given polluter whenever WQBEL’s are ‘necessary to meet water quality standards, treatment standards, or schedules of compliance, [****33] established pursuant to any State law or regulations’ [Citations.] Generally, NPDES permits must conform to state water quality laws insofar as the state laws impose more stringent pollution controls than the CWA. [Citations.] Simply put, WQBEL’s implement water quality standards.” (*Communities for a Better Environment v. State Water Resources Control Bd.*, *supra*, 109 Cal.App.4th at pp. 1093–1094, *fn.* omitted.)

This case involves water quality-based effluent limitations. As set forth above, “[u]nder the CWA, states have the primary role in promulgating water quality standards.” (*Piney Run Preservation Ass’n v. Commrs. of Carroll Co.* (4th Cir. 2001) 268 F.3d 255, 265, *fn.* 9.) “Under the CWA, the water quality standards referred to in section 301 [see 33 U.S.C. § 1311] are primarily the states’ handiwork.” [****316] (*American Paper Institute, Inc. v. U.S. Envtl. Protection Agency* (D.C. Cir. 1993) 302 U.S. App. D.C. 80 [996 F.2d 346, 349] (*American Paper*)). In fact, upon the 1972 passage of the CWA, “[s]tate water quality standards in effect at the time ... were deemed to be the initial water [****34] quality benchmarks for CWA purposes The states were to revisit and, if [*631] necessary, revise those initial standards at least once every three years.” (*American Paper*, at

p. 349.) Therefore, “once a water quality standard has been promulgated, section 301 of the CWA requires all NPDES permits for point sources to incorporate discharge limitations necessary to satisfy that standard.” (*American Paper*, at p. 350.) Accordingly, it appears that in most instances, [****873**] state water quality standards are identical to the federal requirements for NPDES permits.

II. State Law

In California, pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.; Stats. 1969, ch. 482, § 18, p. 1051; hereafter Porter-Cologne Act), the regional water quality control boards establish water quality standards—and therefore federal requirements for NPDES permits—through the adoption of water quality control plans (basin plans). The basin plans establish water quality objectives using enumerated factors—including economic factors—set forth in Water Code section 13241.

In addition, as one court observed: “The Porter-Cologne [******35**] Act ... established nine regional boards to prepare water quality plans (known as basin plans) and issue permits governing the discharge of waste. (Wat. Code, §§ 13100, 13140, 13200, 13201, 13240, 13241, 13243.) The Porter-Cologne Act identified these permits as ‘waste discharge requirements,’ and provided that the waste discharge requirements must mandate compliance with the applicable regional water quality control plan. (Wat. Code, §§ 13263, subd. (a), 13377, 13374.) [¶] Shortly after Congress enacted the Clean Water Act in 1972, the California Legislature added Chapter 5.5 to the Porter-Cologne Act, for the purpose of adopting the necessary federal requirements to ensure it would obtain EPA approval to issue NPDES permits. (Wat. Code, § 13370, subd. (c).) As part of these amendments, the Legislature provided that the state and regional water boards ‘shall, as required or authorized by the [Clean Water Act], issue [******36**] waste discharge requirements ...

which apply and ensure compliance with all applicable provisions [of the Clean Water Act], together with any more stringent effluent standards or limitations necessary to implement water quality control plans, or for the protection of beneficial uses, or to prevent nuisance.’ (Wat. Code, § 13377.) Water Code section 13374 provides that ‘[t]he term “waste discharge requirements” as referred to in this division is the equivalent of the term “permits” as used in the [Clean Water Act].’ [¶] California subsequently obtained the required approval to issue NPDES permits. [Citation.] Thus, the waste discharge requirements issued by the regional water boards ordinarily also serve as NPDES permits under federal law. (Wat. Code, § 13374.)” (*Building Industry Assn. of San Diego County v. State Water Resources Control Bd.* (2004) 124 Cal.App.4th 866, 875 [22 Cal. Rptr. 3d 128].)

[****632**] Applying this federal-state statutory scheme, it appears that throughout this entire process, the Cities of Burbank and Los Angeles (Cities) were unable to have economic factors considered because the Los [******37**] Angeles Regional Water Quality Control Board (Board)—the body responsible to enforce the statutory framework—failed to comply with its statutory mandate.

[*****317**] For example, as the trial court found, the Board did not consider costs of compliance when it initially established its basin plan, and hence the water quality standards. The Board thus failed to abide by the statutory requirement set forth in Water Code section 13241 in establishing its basin plan. Moreover, the Cities claim that the initial narrative standards were so vague as to make a serious economic analysis impracticable. Because the Board does not allow the Cities to raise their economic factors in the permit approval stage, they are effectively precluded from doing so. As a result, the Board appears to be playing a game of “gotcha” by allowing the Cities to raise economic considerations when it is not practical, but precluding them when they have the ability to do

so.

Moreover, the Board acknowledges that it has neglected other statutory provisions that might have provided an additional opportunity to air these concerns. As set forth above, pursuant to the CWA, “[t]he states were to revisit [****38] and, if necessary, revise those initial standards at least once every three years—a process commonly known as triennial review. [Citation.] Triennial reviews consist of public hearings in which current water quality standards are examined to assure that they ‘protect the public health or welfare, enhance the quality of water and serve the purposes’ of the Act. [Citation.] Additionally, the CWA directs [**874] states to consider a variety of competing policy concerns during these reviews, including a waterway’s ‘use and value for public water supplies, propagation of fish and wildlife, recreational purposes, and agricultural, industrial, and other purposes.’ ” (*American Paper, supra*, 996 F.2d at p. 349.)

According to the Cities, “[t]he last time that the narrative water quality objective for toxicity contained in the Basin Plan was reviewed and modified was 1994.” The Board does not deny this claim. Accordingly, the Board has failed its duty to allow public discussion—including economic considerations—at the required intervals when making its determination of proper water quality standards.

What is unclear is why this process should be viewed as a contest. State [****39] and local agencies are presumably on the same side. The costs will be paid by taxpayers and the Board should have as much interest as any other agency in fiscally responsible environmental solutions.

[*633] Our decision today arguably allows the Board to continue to shirk its statutory duties. The majority holds that when read together, Water Code sections 13241, 13263, and 13377 do not allow the Board to consider economic factors when issuing NPDES permits to satisfy federal CWA requirements. (Maj. opn., *ante*, at pp. 625–627.)

The majority then bifurcates the issue when it orders the Court of Appeal “to remand this matter to the trial court to decide whether any numeric limitations, as described in the permits, are ‘more stringent’ than required under federal law and thus should have been subject to ‘economic considerations’ by the Los Angeles Regional Board before inclusion in the permits.” (*Id.* at pp. 628–629.)

The majority overlooks the feedback loop established by the CWA, under which federal standards are linked to state-established water quality standards, including narrative water quality criteria. (See 33 U.S.C. § 1311 [****40] (b)(1)(C); 40 C.F.R. § 122.44(d)(1) (2004).) Under the CWA, NPDES permit requirements include the state narrative criteria, which are incorporated into the Board’s basin plan under the description “no toxins in toxic amounts.” As far as I can determine, NPDES permits [***318] designed to achieve this narrative criteria (as well as designated beneficial uses) will usually implement the state’s basin plan, while satisfying federal requirements as well.

If federal water quality standards are typically identical to state standards, it will be a rare instance that a state exceeds its own requirements and economic factors are taken into consideration.¹ In light of the Board’s initial failure to consider costs of compliance and its repeated failure to conduct required triennial reviews, the result here is an unseemly bureaucratic bait-and-switch that we should not endorse. The likely outcome of the majority’s decision is that the Cities will be economically burdened to meet standards imposed on them in a highly questionable manner.² In these

¹ (But see *In the Matter of the Petition of City and County of San Francisco, San Francisco Baykeeper et al.* (Order No. WQ 95-4, Sept. 21, 1995) 1995 WL 576920.)

² Indeed, given the fact that “water quality standards” in this case are composed of broadly worded components (i.e., a narrative criteria and “designated beneficial uses of the water body”), the Board possessed a high degree of discretion in setting NPDES permit requirements. Based on the Board’s past performance, a proper exercise of this discretion is uncertain.

times of tight fiscal budgets, it is difficult to imagine imposing additional financial burdens on municipalities without at least [****41] allowing them to present alternative views.

Based on the facts of this case, our opinion today appears to largely retain the status quo for the Board. If the Board can actually demonstrate that only the precise limitations at issue here, implemented in only one way, will achieve the desired water standards, perhaps its obduracy is justified. That case has yet to be made.

[*634] Accordingly, I cannot conclude that the majority's decision is wrong. The analysis [**875] may provide a [****42] reasonable accommodation of conflicting provisions. However, since the Board's actions “make me wanna holler and throw up both my hands,”³ I write separately to set forth my concerns and concur in the judgment—*dubitante*.⁴

The petitions of all appellants and respondent for a rehearing were denied June 29, 2005. Brown, J., did not participate therein.

City of Sacramento v. State of California

Supreme Court of California

January 29, 1990

No. S006188

Reporter

50 Cal. 3d 51 *; 785 P.2d 522 **; 266 Cal. Rptr. 139 ***; 1990 Cal. LEXIS 148 ****

CITY OF SACRAMENTO et al., Plaintiffs and Appellants, v. THE STATE OF CALIFORNIA et al., Defendants and Respondents

Prior History: [****1] Superior Court of Sacramento County, No. 331607, Darrel W. Lewis, Judge.

Disposition: We have concluded that chapter 2/78 is a "federal mandate" which exempts affected state and local agencies from pertinent limits on their power to tax, appropriate, and spend. However, local governments' expenses of complying with chapter 2/78 are not subject to compulsory state subvention, because chapter 2/78 imposed no new or increased "program or service," and no "unique" requirement, on local agencies. The contrary judgment of the Court of Appeal is reversed.

Core Terms

costs, reimbursement, local government, unemployment insurance, subvention, federal government, local agency, federal mandate, unemployment, entity, appropriations, mandates, exemption, state and local government, spending limit, programs, taxation, italics, funds, new program, limits, federal law, employees, collateral estoppel, level of service, constitutes, obligations, compliance, expenses, Public Law

Case Summary

Procedural Posture

Appellant city and others challenged the order of the Superior Court of Sacramento County

(California), that entered summary judgment for respondent state and others in appellants' action for reimbursement to local agencies for expenses mandated by respondent state pursuant to 1978 Cal. Stat. ch. 2.

Overview

In response to changes in federal law, 1978 Cal. Stat. ch. 2/78 extended mandatory coverage under the state's unemployment insurance law to include state and local governments. Appellant city and others brought suit against respondent state for reimbursement for the additional expenses to local governmental agencies incurred as a result of ch. 2/78. The trial court granted summary judgment to respondent state and the appellate court reversed. The court affirmed the trial court and held that local governments' expenses of complying with ch. 2/78 were not subject to compulsory state subvention because ch. 2/78 imposed no new or increased program or service, or no "unique" requirement on local agencies. The court concluded that ch. 2/78 was a federal mandate that exempted affected local agencies from pertinent limits on their power to tax, appropriate and spend.

Outcome

The court reversed the appellate court and affirmed the order of the trial court granting summary judgment to respondent state and others and held that respondent was not required to reimburse local agencies for covering their employees with unemployment insurance. The court concluded that the requirement was a federal mandate that exempted affected state and local agencies from pertinent limits on their power to tax, appropriate, and spend.

HN2[↓] Labor & Employment Law, Disability & Unemployment Insurance

The Federal Unemployment Tax Act was amended to require that a "certified" state plan include coverage of the employees of public agencies. 26 U.S.C.S. §§ 3304(a)(6)(A), 3309(a), 3306(c)(7). States which did not alter their unemployment compensation laws accordingly faced loss of the federal tax credit and administrative subsidy.

Governments > State & Territorial
Governments > Finance

HN3[↓] State & Territorial Governments, Finance

Cal. Const. art. XIII B restricts the amounts state and local governments may appropriate and spend each year from the proceeds of taxes and requires state reimbursement of resulting local costs whenever, after January 1, 1975, the Legislature or any state agency mandates a new program or higher level of service on any local government. Cal. Const. art. XIII B, § 6. Such mandatory state subventions are excluded from the local agency's spending limit, but included within the state's. Cal. Const. art. XIII B excludes from either the state or local spending limit any appropriations required for purposes of complying with mandates of the courts or the federal government which, without discretion, require an expenditure for additional services or which unavoidably make the providing of existing services more costly.

Governments > State & Territorial
Governments > Finance

HN4[↓] State & Territorial Governments, Finance

To the extent "federally mandated" costs are exempt from prior statutory limits on local taxation, Cal. Const. art. XIII A eliminates the exemption

insofar as it would allow levies in excess of the constitutional ceiling.

Governments > Local Governments > Claims
By & Against

HN5[↓] Local Governments, Claims By & Against

A local entity is expressly authorized to bring suit to declare an unfunded mandate unenforceable. Cal. Rev. & Tax. Code § 2255(c), Cal. Gov't Code §17612(b).

Governments > Legislation > General
Overview

HN6[↓] Governments, Legislation

Under the separation of powers doctrine, the legislature cannot be compelled to appropriate or authorize the disbursement of specific funds.

Governments > Courts > General Overview

HN7[↓] Governments, Courts

Courts are powerless to compel appropriations per se. However, that fact does not render a prayer for reimbursement of past costs wholly meaningless. California courts have previously recognized judicial power to fashion other appropriate reimbursement remedies.

HN10[↓] Governments, Local Governments

Workers' compensation is not a program

administered by local agencies to provide service to the public. Although local agencies must provide benefits to their employees, they are indistinguishable in this respect from private employers.

Governments > Local Governments > Finance

HN11 [↓] **Local Governments, Finance**

The intent underlying Cal. Const. art. XIII B, § 6 is to require reimbursement to local agencies for the costs involved in carrying out functions peculiar to government, not for expenses incurred by local agencies as an incidental impact of laws that apply generally to all state residents and entities. The language of Cal. Const. art. XIII B, § 6 is far too vague to support an inference that each time the Legislature passes a law of general application it must discern the likely effect on local governments and provide an appropriation to pay for any incidental increase in local costs.

Governments > Local Governments > Finance

HN12 [↓] **Local Governments, Finance**

A cost mandated by the federal government is exempt from a local government's statutory taxation limit. Cal. Rev. & Tax. Code § 2271. An appropriation required to comply with a federal mandate is excluded from the constitutional spending limit of any affected entity, state or local. Cal. Const. art. XIII B, § 9(b).

Governments > Federal Government > General Overview

HN13 [↓] **Governments, Federal Government**

Cal. Const. art. XIII B § 9(b) defines federally mandated appropriations as those required for purposes of complying with mandates of the federal

government which, without discretion, require an expenditure for additional services or which unavoidably make the providing of existing services more costly.

U. S. Const. amend. X provides that the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Governments > Legislation > Interpretation

HN15 [↓] **Legislation, Interpretation**

Constitutional enactments must receive a liberal, practical common-sense construction which will meet changed conditions and the growing needs of the people. A constitutional amendment should be construed in accordance with the natural and ordinary meaning of its words. Literal language of enactments may be disregarded to avoid absurd results and to fulfill the apparent intent of the framers.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A city and a county filed claims with the State Board of Control seeking subvention of the costs imposed on them by Stats. 1978, ch. 2, which extended mandatory coverage under the state's unemployment insurance law to include state and

local governments and nonprofit corporations. The board denied the claims, ruling that Stats. 1978, ch. 2, did not enact a state-mandated program for which reimbursement was required under Cal. Const., art. XIII B. On mandamus the trial court overruled the board and found the cost reimbursable, and the Court of Appeal affirmed. On remand, the board determined the amounts due on the claims originally submitted; however, the Legislature failed to appropriate the necessary funds for disbursement. The city then commenced a class action against the state on behalf of all local governments in the state. The complaint sought injunctive and declaratory relief barring enforcement of Stats. 1978, ch. 2, in the absence of state subvention; a writ of mandate directing that past, current, and/or future subvention funds be appropriated and disbursed, and/or that the Employment Development Department pay local agencies' past, current, and future unemployment insurance contributions from its own budget; and damages for past failures to reimburse. The trial court granted summary judgment for the state. (Superior Court of Sacramento County, No. 331607, Darrel W. Lewis, Judge.) The Court of Appeal, Third Dist., No. C002265, reversed.

The Supreme Court reversed the judgment of the Court of Appeal. The court held that the trial court did not err in granting summary judgment for the state on the ground that the local costs of providing unemployment insurance coverage were not subject to subvention under Cal. Const., art. XIII B, or parallel statutes (Rev. & Tax. Code, former §§ 2207, 2231, subd. (a); Gov. Code, §§ 17514, 17561, subd. (a)). The state had not compelled provision of new or increased "service to the public" at the local level, nor had it imposed a state policy "uniquely" on local governments. However, the court held, Stats. 1978, ch. 2, implemented a federal "mandate" within the meaning of Cal. Const., art. XIII B, and prior statutes restraining local taxation; thus, subject to superseding constitutional ceilings on taxation by state and local governments, an agency governed by Stats. 1978, ch. 2, may tax and spend as necessary to meet the

expenses required to comply with that legislation. (Opinion by Eagleson, J., with Lucas, C. J., Mosk, Broussard, Panelli and Kennard, JJ., concurring. Seperate concurring and dissenting opinion by Kaufman, J., concurring in the judgment.)

Headnotes

CA(1)[↓] (1)

Property Taxes § 7.5—Constitutional Provisions; Statutes and Ordinances—Real Property Tax Limitation—Exemptions for Federally Mandated Costs.

--To the extent that a "federally mandated" cost is exempt from prior statutory limits on local taxation, Cal. Const., art. XIII A, restricting the assessment and taxing powers of state and local governments, eliminates the exemption insofar as it would allow levies in excess of the constitutional ceiling.

CA(2)[↓] (2)

State of California § 7—Actions—Reimbursement to Local Governments for Unemployment Insurance Costs—Exhaustion of Remedies.

--A class action by a city on behalf of all local governments in the state, against the state, in which it was alleged that Stats. 1978, ch. 2 (extending mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations), mandated a new program or higher level of service on local agencies for which reimbursement by the state of local compliance costs was required under Cal. Const., art. XIII B, was not barred by any failure of plaintiffs to exhaust their remedies. The city and a county had filed timely claims for reimbursement of expenses incurred, to comply with Stats. 1978, ch. 2. When the State Board of Control initially denied the claims, the city and the county pursued judicial remedies, culminating in a Court of Appeal opinion concluding that

reimbursement was required. The board then upheld the claims. Insofar as the Legislature thereafter declined to appropriate the necessary funds for disbursement, the city and the county were authorized to bring an enforcement action.

CA(3a)[↓] (3a) CA(3b)[↓] (3b)

State of California § 7—Actions—Reimbursement to Local Governments for Unemployment Insurance Costs—Remedies Available.

--Cal. Const., art. XIII, § 32, precluding any suit to enjoin or impede collection of a tax, did not bar a class action brought by a city on behalf of all local governments in the state, against the state, in which it was alleged that Stats. 1978, ch. 2 (extending mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations), mandated a new program or higher level of service on local which reimbursement by the state of local compliance costs was required under Cal. Const., art. XIII B. The state contended that the only remedy open to the city was to pay its unemployment "taxes" and then seek a "refund" under the "exclusive" procedures set forth in the Unemployment Insurance Code. However, the city was not challenging, directly or indirectly, the validity or application of the unemployment insurance law as such, or the propriety of any "tax" assessed thereunder; rather, it claimed that all its costs of affording unemployment compensation to its employees were subject to a statutory and constitutional subvention that the state refused to make. For the same reasons, the city's claim for reimbursement for past expenses was not barred.

CA(4)[↓] (4)

Constitutional Law § 40—Distribution of Governmental Powers—Between Branches of Government—Judicial Power.

--Under the separation of powers doctrine, the

Legislature cannot be compelled to appropriate or authorize the disbursement of specific funds.

CA(5a)[↓] (5a) CA(5b)[↓] (5b) CA(5c)[↓] (5c)

Judgments § 81—Res Judicata—Collateral Estoppel—Public-interest Exception—Reimbursement to Local Governments for Unemployment Insurance Costs.

--In a class action by a city on behalf of all local governments in the state, against the state, in which it was alleged that Stats. 1978, ch. 2 (extending mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations), mandated a new program or higher level of service on local agencies for which reimbursement by the state of local compliance costs was required under Cal. Const., art. XIII B, the state was not collaterally estopped from litigating the reimbursement issue. The city and a county had previously brought an action against the state, culminating in a Court of Appeal opinion concluding that reimbursement was required. The Legislature then declined to appropriate the necessary funds for disbursement. Even if the formal prerequisites for collateral estoppel were present, the public-interest exception to that doctrine governed, since strict application for the doctrine would foreclose any reexamination of the earlier holding, and the consequences of any error transcended those that would apply to mere private parties.

CA(6)[↓] (6)

Judgments § 81—Res Judicata—Collateral Estoppel—Questions of Law.

--Generally, collateral estoppel bars a party to a prior action, or one in privity with him, from relitigating issues finally decided against him in the earlier action. However, when the issue is a question of law rather than of fact, the prior

determination is not conclusive either if injustice would result or if the public interest requires that relitigation not be foreclosed.

CA(7)[↓] (7)

State of California § 7—Actions—Reimbursement to Local Governments for Unemployment Insurance Costs—Summary Judgment—Effect of Failure of Moving Party to Challenge Prior Summary Adjudication of Issues.

--In a class action by a city, on behalf of all local governments in the state, against the state, in which it was alleged that Stats. 1978, ch. 2 (extending mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations), mandated a new program or higher level of service on local agencies for which reimbursement by the state of local compliance costs was required under Cal. Const., art. XIII B, the trial court did not lack the power to grant summary judgment for the state on the authority of a newly decided California Supreme Court case. The trial court had previously granted the city's motion for summary adjudication of issues, and the state had failed to seek timely mandamus review of that prior, contrary order. However, failure to challenge a summary adjudication order by the discretionary avenue of writ review cannot foreclose a party from asserting subsequent changes in law that render such a pretrial order incorrect.

CA(8)[↓] (8)

Judgments § 68—Res Judicata—Identity of Parties—Class Action—Where Prior Action Involved Individual Claims.

--In a class action by a city on behalf of all local governments in the state, against the state, in which it was alleged that Stats. 1978, ch. 2 (extending mandatory coverage under the state's unemployment insurance law to include state and

local governments and nonprofit corporations), mandated a new program or higher level of service on local agencies for which reimbursement by the state of local compliance costs was required under Cal. Const., art. XIII B, res judicata did not preclude examination of an earlier Court of Appeal opinion, in an action by the city and a county, concluding that reimbursement was required. The issues presented in the current action were not limited to the validity of any finally adjudicated individual claims; rather, they encompassed the question of the state's subvention obligations in general under Stats. 1978, ch. 2.

CA(9a)[↓] (9a) CA(9b)[↓] (9b)

State of California § 11—Fiscal Matters—Reimbursement to Local Governments—State-mandated Programs—Unemployment Insurance Costs.

--In a class action by a city on behalf of all local governments in the state, against the state, in which it was alleged that Stats. 1978, ch. 2 (extending mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations), mandated a new program or higher level of service on local agencies for which reimbursement by the state was required under Cal. Const., art. XIII B, the trial court did not err in granting summary judgment for the state on the ground that the local costs of providing such coverage were not subject to subvention under Cal. Const., art. XIII B, or parallel statutes (Rev. & Tax. Code, former §§ 2207, 2231, subd. (a); Gov. Code, §§ 17514, 17561.). The state had not compelled provision of new or increased "service to the public" at the local level, nor had it imposed a state policy "uniquely" on local governments. The phrase, "To force programs on local governments," in the voters' pamphlet relating to Cal. Const., art. XIII B, § 6, confirmed that the intent underlying that section was to require reimbursement to local agencies for the costs involved in carrying out functions peculiar

to government, not for expenses incurred by local agencies as an incidental impact of laws that apply generally to all state residents and entities.

CA(10)[↓] (10)

State of California § 11—Fiscal Matters— Reimbursement to Local Governments—State- mandated Programs.

--The concepts of reimbursable state-mandated costs in Cal. Const., art. XIII B, requiring that the state reimburse local governments for the costs of state-mandated new programs or higher levels of service, and Rev. & Tax. Code, former §§ 2207, 2231, are identical.

CA(11a)[↓] (11a) CA(11b)[↓] (11b) CA(11c)[↓] (11c)

State of California § 11—Fiscal Matters— Reimbursement to Local Governments—Federally Mandated Programs—Unemployment Insurance Costs.

--Stats. 1978, ch. 2, extending mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations, implemented a federal "mandate" within the meaning of Cal. Const., art. XIII B, and prior statutes restricting local taxation; thus, subject to superseding constitutional ceilings on taxation by state and local governments, an agency governed by Stats. 1978, ch. 2, may tax and spend as necessary to meet the expenses required to comply with that legislation. In enacting Stats. 1978, ch. 2, the state simply did what was necessary to avoid certain and severe federal penalties upon its resident businesses; the alternatives were so far beyond the realm of practical reality that they left the state "without discretion" to depart from federal standards. (Disapproving, insofar as it is inconsistent with this analysis, the decision in *City of Sacramento v. State of California* (1984) 156 Cal. App. 3d 182 (203 Cal.Rptr. 258).)

CA(12)[↓] (12)

Constitutional Law § 11—Construction of Constitutions—Liberality and Flexibility.

--Constitutional enactments must receive a liberal, practical commonsense construction that will meet changed conditions and the growing needs of the people. While a constitutional amendment should be construed in accordance with the natural and ordinary meaning of its words, the literal language of enactments may be disregarded to avoid absurd results and to fulfill the apparent intent of the framers.

CA(13)[↓] (13)

State of California § 11—Fiscal Matters— Reimbursement to Local Governments—Federally Mandated Programs.

--In determining whether a program is federally mandated, to exempt its cost from a local government's statutory taxation limit (Rev. & Tax. Code, § 2271), and to exclude any appropriation required to comply with the mandate from the constitutional spending limit of the affected entity (Cal. Const., art. XIII B, § 9, subd. (b)), the result will depend on the nature and purpose of the federal program; whether its design suggests an intent to coerce; when state and/or local participation began; the penalties, if any, assessed for withdrawal or refusal to participate or comply; and any other legal and practical consequences of nonparticipation, noncompliance, or withdrawal. The courts and the Commission on State Mandates must respect the governing principle of Cal. Const., art. XIII B, § 9, subd. (b): neither state nor local agencies may escape their spending limits when their participation in federal programs is truly voluntary.

Opinion by: EAGLESON

Opinion

[*57] [**523] [***140] In response to changes in federal law, chapter 2 of the Statutes of 1978 (hereafter chapter 2/78) extended mandatory coverage under the state's unemployment insurance law to include state and local governments and nonprofit corporations. Here we consider whether, in chapter 2/78, the state "[mandated] a new program or higher level of service" on the local agencies, and must therefore reimburse local compliance costs under article XIII B of the California Constitution and related statutes.

We conclude that the state is *not* required to reimburse the chapter 2/78 expenses of local governments. The obligations [***141] imposed by chapter 2/78 fail to meet the "program" and "service" standards [**524] for mandatory subvention we recently set forth in *County of Los Angeles v. State of California* (1987) 43 Cal. 3d 46 [233 Cal. Rptr. 38, 729 P.2d 202] (hereafter *County of Los Angeles*). Chapter 2/78 imposes no "unique" obligation on local governments, nor does it require them to provide new or increased governmental services to the public. The Court of [****3] Appeal decision, finding the expenses reimbursable, must therefore be reversed.

However, our holding does not leave local agencies powerless to counter the fiscal pressures created by chapter 2/78. Though provisions of the Revenue and Taxation Code limit local property tax levies, and article XIII B itself places spending limits on both state and local governments, "costs mandated by the federal government" are expressly excluded from these ceilings. Chapter 2/78 imposes such "federally mandated" costs, because it was adopted by the state under federal coercion tantamount to compulsion. Hence, subject to overriding limitations on taxation rates (see, e.g., *Cal. Const.*, art. XIII A), both state and local governments may levy and spend for their chapter 2/78 coverage obligations without reduction of the fiscal limits applicable to other needs and services.

I. FACTS.

In 1972, and again in 1973, the Legislature enacted comprehensive schemes for local property tax relief. Though frequently amended thereafter, these statutes retained three principal features. First, they placed a limit on the local property tax rate. Second, they required the *state* to reimburse local governments [****4] for their costs resulting from state laws "which mandate . . . new [programs] or . . . increased [levels] of service" at the local level. Finally, they allowed local governments to exceed their property taxation limits to fund certain other nondiscretionary expenses, including "costs mandated by the federal government." (Stats. 1972, ch. 1406, § 14.7, pp. [*58] 2961-2967; Stats. 1973, ch. 358, § 3, pp. 783-790; *Rev. & Tax. Code*, §§ 2206, 2260 et seq.; 2271, former §§ 2164.3, 2165, 2167, 2169, 2207, 2231; *Gov. Code*, § 17500 et seq.)

Since adoption of the Social Security Act in 1935, federal law has provided powerful incentives to enactment of unemployment insurance protection by the individual states. In current form, **HN1**[↑] the Federal Unemployment Tax Act (hereafter FUTA) (26 U.S.C. § 3301 et seq.) assesses an annual tax upon the gross wages paid by covered private employers nationwide. The tax rate, which

has varied over the years, stands at 6.2 percent for calendar year 1990. (26 U.S.C. §§ 3301(1), 3306.) However, employers in a state with a federally [****5] "certified" unemployment insurance program may credit their contributions to the state system against up to 90 percent of the federal tax (currently computed at 6 percent for this purpose). (*Id.*, §§ 3302-3304.) A "certified" state program also qualifies for federal administrative funds. (42 U.S.C. §§ 501-503.)

California enacted its unemployment insurance system "on the eve of the adoption of the Social Security Act" in 1935 (*Steward Machine Co. v. Davis* (1937) 301 U.S. 548, 587-588 [81 L. Ed. 1279, 1291-1292, 57 S. Ct. 883, 109 A.L.R. 1293]; see Stats. 1935, ch. 352, § 1 et seq., p. 1226 et seq.) and has sought to maintain federal compliance ever since. Every other state has also adopted an unemployment insurance plan in response to the federal stimulus.

In 1976, Congress enacted Public Law number 94-566 (hereafter Public Law 94-566). Insofar as pertinent here, Public Law 94-566 amended HN2[↑] FUTA to require for the first time that a "certified" state plan include coverage of the employees of public agencies. (Pub. L. No. 94-566 (Oct. 20, 1976) § 115(a), 90 Stat. 2670; 26 U.S.C. §§ 3304(a)(6)(A), 3309(a); see [****6] 26 U.S.C. § 3306(c)(7).) States which did not alter their unemployment compensation laws accordingly faced loss of the federal tax credit and administrative subsidy.

The Legislature thereafter adopted chapter 2/78 to conform California's system to Public Law 94-566. Among other things, chapter 2/78 effectively requires the state [***142] and all local governments, beginning January [**525] 1, 1978, to participate in the state unemployment insurance system on behalf of their employees. (Stats. 1978, ch. 2, §§ 12, 24, 31, 36.5, 58-61, pp. 12-14, 16, 18, 24-27; *Unemp. Ins. Code*, §§ 135, subd. (a), 605, 634.5, 802- 804.)

In November 1979, the voters adopted Proposition 4, adding article XIII B to the state Constitution. CA(1)[↑] (1) (See fn. 1.) HN3[↑] Article XIII B -- the so-called "Gann limit" -- restricts the amounts state and local governments may [*59] appropriate and spend each year from the "proceeds of taxes." (§§ 1, 3, 8, subds. (a)-(c).) ¹ In language similar to that of earlier statutes, article XIII B also requires [****7] state reimbursement of resulting local costs whenever, after January 1, 1975, "the Legislature or any state agency mandates a new program or higher level of service on any local government," (§ 6.) Such mandatory state subventions are excluded from the local agency's spending limit, but included within the state's. (§ 8, subds. (a), (b).) Finally, article XIII B excludes from either the state or local spending limit any "[appropriations] required for purposes of complying with mandates of the courts *or the federal government* which, *without discretion*, require an expenditure for additional services or which *unavoidably* make the providing of existing services more costly." (§ 9, subd. (b) [hereafter section 9(b)], italics added.)

[****8] The City of Sacramento (City) and the County of Los Angeles (County) filed claims with the State Board of Control (Board) (see Rev. & Tax. Code, former § 2250 et seq.; see now *Gov. Code*, § 17550 et seq.) seeking state subvention of the costs imposed on them by chapter 2/78 during 1978 and portions of 1979. The Board denied the claims, ruling that chapter 2/78 was an enactment required by federal law and thus was not a

¹ Article XIII B is to be distinguished from article XIII A, which was adopted as Proposition 13 at the June 1978 election. Article XIII A imposes a direct constitutional limit on state and local power to *adopt and levy taxes*. Articles XIII A and XIII B work in tandem, together restricting California governments' power both to levy and to spend for public purposes. Moreover, HN4[↑] to the extent "federally mandated" costs are exempt from prior *statutory* limits on local *taxation* (see *ante*, at pp. 57-58), article XIII A eliminates the exemption insofar as it would allow levies in excess of the constitutional ceiling.

All further section references are to article XIII B of the California Constitution, unless otherwise indicated.

reimbursable state mandate. On mandamus (Code Civ. Proc., § 1094.5; Rev. & Tax. Code, former § 2253.5, see now Gov. Code, § 17559), the Sacramento Superior Court overruled the Board and found the costs reimbursable. The court ordered the Board to determine the amounts of the City's and the County's individual claims, and also to adopt "parameters and guidelines" to be applied in determining "these . . . and other claims" arising under chapter 2/78. (Rev. & Tax. Code, former § 2253.2; see now Gov. Code, §§ 17555, 17557.)²

[****9] In City of Sacramento v. State of California (1984) 156 Cal. App. 3d 182 [203 Cal. Rptr. 258] (hereafter *Sacramento I*), the Court of Appeal affirmed. Among other things, the court concluded (pp. 194-199) that chapter 2/78 [*60] imposed state-mandated costs reimbursable under section 6 of article XIII B, since the potential loss of federal funds and tax credits did not render Public Law 94-566 so coercive as to constitute a "[*mandate*] . . . of the federal government" under section 9(b). (Italics added.) We denied hearing.

On remand, the Board determined the amounts due on the claims originally submitted by the City and the County. As required by the judgment, the Board also adopted "parameters and guidelines" for reimbursement of chapter 2/78 costs to all affected local agencies. However, during the 1984 session of the Legislature, no bills were introduced for reimbursement of pre-1984 costs, and bills to fund costs in and after 1984 failed passage.

[**526] [***143] From and after the decision in *Sacramento I*, the City paid "under protest" its quarterly billings from the Employment Development Department (EDD) for unemployment [****10] compensation. Each payment included a claim for refund of

unemployment taxes pursuant to Unemployment Insurance Code section 1176 et seq. EDD responded to the refund claims by referring the City to its statutory subvention remedies.

Accordingly, in July 1985, the City began returning its quarterly billings unpaid. It thereupon commenced the instant class action in Sacramento Superior Court on behalf of all local governments in the state. Named as defendants were the State of California, the Governor, EDD, the state Controller and Treasurer, and the Legislature. The complaint sought (1) injunctive and declaratory relief barring enforcement of chapter 2/78 in the absence of state subvention; (2) a writ of mandate directing that past, current, and future subvention funds be appropriated and disbursed, and/or that EDD pay local agencies' past, current, and future unemployment-insurance contributions from its own budget; and (3) damages for past failures to reimburse.

Shortly after this suit was filed, the Legislature appropriated some chapter 2/78 funds for fiscal year 1984-1985 (Stats. 1985, ch. 1217, §§ 12, 17, subd. (b), pp. 4148, 4150), and it subsequently [****11] authorized limited funds in the 1986 Budget Act (Stats. 1986, ch. 186, § 2.00, p. 1006). On defendants' demurrer, the trial court later dismissed plaintiffs' claims for reimbursement for these post-1984 periods.³ Thereafter, the trial court certified the suit as a class action and granted plaintiffs' motion for summary adjudication of issues based on *Sacramento I*.

[*61] While the case remained pending at the trial level, we decided County of Los Angeles. There we held that article XIII B, and earlier subvention statutes, require state reimbursement *only* when the state compels local governments to provide new or upgraded "programs that carry out the

² The claims for reimbursement were originally premised entirely on Revenue and Taxation Code section 2201 et seq. While the City's and the County's mandamus petitions were pending in superior court, article XIII B was adopted. The City and the County amended their petitions to include article XIII B as an additional basis for relief, and the case proceeded accordingly.

³ The trial court also sustained the Legislature's demurrer without leave to amend and dismissed the Legislature as a party defendant. The Court of Appeal affirmed the dismissal in a separate proceeding. (See City of Sacramento v. California State Legislature (1986) 187 Cal. App. 3d 393 [231 Cal. Rptr. 686].)

governmental [****12] function of providing *services to the public*, or . . . , to implement a state policy, [imposes] *unique* requirements on local governments [that] do not apply generally to all residents and entities in the state." (43 Cal. 3d at p. 56, italics added.)

Defendants in this case thereupon moved for summary judgment, urging that extension of unemployment insurance coverage to public employees satisfied neither reimbursement standard set forth in *County of Los Angeles*. The trial court agreed and awarded summary judgment.

The Court of Appeal reversed on two independent grounds. First, the court ruled that defendants were collaterally estopped by *Sacramento I* to relitigate the reimbursability of chapter 2/78 costs. Second, the court found that chapter 2/78 imposed "unique requirements" on local governments, within the meaning of *County of Los Angeles*, since the legislation was aimed solely at local agencies and subjected them to obligations from which they were previously exempt.

II. Jurisdiction; Plaintiffs' Exhaustion of Remedies.

CA(2)[↑] (2) After we granted review, we asked the parties and amici curiae⁴ to brief whether the current suit is jurisdictionally [****13] barred by any failure of plaintiffs to exhaust their remedies (see *Abelleira v. District Court of Appeal* (1941) 17 Cal.2d 280, 291-295 [109 P.2d 942, 132 A.L.R. 715]), or for any other reason. If so, the summary judgment for defendants against all plaintiffs was proper notwithstanding the merits of the subvention claim. In that event, the judgment of [**527] [***144] the Court of Appeal must be reversed without consideration of the substantive issues raised by the appeal.

However, we find no failure to exhaust which

would bar us from reaching the merits. Defendants concede plaintiffs exhausted all administrative remedies provided by the statutes governing subvention of state-mandated costs. The concession [****14] appears correct, at least as to the City and the County. These two agencies filed timely claims for reimbursement of expenses incurred to comply with chapter 2/78. When the Board initially denied the claims, the City and the County pursued judicial remedies culminating in [*62] *Sacramento I*. By direction of the judgment in *Sacramento I*, the Board ultimately upheld the City's and County's 1979 claims, determined their amount, and adopted "parameters and guidelines" for statewide reimbursement that were later included in the Board's government-claims report to the Legislature. (Rev. & Tax. Code, former §§ 2253.2, 2255, subd. (a).)

These procedures exhausted the City's and the County's administrative and judicial avenues, short of this suit, to obtain redress on the claims adjudicated in *Sacramento I*. Insofar as the Legislature thereafter declined to appropriate the necessary funds for disbursement by the Controller, the City and the County were authorized to bring an enforcement action. (*Id.*, former § 2255, subd. (c); Gov. Code, § 17612, subd. (b); *County of Contra Costa v. State of California* (1986) 177 Cal. App. 3d 62, 72 [222 Cal. Rptr. 750]; [****15] see *Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal. App. 3d 521, 548-549 [234 Cal. Rptr. 795].)⁵

CA(3a)[↑] (3a) Defendants urge, however, that plaintiffs essentially are seeking resolution of a "tax" question -- the validity *vel non* of their unemployment tax contributions -- but have failed to satisfy the special procedures applicable to such

⁴ Amicus curiae briefs were filed on behalf of plaintiffs by (1) the League of California Cities, the Association of California Water Agencies, and the Fire District Association of California, and (2) the County of Los Angeles and the County Supervisors Association of California.

⁵ In 1986, the Legislature repealed sections 2250-2255 of the Revenue and Taxation Code. (Stats. 1986, ch. 879, §§ 37-48, p. 3047.) The Board's functions have been transferred to the Commission on State Mandates (Commission), but the procedures for administrative and judicial determination of subvention disputes remain functionally similar. (Gov. Code, §§ 17500 et seq., 17600 et seq.)

cases. Defendants insist that because article XIII, section 32, of the California Constitution broadly precludes any suit to enjoin or impede collection of a tax [****16] (e.g., Calfarm Ins. Co. v. Deukmejian (1989) 48 Cal. 3d 805, 838-841 [258 Cal. Rptr. 161, 771 P.2d 1247]; Western Oil & Gas Assn. v. State Bd. of Equalization (1987) 44 Cal. 3d 208, 213 [242 Cal. Rptr. 334, 745 P.2d 1360]; Pacific Gas & Electric Co. v. State Bd. of Equalization (1980) 27 Cal. 3d 277, 279-284 [165 Cal. Rptr. 122, 611 P.2d 463]), plaintiffs' claims for declaratory and injunctive relief are barred.

The only remedy constitutionally open to plaintiffs, defendants assert, is to pay their unemployment "taxes" and then seek a "refund" under the "exclusive" procedures set forth in the Unemployment Insurance Code. (Unemp. Ins. Code, §§ 1176 et seq., 1241, subd. (a).) Insofar as plaintiffs' complaint *does* seek reimbursement for past contributions, defendants suggest, plaintiffs have not correctly pursued the Unemployment Insurance Code procedures.

We question, but do not decide, whether a *public entity's* contributions to the state unemployment insurance system can ever constitute a "tax" subject [*63] to article XIII, section 32. Even if so, [****17] defendants' claim lacks merit under the circumstances presented here.

"The policy behind [article XIII,] section 32 is to allow revenue collection to continue during [tax] litigation so that essential public services dependent on the funds are not unnecessarily disrupted. [Citation.]" (Pacific Gas & Electric Co., supra, 27 Cal. 3d at p. 283.) The administrative "refund" procedures established by the unemployment insurance law are designed to ensure initial examination of unemployment tax disputes by the agency with specific expertise in that area.

However, plaintiffs attempt no challenge, direct or indirect, to the validity or application of the unemployment insurance [**528] [***145] law as such, or to the propriety of any "tax" assessed

thereunder. Nor have plaintiffs bypassed the agency or procedures established to decide such disputes.

Rather, plaintiffs claim that *all* their costs of affording unemployment compensation to their employees are subject to a statutory and constitutional *subvention* which the state refuses to make. It is incidental that these costs happen to include what might be characterized as a "tax." As the subvention [****18] statutes require, plaintiffs City and County have pursued all available remedies before the agency (formerly the Board, now the Commission) created to decide *subvention* issues; that agency has upheld their submitted claims in full, but the necessary appropriations have been withheld.

Under these circumstances, the Legislature has concluded that a local entity should be forced to continue incurring the unfunded costs subject to "refund." Rather, the HN5[↑] entity is expressly authorized to bring suit to declare such an unfunded mandate *unenforceable*. (Rev. & Tax. Code, former § 2255, subd. (c); Gov. Code, § 17612, subd. (b).) ⁶

The importance of such a remedy stems from the fundamental legislative prerogative to control [****19] appropriations. CA(4)[↑] (4) HN6[↑] Under the separation of powers doctrine, the Legislature cannot be compelled to appropriate or authorize the disbursement of specific funds. (Mandel v. Myers (1981) 29 Cal. 3d 531, 540 [174 Cal. Rptr. 841, 629 P.2d 935].) Since the Legislature will have demonstrated its refusal to fund a particular mandate by the time a mandamus action is filed, the literal "tax refund" process urged by defendants may often be meaningless.

CA(3b)[↑] (3b) Insofar as plaintiffs also seek

⁶Indeed, when the City filed protective claims for "refund" with EDD in the wake of *Sacramento I*, that agency consistently disclaimed authority to decide the subvention issue presented and ["suggested"] that the City pursue its remedies before the Commission.

reimbursement for past expenses, similar considerations dictate that the governing statutes are those created [*64] to resolve subvention problems rather than garden-variety disputes over the unemployment insurance tax.⁷ We find nothing in the language, history, or purpose of article XIII, section 32, or of the unemployment insurance law, which bars the instant complaint. We therefore have jurisdiction to decide whether chapter 2/78 constitutes a reimbursable mandate.

[****20] III. Collateral Estoppel; Res Judicata.

CA(5a)[↑] (5a) However, *plaintiffs* claim that because *Sacramento I* "finally" decided whether chapter 2/78 constitutes a reimbursable state mandate, the *state* and its agents are collaterally estopped from relitigating the issue here. The Court of Appeal agreed that the doctrine of collateral estoppel applies. Under the circumstances, we are not persuaded.

CA(6)[↑] (6) HN8[↑] Generally, collateral estoppel bars the party to a prior action, or one in privity with him, from relitigating issues finally decided against him in the earlier action. (*Clemmer v. Hartford Insurance Co.* (1978) 22 Cal. 3d 865, 874 [151 Cal. Rptr. 285, 587 P.2d 1098].) ". . . But when the issue is a question of law rather than of fact, the prior determination is not conclusive either if injustice would result or if the public interest requires that relitigation not be foreclosed. [Citations.] . . ." (*Consumers Lobby Against Monopolies v. Public Utilities Com.* (1979) 25 Cal. 3d 891, 902 [160 Cal. Rptr. 124, 603 P.2d 41].)

CA(5b)[↑] (5b) Even if the formal prerequisites for collateral estoppel are present here, the public-

⁷As we note above, **HN7[↑]** courts are powerless to compel appropriations per se. However, that fact does not render a prayer for reimbursement of *past* costs wholly meaningless. California courts have previously recognized judicial power to fashion other appropriate reimbursement remedies. (See, e.g., *Carmel Valley Fire Protection Dist.*, *supra*, 190 Cal. App. 3d at pp. 550-552; also cf. *Mandel*, *supra*, 29 Cal. 3d at pp. 535-537, 539-552.) Such power is especially important where subvention is constitutionally compelled.

interest [****21] exception governs. Whether chapter 2/78 costs are reimbursable under [**529] [***146] article XIII B and parallel statutes constitutes a pure question of law. The *state* was the losing party in *Sacramento I*, and also the only entity legally affected by that decision. Thus, strict application of collateral estoppel would foreclose any reexamination of the holding of that case. The state would remain bound, and no other person would have occasion to challenge the precedent.

Yet the consequences of any error transcend those which would apply to mere private parties. If the result of *Sacramento I* is wrong but unimpeachable, taxpayers statewide will suffer unjustly the consequences of the state's continuing obligation to fund the chapter 2/78 costs of local agencies. On the other hand, if the state fails to appropriate the funds to meet this [*65] obligation, and chapter 2/78 therefore cannot be enforced (Rev. & Tax. Code, former § 2255, subd. (c); Gov. Code, § 17612, subd. (b)), the resulting failure to comply with federal law could cost California employers millions.⁸ **CA(7)[↑] (7) (See fn. 9.) CA(5c)[↑] (5c)** Under these circumstances, neither [****22] stare decisis nor collateral estoppel can permanently foreclose our ability to examine the reimbursability of chapter 2/78 costs.⁹

⁸For these reasons, this case is distinguishable from *Slater v. Blackwood* (1975) 15 Cal. 3d 791 [126 Cal. Rptr. 225, 543 P.2d 593], cited by the Court of Appeal. *Slater*, a suit between private parties, held only that the "injustice" exception to the rule of collateral estoppel cannot be based *solely* on an intervening change in the law. (P. 796.) Here, as we note, overriding public-interest issues are involved.

⁹By the same token, the state has not ignored available remedies or otherwise "waived" its right to argue the issues presented by this appeal. The state immediately raised the applicability of *County of Los Angeles* to this suit once our decision therein became final.

Plaintiffs claim the instant trial court had no power to grant summary judgment for defendants on authority of *County of Los Angeles*. *Plaintiffs* assert that because defendants failed to seek timely mandamus review of the prior, contrary order granting summary adjudication of issues in *plaintiffs'* favor, the issues decided by the earlier order must be "deemed established." (See *Code Civ. Proc.*, § 437c, subd. (f).) We disagree. Failure to challenge a summary adjudication order by the *discretionary* avenue of writ review cannot

[****23] CA(8) (8) As below, plaintiffs also argue that reconsideration of *Sacramento I* is precluded by res judicata. They suggest that the prior litigation resolved not only the *legal issues* presented by this appeal, but all *claims* among the current parties as well.

Of course, HN9 res judicata and the rule of final judgments bar us from disturbing individual claims or causes of action, on behalf of specific agencies, which have been finally adjudicated and are no longer subject to review. (Code Civ. Proc., § 1908 et seq.; Slater, supra, 15 Cal. 3d at p. 796; Bernhard v. Bank of America (1942) 19 Cal.2d 807, 810 [122 P.2d 892].) However, the issues presented in the current action are not limited to the validity of any such finally adjudicated individual claims. Rather, they encompass the question of defendants' subvention obligations *in general* under chapter 2/78. We therefore conclude that defendants may contend in this lawsuit that chapter 2/78 is not a reimbursable state mandate.¹⁰ We turn to the merits of that issue.

[****24] [*66] IV. "New Program" or "Increased Service"?

CA(9a) (9a) As below, defendants urge that by extending unemployment insurance coverage to local government employees, the Legislature did not mandate a "new program" or an "increased" or "higher level of service" on local governments. Thus, [**530] [***147] they assert, the local costs of providing such coverage are not subject to

foreclose a party from asserting *subsequent* changes in law which render such a pretrial order incorrect.

¹⁰ Plaintiffs imply that because the original claims by the City and the County were filed decided as statutory "test claims" (Rev. & Tax. Code, former §§ 2218, 2253.2; see now Gov. Code, §§ 17555, 17557), the "cause of action" adjudicated therein encompasses *all* claims by *all* local agencies for *all* years. However, the obvious purpose of the statutory "test claim" procedure is to resolve the *legal issue whether particular state legislation creates a reimbursable mandate*, not to adjudicate every individual claim for reimbursement which may thereafter accrue. The "test claim" result has *precedential* effect for all subsequent claims, but res judicata effect only for the individual claims which were actually adjudicated.

subvention under article XIII B, section 6, or parallel statutes. (Rev. & Tax. Code, former §§ 2207, 2231, subd. (a); Gov. Code, §§ 17514, 17561, subd. (a).) The trial court granted summary judgment for defendants on this basis. Contrary to the conclusions reached by the Court of Appeal, the trial court's ruling was correct.

Our analysis is controlled by our decision in *County of Los Angeles*. There we determined that a general increase in workers' compensation benefits did not, when applied to local governments, constitute a reimbursable state mandate under article XIII B.

In so holding, we focused on the particular language of article XIII B, section 6, which requires state subvention of a local government's costs of any "new program" [****25] or "increased level of service" imposed upon it by the state. We dismissed the notion that, by employing the quoted phrases, the voters intended *all* local costs resulting from compliance with state law to be subject to mandatory reimbursement. Rather, we explained, "[the] concern which prompted the inclusion of section 6 in article XIII B was the perceived attempt by the state to enact legislation or adopt administrative orders creating programs to be administered by local agencies, thereby transferring to those agencies the fiscal responsibility for providing services which the state believed should be extended to the public. . . ." (43 Cal. 3d at p. 56.)

Under these circumstances, we reasoned, the electorate must have intended the undefined terms "new program" and "increased level of service" to carry their "commonly understood meanings . . . -- programs that carry out the governmental function of providing *services to the public*, or laws which, to implement a state policy, impose *unique requirements* on local governments and do not apply generally to all residents and entities in the state." (*Ibid.*, italics added.)

Local governments' costs of complying [****26] with a general statewide increase in the level of workers' compensation benefits do not qualify under these standards, we concluded. As we noted,

". . . [HN10] workers'] compensation is not a program administered by local agencies to provide service to the public. CA(10) (10) (See fn. 11.) Although local agencies must provide benefits to [*67] their employees . . . , they are indistinguishable in this respect from private employers. . . ." (*Id.*, at p. 58.)¹¹

[****27] CA(9b) (9b) Similar considerations apply here. By requiring local governments to provide unemployment compensation protection to their own employees, the state has not compelled provision of new or increased "service to the public" at the local level. Nor has it imposed a state policy "[uniquely]" on local governments. Most private employers in the state already were required to provide unemployment protection to their employees. Extension of this requirement to local governments, together with the state government and nonprofit corporations, merely makes the local agencies [*531] [****148] "indistinguishable in this respect from private employers."

Plaintiffs nonetheless suggest there are several bases for reaching a different result here than in *County of Los Angeles*. None of the asserted distinctions has merit.

¹¹ While our discussion centered on the meaning of section 6 of article XIII B, it relied heavily on the legislative history of parallel provisions of the 1972 and 1973 property tax relief statutes. When article XIII B was adopted in November 1979, the Revenue and Taxation Code already required state subvention of local "[costs] mandated by the state," defined as "any increased costs which a local agency is required to incur as a result of . . . [para.] [any] law enacted after January 1, 1973, which mandates a *new program* or an *increased level of service* of an existing program." (Rev. & Tax. Code, former §§ 2207 [italics added], 2231, subd. (a).) However, a further statutory definition of "increased level of service" to include any state mandate "which makes necessary expanded or additional costs to a county, city and county, city, or special district" had been repealed in 1975. (*County of Los Angeles*, 43 Cal. 3d at p. 55; see Rev. & Tax. Code, former § 2231, subd. (e), repealed by Stats. 1975, ch. 486, § 6, p. 999.) We found the repealer significant to the limited meaning of the statutory term "increased level of service" as later incorporated in article XIII B. (43 Cal. 3d at pp. 55-56.) Our implicit conclusion, which we now make explicit, was that the statutory and constitutional concepts of reimbursable state-mandated costs are identical.

Plaintiffs first note the proponents' declaration in the voters' pamphlet that the purpose of article XIII B, section 6, was to prevent the state from "forcing" unfunded programs on local agencies. Plaintiffs invoke this pamphlet language for the proposition that any new cost "forced" on local governments by state law is subject to subvention.

The [****28] claim is directly contrary to our holding in *County of Los Angeles*. As we explained, "[in] . . . context, the [pamphlet] phrase to force *programs* on local governments' confirms that HN11 the intent underlying section 6 [of article XIII B] was to require reimbursement to local agencies for the costs involved in carrying out *functions peculiar to government*, not for expenses incurred by local agencies as an *incidental impact* of laws that apply generally to all state residents and entities. . . . [para.] The language of section 6 is far too vague to support an inference that . . . each time the Legislature [*68] passes a law of general application it must discern the likely effect on local governments and provide an appropriation to pay for any incidental increase in local costs. . . ." (43 Cal. 3d at pp. 56-57, italics added.)¹²

[****29] Plaintiffs next urge the Court of Appeal's premise -- that chapter 2/78 did impose a "unique" requirement on local agencies within the meaning of *County of Los Angeles*, since it applied only to them, and compelled costs to which they were not previously subject. Plaintiffs cite our recent decision in *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal. 3d 830 [244 Cal. Rptr. 677, 750 P.2d 318]. There we held, inter alia, that by requiring each local school district to contribute

¹² Indeed, our reasoning here was expressly foreshadowed in *County of Los Angeles*. There we observed: "The Court of Appeal reached a different conclusion in [*Sacramento*], with respect to a newly enacted law requiring that all public employees be covered by unemployment insurance. Approaching the question as . . . whether the expense was a state mandated cost,' rather than as whether the provision of an employee benefit was a program or service' within the meaning of the Constitution, the court concluded that reimbursement was required. To the extent that this decision is inconsistent with our conclusion here, it is disapproved." (43 Cal. 3d at p. 58, fn. 10.)

part of the expense of educating its handicapped students in state-run schools -- a cost previously absorbed entirely by the state -- the Legislature created a "new program" subject to subvention under article XIII B, section 6. As we observed, "although the schools for the handicapped have been operated by the state for many years, the program was *new insofar as [the local districts] are concerned . . .*" (P. 835, italics added.)

Lucia Mar is inapposite here. The education of handicapped students was clearly a traditional governmental "service to the public," and it qualified as a "program" on that basis. This function had long been performed by the state, [****30] and the only issue was whether the belated shifting of the program's costs to local governments made it "new" for subvention purposes. A negative answer to that question would have undermined a central purpose of article XIII B, section 6 -- to prevent the state's transfer of the *cost of government* from *itself* to the local level.

Here, the issue is whether costs *unrelated* to the provision of public services are *nonetheless* reimbursable costs of government, because they are imposed on local governments "[uniquely]," and not merely as an incident of compliance with general laws. State and local governments, and nonprofit corporations, had previously enjoyed a special *exemption* from requirements imposed on most other employers in the state and nation. Chapter 2/78 merely eliminated the exemption and made these previously exempted entities subject to the general rule. By doing so, it may have imposed a requirement "new" to local agencies, but that requirement was not "unique."

[*69] [**532] [***149] The distinction proposed by plaintiffs would have an anomalous result. The state could avoid subvention under *County of Los Angeles* standards by [****31] imposing new obligations on the public and private sectors *at the same time*. However, if it chose to proceed by stages, extending such obligations first to private entities, and only later to local

governments, it would have to pay. This was not the intent of our recent decision.

Next, plaintiffs complain that the new costs imposed on local governments by chapter 2/78 are too great to be deemed "incidental" within the meaning of *County of Los Angeles*. However, our decision did not use the word "incidental" to mean merely "insignificant in amount." Rather, we declared that the state need not reimburse local governments for expenses *incidentally imposed* upon them by laws of general application. In *County of Los Angeles*, we assumed that the expenses imposed *in common* on the private and public sectors by such a general law -- as by the across-the-board increase in workers' compensation benefits there at issue -- might be substantial. Notwithstanding this possibility, we found the voters did not intend to require a state subsidy of the public sector in such cases. (43 Cal. 3d at pp. 56-58.)

Finally, plaintiffs and their amici curiae urge us to overrule [****32] *County of Los Angeles*. They insist that our "program" and "unique requirement" limitations conflict with the language and purpose of article XIII B. First, they note that *nonreimbursable* state-mandated costs are expressly listed in subdivisions (a) through (c) of article XIII B, section 6.¹³ Under the maxim *inclusio unius est exclusio alterius*, they reason, further exceptions may not be implied. Second, they assert, our limiting construction allows the state to "force" many costly but unfunded requirements on local governments, which the latter must absorb without relief from their own article

¹³ Article XIII B, section 6, provides that the state shall provide a subvention of funds to reimburse a local agency for costs incurred by the agency "[whenever] the [state] mandates [on the agency] a new program or higher level of service . . . , except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [para.] (a) Legislative mandates requested by the local agency affected; [para.] (b) Legislation defining a new crime or changing an existing definition of a crime; or [para.] (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975."

XIII B spending limits. This, they aver, cannot have been the voters' intent.

[****33] These arguments misapprehend both the language of article XIII B, section 6, and our *County of Los Angeles* holding. Our reasoning in that case is not inconsistent with subdivisions (a) through (c) of section 6. Those paragraphs simply exclude certain state-imposed costs *even if they would otherwise be reimbursable under the "new program" or "increased service" [*70] standards.* Subdivisions (a) through (c) do not purport to define what constitutes a "new program" or "increased level of service."

Moreover, the "program" and "service" standards developed in *County of Los Angeles* create no undue risk that the state will impose expensive unfunded obligations against local agencies' article XIII B spending limits. On the contrary, our standards require reimbursement whenever the state freely chooses to impose on local agencies *any* peculiarly "governmental" cost which they were not previously required to absorb.

On the other hand, as we explained in *County of Los Angeles*, extension of the subvention requirements to costs "incidentally" imposed on local governments would require the Legislature to assess the fiscal effect on local agencies of each law of general [****34] application. Moreover, it would subject much general legislation to the supermajority vote required to pass a companion local-government revenue bill. Each such necessary appropriation would, in turn, cut into the *state's* article XIII B spending limit. (§ 8, subd. (a).) We concluded that nothing in the language, history, or apparent purpose of article XIII B suggested such far-reaching limitations on [**533] [***150] legitimate state power. (43 Cal. 3d at pp. 56-58.)

We remain persuaded by this reasoning.¹⁴ We

¹⁴Nor do we agree that subvention depends on whether the "benefit" of a state-imposed local requirement falls principally at the state or local level. Attempts to apply such a "benefit" test to the myriad of

decline to overrule *County of Los Angeles*. Under the teaching of that case, we hold that chapter 2/78 imposes no local costs which must be reimbursed pursuant to article XIII B, section 6, and parallel statutes.

[****35] V. "Federal" Mandate?

CA(11a)[↑] (11a) This case proceeded through the Court of Appeal solely on the issue whether chapter 2/78 constitutes a reimbursable "state mandate," as defined in *County of Los Angeles*. After we granted review, and in the public interest, we also decided to reexamine a related holding contained in *Sacramento I* -- that chapter 2/78 does not qualify as a "federal" mandate.

Proper application of the "federal mandate" concept has important implications beyond subvention. **HN12[↑]** A "cost mandated by the federal government" is exempt from a local government's statutory taxation limit. (Rev. & Tax. Code, § 2271.) Moreover, an appropriation required to comply with a [*71] federal mandate is excluded from the constitutional spending limit of any affected entity, state or local (Cal. Const., art. XIII B, § 9, subd. (b).) Accordingly, we requested supplemental briefs on this question.¹⁵

[****36] After due consideration, we reject *Sacramento I's* premise. We conclude that chapter 2/78 does impose "costs mandated by the federal government," as described in article XIII B and parallel statutes.¹⁶

individual cases could easily produce debates bordering on the metaphysical. Nothing in the language or history of article XIII B, or prior subvention statutes, suggests an intent to force such debates upon the Legislature each time it considers legislation affecting local governments.

¹⁵For the reasons expressed in part III, *ante*, our consideration of this issue is not foreclosed by principles of collateral estoppel.

¹⁶In *Sacramento I*, both the parties and the Court of Appeal assumed that if a cost was "federally mandated," it was therefore *not* a "state mandated" cost subject to subvention. In other words, it was assumed, an expense could not be both "state mandated" and "federally mandated," even if imposed by the state under federal compulsion. It was in this context that *Sacramento I* addressed the

[****37] HN13[↑]

Article XIII B, section 9(b), defines federally mandated appropriations as those "required for purposes of complying with mandates of . . . the federal government which, *without discretion*, require an expenditure for additional services or which *unavoidably make the providing of existing services more costly*." (Italics added.)

As in *Sacramento I*, plaintiffs argue that the words "without discretion" and "unavoidably" require clear *legal* compulsion not present in Public Law 94-566. Defendants respond, as before, that the consequences of California's failure to comply with the federal "carrot and stick" scheme were so substantial that the state had no realistic "discretion" to refuse.¹⁷ In *Sacramento I*, the Court of Appeal adopted plaintiffs' narrow view. On reflection, we disagree.

[****38] Though section 9(b) seems plain on its face, we find a latent ambiguity in context. At the time article XIII B was adopted, United States Supreme Court decisions construing the Tenth Amendment *severely* [**534] [***151] *limited* federal power to dictate policy or programs to the sovereign states or their subdivisions.¹⁸ Indeed, by

"federal mandate" issue. (See also *Carmel Valley Fire Protection Dist.*, *supra*, 190 Cal. App. 3d at p. 543.) We here express no view on the question whether "federal" and "state" mandates are mutually exclusive for purposes of state subvention, but leave that issue for another day. We decide only that, insofar as an expense is "federally mandated," as described in the state Constitution and statutes, it is exempt from the pertinent taxation and spending limits.

¹⁷Ironically, the local agencies here argue *against* a "federal mandate," with the state in opposition to that view. An anti-"federal mandate" position seems directly contrary to the local agencies' interests, since its acceptance would mean the agencies are not eligible for exemptions from their pertinent taxing and spending limits. However, all parties appear still bound by the premise of *Sacramento I* that if a cost is "federally mandated," it is ineligible for state subvention. As noted above (see fn. 16, *ante*), we do not decide that issue here.

¹⁸HN14[↑] The Tenth Amendment to the United States Constitution provides: "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

its early ruling that federal unemployment-insurance [*72] laws did not violate state sovereignty insofar as they merely employed a "carrot and stick" to induce state compliance (*Steward Machine Co. v. Davis*, *supra*, 301 U.S. 548, 585-593 [81 L. Ed. 1279, 1290-1294]), the high court helped set the stage for two generations of pervasive federal regulation by this indirect means.¹⁹

[****39] Just three years before article XIII B was adopted, the court struck down, on Tenth Amendment grounds, Congress's effort to extend the minimum-wage and maximum-hour requirements of the Fair Labor Standards Act directly to local government employees. (*National League of Cities v. Usery* (1976) 426 U.S. 833 [49 L. Ed. 2d 245, 96 S. Ct. 2465].) Overruling earlier authority (see *Maryland v. Wirtz* (1968) 392 U.S. 183 [20 L. Ed. 2d 1020, 88 S. Ct. 2017]), the court held in *Usery, supra*, that constitutional principles of federalism prohibit Congress from using its otherwise "plenary" commerce power against the "States as States," so as to interfere with the essential "attributes of [state government] sovereignty." (426 U.S. at pp. 840-855 [49 L. Ed. 2d at pp. 250-260].) Accordingly, said the court, Congress could not "force directly upon the States its choices as to how essential decisions regarding the conduct of integral governmental functions are to be made. . . ." (*Id.*, at p. 855 [49 L. Ed. 2d at p. 259].)

Usery dealt with federal efforts to regulate sovereign units of government as employers.

[****40] However, the court's rationale obviously

¹⁹The traditional categorical-aid provisions of the Social Security Act (e.g., 42 U.S.C. §§ 301 et seq. [old-age assistance], 601 et seq. [aid to needy families with dependent children], 1201 et seq. [aid to the blind], 1351 et seq. [aid to the permanently and totally disabled]), and statutes concerned with occupational safety and health (e.g., 29 U.S.C. § 651 et seq.), highways and mass transit (e.g., 23 U.S.C. § 101 et seq.), education (e.g., 20 U.S.C. § 241a et seq.), and air and water pollution (e.g., 33 U.S.C. §§ 1251 et seq., 1311 et seq.; 42 U.S.C. § 7401 et seq.) are but a few examples of federal laws imposing greater or lesser degrees of inducement to state and local compliance with federal policies and programs.

applied with equal or greater force to direct federal regulation of state and local governments *as governments*. Under *Usery's* reasoning, it seems manifest that Congress's direct power to require or prohibit substantive governmental policies or programs by state or local agencies was greatly curtailed. Such power would interfere impermissibly with "integral governmental functions" and essential "attributes of [state] sovereignty."²⁰

[****41] [*73] After article XIII B's adoption, both the result and the reasoning of *Usery* were overruled in *Garcia v. San Antonio Metro. Transit Auth.* (1985) 469 U.S. 528 [83 L. Ed. 2d 1016, 105 S. Ct. 1005]. In *Garcia*, a five-justice majority concluded that the political structure of the federal system, rather than rigid categories of inviolable state "sovereignty," constitutes state and local governments' primary protection against Congress's overreaching efforts to regulate them. (Pp. 547-555 [83 L. Ed. 2d at pp. 1031-1037].)

However, this later development does not alter two crucial facts extant when article XIII B was enacted. First, the power of the federal government to impose its direct [*535] [***152] regulatory will on state and local agencies was *then* sharply in doubt. Second, in conformity with this principle, the vast bulk of cost-producing federal influence on government at the state and local levels was by inducement or incentive rather than direct

²⁰ *Hodel v. Virginia Surface Mining & Recl. Assn.* (1981) 452 U.S. 264 [69 L. Ed. 2d 1, 101 S. Ct. 2352] later implicitly confirmed this premise. There, Virginia mine operators challenged a federal surface-mining regulatory scheme on grounds it displaced state authority and sovereignty. The federal law imposed minimum federal standards, to be enforced by federal or state officials at the state's choice, and allowed states to take over regulation by imposing equal or higher standards of their own. (30 U.S.C. §§ 1201 et seq., 1251-1254.) The court upheld the program, noting it regulated private persons, not the "States as States." Moreover, said the court, since states were not ordered to adopt their own surface-mining standards, "there can be no suggestion that the Act commandeers the legislative processes of the States by directly compelling them to enact and enforce a federal regulatory program. [Citations.] . . ." (452 U.S. at pp. 286-288 [69 L. Ed. 2d at pp. 22-24].)

compulsion.²¹ That remains so to this day.

[****42] Thus, if article XIII B's reference to "federal mandates" were limited to strict legal compulsion by the federal government, it would have been largely superfluous.²² CA(12)[*] (12) It is well settled that "HN15[*] constitutional . . . enactments must receive a liberal, practical common-sense construction which will meet changed conditions and the growing needs of the people. [Citations.] . . ." (*Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal. 3d 208, 245 [149 Cal. Rptr. 239, 583 P.2d 1281].) While "[a] constitutional amendment should be construed in accordance with the natural and ordinary meaning of its words[,] [citation] [, the] literal language of enactments may be disregarded to avoid absurd results and to fulfill the apparent intent of the framers. [Citations.]" (*Ibid.*)

[****43] CA(11b)[*] (11b) As the drafters and adopters of article XIII B must have understood, certain regulatory standards imposed by the federal government [*74] under "cooperative federalism" schemes are coercive on the states and localities in every practical sense. The instant facts amply illustrate the point. Joint federal-state operation of

²¹ The United States Constitution includes specific limitations on the subject-matter jurisdiction of state and local governments (art. I, § 10), imposes certain direct obligations and restrictions on the "States as States" (e.g., art. I, § 2, cls. 1, 4; art. I, § 3, cls. 1, 2; art. II, § 1, cl. 2; art. IV, §§ 1, 2, cls. 1, 2; Amends. XIV, XV), and grants Congress power to prevent denial of certain constitutional rights by the states (Amends. XIII, XIV, XV). Obviously, however, these provisions account for only a minute portion of the costs incurred by state and local governments as a result of federal programs and regulations.

²² For this reason, federal cases cited by plaintiffs and their amici curiae for the proposition that Public Law 94-566 is not "coercive" (e.g., *County of Los Angeles, Cal. v. Marshall* (D.C. Cir. 1980) 631 F.2d 767 [203 App. D.C. 185]; *State, etc. v. Marshall* (1st. Cir. 1980) 616 F.2d 240) are inapposite. Those decisions applied *Tenth Amendment* principles to determine whether Public Law 94-566 was constitutionally valid. Had Public Law 94-566 been struck down on this ground, it would *not* have resulted in local costs to which the "federal mandate" provisions of article XIII B might extend. Thus, applying the *Tenth Amendment* cases to determine whether a cost is "federally mandated" for purposes of article XIII B presents a problem in circular reasoning.

a system of unemployment compensation has been a fundamental aspect of our political fabric since the Great Depression. California had afforded federally "certified" unemployment insurance protection to its workers for over 40 years by the time Public Law 94-566, chapter 2/78, and article XIII B were adopted. Every other state also operated such a system. If California failed to conform its plan to new federal requirements as they arose, its businesses faced a new and serious penalty -- full, double unemployment taxation by both state and federal governments. Besides constituting an intolerable expense against the state's economy on its face, this double taxation would place California employers at a serious competitive disadvantage against their counterparts in states which remained in federal compliance.

Plaintiffs and their amici curiae [****44] suggest California could have chosen to terminate its own unemployment insurance system, thus leaving the state's employers faced only with the federal tax. However, we cannot imagine the drafters and adopters of article XIII B intended to force the state to such draconian ends.

Here, the state simply did what was necessary to avoid certain and severe federal penalties upon its resident businesses. The alternatives were so far beyond the realm of practical reality that they left the state "without discretion" to depart from federal standards. We therefore conclude that the state acted in response to a federal "mandate" for purposes of article XIII B.²³

²³The dissent cites two older cases for the premise that in antidebt and antispending measures, the exception recognized for "mandatory" costs and expenditures has traditionally been limited to obligations imposed by law. Neither cited decision is dispositive or persuasive here.

County of Los Angeles v. Byram (1951) 36 Cal.2d 694 [227 P.2d 4], and the cases therein cited, concern the constitutional provision (Cal. Const., former art. XI, § 18, see now art. XVI, § 18 (hereafter section 18)) which prohibits local governments, absent voter approval, from incurring debts or liabilities which exceed in any year the income or revenue provided for such year. Section 18 is *absolute on its face* and, unlike article XIII B, it contains *no express exception* for mandatory expenses. Though sometimes founded on contorted

[****45] [*75] [**536] [***153] Unlike the *Sacramento I* court, we deem significant the Legislature's persistent agreement with our construction. In 1980, after the adoption of article XIII B, it amended the statutory definition of "costs mandated by the federal government" to provide that these include "costs resulting from enactment of a state law or regulation where failure to enact such law or regulation to meet specific federal program or service requirements would result in *substantial monetary penalties or loss of funds to public or private persons in the state. . . .*" (Rev. & Tax. Code, § 2206, italics added; Stats. 1980, ch. 1256, § 3, p. 4247.)

In *Sacramento I*, the Court of Appeal declined to apply this statutory amendment "retroactively" to article XIII B. (156 Cal. App. 3d at pp. 197-198.) The Legislature immediately responded. In 1984 statutes enacted for the express purpose of "[implementing]" article XIII B (see Gov. Code, § 17500), the Legislature reiterated its 1980 definition. (*Id.*, § 17513; Stats. 1984, ch. 1459, § 1,

linguistic analyses (see, e.g., *City of Long Beach v. Lisenby* (1919) 180 Cal. 52, 56 [179 P. 198]), the *implied* exceptions to section 18, as recognized in *Byram* and other cases, arise from a rule of necessity and despite the absolute constitutional language. Such implied exceptions must, of course, be narrowly confined.

On the other hand, *County of Los Angeles v. Payne* (1937) 8 Cal.2d 563 [66 P.2d 658], also cited by the dissent, construed former Political Code section 3714, which limited a local government's annual expenditures to its previously adopted budget. Section 3714 *did* contain an express exception for "mandatory expenses *required by law.*" (Italics added.) *Payne's* adherence to the explicit terms of the statutory exception is hardly remarkable.

In contrast with the measure considered in *Byram*, article XIII B and the Revenue and Taxation Code *do* expressly exempt "federally mandated" expenses from the pertinent taxation and appropriations limits. Unlike the measure construed in *Payne*, neither article XIII B nor the Revenue and Taxation Code expressly limit their exemptions to obligations "required by law." Article XIII B uses the broader terms "unavoidably" and "without discretion," suggesting recognition by the drafters and voters that forces beyond strict legal compulsion may produce expenses that are realistically involuntary. The Revenue and Taxation Code explicitly includes coercive federal "carrot and stick" requirements within the federally "mandated" costs exempt from statutory property tax limits. (Rev. & Tax. Code, § 2206.)

p. 5114.)²⁴

[****46] Plaintiffs contend that these statutory pronouncements deserve little interpretive weight since, among other things, they are "internally inconsistent." Plaintiffs stress the proviso in Revenue and Taxation Code, section 2206, and in Government Code, section 17513, that the phrase "[costs] mandated by the federal government" does *not* include costs which are specifically reimbursed or funded by the federal or state government or programs or services which may be implemented at the *option* of the state, local agency, or school district." (Italics added.)

We see no fatal inconsistencies. The first clause of the proviso merely confirms, as article XIII B itself specifies, that program funds voluntarily provided by another unit of government may not be excluded from the [*76] spending limits of recipient local agencies. (Compare art. XIII B, §§ 8, subd. (b), 9(b).) The second clause isolates a concern which we share -- that state or local governments might otherwise claim "federally mandated costs" even where participation in a federal program, or compliance with federal "standards," is a matter of true choice. (Cf. [****47], e.g., *Carmel* [**537] [***154] *Valley Fire Protection Dist., supra*, 190 Cal. App. 3d at pp. 542-544.)²⁵

²⁴ Plaintiffs suggest that by reenacting this language in the wake of *Sacramento I*, the Legislature "acquiesced" in the Court of Appeal's narrow definition of "costs mandated by the federal government." We are not persuaded. *Sacramento I* did not *construe* the statutory language; it simply found a postdated statute *irrelevant* to the proper interpretation of article XIII B. By later readopting its expanded definition in statutes designed to "implement" article XIII B, the Legislature expressed its disagreement with *Sacramento I*, not its acquiescence. Contrary to the implications of *Sacramento I*, legislative efforts to resolve ambiguities in constitutional language are entitled to serious judicial consideration. (See authorities cited *ante*.)

²⁵ In the *Carmel Valley* case, the state claimed, among other things, that local costs of purchasing protective clothing and equipment for firefighters, as required by regulations under the California Occupational Safety and Health Act, constituted a nonreimbursable "federal mandate" because the California standards merely "implemented" federal law. However, the evidence was contrary; a letter from the federal Occupational Safety and Health

[****48] Given the variety of cooperative federal-state-local programs, we here attempt no final test for "mandatory" versus "optional" compliance with federal law. CA(13)[↑] (13) A determination in each case must depend on such factors as the nature and purpose of the federal program; whether its design suggests an intent to coerce; when state and/or local participation began; the penalties, if any, assessed for withdrawal or refusal to participate or comply; and any other legal and practical consequences of nonparticipation, noncompliance, or withdrawal. Always, the courts and the Commission must respect the governing principle of article XIII B, section 9(b): neither state nor local agencies may escape their spending limits when their participation in federal programs is truly voluntary.

CA(11c)[↑] (11c) For reasons expressed above, we are satisfied under these standards that chapter 2/78 did implement a federal "mandate" within the meaning of article XIII B and prior statutes restricting local taxation. Hence, subject to superseding constitutional ceilings on taxation by state and local governments, an agency governed by chapter 2/78 may tax and spend as necessary to meet the expenses [****49] required to comply with that legislation. To the extent *Sacramento I* is inconsistent with our analysis, that decision is disapproved.

VI. Conclusion.

We have concluded that chapter 2/78 is a "federal mandate" which exempts affected state and local agencies from pertinent limits on their power to tax, appropriate, and spend. However, local governments' expenses [*77] of complying with

Administration disclaimed federal jurisdiction over California's political subdivisions and stated that state and federal standards were independent. (190 Cal. App. 3d at pp. 543-544.) Examination of the pertinent statutory scheme reinforces the view that compliance with federal standards in this area is "optional" with the state. Other than loss of limited federal administrative funds (29 U.S.C. § 672(g)), the only sanction for California's decision not to maintain a federally approved occupational safety and health system is that federal standards, administered by federal personnel, will then prevail within the state. (*Id.*, § 667(b)-(h).)

chapter 2/78 are not subject to compulsory state subvention, because chapter 2/78 imposed no new or increased "program or service," and no "unique" requirement, on local agencies. The contrary judgment of the Court of Appeal is reversed.

Concur by: KAUFMAN

Dissent by: KAUFMAN

Dissent

KAUFMAN, J., Concurring and Dissenting.

I concur in the judgment. Given this court's decision in County of Los Angeles v. State of California (1987) 43 Cal. 3d 46 [233 Cal. Rptr. 38, 729 P.2d 202], I am compelled to agree that the obligation imposed on local governments by the 1978 state unemployment insurance legislation is not a "new program or higher level of service" within the meaning of article XIII B, section 6, of the California Constitution, and that for this reason the state is not constitutionally [****50] obligated to provide a subvention of funds to reimburse the unemployment insurance costs of local governments. I respectfully dissent, however, from the additional conclusion, stated in part V of the majority opinion, that these unemployment insurance costs are "mandates of . . . the federal government" and therefore exempt from the state and local government appropriation limits of article XIII B and from property taxation limits imposed by statute. In reaching this additional conclusion the majority decides an issue not raised by the parties and completely outside the scope of this action. As so often happens when a court reaches beyond the confines of the case before it to render a gratuitous [**538] [***155] advisory opinion, the majority decides the issue incorrectly.

All too frequently in recent years (see, e.g., S. G. Borello & Sons, Inc. v. Department of Industrial Relations (1989) 48 Cal. 3d 341, 345, fn. 1 [256 Cal. Rptr. 543, 769 P.2d 399]) this court, in its misguided zeal to provide enlightenment, has

reached out to decide an issue not tendered by the parties. The majority's failure to exercise proper judicial restraint in the instant case [****51] is another example of this trend and one I find particularly disturbing since it violates a fundamental and venerable tenet of judicial practice -- i.e., "A court will not decide a constitutional question unless such construction is absolutely necessary." (Estate of Johnson (1903) 139 Cal. 532, 534 [73 P. 424]; accord, People v. Williams (1976) 16 Cal. 3d 663, 667 [128 Cal. Rptr. 888, 547 P.2d 1000]; Palermo v. Stockton Theatres, Inc. (1948) 32 Cal.2d 53, 65 [195 P.2d 1].) The federal mandate issue which the majority here decides, because it turns on the proper construction of article XIII B, section 9, of our state Constitution, is a constitutional issue. Using this case to resolve that issue is, to my mind, indefensible.

To see just how far the majority has wandered from the issues essential to the proper resolution of this case, one need only point out that this action [*78] was not brought to settle a dispute about taxation or appropriation limits, nor has this court been informed that any such dispute exists. Rather, this action was brought to enforce the holding in City of Sacramento v. State of California (1984) 156 Cal. App. 3d 182 [203 Cal. Rptr. 258] [****52] (Sacramento I), that the state is constitutionally obligated to reimburse the unemployment insurance costs of local governments. The governmental entities litigating this proceeding have not sought a judicial determination of the 1978 unemployment insurance legislation's effect on their statutory or constitutional taxing or spending limits, nor have they raised any issue regarding whether unemployment insurance costs are federally mandated for any purpose. The federal mandate issue was first injected into the case by this court when we requested additional briefing on the questions whether the unemployment insurance costs of local governments are federally mandated under article XIII B, section 9, of the state Constitution and, if so, whether this conclusion necessarily exempts the state from any obligation it might otherwise have to reimburse local

governments for these costs.

The majority's federal mandate discussion does not even provide an alternative ground for the holding denying reimbursement of local governments' unemployment insurance costs, for the majority purports to decide whether unemployment insurance costs are federally mandated without deciding whether resolution [****53] of this issue has any bearing on entitlement to reimbursement (see maj. opn., *ante*, p. 71, fn. 16). The majority's only justification for deciding whether unemployment insurance costs are federally mandated is that the issue has "important implications" inasmuch as federally mandated costs are "exempt from a local government's statutory taxation limit (Rev. & Tax. Code, § 2271)" and "from the constitutional spending limit of any affected entity, state or local (Cal. Const., art. XIII B, § 9, subd. (b))." (Maj. opn., *ante*, pp. 70-71.) But the present case is an inappropriate vehicle for deciding these weighty issues since neither the state nor the local entities have any reason to contest the other's exemptions from spending or taxation limits. In other words, the parties now before us are not adverse on these issues and so have not defined and argued opposing points of view with the vigor and thoroughness essential to proper judicial resolution of complex legal questions, particularly those of constitutional magnitude. Those who might have argued in favor of including unemployment insurance costs in the taxing and spending limits -- for example, [****54] the proponents of the initiative measure by which article XIII B was enacted -- are not represented in this proceeding.

Were the issue properly presented in this case, I would conclude that the unemployment insurance costs are not federally mandated. The text of a constitution "[**539] should be construed in accordance with [***156] the natural and ordinary meaning of its words." (Amador Valley Joint Union High Sch. Dist. v. [*79] State Bd. of Equalization (1978) 22 Cal. 3d 208, 245 [149 Cal. Rptr. 239, 583 P.2d 1281].) The language at issue

here excludes from the definition of "appropriations subject to limitation" those appropriations "required for purposes of complying with *mandates* of the courts or the federal government which, *without discretion, require* an expenditure for additional services or which *unavoidably* make the providing of existing services more costly." (Cal. Const., art. XIII B, § 9, subd. (b), italics added.)

The meaning of this language is clear; to look beyond the text for some other meaning is both unnecessary and improper under accepted rules of constitutional interpretation. (See State Board of Education v. Levit (1959) 52 Cal.2d 441, 462 [343 P.2d 8]; [****55] People v. Knowles (1950) 35 Cal.2d 175, 182-183 [217 P.2d 1].) A "mandate" is "an order, command [or] charge." (Xth Olympiad Com. v. American Olym. Assn. (1935) 2 Cal.2d 600, 604 [42 P.2d 1023]; see also, Morris v. County of Marin (1977) 18 Cal. 3d 901, 908 [136 Cal. Rptr. 251, 559 P.2d 606] ["mandatory duty" is "an obligatory duty which a governmental entity is required to perform"]; Bridgman v. American Book Co. (1958) 12 Misc.2d 63, 66 [173 N.Y.S.2d 502, 506] ["mandate" is "a command, order or direction . . . which a person is bound to obey"].) The mandates to which the constitutional provision at issue refers are those "of the courts or the federal government." The coercive force of court mandates is, of course, the force of law. That "mandates of . . . the federal government" are similarly limited to those obligations imposed by force of federal law is shown not only by the term "mandate" itself but also by the terms "without discretion" and "unavoidably," which plainly exclude any form of inducement using political or economic pressure rather than legal compulsion.

Laws limiting [****56] governmental appropriations and indebtedness have traditionally exempted two categories of expenditures: those required to meet emergencies and those required to satisfy duties or mandates imposed by law. (See, e.g., County of Los Angeles v. Byram (1951) 36 Cal.2d 694, 698-700 [227 P.2d 4]; County of Los Angeles v. Payne (1937) 8 Cal.2d 563, 569-575 [66

P.2d 658]; *State v. City Council of City of Helena* (1939) 108 Mont. 347 [90 P.2d 514, 516]; *Raynor v. King County* (1940) 2 Wn.2d 199 [97 P.2d 696, 707].) The latter category has been interpreted as including only those obligations compelled by force of law, as opposed to economic or political necessity or expedience. (See *County of Los Angeles v. Byram, supra*, at pp. 698-700; *County of Los Angeles v. Payne, supra*, at pp. 573-574.) Article XIII B of the California Constitution follows the pattern of other similar laws; it provides exemptions for emergency appropriations in section 3, subdivision (c), and for legal duties or "mandates" in section 9, subdivision (b). I see no basis for concluding that [****57] the term "mandate," which in the context of government debt and appropriation limitations has traditionally [*80] meant a duty imposed by force of law, has suddenly acquired a novel and more expansive meaning in section 9. On the contrary, the drafters of section 9 appear to have taken pains to avoid any such interpretation.

As stated in *Sacramento I*, "The concept of federal mandates . . . is defined in section 9 of article XIII B. Subdivision (b) of that section excludes from a governmental entity's appropriation limit [appropriations] required for purposes of complying with mandates of . . . the federal government which, *without discretion, require* an expenditure' by the governmental entity. (Italics added.) As contemplated by article XIII B, section 9, a federal mandate is one pursuant to which the federal government imposes a cost upon a governmental entity, and the entity has *no discretion* to refuse the cost. Chapter 2 [the 1978 unemployment insurance legislation] was not a federal mandate within this constitutional definition, as the State had the discretion to participate or not in the federal unemployment insurance system." (*Sacramento I, supra*, 156 Cal. App. 3d 182, 197, [****58] [***157] [**540] italics in original.) Giving the constitutional language its usual and ordinary meaning, I agree with the Court of Appeal that federal law "mandates" an expenditure only if the expenditure

is legally compelled, and not if the federal law merely provides economic or political inducements, no matter how powerful or coercive. Since it is undisputed that the state was under no legal compulsion to enact the 1978 unemployment insurance legislation, the burdens of that legislation are not "mandates of . . . the federal government."

In support of its contrary conclusion, the majority reasons as follows: (1) when article XIII B of the California Constitution was drafted and enacted, the Tenth Amendment to the United States Constitution had been construed to prohibit Congress from imposing costs on state and local governments; (2) as a result, virtually all federal laws imposing costs on state and local governments did so through "carrot and stick" incentive programs rather than by direct legal compulsion; and (3) the exemption for "mandates of . . . the federal government" must be construed to encompass at least some of these incentive programs because otherwise it [****59] would be almost entirely superfluous. I find each of these points highly questionable, if not demonstratively unsound.

First, the Tenth Amendment has never been interpreted as entirely prohibiting the federal government from imposing costs on state and local government. Rather, *National League of Cities v. Usery* (1976) 426 U.S. 833 [49 L. Ed. 2d 245, 96 S. Ct. 2465] defined an exception to the broad sweep of Congress's commerce clause authority. Under this exception, "traditional governmental functions" of state and local governments were protected from direct and intrusive federal regulation. (426 U.S. at p. 852 [49 L. Ed. 2d at pp. 257-258].) As explained in *Garcia v. San Antonio Metro. Transit* [*81] *Auth.* (1985) 469 U.S. 528, 538-547 [83 L. Ed. 2d 1016, 1025-1032, 105 S. Ct. 1005], the result was an inconsistent patchwork of decisions upholding or striking laws depending on whether the regulated activities were perceived by the court as being traditionally associated with state or local government or constituting "attributes of state sovereignty." Thus, a significant number of laws

imposing costs on state and local governments [****60] survived Tenth Amendment scrutiny even before the decision in *Garcia v. San Antonio Metro. Transit Auth.*, *supra*. (See, e.g., *EEOC v. Wyoming* (1983) 460 U.S. 226 [75 L. Ed. 2d 18, 103 S. Ct. 1054] [holding state and local government employee retirement policies subject to federal age discrimination regulations]; see generally, Skover, "Phoenix Rising" and *Federalism Analysis* (1986) 13 *Hastings Const. L.Q.* 271, 286-288.) More importantly, however, I see no reason to assume that the drafters of article XIII B intended that the federal mandate exemption would have broad application, encompassing a large number of federal programs. Rather, construing the exemption narrowly seems entirely consistent with the probable intent of those who drafted the provision.

The test proposed by the majority for identifying those incentive programs which qualify as "mandates of . . . the federal government" will require an extensive factual inquiry into the practical consequences of non-compliance with the federal law. It will be burdensome to apply and its outcome difficult to predict. Besides being wholly unnecessary to resolution of this case, [****61] and violating the probable intent of the voters who enacted article XIII B of the California Constitution,¹ the majority's discussion of the federal mandate issue is certain to generate more difficulties than it resolves.

End of Document

¹ Those voters no doubt will be upset to learn that their tax dollars will be dissipated in litigation to determine such metaphysical questions as whether a decision to participate in a federal program was "truly voluntary."

County of Los Angeles v. Commission on State Mandates

Court of Appeal of California, Second Appellate District, Division Seven.

Case Summary

Procedural Posture

Appellant county challenged the denial of its petition for a writ of mandate by the Superior Court of Los Angeles County (California). Appellants sought a writ of mandate compelling respondent commission to vacate its determination that Cal. Penal Code § 987.9 (1977) did not constitute a state mandate, for which the state was obligated to reimburse appellant pursuant to Cal. Const. art. XIII B, § 6.

Overview

In response to a test claim filed by appellant county for reimbursement of costs for ancillary services provided to indigent defendants, respondent commission determined that Cal. Penal Code § 987.9 (1977) did not constitute a state mandate, for which the state was obligated to reimburse appellant pursuant to Cal. Const. art. XIII B, § 6. Appellant petitioned for a writ of mandate compelling respondent to vacate its determination, which the trial court denied. Appellant sought review. The court applied the substantial evidence test and affirmed the denial of appellant's petition for a writ of mandate. The court held that a state mandate triggering reimbursement under Cal. Const. art. XIII B, § 6, did not exist because the requirements of the state statute were required by federal law. The requirement of Cal. Penal Code § 987.9 (1977) to pay for ancillary services codified the existing federal constitutional guarantees of due process under U.S. Const. amend XIV and the right to counsel under U.S. Const. amend VI. That the legislature initially provided funding under the statute was irrelevant because respondent had the sole authority to determine if a state mandate existed.

Outcome

The court affirmed the denial of appellant county's petition for a writ of mandate compelling respondent commission to vacate its determination that the statute requiring appellant to pay for ancillary services to indigent defendants was not a state-mandated program. As the duty to pay for

such services came from the Fourteenth Amendment and the Sixth Amendment right to counsel, there was no state mandate requiring reimbursement.

HN6 [↓] **Reviewability, Factual Determinations Finance**

The substantial evidence test is that standard of judicial review in which the trial court reviews the evidence adduced at the administrative hearing to determine whether there is substantial evidence in support of the agency's finding in light of the whole record. Substantial evidence is evidence of ponderable legal significance, which is reasonable in nature, credible and of solid value. Where the proper scope of review in the trial court was whether the administrative decision was supported by substantial evidence on the whole record, the function of the reviewing court on appeal from the judgment is the same as that of the trial court, that is, to review the administrative decision to determine whether it is supported by substantial evidence on the whole record.

No state mandate exists if the requirements or provisions of a state statute are, nevertheless, required by federal law. When the federal government imposes costs on local agencies those costs are not mandated by the state and thus would not require a state subvention. Instead, such costs are exempt from local agencies' taxing and spending limitations. This should be true even though the state has adopted an implementing statute or regulation pursuant to the federal mandate so long as the state had no true choice in the manner of implementation of the federal mandate.

The statutory scheme, Cal. Gov't Code § 17500 et seq., contemplates that the Commission on State Mandates, as a quasi-judicial body, has the sole and exclusive authority to adjudicate whether a state mandate exists. Thus, any legislative findings are irrelevant to the issue of whether a state mandate exists.

Headnotes/Summary**Summary****CALIFORNIA OFFICIAL REPORTS
SUMMARY**

A county sought a writ of mandate to compel the Commission on State Mandates to vacate its determination that Pen. Code, § 987.9 (funding by court for preparation of defense for indigent defendants in capital cases or cases under Pen. Code, § 190.05, subd. (a)), did not constitute a state mandate, for which the state was obligated to reimburse the county pursuant to Cal. Const., art. XIII B, § 6. The trial court denied the writ.

(Superior Court of Los Angeles County, No. BS020682, Diane Wayne, Judge.)

The Court of Appeal affirmed. The court held that the requirements of Pen. Code, § 987.9, are not state mandated, since, even in the absence of the statute, counties would be responsible for providing ancillary services to indigent defendants under the federal constitutional guaranties of right to counsel and due process (U.S. Const., 6th and 14th Amends.). And, even assuming that the provisions of the statute constitute a new program, it does not necessarily mean that the program is a state mandate under Cal. Const., art. XIII B, § 6. If a local entity has alternatives under the statute other than the mandated contribution, that contribution does not constitute a state mandate. In fact, the requirements under Pen. Code, § 987.9, are not mandated by the state, but rather by principles of constitutional law and a superior court's finding of reasonableness and necessity under the statute. Moreover, the court held that the Legislature's initial appropriation to reimburse the counties for the costs of Pen. Code, § 987.9, was not a final and unchallengeable determination that the statute constitutes a state mandate, nor did the commission err in finding that the statute is not a state mandate, despite the Legislature's finding to the contrary in a later appropriations bill. The commission was not bound by the Legislature's determination, and it had discretion to determine whether a state mandate existed. Similarly, the Legislature's initial determination to enact an appropriation did not obligate it to enact an appropriation every year in perpetuity to reimburse the counties, nor did this determination prevent future legislatures from refusing to appropriate moneys for Pen. Code, § 987.9, costs. The court also held that the appropriate standard of review was the substantial evidence test and not the independent judgment test, since the proper scope of review in the trial court was whether the administrative decision was supported by substantial evidence on the whole record. (Opinion by Woods (Fred), J., with Lillie, P. J., and Johnson, J., concurring.)

Headnotes

CA(1a)[↓] (1a) CA(1b)[↓] (1b)

Administrative Law § 138—Judicial Review and Relief—Decision of Courts on Review—Appellate Courts—Standard of Review.

--On appeal from the trial court's denial of a county's petition for a writ of mandate to compel the Commission on State Mandates to vacate its determination that Pen. Code, § 987.9 (funding by court for preparation of defense for indigent defendants in capital cases), did not constitute a state mandate, the appropriate standard of review was the substantial evidence test and not the independent judgment test. The independent judgment test applies when the order or decision substantially affects a fundamental vested right, and the county had no such right. Further, pursuant to Gov. Code, § 17559, which governs the state mandates process, a claimant or the state may commence a mandamus proceeding under Code Civ. Proc., § 1094.5, to set aside a decision of the commission on the ground that the decision is not supported by substantial evidence. Where the proper scope of review in the trial court was whether the administrative decision was supported by substantial evidence on the whole record, the function of the reviewing court on appeal from the judgment is the same as that of the trial court, that is, to review the administrative decision to determine whether it is supported by substantial evidence on the whole record.

CA(2)[↓] (2)

Administrative Law § 131—Judicial Review and Relief—Scope and Extent of Review—Evidence—Substantial Evidence Test.

--The substantial evidence test is that standard of judicial review in which the trial court reviews the evidence adduced at the administrative hearing to determine whether there is substantial evidence in

support of the agency's finding in light of the whole record. "Substantial evidence" is evidence of ponderable legal significance, which is reasonable in nature, credible, and of solid value.

CA(3a)[↓] (3a) CA(3b)[↓] (3b) CA(3c)[↓] (3c)

State of California § 11—Fiscal Matters—State Mandated Programs—What Constitutes—Funding by Court for Preparation of Defense for Indigent Defendants in Capital Cases.

--The trial court properly denied a writ of mandate sought by a county to compel the Commission on State Mandates to vacate its determination that Pen. Code, § 987.9 (funding by court for preparation of defense for indigent defendants in capital cases), did not constitute a state mandate, for which the state was obligated to reimburse the county pursuant to Cal. Const., art. XIII B, § 6. The requirements of Pen. Code, § 987.9, are not state mandated. Pursuant to the federal Constitution's guaranty of the right to counsel and its due process clause (U.S. Const., 6th and 14th Amendments), the right to counsel of an indigent defendant includes the right to the use of experts to assist counsel in preparing a defense. Thus, even in the absence of Pen. Code, § 987.9, counties would be responsible for providing ancillary services under those federal constitutional guaranties. And, even assuming that the provisions of the statute constitute a new program, it does not necessarily mean that the program is a state mandate under Cal. Const., art. XIII B, § 6. If a local entity has alternatives under the statute other than the mandated contribution, that contribution does not constitute a state mandate. In fact, the requirements under Pen. Code, § 987.9, are not mandated by the state, but rather by principles of constitutional law and a superior court's finding of reasonableness and necessity under the statute.

[See 9 **Witkin**, Summary of Cal. Law (9th ed. 1989) Taxation, § 123.]

CA(4)[↓] (4)

Criminal Law § 88—Rights of Accused—Aid of Counsel—Indigent Defendants—Scope of Assistance—Right to Use of Experts to Assist Counsel in Preparation of Defense.

--A state is required by the United States Constitution to provide counsel for indigent defendants, and that right includes the right to the use of any experts that will assist counsel in preparing a defense. If expert or investigative help is necessary to the defense pending the preliminary hearing, due process requires the state to provide the service to an indigent defendant. Further, the right to competent counsel derives not exclusively from the due process clause of U.S. Const., 14th Amend., but also from the constitutional right to the assistance of counsel. Thus, the appointment of experts on behalf of an indigent defendant is constitutionally compelled in a proper case as a fundamental part of the right of an accused under U.S. Const., 6th Amend., to be represented by counsel.

CA(5)[↓] (5)

State of California § 11—Fiscal Matters—State Mandated Programs—What Constitutes—"New Program"—Provisions of State Statute Required by Federal Law.

--A "new program" within the meaning of Cal. Const., art. XIII B, § 6 (reimbursement of local governments for new programs mandated by state), is a program that carries out the governmental function of providing services to the public, or a law that, to implement state policy, imposes unique requirements on local governments and does not apply generally to all residents and entities in the state. But no state mandate exists if the requirements or provisions of a state statute are, nevertheless, required by federal law. When the federal government imposes costs on local agencies, those costs are not mandated by the state and thus do not require a state subvention. Instead,

such costs are exempt from local agencies' taxing and spending limitations. This is true even though the state has adopted an implementing statute or regulation pursuant to the federal mandate, so long as the state had no true choice in the manner of implementation of the federal mandate.

CA(6)[↓] (6)

State of California § 11—Fiscal Matters—State Mandated Programs—What Constitutes—Funding by Court for Preparation of Defense for Indigent Defendants in Capital Cases—As Unlawful Shifting of Costs of State-administered Program.

--The decision of the Commission on State Mandates not to reimburse counties for their programs under Pen. Code, § 987.9 (funding by court for preparation of defense for indigent defendants in capital cases), did not constitute an unlawful shifting of the financial responsibility of this program from the state to the counties. The program had never been operated or administered by the State of California, and the counties had always borne legal and financial responsibility for implementing the procedures under the statute. The state merely reimbursed counties for specific expenses incurred by the counties in their operation of a program for which they had a primary legal and financial responsibility.

CA(7)[↓] (7)

State of California § 11—Fiscal Matters—State Mandated Programs—What Constitutes—Funding by Court for Preparation of Defense for Indigent Defendants in Capital Cases—Legislature's Initial Finding of State Mandate as Binding on Trial Court.

--The Legislature's initial appropriation to reimburse counties for the costs of Pen. Code, § 987.9 (funding by court for preparation of defense for indigent defendants in capital cases), was not a

final and unchallengeable determination that the statute constitutes a state mandate, nor did the Commission on State Mandates err in finding that the statute is not a state mandate, despite the Legislature's finding to the contrary in a later appropriations bill. The commission was not bound by the Legislature's determination, and it had discretion to determine whether a state mandate existed. The comprehensive administrative procedures for resolution of claims arising out of Cal. Const., art. XIII B, § 6 (Gov. Code, § 17500 et seq.), are the exclusive procedures by which to implement and enforce the constitutional provision. Thus, the commission, as a quasi-judicial body, has the sole and exclusive authority to adjudicate whether a state mandate exists. Any legislative findings are irrelevant to the issue of whether a state mandate exists, and the commission properly determined that no such mandate existed. In any event, the Legislature itself ceased to regard the provisions of Pen. Code, § 987.9, as a state mandate in 1983.

CA(8)[↓] (8)

State of California § 12—Fiscal Matters—Appropriations—As Legislative Power—Appropriation by One Legislature as Binding Future Legislatures—Costs of Funding by Court for Preparation of Defense for Indigent Defendants in Capital Cases: Legislature § 5—Powers.

--The Legislature's initial determination to enact an appropriation to reimburse counties for their costs under Pen. Code, § 987.9 (funding by court for preparation of defense for indigent defendants in capital cases), did not obligate it to enact an appropriation every year in perpetuity to reimburse the counties, nor did this determination prevent future legislatures from refusing to appropriate monies for Pen. Code, § 987.9, costs. A contrary conclusion would be directly contrary to law and would necessarily unlawfully infringe on the Legislature's constitutional authority to enact appropriations (Cal. Const., art. IV, § 1). This

authority resides with the Legislature under the doctrine of separation of governmental powers. Thus, the Legislature has the authority and the discretion to determine appropriations. If the Legislature, in its wisdom and discretion, has decided not to appropriate monies to reimburse counties for their costs under Pen. Code, § 987.9, it is well within the exercise of its constitutional authority.

I.

FACTUAL AND PROCEDURAL SUMMARY

A. Procedural.

On December 22, 1992, appellant filed its first amended verified petition for writ of mandate. In its petition, appellant sought a peremptory writ of mandate compelling respondent Commission on State Mandates (the Commission) to vacate its determination that Penal Code section¹ 987.9 did not constitute a state mandate, for which the state was obligated to reimburse [***2] appellant

¹Unless otherwise noted, all statutory references are to the Penal Code.

pursuant to article XIII B, section 6, of the California Constitution. The petition also named as real parties in interest, State Controller Gray Davis, the Department of Finance, and Director of Finance Thomas W. Hayes.

Appellant also sought an order from the lower court, determining that section 987.9 [**306] constituted a state mandate and compelling respondents to process appellant's claims.

On or about May 18, 1993, the State of California, Gray Davis, the Department of Finance, and Thomas W. Hayes filed an answer to the first amended verified petition for writ of mandate.

On or about May 19, 1993, the Commission filed its answer to the first amended verified petition for writ of mandate.

On June 30, 1993, appellant filed a motion for peremptory writ of mandate pursuant to Code of Civil Procedure section 1094.5.

On or about August 6, 1993, the Commission filed its opposition.

[*811] On or about August [***3] 13, 1993, the State of California, Gray Davis, the Department of Finance, and Thomas W. Hayes filed their opposition.

On October 8, 1993, after hearing oral arguments, the lower court denied the petition for review, finding that the Sixth Amendment of the United States Constitution guaranteed an indigent criminal defendant the right to publicly funded counsel and the right to ancillary services and that the Commission, as a quasi-judicial body, properly determined within its jurisdiction, that section 987.9 was not a state mandate.

Judgment denying the petition for writ of mandate was entered on November 4, 1993.

A notice of entry of judgment was filed on December 7, 1993.

On December 7, 1993, appellant filed its notice of

appeal.

B. Facts.

Appellant asserts section 987.9 is a state mandate, constituting a new program or higher level of service, thereby requiring reimbursement by respondents pursuant to article XIII B, section 6, of the California Constitution.²

[***4] Section 987.9 was added to the Penal Code on September 24, 1977, by chapter 1048, section 1, pages 3178-3179, of the Statutes of 1977.³ [***5] Included [*812] in the law was an appropriation in the amount of \$ 1 million for "disbursement to local agencies pursuant to Section 2231 of the Revenue and Taxation Code to reimburse such agencies for costs incurred by them pursuant to this act."⁴

² HNI[↑] Article XIII B, section 6, of the California Constitution provides, in pertinent part: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service"

³ HN2[↑] Section 987.9 provides, in pertinent part, as follows: "In the trial of a capital case or a case under subdivision (a) of Section 190.05 the indigent defendant, through the defendant's counsel, may request the court for funds for the specific payment of investigators, experts, and others for the preparation or presentation of the defense. The application for funds shall be by affidavit and shall specify that the funds are reasonably necessary for the preparation or presentation of the defense. The fact that an application has been made shall be confidential and the contents of the application shall be confidential. Upon receipt of an application, a judge of the court, other than the trial judge presiding over the case in question, shall rule on the reasonableness of the request and shall disburse an appropriate amount of money to the defendant's attorney. The ruling on the reasonableness of the request shall be made at an in camera hearing. In making the ruling, the court shall be guided by the need to provide a complete and full defense for the defendant."

⁴ HN3[↑] Former Revenue and Taxation Code section 2231, subdivision (a), required the state to reimburse local agencies for all costs mandated by the state, as defined in Revenue and Taxation Code section 2207.

Former Revenue and Taxation Code section 2207 provided, in pertinent part: " 'Costs mandated by the state' means any increased costs which a local agency is required to incur as a result of the following:

From 1977 to 1982, the first five years after the enactment of section 987.9, the Legislature enacted an appropriation to reimburse counties for their costs under that section in each annual budget act along with the following language, "for reimbursement, in accordance with subdivision (a) of section 2231 of the Revenue and Taxation Code."

[**307] In the 1983 Budget Act (Stats. 1983, ch. 323), while an appropriation was made, the appropriation no longer contained a reference to the Revenue and Taxation Code, but instead, specified that the funds [***6] were appropriated for "contributions to counties."

In subsequent years, the Budget Act language was simply, "For local assistance, Assistance to Counties for Defense of Indigents."

In the 1989-1990 Budget Act, the California Legislature enacted a \$ 13 million appropriation to reimburse counties for their costs under section 987.9. The 1989-1990 Budget Act, with the \$ 13 million appropriation, was signed into law by the Governor. In the 1990-1991 Budget Act, however, no appropriation was made to reimburse counties for their section 987.9 costs. Because of the lack of appropriation in the Budget Act, the Legislature introduced and passed Assembly Bill No. 2813, which would have appropriated the sum of \$ 13 million to reimburse counties for their section 987.9 costs. Assembly Bill No. 2813, however, was vetoed by the Governor, and consequently no appropriation was made to counties to reimburse them for their costs in the 1990-1991 Budget Act.

Upon notification by the State Controller's Office that it would not issue claiming instructions and honor requests for payment of section 987.9 costs for fiscal year 1990-1991, appellant filed its test claim with the Commission [*813] [***7] on December 26, 1991, seeking reimbursement for its costs associated with section 987.9 as a state-

"(a) Any law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program. . . ."

mandated cost.⁵

After hearing appellant's test claim, the Commission determined that section 987.9 did not constitute a reimbursable state mandate. The Commission found that an indigent defendant's rights, as guaranteed by the provisions of the Sixth Amendment, were obligatory and that the appellant's obligation to provide services to indigent defendants was not mandated by the state, but rather by the United States Constitution and various court rulings. The Commission concluded that section 987.9 did not impose a new program or higher level of service in an existing program within the meaning of Government Code section 17514 and article XIII B, section [***8] 6, of the California Constitution.

Appellant thereafter filed its petition for writ of mandate.

II.

DISCUSSION

A. The Appropriate Standard of Review of the Lower Court's Decision Is Substantial Evidence.

CA(1a)[↑] (1a) Appellant argues the independent judgment standard of review governs this court's review of the lower court's decision. Appellant is mistaken. The independent judgment test applies when the order or decision substantially affects a fundamental vested right. (*Tex-Cal Land Management, Inc. v. Agricultural Labor Relations Bd.* (1979) 24 Cal. 3d 335 [156 Cal. Rptr. 1, 595 P.2d 579].) Appellant has no fundamental vested right here and the appropriate standard of review is the substantial evidence test.

HN5[↑] Government Code section 17559 governs the state mandates process, and provides: "A claimant or the state may commence a proceeding

⁵ **HN4[↑]** A "test claim" is defined as "the first claim filed with the commission alleging costs mandated by the state as defined in Sections 17514 and 17551 of the Government Code in a particular statute or executive order." (Cal. Code Regs., tit. 2, § 1183.)

in accordance with the provisions of section 1094.5 of the Code of Civil Procedure to set aside a decision of the commission on the ground that the commission's decision *is not supported by substantial evidence*. The court may order the commission to hold another hearing regarding the claim and may direct the commission on what basis [***9] the claim is to receive a rehearing." (Italics added.)

CA(2)[↑] (2) HN6[↑] The substantial evidence test is that standard of judicial review in which the trial court reviews the evidence adduced at the administrative [*814] hearing to determine whether there is substantial evidence in support of the agency's finding in light of the whole record. "Substantial evidence" is evidence of ponderable legal significance, which is "reasonable in nature, credible and of [*308] solid value." (*Pennel v. Pond Union School Dist.* (1973) 29 Cal. App. 3d 832, 837, fn. 2 [105 Cal. Rptr. 817]; see also *Bowers v. Bernards* (1984) 150 Cal. App. 3d 870, 873 [197 Cal. Rptr. 925].)

CA(1b)[↑] (1b) Where the proper scope of review in the trial court was whether the administrative decision was supported by substantial evidence on the whole record, the function of the reviewing court on appeal from the judgment is the same as that of the trial court, that is, to review the administrative decision to determine whether it is supported by substantial evidence on the whole record. (*Steve P. Rados, Inc. v. California Occupational Saf. & Health Appeals Bd.* (1979) 89 Cal. App. 3d 590, 595 [152 Cal. Rptr. 510].) [***10]

B. An Indigent Defendant's Right to Ancillary Services Is Guaranteed by the Sixth Amendment of the United States Constitution.

CA(3a)[↑] (3a) Appellant asserts section 987.9 is a state-mandated program for which it is entitled to be reimbursed. To the contrary, the requirements of section 987.9 are not state mandated.

CA(4)[↑] (4) CA(3b)[↑] (3b) A state is required

by the United States Constitution to provide counsel for indigent defendants. (*Gideon v. Wainwright* (1963) 372 U.S. 335 [9 L. Ed. 2d 799, 83 S. Ct. 792, 93 A.L.R.2d 733].) The right to counsel includes the right to the use of any experts that will assist counsel in preparing a defense. (*In re Ketchel* (1968) 68 Cal. 2d 397, 398 [66 Cal. Rptr. 881, 438 P.2d 625]; *Torres v. Municipal Court* (1975) 50 Cal. App. 3d 778 [123 Cal. Rptr. 553]; *Mason v. State of Arizona* (9th Cir. 1974) 504 F.2d 1345, 1351.)

"It follows, therefore, that if expert or investigative help is necessary to the defense pending the preliminary hearing, due process requires the state to provide the service to indigents." (*Anderson v. Justice Court* (1979) 99 Cal. App. 3d 398, 401-402 [160 Cal. Rptr. 274].)

The California Supreme Court, in *People v. Frierson* [***11] (1979) 25 Cal. 3d 142, 162 [158 Cal. Rptr. 281, 599 P.2d 587], held that the right to competent counsel derives not exclusively from the due process clause of the Fourteenth Amendment to the United States Constitution, but also from the constitutional right to the assistance of counsel. The court concluded that the failure of counsel to take reasonable investigative measures to prepare the apparently sole meritorious defense used at trial, resulted in the presentation [*815] to the jury of an incomplete defense, and thus, deprived the defendant of his right to effective trial counsel. (*Id.*, at p. 164.)

Finally, in *People v. Worthy* (1980) 109 Cal. App. 3d 514 [167 Cal. Rptr. 402], the court found that, although there was no specific authority in California for a trial court to appoint experts at county expense for an indigent defendant represented by private counsel, the appointment of experts was constitutionally compelled in a proper case as a fundamental part of the constitutional right of an accused to be represented by counsel.

Thus, HN7[↑] even in the absence of section 987.9, appellant and other counties would be

responsible for providing ancillary services under [***12] the constitutional guarantees of due process under the Fourteenth Amendment and the Sixth Amendment right to counsel.

In *Corenevsky v. Superior Court* (1984) 36 Cal. 3d 307 [204 Cal. Rptr. 165, 682 P.2d 360], an indigent defendant challenged a superior court order denying him ancillary defense services. The court traced the judicially imposed requirement that the right to counsel includes the right to reasonably necessary ancillary services: *Keenan v. Superior Court* (1982) 31 Cal. 3d 424, 428 [180 Cal. Rptr. 489, 640 P.2d 108] ["The right to effective counsel also includes the right to ancillary services necessary in the preparation of a defense."]; *In re Ketchel, supra*, 68 Cal. 2d 397, 399-400 ["A fundamental part of the constitutional right of an accused to be represented by counsel is that his attorney . . . is obviously entitled to the aid of such expert assistance as he may need . . . in preparing the defense."]; *Puett v. Superior Court* (1979) 96 Cal. App. 3d 936, 938-939 [158 Cal. Rptr. 266] ["[T]he right to counsel encompasses the right to effective counsel which in turn encompasses the right of an indigent and his appointed counsel to have [***13] the services of an investigator."]; *People* [***309] *v. Fixel* (1979) 91 Cal. App. 3d 327, 330 [154 Cal. Rptr. 132] ["The due process right of effective counsel includes the right to ancillary services necessary in the preparation of a defense."]; *Mason v. State of Arizona, supra*, 504 F.2d 1345, 1351 ["[T]he effective assistance of counsel guarantee of the Due Process Clause requires, when necessary, the allowance of investigative expenses or appointment of investigative assistance for indigent defendants"]

The court in *Corenevsky* thus recognized that section 987.9 merely codified these constitutional guarantees.⁶

⁶ While appellant correctly points out that the court in *Corenevsky* referred to "matters within the compass of section 987.9" as "state funded" (*Corenevsky v. Superior Court, supra*, 36 Cal. 3d at p. 314,

[14] [*816]** C. Section 987.9 Merely Implements the Guarantees Provided by the Sixth Amendment of the United States Constitution.

California Constitution, article XIII B, section 6, provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates:

"(a) Legislative mandates requested by the local agency affected;

"(b) Legislation defining a new crime or changing an existing definition of a crime; or

"(c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975."

CA(5)[↑] (5) The California Supreme Court has defined what is a "new program" or "increased cost," stating that the drafters and electorate had "in mind the commonly understood meanings of the term--programs that carry out the governmental function of providing services to the public, or laws which, to implement state **[**15]** policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state." (County of Los Angeles v. State of California (1987) 43 Cal. 3d 46, 56 [233 Cal. Rptr. 38, 729 P.2d 202].)

The courts have concluded that **HN8[↑]** no state mandate exists if the requirements or provisions of a state statute are, nevertheless, required by federal law.

original italics), this was not a ruling that such funding was required, but merely a recognition of the fact that, in 1984, when the court's opinion was issued, such funding had been through the Legislature's annual appropriation.

"When the federal government imposes costs on local agencies those costs are not mandated by the state and thus would not require a state subvention. Instead, such costs are exempt from local agencies' taxing and spending limitations. This should be true even though the state has adopted an implementing statute or regulation pursuant to the federal mandate so long as the state had no 'true choice' in the manner of implementation of the federal mandate." (Hayes v. Commission on State Mandates (1992) 11 Cal. App. 4th 1564, 1593 [15 Cal. Rptr. 2d 547]; see also City of Sacramento v. State of California (1990) 50 Cal. 3d 51, 76 [266 Cal. Rptr. 139, 785 P.2d **[*817]** 522]; County of Fresno v. Lehman (1991) 229 Cal. App. 3d 340, 349 [280 Cal. Rptr. 310].) ⁷

[16]** D. *The State Has Not Shifted the Costs of a State-administered Program to the Counties.*

1. Lucia Mar Unified School Dist. v. Honig (1988) 44 Cal. 3d 830 [244 Cal. Rptr. 677, 750 P.2d 318] *is inapposite.*

CA(6)[↑] (6) Appellant argues that the Commission's decision not to reimburse the counties for their programs under section 987.9 constitutes an unlawful shifting of the financial responsibility of this program from the state **[**310]** to the counties, in violation of the California Supreme Court's holding in *Lucia Mar*.

To the contrary, *Lucia Mar* is factually distinguishable from the case presented by appellant. In *Lucia Mar*, the handicapped school program in issue had been operated and administered by the State of California for many years. The court found primary responsibility rested with the state and that the transfer of financial responsibility from the state through state tax

⁷The argument that section 987.9 is a "new program" because it requires in camera hearings, confidentiality and a second trial judge is disingenuous. The additions of those procedural requirements add nothing to the cost of the statute but are, in fact, designed to curtail costs and to protect defendants and confidentiality rights. They do not involve additional expenses. The financial impact, if any, of these requirements is merely incidental.

revenues to school districts through school district tax and assessment revenues in the school district treasuries imposed a new program on school districts. (44 Cal. 3d at p. 835.)

Upon the enactment of a statute requiring local school districts to contribute to the cost of [***17] educating their handicapped students at the state schools, the court determined it was a "new program" within the meaning of article XIII B, section 6, of the California Constitution. (*Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal. 3d at p. 836 ["The intent of [section 6 of article XIII B] would plainly be violated if the state could, while retaining administrative control of programs it has supported with state tax money, simply shift the cost of the programs to local government" (Italics added.)].)

In contrast, the program here has never been operated or administered by the State of California. The counties have always borne legal and financial responsibility for implementing the procedures under section 987.9. The state merely reimbursed counties for specific expenses incurred by the counties in their operation of a program for which they had a primary legal and financial responsibility. There has been no shift of costs from the state to the counties and *Lucia Mar* is, thus, inapposite.

[*818] *Lucia Mar* is further distinguishable because the court in *Lucia Mar* never addressed the issue presented here. That is, whether the statute [***18] in question constituted a state mandate within the meaning of article XIII B, section 6, of the California Constitution. While the court in *Lucia Mar* found that the statute created a new program, it did not reach a determination of whether the school district was mandated by the state to pay these costs within the meaning of article XIII B, section 6, of the California Constitution, and remanded the matter to the lower court to resolve this issue. (*Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal. 3d at p. 837.)

2. Assuming, *arguendo*, section 987.9 constitutes a

"new program" or "increased costs," it is not a state mandate.

CA(3c)[↑] (3c) Assuming, *arguendo*, the provisions of section 987.9 were determined to be a new program, it does not necessarily lead to the conclusion that the program is a state mandate under California Constitution, article XIII B, section 6.

If a local entity or school district has alternatives under the statute other than the mandated contribution, it does not constitute a state mandate. (*Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal. 3d at pp. 836-837.) In fact, the requirements under section 987.9 are not mandated by the state, [***19] but rather by principles of constitutional law and a superior court's finding of reasonableness and necessity under section 987.9.

E. *The Legislature's Initial Finding of a State Mandate Was Not Binding on the Lower Court.*

1. *The Commission has exclusive authority to determine whether a state mandate exists.*

CA(7)[↑] (7) Appellant argues that the Legislature's initial appropriation of \$ 1 million to reimburse the counties, containing the language "pursuant to Section 2231 of the Revenue and Taxation Code," is a final and unchallengeable determination that section 987.9 constitutes a state mandate and that, in light of the Legislature's initial finding in Assembly Bill No. 2813, the Commission erred in finding otherwise. Appellant argues that the Commission was bound by the Legislature's determination and that it had no discretion to determine whether a state mandate existed.

[**311] Appellant, however, is mistaken. The findings of the Legislature as to whether section 987.9 constitutes a state mandate are irrelevant. The Legislature enacted comprehensive administrative procedures for resolution of claims arising out of article XIII B, section 6. (Gov. Code, § 17500 et seq.) [***20] [*819] The Legislature did so

because the absence of a uniform procedure had resulted in inconsistent rulings on the existence of state mandates, unnecessary litigation, reimbursement delays, and apparently, resultant uncertainties in accommodating reimbursement requirements in the budgetary process. (*Kinlaw v. State of California* (1991) 54 Cal. 3d 326, 331 [285 Cal. Rptr. 66, 814 P.2d 1308].)

"It is apparent from the comprehensive nature of this legislative scheme, and from the Legislature's expressed intent, that the exclusive remedy for a claimed violation of section 6 lies in these procedures. The statutes create an administrative forum for resolution of state mandate claims, and establishes procedures which exist for the express purpose of avoiding multiple proceedings, judicial and administrative, addressing the same claim that a reimbursable state mandate has been created. . . . [P] . . . *In short, the Legislature has created what is clearly intended to be a comprehensive and exclusive procedure by which to implement and enforce section 6.*" (*Kinlaw v. State of California, supra*, 54 Cal. 3d at p. 333, italics added.)

Thus, **HN9**[↑] the statutory scheme contemplates *****21** that the Commission, as a quasi-judicial body, has the sole and exclusive authority to adjudicate whether a state mandate exists. Thus, any legislative findings are irrelevant to the issue of whether a state mandate exists, and the Commission properly determined that no state mandate existed.

2. Beginning in 1983, the Legislature no longer considered section 987.9 a state mandate.

Assuming, arguendo, the Legislature's findings are entitled to some weight, the Legislature, itself, ceased to regard the provisions of section 987.9 as a state mandate in 1983. For the first five years after section 987.9 was enacted, the appropriation in the annual budget acts would be made in accordance with former Revenue and Taxation Code section 2231. The budget acts would contain the following language: "For reimbursement, in accordance with

subdivision (a) of section 2231 of the Revenue and Taxation Code."

In the 1983 Budget Act, however, the funds were appropriated for "contributions to counties." There is no mention of the Revenue and Taxation provisions. In every succeeding year, the Budget Act language was simply "For local assistance, Assistance to Counties for Defense of Indigents."

*****22** The absence of any reference to the Revenue and Taxation Code sections indicates that the Legislature ceased to regard section 987.9 as a state mandate. Although the Legislature ceased to regard section 987.9 as a state mandate, it nevertheless, continued to appropriate moneys for reimbursement to counties as a means of voluntarily providing local assistance.

***820** Thus, the Legislature ceased making appropriations because it recognized that it no longer had a legal obligation to do so under the Revenue and Taxation Code or article XIII B, section 6, of the California Constitution.

F. Appellant's Request for Reimbursement Unlawfully Infringes on the Legislature's Authority of Appropriation.

CA(8)[↑] **(8)** Appellant argues that the Legislature's initial determination to enact an appropriation to reimburse counties for their costs under section 987.9 obligated it to enact an appropriation every year in perpetuity to reimburse the counties and that this determination binds future legislatures from refusing to appropriate moneys for section 987.9 costs.

Appellant's theory is directly contrary to law and would necessarily unlawfully infringe upon the Legislature's constitutional authority *****23** to enact appropriations. The appropriation of tax revenues is a legislative power granted by article IV, section 1, of the California Constitution, and the authority to appropriate moneys resides with the Legislature under the doctrine of separation of governmental *****312** powers. (*California State*

Employees' Assn. v. Flournoy (1973) 32 Cal. App. 3d 219, 234 [108 Cal. Rptr. 251].) Thus, the Legislature has the authority and the discretion to determine appropriations. (Mandel v. Myers (1981) 29 Cal. 3d 531, 539 [174 Cal. Rptr. 841, 629 P.2d 935].)

If the Legislature, in its wisdom and discretion, has decided not to appropriate monies to reimburse counties for their costs under Penal Code section 987.9, it is well within the exercise of its constitutional authority. It is not obligated to enact the same appropriations year after year, as appellant claims.

III.

DISPOSITION

The judgment is affirmed. Respondents are awarded costs of appeal.

Lillie, P. J., and Johnson, J., concurred.

Appellant's petition for review by the Supreme Court was denied May 11, 1995.

COUNTY OF LOS ANGELES et al., Plaintiffs and Appellants, v. THE STATE OF CALIFORNIA et al., Defendants and Respondents. CITY OF SONOMA et al., Plaintiffs and Appellants, v. THE STATE OF CALIFORNIA et al., Defendants and Respondents

Subsequent History: [****1] Appellants' petition for a rehearing was denied February 26, 1987.

Prior History: Superior Court of Los Angeles County, Nos. C 424301 and C 464829, Leon Savitch and John L. Cole, Judges. The Court of Appeal, Second Dist., Div. Five, affirmed the first action; the second action was reversed and remanded to the State Board of Control for further and adequate findings (B001713 and B003561).

Disposition: The judgment of the Court of Appeal is reversed. Each side shall bear its own costs.

Core Terms

workers' compensation, increased level of service, local agency, reimbursement, costs, local government, employees, subvention, programs, benefits, mandated, changes, repeal, higher level of service, increases, constitutional provision, pro tanto repeal, increased cost, plenary power, electorate, incidental, workers' compensation benefits, discipline, provide a service, cost of living, new program, state-mandated, effected, maximum, additional cost

Case Summary

Procedural Posture

Appellant county and city sought review of a decision of the Court of Appeals, Third Appellate District, Second Division (California), which held that state-mandated increases in workers' compensation benefits, that do not exceed the rise in the cost of living, were not costs which must be borne by respondent state under Cal. Const. art. XIII B, and its legislative implementing statutes.

Overview

Proceedings were initiated to determine whether legislation, which increased certain workers' compensation benefit payments, was subject to the command of Cal. Const. art. XIII B that local government costs mandated by respondent state must be funded by respondent. Appellant county and city sought review of the appellate court decision which held that state-mandated increases in workers' compensation benefits, that did not exceed the rise in the cost of living, were not costs which must be borne by respondent under Cal. Const. art. XIII B. On appeal, the court agreed that the State Board of Control properly denied appellants' claims but the court's conclusion rested on entirely new grounds. Thus, the judgment was reversed on a finding that appellants' petitions for writs of mandate to compel approval of appellants' claims lacked merit and should have been denied outright. The court concluded that Cal. Const. art. XIII B, § 6 had no application to, and respondent need not provide subvention for, the costs incurred by local agencies in providing to their employees the same increase in workers' compensation benefits that employees of private individuals or organizations received.

Outcome

The judgment of the court of appeal was reversed in favor of respondent state. The court concluded that appellant county and city's reimbursement claims were both properly denied by the California State Board of Control. Their petitions for writs of mandate seeking to compel the board to approve the claims lacked merit and should have been denied by the superior court without the necessity of further proceedings before the board.

The legislative intent of the Cal. Const. art. XIII B was subvention for the expense or increased cost of programs administered locally and for expenses occasioned by laws that impose unique requirements on local governments and do not apply generally to all state residents or entities. In using the word "programs" the commonly understood meaning of the term was meant, as in programs which carry out the governmental function of providing services to the public.

In no sense can employers, public or private, be considered to be administrators of a program of workers' compensation or to be providing services incidental to administration of the workers' compensation program. Workers' compensation is administered by the state through the Division of Industrial Accidents and the Workers' Compensation Appeals Board. Cal. Lab. Code § 3201 et seq. Therefore, although the state requires that employers provide workers' compensation for nonexempt categories of employees, increases in the cost of providing this employee benefit are not subject to reimbursement as state-mandated programs or higher levels of service within the meaning of Cal. Const. art. XIII B, § 6.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court denied a petition for writ of mandate to compel the State Board of Control to approve reimbursement claims of local government entities, for costs incurred in providing an increased level of service mandated by the state for workers' compensation benefits. The trial court found that Cal. Cosnt., art. XIII B, § 6, requiring reimbursement when the state mandates a new program or a higher level of service, is subject to an implied exception for the rate of inflation. In another action, the trial court, on similar claims, granted partial relief and ordered the board to set aside its ruling denying the claims. The trial court, in this second action, found that reimbursement was not required if the increases in benefits were only cost of living increases not imposing a higher or increased level of service on an existing program. Thus, the second matter was remanded due to insubstantial evidence and legally inadequate findings. (Superior Court of Los Angeles County, Nos. C 424301 and C 464829, Leon Savitch and John L. Cole, Judges.) The Court of Appeal, Second Dist., Div. Five, Nos. B001713 and B003561 affirmed the first action; the second action was reversed and remanded to the State Board of Control for further and adequate findings.

The Supreme Court reversed the judgment of the Court of Appeal, holding that the petitions lacked merit and should have been denied by the trial court without the necessity of further proceedings before the board. The court held that when the voters adopted art. XIII B, § 6, their intent was not to require that state to provide subvention whenever a newly enacted statute results incidentally in some cost to local agencies, but only to require subvention for the expense or increased cost of programs administered locally, and for expenses occasioned by laws that impose unique

requirements on local governments and do not apply generally to all state residents or entities. Thus, the court held, reimbursement was not required by art. XIII B, § 6. Finally, the court held that no pro tanto repeal of Cal. Const., art. XIV, § 4 (workers' compensation), was intended or made necessary by the adoption of art. XIII B, § 6. (Opinion by Grodin, J., with Bird, C. J., Broussard, Reynoso, Lucas and Panelli, JJ., concurring. Separate concurring opinion by Mosk, J.)

Headnotes

CA(1)[↓] (1)

State of California § 12—Fiscal Matters— Appropriations—Reimbursement to Local Governments—Costs to Be Reimbursed.

--When the voters adopted Cal. Const., art. XIII B, § 6 (reimbursement to local agencies for new programs and services), their intent was not to require the state to provide subvention whenever a newly enacted statute resulted incidentally in some cost to local agencies. Rather, the drafters and the electorate had in mind subvention for the expenses occasioned by laws that impose unique requirements on local governments and do not apply generally to all state residents or entities.

CA(2)[↓] (2)

Statutes § 18—Repeal—Effect—"Increased Level of Service."

--The statutory definition of the phrase "increased level of service," within the meaning of Rev. Tax. Code, § 2207, subd. (a) (programs resulting in increased costs which local agency is required to incur), did not continue after it was specifically repealed, even though the Legislature, in enacting the statute, explained that the definition was declaratory of existing law. It is ordinarily presumed that the Legislature, by deleting an express provision of a statute, intended a substantial

change in the law.

[See Am.Jur.2d, Statutes, § 384.]

CA(3)[↓] (3)

Constitutional Law § 13—Construction of Constitutions—Language of Enactment.

--In construing the meaning of an initiative constitutional provision, a reviewing court's inquiry is focused on what the voters meant when they adopted the provision. To determine this intent, courts must look to the language of the provision itself.

CA(4)[↓] (4)

Constitutional Law § 13—Construction of Constitutions—Language of Enactment—"Program"

--The word "program," as used in Cal. Const., art. XIII B, § 6 (reimbursement to local agencies for new programs and services), refers to programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state.

CA(5)[↓] (5)

State of California § 12—Fiscal Matters—Appropriations—Reimbursement to Local Governments—Increases in Workers' Compensation Benefits.

--The provisions of Cal. Const., art. XIII B, § 6 (reimbursement to local agencies for new programs and services), have no application to, and the state need not provide subvention for, the costs incurred by local agencies in providing to their employees the same increase in workers' compensation benefits that employees of private individuals or

organizations receive. Although the state requires that employers provide workers' compensation for nonexempt categories of employees, increases in the cost of providing this employee benefit are not subject to reimbursement as state-mandated programs or higher levels of service within the meaning of art. XIII B, § 6. Accordingly, the State Board of Control properly denied reimbursement to local governmental entities for costs incurred in providing state-mandated increases in workers' compensation benefits. (Disapproving City of Sacramento v. State of California (1984) 156 Cal. App. 3d 182 [203 Cal. Rptr. 258], to the extent it reached a different conclusion with respect to expenses incurred by local entities as the result of a newly enacted law requiring that all public employees be covered by unemployment insurance.)

[See Cal.Jur.3d, State of California, § 78.]

CA(6)[↓] (6)

Constitutional Law § 14—Construction of Constitutions—Reconcilable and Irreconcilable Conflicts.

--Controlling principles of construction require that in the absence of irreconcilable conflict among their various parts, constitutional provisions must be harmonized and construed to give effect to all parts.

CA(7)[↓] (7)

Constitutional Law § 14—Construction of Constitutions—Reconcilable and Irreconcilable Conflicts—Pro Tanto Repeal of Constitutional Provision.

--The goals of Cal. Const., art XIII B, § 6 (reimbursement to local agencies for new programs and services), were to protect residents from excessive taxation and government spending, and to preclude a shift of financial responsibility for

governmental functions from the state to local agencies. Since these goals can be achieved in the absence of state subvention for the expense of increases in workers' compensation benefit levels for local agency employees, the adoption of art. XIII B, § 6, did not effect a pro tanto repeal of Cal. Const., art. XIV, § 4, which gives the Legislature plenary power over workers' compensation.

Opinion by: GRODIN

Opinion

[*49] [**203] [***38] We are asked in this

proceeding to determine whether legislation enacted in 1980 and 1982 increasing certain workers' compensation benefit payments is subject to the command of article XIII B of the California Constitution that local government costs mandated by the state must be funded by the state. The County of Los Angeles and the City of Sonoma sought review by this court of a decision of the Court of Appeal which held that state-mandated increases [***39] in workers' compensation benefits that do not exceed the rise in the cost of living are not costs which must be borne by the state under article XIII B, an initiative constitutional provision, and legislative implementing [****3] statutes.

Although we agree that the State Board of Control properly denied plaintiffs' claims, our conclusion rests on grounds other than those relied upon by the Court of Appeal, and requires that its judgment be reversed. CA(1)[7] (1) We conclude that when the voters adopted article XIII B, section 6, their intent was not to require the state to provide subvention whenever a newly enacted statute resulted incidentally in some cost to local agencies. HN1[7] Rather, the drafters and the electorate had in mind subvention for the expense or [*50] increased cost of programs administered locally and for expenses occasioned by laws that impose unique requirements on local governments and do not apply generally to all state residents or entities. In using the word "programs" they had in mind the commonly understood meaning of the term, programs which carry out the governmental function of providing services to the public. Reimbursement for the cost or increased cost of providing workers' compensation benefits to employees of local agencies is not, therefore, required by section 6.

We recognize also the potential conflict between article XIII B and the grant of plenary power over workers' [****4] compensation bestowed upon the Legislature by section 4 of article XIV, but in accord with established rules of construction our construction of article XIII B, section 6,

harmonizes these constitutional provisions.

I

On November 6, 1979, the voters approved an initiative measure which added article XIII B to the California Constitution. That article imposed spending limits on the state and local governments and provided in section 6 (hereafter section 6): "Whenever the Legislature or any state agency mandates a new program or higher level of [**204] service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [para.] (a) Legislative mandates requested by the local agency affected; [para.] (b) Legislation defining a new crime or changing an existing definition of a crime; or [para.] (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975." No [****5] definition of the phrase "higher level of service" was included in article XIII B, and the ballot materials did not explain its meaning.¹

The genesis of this action was the enactment in 1980 and 1982, after article XIII B had been adopted, of laws increasing the amounts which [**51] employers, [****6] including local governments, must pay in workers' compensation benefits to injured employees and families of deceased employees.

¹ The analysis by the Legislative Analyst advised that the state would be required to "reimburse local governments for the cost of complying with 'state mandates.' 'State mandates' are requirements imposed on local governments by legislation or executive orders." Elsewhere the analysis repeats: "[The] initiative would establish a requirement that the state provide funds to reimburse local agencies for the cost of complying with state mandates"

The one ballot argument which made reference to section 6, referred only to the "new program" provision, stating, "Additionally, this measure [para.] (1) will not allow the state government to force programs on local governments without the state paying for them."

The first of these statutes, Assembly, Bill No. 2750 (Stats. 1980, ch. 1042, p. 3328), amended several sections of the Labor Code related to workers' compensation. The amendments of Labor Code sections 4453, 4453.1 and 4460 increased the maximum weekly wage upon which temporary and permanent disability indemnity is computed from \$ 231 per week to \$ 262.50 per week. The amendment of section 4702 of the Labor Code increased certain death benefits from \$ 55,000 to \$ 75,000. No appropriation [****40] for increased state-mandated costs was made in this legislation.²

[****7] Test claims seeking reimbursement for the increased expenditure mandated by these changes were filed with the State Board of Control in 1981 by the County of San Bernardino and the City of Los Angeles. The board rejected the claims, after hearing, stating that the increased maximum workers' compensation benefit levels did not change the terms or conditions under which benefits were to be awarded, and therefore did not, by increasing the dollar amount of the benefits, create an increased level of service. The first of these consolidated actions was then filed by the County of Los Angeles, the County of San Bernardino, and the City of San Diego, seeking a writ of mandate to compel the board to approve the reimbursement claims for costs incurred in providing an increased level of service mandated

² The bill was approved by the Governor and filed with the Secretary of State on September 22, 1980. Prior to this, the Assembly gave unanimous consent to a request by the bill's author that his letter to the Speaker stating the intent of the Legislation be printed in the Assembly Journal. The letter stated: (1) that the Assembly Ways and Means Committee had recommended approval without appropriation on grounds that the increases were a result of changes in the cost of living that were not reimbursable under either Revenue and Taxation Code section 2231, or article XIII B; (2) the Senate Finance Committee had rejected a motion to add an appropriation and had approved a motion to concur in amendments of the Conference Committee deleting any appropriation.

Legislative history confirms only that the final version of Assembly Bill No. 2750, as amended in the Assembly on April 16, 1986, contained no appropriation. As introduced on March 4, 1980, with a higher minimum salary of \$ 510 on which to base benefits, an unspecified appropriation was included.

by the state pursuant to Revenue and Taxation Code section 2207.³ They also sought a declaration that because the State of California and the board were obliged by article XIII B to reimburse them, they were not obligated to **[**205]** pay the increased benefits until the state provided reimbursement.

[**8]** The superior court denied relief in that action. The court recognized that although increased benefits reflecting cost of living raises were not expressly **[*52]** excepted from the requirement of state reimbursement in section 6 the intent of article XIII B to limit governmental expenditures to the prior year's level allowed local governments to make adjustment for changes in the cost of living, by increasing their own appropriations. Because the Assembly Bill No. 2750 changes did not exceed cost of living changes, they did not, in the view of the trial court, create an "increased level of service" in the existing workers' compensation program.

The second piece of legislation (Assem. Bill No. 684), enacted in 1982 (Stats. 1982, ch. 922, p. 3363), again changed the benefit levels for workers' compensation by increasing the maximum weekly wage upon which benefits were to be computed, and made other changes among which were: The bill increased minimum weekly earnings for temporary and permanent total disability from \$ 73.50 to \$ 168, and the maximum from \$ 262.50 to \$ 336. For permanent partial disability the weekly wage was raised from a minimum of \$ 45 to \$ 105, and from a maximum **[****9]** of \$ 105 to \$ 210, in each case for injuries occurring on or after January 1, 1984. (Lab. Code, § 4453.) A \$ 10,000 limit on additional compensation for injuries resulting from serious and willful employer misconduct was removed (Lab. Code, § 4553), and the maximum death benefit was raised from \$ 75,000 to \$ 85,000 for deaths in 1983, and to \$ 95,000 for deaths on or

after January 1, 1984. (Lab. Code, § 4702.)

Again the statute included no appropriation and this time the statute expressly acknowledged that the omission was made "[notwithstanding] section 6 of Article XIII B of the California Constitution and section 2231 . . . of the Revenue and Taxation **[***41]** Code." (Stats. 1982, ch. 922, § 17, p. 3372.)⁴

[**10]** Once again test claims were presented to the State Board of Control, this time by the City of Sonoma, the County of Los Angeles, and the City of San Diego. Again the claims were denied on grounds that the statute made no change in the terms and conditions under which workers' compensation benefits were to be awarded, and the increased costs incurred as a result of higher benefit levels did not create an increased level of service as defined in Revenue and Taxation Code section 2207, subdivision (a).

The three claimants then filed the second action asking that the board be compelled by writ of mandate to approve the claims and the state to pay them, and that chapter 922 be declared unconstitutional because it was not adopted in conformity with requirements of the Revenue and Taxation Code or **[*53]** section 6. The trial court granted partial relief and ordered the board to set aside its ruling. The court held that the board's decision was not supported by substantial evidence and legally adequate findings on the presence of a state-mandated cost. The basis for this ruling was the failure of the board to make adequate findings on the possible impact **[****11]** of changes in the burden of proof in some workers' compensation proceedings (Lab. Code, § 3202.5); a limitation on an injured worker's right to sue his employer under the "dual capacity" exception to the exclusive remedy doctrine (Lab. Code, §§ 3601- 3602); and

³ The superior court consolidated another action by the County of Butte, Novato Fire Protection District, and the Galt Unified School District with that action. Neither those plaintiffs nor the County of San Bernardino are parties to the appeal.

⁴ The same section "recognized," however, that a local agency "may pursue any remedies to obtain reimbursement available to it" under the statutes governing reimbursement for state-mandated costs in chapter 3 of the Revenue and Taxation Code, commencing with section 2201.

changes in death and disability benefits and in liability in serious and wilful misconduct cases. (Lab. Code, § 4551.)

The court also held: "[The] changes made by chapter 922, Statutes of 1982 may be excluded from state-mandated costs if that change effects a cost of living increase which does not impose a higher or increased level of service on an existing program." The City of Sonoma, the County of Los Angeles, and the City of San Diego [****206**] appeal from this latter portion of the judgment only.

II

The Court of Appeal consolidated the appeals. The court identified the dispositive issue as whether legislatively mandated increases in workers' compensation benefits constitute a "higher level of service" within the meaning of section 6, or are an "increased level of service" ⁵ described in subdivision (a) of Revenue and Taxation Code section 2207 [******12**]. The parties did not question the proposition that higher benefit payments might constitute a higher level of "service." The dispute centered on whether higher benefit payments which do not exceed increases in the cost of living constitute a higher level of service. Appellants maintained that the reimbursement requirement of section 6 is absolute and permits no implied or judicially created exception for increased costs that do not exceed the inflation rate. The Court of Appeal addressed the problem as one of defining "increased level of service."

The court rejected appellants' argument that a definition of "increased level of service" that once had been included in section 2231, subdivision (e) of the Revenue and Taxation Code should be applied. That definition brought any law that imposed "additional costs" within the scope of "increased [******13**] level of service." The court

⁵ The court concluded that there was no legal or semantic difference in the meaning of the terms and considered the intent or purpose of the two provisions to be identical.

concluded that the repeal of section 2231 in 1975 (Stats. 1975, ch. 486, § 7, pp. 999-1000) and the failure of the Legislature by statute or the electorate in article XIII B to readopt the [***54**] definition must be treated as reflecting an intent to change the law. (*Eu v. Chacon* (1976) 16 Cal.3d 465, 470 [128 Cal. Rptr. 1, 546 P.2d 289].) ⁶ On that basis the court [******42**] concluded that increased costs were no longer tantamount to an increased level of service.

[******14**] The court nonetheless assumed that an increase in costs mandated by the Legislature did constitute an increased level of service if the increase exceeds that in the cost of living. The judgment in the second, or "Sonoma" case was affirmed. The judgment in the first, or "Los Angeles" case, however, was reversed and the matter "remanded" to the board for more adequate findings, with directions. ⁷

III

⁶ The Court of Appeal also considered the expression of legislative intent reflected in the letter by the author of Assembly Bill No. 2750 (see fn. 2, *ante*). While consideration of that expression of intent may have been proper in construing Assembly Bill No. 2750, we question its relevance to the proper construction of either section 6, adopted by the electorate in the prior year, or of Revenue and Taxation Code section 2207, subdivision (a) enacted in 1975. (Cf. *California Employment Stabilization Co. v. Payne* (1947) 31 Cal.2d 210, 213-214 [187 P.2d 702].) There is no assurance that the Assembly understood that its approval of printing a statement of intent as to the later bill was also to be read as a statement of intent regarding the earlier statute, and it was not relevant to the intent of the electorate in adopting section 6.

The Court of Appeal also recognized that the history of Assembly Bill No. 2750 and Statutes 1982, chapter 922, which demonstrated the clear intent of the Legislature to omit any appropriation for reimbursement of local government expenditures to pay the higher benefits precluded reliance on reimbursement provisions included in benefit-increase bills passed in earlier years. (See e.g., Stats. 1973, chs. 1021 and 1023.)

⁷ We infer that the intent of the Court of Appeal was to reverse the order denying the petition for writ of mandate and to order the superior court to grant the petition and remand the matter to the board with directions to set aside its order and reconsider the claim after making the additional findings. (See Code Civ. Proc. § 1094.5, subd. (f).)

The Court of Appeal did not articulate the basis for its conclusion that costs in excess of the increased cost of living do constitute a reimbursable increased level of service within the meaning of section 6. Our task in ascertaining [****15] the meaning of the phrase is aided somewhat by one explanatory reference to this part of section 6 in the ballot materials.

A statutory requirement of state reimbursement was in effect when section 6 [**207] was adopted. That provision used the same "increased level of service" phraseology but it also failed to include a definition of "increased level of service," providing only: "Costs mandated by the state" means any increased costs which a local agency is required to incur as a result of the following: [para.] (a) Any law . . . which mandates a new program or an increased level of service of an existing program." (Rev. & Tax. Code § 2207.) As noted, however, the definition of that term which had been [*55] included in Revenue and Taxation Code section 2164.3 as part of the Property Tax Relief Act of 1972 (Stats. 1972, ch. 1406, § 14.7, p. 2961), had been repealed in 1975 when Revenue and Taxation Code section 2231, which had replaced section 2164.3 in 1973, was repealed and a new section 2231 enacted. (Stats. 1975, ch. 486, §§ 6 & 7, p. 999.)⁸ Prior to repeal, Revenue and Taxation Code section 2164.3 [****16] , and later section 2231, after providing in subdivision (a) for state

reimbursement, explained in subdivision (e) that "'Increased level of service' means any requirement mandated by state law or executive regulation . . . which makes necessary expanded or additional costs to a county, city and county, city, or special district." (Stats. 1972, ch. 1406, § 14.7, p. 2963.)

[****17] [***43] CA(2)[↑] (2) Appellants contend that despite its repeal, the definition is still valid, relying on the fact that the Legislature, in enacting section 2207, explained that the provision was "declaratory of existing law." (Stats. 1975, ch. 486, § 18.6, p. 1006.) We concur with the Court of Appeal in rejecting this argument. HN2[↑] "[I]t is ordinarily to be presumed that the Legislature by deleting an express provision of a statute intended a substantial change in the law." (Lake Forest Community Assn. v. County of Orange (1978) 86 Cal. App. 3d 394, 402 [150 Cal. Rptr. 286]; see also Eu v. Chacon, supra, 16 Cal.3d 465, 470.) Here, the revision was not minor: a whole subdivision was deleted. As the Court of Appeal noted, "A change must have been intended; otherwise deletion of the preexisting definition makes no sense."

Acceptance of appellants' argument leads to an unreasonable interpretation of section 2207. If the Legislature had intended to continue to equate "increased level of service" with "additional costs," then the provision would be circular: "costs mandated by the state" are defined as "increased costs" due to an "increased [****18] level of service," which, in turn, would be defined as "additional costs." We decline to accept such an interpretation. Under the repealed provision, "additional costs" may have been deemed tantamount to an "increased level of service," but not under the post-1975 statutory scheme. Since that definition has been repealed, an act of which the drafters of section 6 and the electorate are presumed to have been [*56] aware, we may not conclude that an intent existed to incorporate the repealed definition into section 6.

CA(3)[↑] (3) HN3[↑] In construing the meaning

⁸ Pursuant to the 1972 and successor 1973 property tax relief statutes the Legislature had included appropriations in measures which, in the opinion of the Legislature, mandated new programs or increased levels of service in existing programs (see, e.g., Stats. 1973, ch. 1021, § 4, p. 2026; ch. 1022, § 2, p. 2027; Stats. 1976, ch. 1017, § 9, p. 4597) and reimbursement claims filed with the State Board of Control pursuant to Revenue and Taxation Code sections 2218-2218.54 had been honored. When the Legislature fails to include such appropriations there is no judicially enforceable remedy for the statutory violation notwithstanding the command of Revenue and Taxation Code section 2231, subdivision (a) that "[the] state shall reimburse each local agency for all 'costs mandated by the state,' as defined in Section 2207" and the additional command of subdivision (b) that any statute imposing such costs "provide an appropriation therefor." (County of Orange v. Flournoy (1974) 42 Cal. App. 3d 908, 913 [117 Cal. Rptr. 224].)

of the constitutional provision, our inquiry is not focussed on what the Legislature intended in adopting the former statutory reimbursement scheme, but rather on what the voters meant when they adopted article XIII B in 1979. To determine this intent, we must look to the language of the provision itself. (*ITT World Communications, Inc. v. City and County of San Francisco* (1985) 37 Cal.3d 859, 866 [210 Cal. Rptr. 226, 693 P.2d 811].) In section 6, the electorate commands [**208] that the state reimburse local agencies for the cost of any "new program or higher level of service." Because workers' [****19] compensation is not a new program, the parties have focussed on whether providing higher benefit payments constitutes provision of a higher level of service. As we have observed, however, the former statutory definition of that term has been incorporated into neither section 6 nor the current statutory reimbursement scheme.

CA(4)[↑] (4) Looking at the language of section 6 then, it seems clear that by itself the term "higher level of service" is meaningless. It must be read in conjunction with the predecessor phrase "new program" to give it meaning. Thus read, it is apparent that the subvention requirement for increased or higher level of service is directed to state mandated increases in the services provided by local agencies in existing "programs." But the term "program" itself is not defined in article XIII B. What programs then did the electorate have in mind when section 6 was adopted? We conclude that the drafters and the electorate had in mind the commonly understood meanings of the term -- programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and [****20] do not apply generally to all residents and entities in the state.

The concern which prompted the inclusion of section 6 in article XIII B was the perceived attempt by the state to enact legislation or adopt administrative orders creating programs to be

administered by local agencies, thereby transferring to those agencies the fiscal responsibility for providing services which the state believed should be extended to the public. In their ballot arguments, the proponents of article XIII B explained section 6 to the voters: "Additionally, this measure: (1) Will not allow the state government to *force programs* on local governments without the state paying for them." (Ballot Pamp., Proposed Amend. to Cal. Const. with arguments [***44] to voters, Spec. Statewide Elec. (Nov. 6, 1979) p. 18. Italics added.) In this context the phrase "to force programs on local governments" confirms that the intent underlying section 6 was to require reimbursement to local agencies for the costs involved in carrying out functions peculiar to government, not [*57] for expenses incurred by local agencies as an incidental impact of laws that apply generally to all state residents and entities. [****21] Laws of general application are not passed by the Legislature to "force" programs on localities.

The language of section 6 is far too vague to support an inference that it was intended that each time the Legislature passes a law of general application it must discern the likely effect on local governments and provide an appropriation to pay for any incidental increase in local costs. We believe that if the electorate had intended such a far-reaching construction of section 6, the language would have explicitly indicated that the word "program" was being used in such a unique fashion. (Cf. *Fuentes v. Workers' Comp. Appeals Bd.* (1976) 16 Cal.3d 1, 7 [128 Cal. Rptr. 673, 547 P.2d 449]; *Big Sur Properties v. Mott* (1976) 63 Cal. App. 3d 99, 105 [132 Cal. Rptr. 835].) Nothing in the history of article XIII B that we have discovered, or that has been called to our attention by the parties, suggests that the electorate had in mind either this construction or the additional indirect, but substantial impact it would have on the legislative process.

HN4[↑] Were section 6 construed to require state subvention for the incidental cost to local

governments [****22] of general laws, the result would be far-reaching indeed. Although such laws may be passed by simple majority vote of each house of the Legislature (art. IV, § 8, subd. (b)), the revenue measures necessary to make them effective may not. A bill which will impose costs subject to subvention of local agencies must be accompanied by a revenue measure providing the subvention required by article XIII B. (Rev. & Tax. Code, §§ 2255, subd. (c).) Revenue bills must be passed by two-thirds vote of each house of the Legislature. (Art. IV, § 12, subd. (d).) Thus, were we to construe section 6 as [**209] applicable to general legislation whenever it might have an incidental effect on local agency costs, such legislation could become effective only if passed by a supermajority vote.⁹ Certainly no such intent is reflected in the language or history of article XIII B or section 6.

[****23] CA(5)[↑] (5) We conclude therefore that section 6 has no application to, and the state need not provide subvention for, the costs incurred by local agencies in providing to their employees the same increase in workers' compensation [*58] benefits that employees of private individuals or organizations receive.¹⁰ Workers' compensation is not a program administered by local agencies to provide service to the public. Although local agencies must provide benefits to their employees either through insurance or direct payment, they are

⁹ Whether a constitutional provision which requires a supermajority vote to enact substantive legislation, as opposed to funding the program, may be validly enacted as a Constitutional amendment rather than through revision of the Constitution is an open question. (See *Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal.3d 208, 228 [149 Cal. Rptr. 239, 583 P.2d 1281].)

¹⁰ The Court of Appeal reached a different conclusion in *City of Sacramento v. State of California* (1984) 156 Cal. App. 3d 182 [203 Cal. Rptr. 258], with respect to a newly enacted law requiring that all public employees be covered by unemployment insurance. Approaching the question as to whether the expense was a "state mandated cost," rather than as whether the provision of an employee benefit was a "program or service" within the meaning of the Constitution, the court concluded that reimbursement was required. To the extent that this decision is inconsistent with our conclusion here, it is disapproved.

indistinguishable in this respect from private employers. HN5[↑] In no sense can employers, public or private, be considered to be administrators of a program of workers' compensation or to be providing services incidental to administration of the program. Workers' compensation is administered by the state through the Division of Industrial Accidents and the Workers' Compensation Appeals Board. (See [****45] Lab. Code, § 3201 et seq.) Therefore, although the state requires that employers provide workers' compensation for nonexempt categories of employees, increases in the cost of providing this employee benefit are not subject [****24] to reimbursement as state-mandated programs or higher levels of service within the meaning of section 6.

IV

CA(6)[↑] (6) HN6[↑] Our construction of section 6 is further supported by the fact that it comports with controlling principles of construction which "require that in the absence of irreconcilable conflict among their various parts, [constitutional provisions] must be harmonized and construed [****25] to give effect to all parts. (*Clean Air Constituency v. California State Air Resources Bd.* (1974) 1 Cal.3d 801, 813-814 [114 Cal. Rptr. 577, 523 P.2d 617]; *Serrano v. Priest* (1971) 5 Cal.3d 584, 596 [96 Cal. Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187]; *Select Base Materials v. Board of Equal.* (1959) 51 Cal.2d 640, 645 [335 P.2d 672].)" (*Legislature v. Deukmejian* (1983) 34 Cal.3d 658, 676 [194 Cal. Rptr. 781, 669 P.2d 17].)

HN7[↑] Our concern over potential conflict arises because article XIV, section 4,¹¹ gives the

¹¹ HN8[↑] Section 4: "The Legislature is hereby expressly vested with plenary power, unlimited by any provision of this Constitution, to create, and enforce a complete system of workers' compensation, by appropriate legislation, and in that behalf to create and enforce a liability on the part of any or all persons to compensate any or all of their workers for injury or disability, and their dependents for death incurred or sustained by the said workers in the course of their

[**210] Legislature "plenary power, unlimited by any provision of [*59] this Constitution" over workers' compensation. Although seemingly unrelated to workers' compensation, section 6, as we have shown, would have an indirect, but substantial impact on the ability of the Legislature to make future changes in the existing workers'

employment, irrespective of the fault of any party. A complete system of workers' compensation includes adequate provisions for the comfort, health and safety and general welfare of any and all workers and those dependent upon them for support to the extent of relieving from the consequences of any injury or death incurred or sustained by workers in the course of their employment, irrespective of the fault of any party; also full provision for securing safety in places of employment; full provision for such medical, surgical, hospital and other remedial treatment as is requisite to cure and relieve from the effects of such injury; full provision for adequate insurance coverage against liability to pay or furnish compensation; full provision for regulating such insurance coverage in all its aspects, including the establishment and management of a State compensation insurance fund; full provision for otherwise securing the payment of compensation and full provision for vesting power, authority and jurisdiction in an administrative body with all the requisite governmental functions to determine any dispute or matter arising under such legislation, to the end that the administration of such legislation shall accomplish substantial justice in all cases expeditiously, inexpensively, and without encumbrance of any character; all of which matters are expressly declared to be the social public policy of this State, binding upon all departments of the State government.

"The Legislature is vested with plenary powers, to provide for the settlement of any disputes arising under such legislation by arbitration, or by an industrial accident commission, by the courts, or by either, any, or all of these agencies, either separately or in combination, and may fix and control the method and manner of trial of any such dispute, the rules of evidence and the manner of review of decisions rendered by the tribunal or tribunals designated by it; provided, that all decisions of any such tribunal shall be subject to review by the appellate courts of this State. The Legislature may combine in one statute all the provisions for a complete system of workers' compensation, as herein defined.

"The Legislature shall have power to provide for the payment of an award to the state in the case of the death, arising out of and in the course of the employment, of an employee without dependents, and such awards may be used for the payment of extra compensation for subsequent injuries beyond the liability of a single employer for awards to employees of the employer.

"Nothing contained herein shall be taken or construed to impair or render ineffectual in any measure the creation and existence of the industrial accident commission of this State or the State compensation insurance fund, the creation and existence of which, with all the functions vested in them, are hereby ratified and confirmed." (Italics added.)

compensation scheme. Any changes in the system which would increase benefit levels, provide new services, or extend current service might also increase local agencies' costs. Therefore, even though workers' compensation is a program which is [****26] intended [***46] to provide benefits to all injured or deceased employees and their families, because the change might have some incidental impact on local government costs, the change could be made only if it commanded a supermajority vote of two-thirds of the members of each house of the Legislature. The potential conflict between section 6 and the plenary power over workers' compensation granted to the Legislature by article XIV, section 4 is apparent.

[****27] The County of Los Angeles, while recognizing the impact of section 6 on the Legislature's power over workers' compensation, argues that the "plenary power" granted by article XIV, section 4, is power over the substance of workers' compensation legislation, and that this power would be unaffected by article XIII B if the latter is construed to compel reimbursement. The subvention requirement, it is argued, is analogous to other procedural [*60] limitations on the Legislature, such as the "single subject rule" (art. IV, § 9), as to which article XIV, section 4, has no application. We do not agree. A constitutional requirement that legislation either exclude employees of local governmental agencies or be adopted by a supermajority vote would do more than simply establish a format or procedure by which legislation is to be enacted. It would place workers' compensation legislation in a special classification of substantive legislation and thereby curtail the power of a majority to enact substantive changes by any procedural means. If section 6 were applicable, therefore, article XIII B would restrict the power of the Legislature over workers' compensation.

The City of Sonoma [****28] concedes that so construed article XIII B *would* restrict the plenary power of the Legislature, and reasons that the provision therefore either effected a pro tanto

repeal of article XIV, section 4, or must be accepted as a limitation on the power of the Legislature. We need not accept that conclusion, however, because our construction of section 6 permits the constitutional provisions to be reconciled.

Construing a recently enacted constitutional provision such as section 6 to avoid conflict with, and thus pro tanto repeal of, an earlier provision is also consistent with **[**211]** and reflects the principle applied by this court in *Hustedt v. Workers' Comp. Appeals Bd.* (1981) 30 Cal.3d 329 [178 Cal. Rptr. 801, 636 P.2d 1139]. There, by coincidence, article XIV, section 4, was the later provision. A statute, enacted pursuant to the plenary power of the Legislature over workers' compensation, gave the Workers' Compensation Appeals Board authority to discipline attorneys who appeared before it. If construed to include a transfer of the authority to discipline attorneys from the Supreme Court to the Legislature, or to delegate that power to the board, article **[****29]** XIV, section 4, would have conflicted with the constitutional power of this court over attorney discipline and might have violated the separation of powers doctrine. (Art. III, § 3.) The court was thus called upon to determine whether the adoption of article XIV, section 4, granting the Legislature plenary power over workers' compensation effected a pro tanto repeal of the preexisting, exclusive jurisdiction of the Supreme Court over attorneys.

We concluded that there had been no pro tanto repeal because article XIV, section 4, did not give the Legislature the authority to enact the statute. Article XIV, section 4, did not expressly give the Legislature power over attorney discipline, and that power was not integral to or necessary to the establishment of a complete system of workers' compensation. In those circumstances the presumption against implied repeal controlled. "It is well established that the adoption of article XIV, section 4 'effected a repeal *pro tanto*' of any state constitutional provisions which conflicted with that **[*61]** amendment. (*Subsequent Etc. Fund. v. Ind.*

Acc. Com. (1952) 39 Cal.2d 83, 88 [244 P.2d 889]; *Western Indemnity Co. v. Pillsbury* (1915) 170 Cal. 686, 695, [151 P. 398].) **[****30]** **HN9**[⌄] A *pro tanto* repeal of conflicting state constitutional provisions removes 'insofar as necessary' any restrictions which would prohibit the realization **[***47]** of the objectives of the new article. (*Methodist Hosp. of Sacramento v. Saylor* (1971) 5 Cal.3d 685, 691-692 [97 Cal. Rptr. 1, 488 P.2d 161]; cf. *City and County of San Francisco v. Workers' Comp. Appeals Bd.* (1978) 22 Cal.3d 103, 115-117 [148 Cal. Rptr. 626, 583 P.2d 151].) Thus the question becomes whether the board must have the power to discipline attorneys if the objectives of article XIV, section 4 are to be effectuated. In other words, does the achievement of those objectives compel the modification of a power -- the disciplining of attorneys -- that otherwise rests exclusively with this court?" (*Hustedt v. Workers' Comp. Appeals Bd.*, *supra*, 30 Cal.3d 329, 343.) We concluded that the ability to discipline attorneys appearing before it was not necessary to the expeditious resolution of workers' claims or the efficient administration of the agency. Thus, the absence of disciplinary power over attorneys would not preclude the board from achieving **[****31]** the objectives of article XIV, section 4, and no pro tanto repeal need be found.

CA(7)[⌄] (7) A similar analysis leads to the conclusion here that no pro tanto repeal of article XIV, section 4, was intended or made necessary here by the adoption of section 6. The goals of article XIII B, of which section 6 is a part, were to protect residents from excessive taxation and government spending. (*Huntington Park Redevelopment Agency v. Martin* (1985) 38 Cal.3d 100, 109-110 [211 Cal. Rptr. 133, 695 P.2d 220].) Section 6 had the additional purpose of precluding a shift of financial responsibility for carrying out governmental functions from the state to local agencies which had had their taxing powers restricted by the enactment of article XIII A in the preceding year and were ill equipped to take responsibility for any new programs. Neither of these goals is frustrated by requiring local agencies

to provide the same protections to their employees as do private employers. Bearing the costs of salaries, unemployment insurance, and workers' compensation coverage -- costs which all employers must bear -- neither threatens excessive taxation or governmental spending, [****32] nor shifts from the state to a local agency the expense of providing governmental services.

[**212] Therefore, since the objectives of article XIII B and section 6 can be achieved in the absence of state subvention for the expense of increases in workers' compensation benefit levels for local agency employees, section 6 did not effect a pro tanto repeal of the Legislature's otherwise plenary power over workers' compensation, a power that does not contemplate that the Legislature rather than the employer must fund the cost or increases in [*62] benefits paid to employees of local agencies, or that a statute affecting those benefits must garner a supermajority vote.

Because we conclude that section 6 has no application to legislation that is applicable to employees generally, whether public or private, and affects local agencies only incidentally as employers, we need not reach the question that was the focus of the decision of the Court of Appeal -- whether the state must reimburse localities for state-mandated cost increases which merely reflect adjustments for cost-of-living in existing programs.

V

It follows from our conclusions above, that in each of these cases the [****33] plaintiffs' reimbursement claims were properly denied by the State Board of Control. Their petitions for writs of mandate seeking to compel the board to approve the claims lacked merit and should have been denied by the superior court without the necessity of further proceedings before the board.

In B001713, the Los Angeles case, the Court of Appeal reversed the judgment of the superior court denying the petition. In the B003561, the Sonoma case, the superior court granted partial relief,

ordering further proceedings before the board, and the Court of Appeal affirmed that judgment.

The judgment of the Court of Appeal is reversed. Each side shall bear its own costs.

Concur by: MOSK

Concur

MOSK, J. I concur in the result reached by the majority, but I prefer the rationale of the Court of Appeal, i.e., that neither article XIII B, section 6, of the Constitution nor Revenue and Taxation Code sections 2207 and 2231 require state subvention for increased workers' compensation benefits provided by chapter 1042, Statutes of 1980, and chapter 922, Statutes of 1982, but only if the increases do not exceed applicable cost-of-living adjustments [****34] because such payments do not result in an increased level of service.

Under the majority theory, the state can order unlimited financial burdens on local units of government without providing the funds to meet those burdens. This may have serious implications in the future, and does violence to the requirement of section 2231, subdivision (a), that the state reimburse local government for "all costs mandated by the state."

In this instance it is clear from legislative history that the Legislature did not intend to mandate additional burdens, but merely to provide a cost-of-living [*63] adjustment. I agree with the Court of Appeal that this was permissible.

Case Summary

Overview

HOLDINGS: [1]-Local agencies operating storm drain systems pursuant to National Pollutant Discharge Elimination System permits issued by the State Water Resources Control Board under 33 U.S.C. § 1342(p)(3)(A) were entitled to reimbursement from the state under Cal. Const., art. XIII B, § 6, for the costs of complying with permit conditions requiring the agencies to install trash receptacles and to inspect industrial facilities and construction sites because these conditions were not federal mandates under the exception in Gov. Code, § 17556, subd. (c), but were imposed pursuant to Wat. Code, §§ 13260, 13263, 13267, subd. (c), under state regulatory authority; [2]-Although federal regulations generally contemplated that storm drain operators would have street maintenance procedures and would conduct inspections, the state exercised discretion in imposing the specific conditions at issue.

Outcome

Reversed and remanded.

Governments > State & Territorial
Governments > Finance

Administrative Law > Judicial Review > Standards of
Review > Substantial Evidence

Administrative Law > Judicial
Review > Reviewability > Questions of Law

HNI A decision of the California Commission on State Mandates is reviewed to determine whether it is supported by substantial evidence. *Gov. Code, § 17559*. Ordinarily, when the scope of review in the trial court is whether the administrative decision is supported by substantial evidence, the scope of review on appeal is the same. However, the appellate court independently reviews conclusions as to the meaning and effect of constitutional and statutory provisions. The question whether a statute or executive order imposes a mandate is a question of law. Thus, the appellate court reviews the entire record before the Commission, which includes references to federal and state statutes and regulations, as well as evidence of other permits and the parties' obligations under those permits, and independently determines whether it supports the Commission's conclusion.

Governments > State & Territorial
Governments > Finance

HN2 Cal. Const., art. XIII B, restricts the amounts state and local governments may appropriate and spend each year from the proceeds of taxes. Cal. Const., art. XIII B, is to be distinguished from Cal. Const., art. XIII A, which was adopted as Proposition 13 at the June 1978 election. Cal. Const., art. XIII A, imposes a direct constitutional limit on state and local power to adopt and levy taxes. Cal. Const., arts. XIII A, XIII B, work in tandem, together restricting California governments' power both to levy and to spend for public purposes. The concern which prompted the inclusion of *Cal. Const., art. XIII B, § 6*, was the perceived attempt by the state to enact legislation or adopt administrative orders creating programs to be administered by local agencies, thereby transferring to those agencies the fiscal responsibility for

providing services which the state believed should be extended to the public. The reimbursement provision in *Cal. Const., art. XIII B, § 6*, was included in recognition of the fact that Cal. Const., arts. XIII A, XIII B, severely restrict the taxing and spending powers of local governments.

Governments > State & Territorial
Governments > Finance

HN3 The purpose of *Cal. Const., art. XIII B, § 6*, is to prevent the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ill equipped to assume increased financial responsibilities because of the taxing and spending limitations that Cal. Const., arts. XIII A, XIII B, impose. Thus, with certain exceptions, *Cal. Const., art. XIII B, § 6*, requires the state to pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies. Reimbursement is not required if the statute or executive order imposes a requirement that is mandated by a federal law or regulation, unless the state mandate imposes costs that exceed the federal mandate. *Gov. Code, § 17556, subd. (c)*.

Governments > State & Territorial
Governments > Finance

HN4 In determining whether federal law requires a specified function, the focus of the inquiry is whether the manner of implementation of the federal program was left to the true discretion of the state. If the state has adopted an implementing statute or regulation pursuant to the federal mandate and had no true choice as to the manner of implementation, the local government is not entitled to reimbursement. If, on the other hand, the manner of implementation of the federal program was left to the true discretion of the state, the local government might be entitled to reimbursement. The essential question is how the costs came to be imposed upon the agency required to bear them. If the state freely chose to impose the costs upon the local agency as a means of implementing a federal

program then the costs are the result of a reimbursable state mandate regardless whether the costs were imposed upon the state by the federal government.

Governments > State & Territorial
Governments > Finance

HN5 If federal law compels the state to impose, or itself imposes, a requirement, that requirement is a federal mandate. On the other hand, if federal law gives the state discretion whether to impose a particular implementing requirement, and the state exercises its discretion to impose the requirement by virtue of a true choice, the requirement is not federally mandated.

Governments > State & Territorial
Governments > Finance

Evidence > Burdens of Proof > Allocation

HN6 *Cal. Const., art. XIII B, § 6*, establishes a general rule requiring reimbursement of all state-mandated costs. *Gov. Code, § 17556, subd. (c)*, codifies an exception to that rule. Typically, the party claiming the applicability of an exception bears the burden of demonstrating that it applies. Thus, the state must explain why federal law mandated the requirements at issue.

Environmental Law > ... > Enforcement > Discharge Permits > Storm Water Discharges

HN7 State law makes a regional water quality control board responsible for regulating discharges of waste within its jurisdiction. *Wat. Code, §§ 13260, 13263*. This regulatory authority includes the power to inspect the facilities of any person to ascertain whether waste discharge requirements are being complied with. *Wat. Code, § 13267, subd. (c)*. Thus, state law imposes an overarching mandate that the regional board inspect facilities and sites. In addition, federal law and practice require the regional board to inspect all industrial facilities and construction sites. Under the Clean Water Act, *33 U.S.C. § 1251 et seq.*, the State Water Resources Control Board, as an issuer of

National Pollutant Discharge Elimination System permits, is required to issue permits for storm water discharges associated with industrial activity. *33 U.S.C. § 1342(p)(3)(A)*. The term "industrial activity" includes construction activity. *40 C.F.R. § 122.26(b)(14)(x)*.

Headnotes/Syllabus

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

The trial court granted a petition challenging a reimbursement determination by the California Commission on State Mandates (*Cal. Const., art. XIII B, § 6*) and ordered the Commission to issue a new statement of decision. The Commission had determined that local agencies operating storm drain systems were entitled to reimbursement from the state for the costs of complying with permit conditions requiring the agencies to install trash receptacles and to inspect industrial facilities and construction sites. (Superior Court of Los Angeles County, No. BS130730, Ann I. Jones, Judge.) The Court of Appeal, Second Dist., Div. One, No. B237153, affirmed.

The Supreme Court reversed and remanded. The court held that the agencies, which operated the storm drain systems pursuant to National Pollutant Discharge Elimination System permits issued by the State Water Resources Control Board (*33 U.S.C. § 1342(p)(3)(A)*), were entitled to reimbursement because the permit conditions were not federal mandates (*Gov. Code, § 17556, subd. (c)*), but were imposed under state regulatory authority (*Wat. Code, §§ 13260, 13263, 13267, subd. (c)*). Although federal regulations generally contemplate that storm drain operators will have street maintenance procedures and will conduct inspections, the state exercised discretion in imposing the specific conditions at issue. (Opinion by Corrigan, J., with Cantil-Sakauye, C. J., Werdegar, and Chin, JJ., concurring. Concurring

and dissenting opinion by Cuéllar, J., with Liu, and Kruger, JJ., concurring (see p. 772).)

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1) (1)

State of California § 11 > Fiscal
Matters > Reimbursing Local Governments for State-
mandated Costs.

Cal. Const., art. XIII B, restricts the amounts state and local governments may appropriate and spend [*750] each year from the proceeds of taxes. Cal. Const., art. XIII B, is to be distinguished from Cal. Const., art. XIII A, which was adopted as Prop. 13 at the June 1978 election. Cal. Const., art. XIII A, imposes a direct constitutional limit on state and local power to adopt and levy taxes. Cal. Const., arts. XIII A, XIII B, work in tandem, together restricting California governments' power both to levy and to spend for public purposes. The concern which prompted the inclusion of Cal. Const., art. XIII B, § 6, was the perceived attempt by the state to enact legislation or adopt administrative orders creating programs to be administered by local agencies, thereby transferring to those agencies the fiscal responsibility for providing services which the state believed should be extended to the public. The reimbursement provision in Cal. Const., art. XIII B, § 6, was included in recognition of the fact that Cal. Const., arts. XIII A, XIII B, severely restrict the taxing and spending powers of local governments.

CA(2) (2)

State of California § 11 > Fiscal
Matters > Reimbursing Local Governments for State-
mandated Costs > Federal Mandate Exception.

The purpose of Cal. Const., art. XIII B, § 6, is to prevent the state from shifting financial responsibility for carrying out governmental

functions to local agencies, which are ill equipped to assume increased financial responsibilities because of the taxing and spending limitations that Cal. Const., arts. XIII A, XIII B, impose. Thus, with certain exceptions, Cal. Const., art. XIII B, § 6, requires the state to pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies. Reimbursement is not required if the statute or executive order imposes a requirement that is mandated by a federal law or regulation, unless the state mandate imposes costs that exceed the federal mandate (Gov. Code, § 17556, subd. (c)).

CA(3) (3)

State of California § 11 > Fiscal
Matters > Reimbursing Local Governments for State-
mandated Costs > Federal Mandate Exception.

In determining whether federal law requires a specified function, the focus of the inquiry is whether the manner of implementation of the federal program was left to the true discretion of the state. If the state has adopted an implementing statute or regulation pursuant to the federal mandate and had no true choice as to the manner of implementation, the local government is not entitled to reimbursement. If, on the other hand, the manner of implementation of the federal program was left to the true discretion of the state, the local government might be entitled to reimbursement. The essential question is how the costs came to be imposed upon the agency required to bear them. If the state freely chose to impose the costs upon the local agency as a means of implementing a [*751] federal program then the costs are the result of a reimbursable state mandate regardless whether the costs were imposed upon the state by the federal government.

CA(4) (4)

State of California § 11 > Fiscal
Matters > Reimbursing Local Governments for State-
mandated Costs > Federal Mandate Exception.

If federal law compels the state to impose, or itself imposes, a requirement, that requirement is a federal mandate. On the other hand, if federal law gives the state discretion whether to impose a particular implementing requirement, and the state exercises its discretion to impose the requirement by virtue of a true choice, the requirement is not federally mandated.

CA(5) (5)

State of California § 11 > Fiscal Matters > Reimbursing Local Governments for State-mandated Costs > Federal Mandate Exception.

Cal. Const., art. XIII B, § 6, establishes a general rule requiring reimbursement of all state-mandated costs. *Gov. Code, § 17556, subd. (c)*, codifies an exception to that rule. Typically, the party claiming the applicability of an exception bears the burden of demonstrating that it applies. Thus, the state must explain why federal law mandated the requirements at issue.

CA(6) (6)

State of California § 11 > Fiscal Matters > Reimbursing Local Governments for State-mandated Costs > Federal Mandate Exception > Storm Drainage Permit Conditions.

The California Commission on State Mandates determined that National Pollutant Discharge Elimination System permit conditions requiring operators of storm drainage systems to install trash receptacles and to inspect facilities and construction sites were not federal mandates. The Commission was correct. These permit conditions were not federally mandated.

[*Manaster & Selmi, Cal. Environmental Law & Land Use Practice (2016) ch. 31, § 31.24.*]

CA(7) (7)

Pollution and Conservation Laws § 5 > Water Pollution > Inspections and Permits > State and Federal Requirements.

State law makes a regional water quality control board responsible for regulating discharges of waste within its jurisdiction (*Wat. Code, §§ 13260, 13263*). This regulatory authority includes the power to inspect the facilities of any person to ascertain whether waste discharge requirements are being complied with (*Wat. Code, § 13267, subd. (c)*). Thus, state law imposes an overarching mandate that the regional board inspect facilities and sites. In addition, federal law and practice require the regional board to inspect all industrial facilities and construction sites. Under the Clean [*752] Water Act, the State Water Resources Control Board, as an issuer of National Pollutant Discharge Elimination System permits, is required to issue permits for stormwater discharges associated with industrial activity (*33 U.S.C. § 1342(p)(3)(A)*). The term “industrial activity” includes construction activity (*40 C.F.R. § 122.26(b)(14)(x) (2001)*).

Opinion

[**49] [**360] **CORRIGAN, J.**—Under our state Constitution, if the Legislature or a state agency requires a local government to provide a new program or higher level of service, the local government is entitled to reimbursement from the state for the associated costs. (*Cal. Const., art. XIII B, § 6, subd. (a).*) There are exceptions, however. Under one of them, if the new program or increased service is mandated by a federal law or regulation, [***5] reimbursement is not required. (*Gov. Code, § 17556, subd. (c).*)

The services in question here are provided by local agencies that operate storm drain systems pursuant to a state-issued permit. Conditions in that permit are designed to maintain the quality of California's water, and to comply with the federal Clean Water Act (*33 U.S.C. § 1251 et seq.*). The Court of Appeal held that certain permit conditions were federally mandated, and thus not reimbursable. We reverse, concluding that no federal law or regulation imposed the conditions nor did the federal regulatory system require the state to impose them. Instead, the permit conditions were imposed as a result of the state's discretionary action.

[**361] **I. Background**

The Regional Water Quality Control Board, Los Angeles Region (the Regional Board) is a state agency. It issued a permit authorizing Los Angeles County, the Los Angeles County Flood Control District, and 84 cities (collectively, the Operators) to operate storm drainage systems.¹ [***50]

¹ The cities involved are the Cities of Agoura Hills, Alhambra, Arcadia, Artesia, Azusa, Baldwin Park, Bell, Bellflower, Bell Gardens, Beverly Hills, Bradbury, Burbank, Calabasas, Carson,

Permit [*755] conditions required that the Operators take various steps to reduce the discharge of waste and pollutants into state waters. The conditions included installing and maintaining trash receptacles at transit stops, as well as inspecting certain commercial [***6] and industrial facilities and construction sites.

Some Operators sought reimbursement for the cost of satisfying the conditions. The Commission [***7] on State Mandates (the Commission) concluded each required condition was a new program or higher level of service, mandated by the state rather than by federal law. However, it found the Operators were only entitled to state reimbursement for the costs of the trash receptacle condition, because they could levy fees to cover the costs of the required inspections. (See discussion, *post*, at p. 761.) The trial court and the Court of Appeal disagreed, finding that all of the requirements were federally mandated.

We granted review. To resolve this issue, it is necessary to consider both the permitting system and the reimbursement obligation in some detail.

A. The Permitting System

The Operators' municipal storm sewer systems discharge both waste and pollutants.² State law

Cerritos, Claremont, Commerce, Compton, Covina, Cudahy, Culver City, Diamond Bar, Downey, Duarte, El Monte, El Segundo, Gardena, Glendale, Glendora, Hawaiian Gardens, Hawthorne, Hermosa Beach, Hidden Hills, Huntington Park, Industry, Inglewood, Irwindale, La Cañada Flintridge, La Habra Heights, Lakewood, La Mirada, La Puente, La Verne, Lawndale, Lomita, Los Angeles, Lynwood, Malibu, Manhattan Beach, Maywood, Monrovia, Montebello, Monterey Park, Norwalk, Palos Verdes Estates, Paramount, Pasadena, Pico Rivera, Pomona, Rancho Palos Verdes, Redondo Beach, Rolling Hills, Rolling Hills Estates, Rosemead, San Dimas, San Fernando, San Gabriel, San Marino, Santa Clarita, Santa Fe Springs, Santa Monica, Sierra Madre, Signal Hill, South El Monte, South Gate, South Pasadena, Temple City, Torrance, Vernon, Walnut, West Covina, West Hollywood, Westlake Village, and Whittier.

² The systems at issue here are “municipal separate storm sewer systems,” sometimes referred to by the acronym “MS4.” (*40 C.F.R. § 122.26(b)(19) (2001)*, italics omitted.) A “[m]unicipal separate storm sewer” is a system owned or operated by a public agency with

controls “waste” discharges. (*Wat. Code, § 13265.*) Federal law regulates discharges of “pollutant[s].” (*33 U.S.C. § 1311(a).*) Both state and later-enacted federal law require a permit to operate such systems.

California's Porter-Cologne Water Quality Control Act (Porter-Cologne Act or the Act; *Wat. Code, § 13000 et seq.*) was enacted in 1969. It established the State Water Resources Control Board (State Board), along with nine regional water quality control boards, and gave those agencies “primary responsibility for the coordination and control of water quality.” (*Wat. Code, § 13001*; see *City of Burbank v. State Water Resources Control Bd.* (2005) 35 Cal.4th 613, 619 [26 Cal. Rptr. 3d 304, 108 P.3d 862] (*City of Burbank*).) The State Board establishes statewide policy. The regional boards formulate and [*756] adopt water quality control plans and issue permits governing the discharge of waste. (*Building Industry Assn. of San Diego County v. State Water Resources Control Bd.* (2004) 124 Cal.App.4th 866, 875 [22 Cal. Rptr. 3d 128] (*Building Industry*).)

The Porter-Cologne Act requires any person discharging, or proposing to discharge, waste that could affect the quality of state waters to file a report with the appropriate regional board. ([***51] *Wat. Code, § 13260, subd. (a)(1).*) The regional board then “shall prescribe requirements as to the nature” of the discharge, implementing any applicable water quality control plans. (*Wat. Code, § 13263, subd. (a).*) The Operators must follow [*362] all requirements set by the Regional Board. (*Wat. Code, §§ 13264, 13265.*)

The federal Clean Water Act (the CWA; *33 U.S.C. § 1251 et seq.*) was enacted in 1972, [****9] and also established a permitting system. The CWA is a comprehensive water quality statute designed to restore and maintain the chemical, physical, and

jurisdiction over disposal of waste and designed [****8] or used for collecting or conveying stormwater. (*40 C.F.R. § 122.26(b)(8)* (2001), italics omitted.) Unless otherwise indicated, all further citations to the Code of Federal Regulations are to the 2001 version.

biological integrity of the nation's waters. (*City of Burbank, supra, 35 Cal.4th at p. 620.*) The CWA prohibits pollutant discharges unless they comply with (1) a permit (see *33 U.S.C. §§ 1328, 1342, 1344*); (2) established effluent limitations or standards (see *33 U.S.C. §§ 1312, 1317*); or (3) established national standards of performance (see *33 U.S.C. § 1316*). (See *33 U.S.C. § 1311(a).*) The CWA allows any state to adopt and enforce its own water quality standards and limitations, so long as those standards and limitations are not “less stringent” than those in effect under the CWA. (*33 U.S.C. § 1370.*)

The CWA created the National Pollutant Discharge Elimination System (NPDES), authorizing the Environmental Protection Agency (EPA) to issue a permit for any pollutant discharge that will satisfy all requirements established by the CWA or the EPA Administrator. (*33 U.S.C. § 1342(a)(1), (2).*) The federal system notwithstanding, a state may administer its own permitting system if authorized by the EPA. ³ If the EPA concludes a state has adequate authority to administer its proposed program, it must grant approval (*33 U.S.C. § 1342(b)*) and suspend its own issuance of permits (*33 U.S.C. § 1342(c)(1)*). ⁴

[*757]

California was the first state authorized to issue its own pollutant discharge permits. (*California ex rel. State Water Resources Control Bd. v. Environmental Protection Agency* (9th Cir. 1975) 511 F.2d 963, 970, fn. 11, revd. on other grounds in *EPA v. State Water Resources Control Board*

³ For a state to acquire permitting authority, the [****10] governor must give the EPA a “description of the program [the state] proposes to establish,” and the attorney general must affirm that the laws of the state “provide adequate authority to carry out the described program.” (*33 U.S.C. § 1342(b).*)

⁴ The EPA may withdraw approval of a state's program (*33 U.S.C. § 1342(c)(3)*), and also retains some supervisory authority: States must inform the EPA of all permit applications received and of any action related to the consideration of a submitted application (*33 U.S.C. § 1342(d)(1)*).

(1976) 426 U.S. 200 [48 L.Ed.2d 578, 96 S.Ct. 2022].) Shortly after the CWA's enactment, the Legislature amended the Porter-Cologne Act, adding chapter 5.5 (*Wat. Code, § 13370 et seq.*) to authorize state issuance of permits (*Wat. Code, § 13370, subd. (c)*). The Legislature explained the amendment was “in the interest of the people of the state, in order to avoid direct regulation by the federal government of persons already subject to regulation under state law pursuant to [the Porter-Cologne Act].” (*Ibid.*) The Legislature provided that chapter 5.5 be “construed to ensure consistency” with the CWA. (*Wat. Code, § 13372, subd. (a)*.) It directed that state and regional boards issue waste discharge requirements “ensur[ing] compliance with all applicable provisions [****11] of the [CWA] ... together with any more stringent effluent standards or limitations necessary to implement water quality control plans, or for the protection of beneficial uses, or to prevent nuisance.” [***52] (*Wat. Code, § 13377*, italics added.) To align the state and federal permitting systems, the legislation provided that the term “waste discharge requirements” under the Act was equivalent to the term “permits” under the CWA. (*Wat. Code, § 13374*.) Accordingly, California's permitting system now regulates discharges under both state and federal law. (*WaterKeepers Northern California v. State Water Resources Control Bd.* (2002) 102 Cal.App.4th 1448, 1452 [126 Cal. Rptr. 2d 389]; accord, *Building Industry, supra*, 124 Cal.App.4th at p. 875.)

In 1987, Congress amended the CWA to clarify that a permit is required for any discharge from a municipal storm sewer system serving a population of 100,000 or more. (*33 U.S.C. § 1342(p)(2)(C), (D)*.) Under those amendments, a permit may be issued either on a system- or jurisdiction-wide basis, must effectively prohibit non-stormwater discharges into the storm sewers, and must “require controls to reduce the discharge of [**363] pollutants to the maximum extent practicable.” (*33 U.S.C. § 1342(p)(3)(B)*, italics added.) The phrase “maximum extent practicable” is not further

defined. How that phrase is applied, and by whom, are important aspects of this case.

EPA regulations specify the information to be included in a permit [****12] application. (See *40 C.F.R. § 122.26(d)(1)(i)–(vi), (2)(i)–(viii)*.) Among other things, an applicant must set out a proposed management program that includes management practices; control techniques; and system, design, and engineering methods to reduce the discharge of pollutants to the maximum extent practicable. (*40 C.F.R. § 122.26(d)(2)(iv)*.) The permit-issuing agency has discretion to determine which practices, whether or not proposed by the applicant, will be imposed as conditions. (*Ibid.*)

[*758]

B. The Permit in Question

In 2001, Los Angeles County (the County), acting for all Operators, applied for a permit from the Regional Board. The board issued a permit (the Permit), with conditions intended to “reduce the discharge of pollutants in stormwater to the Maximum Extent Practicable” in the Operators' jurisdiction. The Permit stated that its conditions implemented *both* the Porter-Cologne Act and the CWA.

Part 4 of the Permit contains the four requirements at issue. Part 4.C addresses commercial and industrial facilities, and required the Operators to inspect certain facilities twice during the five-year term of the Permit. Inspection requirements were set out in substantial detail.⁵ Part 4.E of the Permit

⁵ As to commercial facilities, part 4.C.2.a required each Operator to inspect each restaurant, automotive service facility, retail gasoline outlet, and automotive dealership within its jurisdiction, and to confirm that the facility employed best management practices in compliance with state law, county and municipal ordinances, a Regional Board resolution, and the Operators' stormwater quality management program (SQMP). For each type of facility, the Permit set forth specific inspection tasks.

Part 4.C.2.b addressed industrial facilities, requiring the Operators to inspect them and confirm that each complied with county and municipal ordinances, a Regional Board resolution, and the SQMP. The Operators also [****14] were required to inspect industrial

addresses construction sites. It required each Operator [****13] to “implement a program to control runoff from construction activity at all construction sites within its jurisdiction,” and to inspect each construction [***53] site of one acre or greater at least “once during the wet season.”⁶ Finally, Part 4.F of the Permit addresses pollution from public agency activities. Among other things, it directed each Operator not otherwise regulated to “[p]lace trash receptacles at all transit stops within its jurisdiction,” and to maintain them as necessary.

C. Local Agency Claims

1. Applicable procedures for seeking reimbursement

As mentioned, when the Legislature or a state agency requires a local government to provide a new program or higher level of service, the state must “reimburse that local government for the costs of the program or increased level of service.” (*Cal. Const., art. XIII B, § 6, subd. (a)* (hereafter, [**759] *section 6*)).⁷ However, reimbursement is not required if “[t]he statute or executive order imposes a requirement that is mandated by a federal law or regulation and results in costs mandated by the federal government, unless the statute or executive order mandates costs that exceed the mandate in that federal law or regulation.” (*Gov. Code, § 17556, subd. (c)*.)

[**364] The Legislature has enacted

facilities for violations of the general industrial activity stormwater permit, a statewide permit issued by the State Board that regulates discharges from industrial facilities. (See discussion, *post*, at pp. 770–771.)

⁶Part 4.E.4 required inspections for violations of the general construction activity stormwater permit, another statewide permit issued by the State Board. (See discussion, *post*, at pp. 770–771.)

⁷“Costs mandated by the state” means any increased costs which a local agency or school district is required [****15] to incur ... as a result of any statute enacted on or after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which mandates a new program or higher level of service of an existing program within the meaning of *Section 6 of Article XIII B of the California Constitution*.” (*Gov. Code, § 17514*.)

comprehensive procedures for the resolution of reimbursement claims (*Gov. Code, § 17500 et seq.*) and created the Commission to adjudicate them (*Gov. Code, §§ 17525, 17551*). It also established “a test-claim procedure to expeditiously resolve disputes affecting multiple agencies.” (*Kinlaw v. State of California (1991) 54 Cal.3d 326, 331 [285 Cal. Rptr. 66, 814 P.2d 1308]* (*Kinlaw*)).

The first reimbursement claim filed with the Commission is called a test claim. (*Gov. Code, § 17521*.) The Commission must hold a public hearing, at which the Department of Finance (the Department), the claimant, and any other affected department or agency may present evidence. (*Gov. Code, §§ 17551, 17553*.) The Commission then determines “whether a state mandate exists and, if so, the amount to be reimbursed.” (*Kinlaw, supra, 54 Cal.3d at p. 332*.) The Commission's decision is reviewable by writ of mandate. (*Gov. Code, § 17559*.)

2. The test claims

The County and other Operators filed test claims with the Commission, seeking reimbursement for the Permit's inspection and trash receptacle requirements. The Department, State Board, and Regional Board [****16] (collectively, the State) responded that the Operators were not entitled to reimbursement because each requirement was federally mandated.

The Department argued that the EPA had delegated its federal permitting authority to the Regional Board, which acted as an administrator for the EPA, ensuring the state's program complied with the CWA. The Department acknowledged the Regional Board had discretion to set detailed permit conditions, but urged that the challenged conditions were required for the Permit to comply with federal law.

[****54] The State and Regional Boards argued somewhat differently. They contended the CWA required the Regional Board to impose specific permit [**760] controls to reduce the discharge of

pollutants to the “maximum extent practicable.” Thus, when the Regional Board determined the Permit's conditions, those conditions were part of the federal mandate. The State and Regional Boards also argued that the challenged conditions were “animated” by EPA regulations. In support of the trash receptacle requirement, they relied on 40 Code of Federal Regulations part 122.26(d)(2)(iv)(A)(3).⁸ In support of the inspection requirements, they relied on 40 Code of Federal Regulations part 122.26(d)(2)(iv)(B)(1),⁹ (C)(1),¹⁰ and (D)(3).¹¹

⁸ Title 40 Code of Federal Regulations part 122.26(d)(2)(iv)(A) provides that the proposed management plan in an operator's permit application must [****17] be based, in part, on a “description of structural and source control measures to reduce pollutants from runoff from commercial and residential areas that are discharged from the municipal storm sewer system that are to be implemented during the life of the permit, accompanied with an estimate of the expected reduction of pollutant loads and a proposed schedule for implementing such controls,” and that, at a minimum, that description shall include, among other things, a “description of practices for operating and maintaining public streets, roads and highways and procedures for reducing the impact on receiving waters of discharges from municipal storm sewer systems, including pollutants discharged as a result of deicing activities.” (40 C.F.R. § 122.26(d)(2)(iv)(A), (A)(3).)

⁹ Title 40 Code of Federal Regulations part 122.26(d)(2)(iv)(B) provides that the proposed management plan in an operator's permit application must be based, in part, on a “description of a program, including a schedule, to detect and remove ... illicit discharges and improper disposal into the storm sewer,” and that the proposed program shall include a “description of a program, including inspections, to implement and enforce an ordinance, orders or similar means to prevent illicit discharges to the municipal [****18] separate storm sewer system.” (40 C.F.R. § 122.26(d)(2)(iv)(B), (B)(1).)

¹⁰ Title 40 Code of Federal Regulations part 122.26(d)(2)(iv)(C) provides that the proposed management plan in an operator's permit application must be based, in part, on a “description of a program to monitor and control pollutants in storm water discharges to municipal systems from municipal landfills, hazardous waste treatment, disposal and recovery facilities, industrial facilities that are subject to section 313 of title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA), and industrial facilities that the municipal permit applicant determines are contributing a substantial pollutant loading to the municipal storm sewer system,” and that the program shall “[i]dentify priorities and procedures for inspections and establishing and implementing control measures for such discharges.” (40 C.F.R. § 122.26(d)(2)(iv)(C), (C)(1).)

[**365] The Operators argued the conditions were not mandated by federal law, because nothing in the CWA or in the cited federal regulations required them to install trash receptacles or perform the required site inspections. They also submitted evidence showing that none of the challenged requirements were [*761] contained in their previous permits issued by the Regional Board, nor were they imposed on other municipal storm sewer systems by the EPA.

As to the inspection requirements, the Operators argued that state law required [***55] the *state and regional boards* to regulate discharges of waste. This regulatory authority included the power to inspect facilities and sites. The Regional Board had used the Permit conditions to shift those inspection responsibilities to them. They also presented evidence that the Regional Board was required to inspect industrial facilities and construction sites for compliance with statewide permits issued by the State Board (see *ante*, p. 758, fns. 5, 6). They urged that the Regional Board had shifted that obligation to the Operators as well. Finally, the Operators submitted a declaration [****20] from a county employee indicating the Regional Board had offered to pay the County to inspect industrial facilities *on behalf of* the Regional Board, but revoked that offer after including the inspection requirement in the Permit.

The EPA submitted comments to the Commission indicating that the challenged permit requirements were designed to reduce the discharge of pollutants to the “maximum extent practicable.” Thus, the EPA urged the requirements fell “within the scope”

¹¹ Title 40 Code of Federal Regulations part 122.26(d)(2)(iv)(D) provides that the proposed management plan in an operator's permit application must be based, in part, on a “description of a program to implement and maintain structural and non-structural best management practices to reduce pollutants in storm water runoff from construction sites to the municipal storm sewer system,” which shall include, a “description of procedures for identifying priorities for inspecting sites and enforcing control measures which consider the nature of the construction [****19] activity, topography, and the characteristics of soils and receiving water quality.” (40 C.F.R. § 122.26(d)(2)(iv)(D), (D)(3).)

of federal regulations and other EPA guidance regarding stormwater management programs. The Bay Area Stormwater Management Agencies Association, the League of California Cities, and the California State Association of Counties submitted comments urging that the challenged requirements were state, rather than federal, mandates.

3. *The commission's decision*

By a four-to-two vote, the Commission partially approved the test claims, concluding none of the challenged requirements were mandated by federal law. However, the Commission determined the Operators were not entitled to reimbursement for the inspection requirements because they had authority to levy fees to pay for the required inspections. Under *Government Code section 17556, subdivision (d)*, the constitutional [****21] reimbursement requirement does not apply if the local government has the authority to levy fees or assessments sufficient to pay for the mandated program or service.

4. *Petitions for writ of mandate*

The State challenged the Commission's determination that the requirements were state mandates. By cross-petition, the County and certain cities challenged the Commission's finding that they could impose fees to pay for the inspections.

The trial court concluded that, because each requirement fell “within the maximum extent practicable standard,” they were federal mandates not [*762] subject to reimbursement. It granted the State's petition and ordered the Commission to issue a new statement of decision. The court did not reach the cross-claims relating to fee authority. Certain Operators appealed.¹² The Court of Appeal affirmed, concluding as a matter of law that the

trash receptacle and inspection requirements were federal mandates.

[**366] II. Discussion

A. *Standard of Review*

HNI Courts review a decision of [****22] the Commission to determine whether it is supported by substantial evidence. (*Gov. Code, § 17559*.) Ordinarily, when the scope of review in the trial court is whether the administrative decision is supported by substantial evidence, the scope of review on appeal is the same. (*County of Los Angeles v. Commission on State Mandates (1995) 32 Cal.App.4th 805, 814 [38 Cal. Rptr. 2d 304] (County of Los Angeles)*.) [***56] However, the appellate court independently reviews conclusions as to the meaning and effect of constitutional and statutory provisions. (*City of San Jose v. State of California (1996) 45 Cal.App.4th 1802, 1810 [53 Cal. Rptr. 2d 521]*.) The question whether a statute or executive order imposes a mandate is a question of law. (*Ibid.*) Thus, we review the entire record before the Commission, which includes references to federal and state statutes and regulations, as well as evidence of other permits and the parties' obligations under those permits, and independently determine whether it supports the Commission's conclusion that the conditions here were not federal mandates. (*Ibid.*)

B. *Analysis*

The parties do not dispute here that each challenged requirement is a new program or higher level of service. The question here is whether the requirements were mandated by a federal law or regulation.

1. *The federal mandate exception*

CA(1) (1) Voters added article XIII B to the California Constitution in 1979. Also known as the “Gann limit,” *HN2* it “restricts the amounts [****23] state and local governments may appropriate and spend each year from the ‘proceeds

¹² Appellants are the County and the Cities of Artesia, Azusa, Bellflower, Beverly Hills, Carson, Commerce, Covina, Downey, Monterey Park, Norwalk, Rancho Palo Verdes, Signal Hill, Vernon, and Westlake Village.

of taxes.” (*City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 58–59 [266 Cal. Rptr. 139, 785 P.2d 522]) (*City of Sacramento*). “Article XIII B is to be distinguished from article XIII A, which was adopted as Proposition 13 at [*763] the June 1978 election. Article XIII A imposes a direct constitutional limit on state and local power to *adopt and levy taxes*. Articles XIII A and XIII B work in tandem, together restricting California governments' power both to levy and to spend for public purposes.” (*Id. at p. 59, fn. 1.*)

CA(2) (2) The “concern which prompted the inclusion of *section 6 in article XIII B* was the perceived attempt by the state to enact legislation or adopt administrative orders creating programs to be administered by local agencies, thereby transferring to those agencies the fiscal responsibility for providing services which the state believed should be extended to the public.” (*County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56 [233 Cal. Rptr. 38, 729 P.2d 202].) The reimbursement provision in *section 6* was included in recognition of the fact “that articles XIII A and XIII B severely restrict the taxing and spending powers of local governments.” (*County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81 [61 Cal. Rptr. 2d 134, 931 P.2d 312]) (*County of San Diego*). **HN3** The purpose of *section 6* is to prevent “the state from shifting financial responsibility for carrying out governmental functions to local agencies, which [****24] are ‘ill equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.” (*County of San Diego, at p. 81.*) Thus, with certain exceptions, *section 6* “requires the state ‘to pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies.’” (*County of San Diego, at p. 81.*)

As noted, reimbursement is not required if the statute or executive order imposes “a requirement that is mandated by a federal law or regulation,” unless the state mandate imposes costs that exceed

the federal mandate. (*Gov. Code, § 17556, subd. (c).*) The question here is how to apply that [***57] exception when federal law requires a local agency to obtain a permit, authorizes the state to issue the permit, and provides the state discretion in determining which conditions are necessary to achieve a general standard established by federal law, and when state law allows the imposition of conditions that exceed the federal standard. Previous decisions [**367] of this court and the Courts of Appeal provide guidance.

In *City of Sacramento, supra, 50 Cal.3d 51*, this court addressed local governments' reimbursement claims for the costs of extending unemployment insurance protection [****25] to their employees. (*Id. at p. 59.*) Since 1935, the applicable federal law had provided powerful incentives for states to implement their own unemployment insurance programs. Those incentives included federal subsidies and a substantial federal tax credit for all corporations in states with certified federal programs. (*Id. at p. 58.*) California had implemented such a program. (*Ibid.*) In 1976, Congressional legislation required [*764] that unemployment insurance protection be extended to local government employees. (*Ibid.*) If a state failed to comply with that directive, it “faced [the] loss of the federal tax credit and administrative subsidy.” (*Ibid.*) The Legislature passed a law requiring local governments to participate in the state's unemployment insurance program. (*Ibid.*)

Two local governments sought reimbursement for the costs of complying with that requirement. Opposing the claims, the state argued its action was compelled by federal law. This court agreed, reasoning that, if the state had “failed to conform its plan to new federal requirements as they arose, its businesses [would have] faced a new and serious penalty” of double taxation, which would have placed those businesses at a competitive disadvantage [****26] against businesses in states complying with federal law. (*City of Sacramento, supra, 50 Cal.3d at p. 74.*) Under those circumstances, we concluded that the “state simply

did what was necessary to avoid certain and severe federal penalties upon its resident businesses.” (*Ibid.*) Because “[t]he alternatives were so far beyond the realm of practical reality that they left the state ‘without discretion’ to depart from federal standards,” we concluded “the state acted in response to a federal ‘mandate.’” (*Ibid.*, italics added.)

County of Los Angeles, supra, 32 Cal.App.4th 805, involved a different kind of federal compulsion. In Gideon v. Wainwright (1963) 372 U.S. 335 [9 L.Ed.2d 799, 83 S.Ct. 792], the United States Supreme Court held that states were required by the federal Constitution to provide counsel to indigent criminal defendants. That requirement had been construed to include “the right to the use of any experts that will assist counsel in preparing a defense.” (County of Los Angeles, at p. 814.) The Legislature enacted Penal Code section 987.9, requiring local governments to provide indigent criminal defendants with experts for the preparation of their defense. (County of Los Angeles, at p. 811, fn. 3.) Los Angeles County sought reimbursement for the costs of complying with the statute. The state argued the statute's requirements were mandated by federal law.

The state prevailed. The Court of Appeal [****27] reasoned that, even without Penal Code section 987.9, the county would have been “responsible for providing ancillary services” under binding Supreme Court precedent. (County of Los Angeles, supra, 32 Cal.App.4th at p. 815.) Penal Code section 987.9 merely codified an existing federal mandate. (County of Los Angeles, at p. 815.)

[***58] Hayes v. Commission on State Mandates (1992) 11 Cal.App.4th 1564 [15 Cal. Rptr. 2d 547] (*Hayes*) provides a contrary example. *Hayes* involved the former federal Education of the Handicapped Act (EHA; 20 U.S.C. § 1401 et seq.). EHA was a “comprehensive measure designed to provide all handicapped children with basic educational opportunities.” (Hayes, at [***765] p. 1594.) EHA required each state to adopt an

implementation plan, and mandated “certain substantive and procedural requirements,” but left “primary responsibility for implementation to the state.” (Hayes, at p. 1594.)

CA(3) (3) Two local governments sought reimbursement for the costs of special education assessment hearings which were required under the state's adopted plan. The state argued the requirements imposed under its plan were federally mandated. The Hayes court rejected that argument. Reviewing [***368] the historical development of special education law (Hayes, supra, 11 Cal.App.4th at pp. 1582–1592), the court concluded that, so far as the state was concerned, the requirements established by the EHA were federally mandated (Hayes, at p. 1592). However, that conclusion “mark[ed] the starting point rather than the end of [its] consideration.” [****28] (Ibid.) The court explained that, HN4 in determining whether federal law requires a specified function, like the assessment hearings, the focus of the inquiry is whether the “manner of implementation of the federal program was left to the true discretion of the state.” (Id. at p. 1593, italics added.) If the state “has adopted an implementing statute or regulation pursuant to the federal mandate,” and had “no ‘true choice’” as to the manner of implementation, the local government is not entitled to reimbursement. (*Ibid.*) If, on the other hand, “the manner of implementation of the federal program was left to the true discretion of the state,” the local government might be entitled to reimbursement. (*Ibid.*)

According to the *Hayes* court, the essential question is how the costs came to be imposed upon the agency required to bear them. “If the state freely chose to impose the costs upon the local agency as a means of implementing a federal program then the costs are the result of a reimbursable state mandate regardless whether the costs were imposed upon the state by the federal government.” (Hayes, supra, 11 Cal.App.4th at p. 1594.) Applying those principles, the court concluded that, to the extent “the state implemented the [EHA] by

freely [****29] choosing to impose new programs or higher levels of service upon local school districts, the costs of such programs or higher levels of service are state mandated and subject to” reimbursement. (*Ibid.*)

CA(4) (4) From *City of Sacramento, County of Los Angeles*, and *Hayes*, we distill the following principle: HN5 If federal law compels the state to impose, or itself imposes, a requirement, that requirement is a federal mandate. On the other hand, if federal law gives the state discretion whether to impose a particular implementing requirement, and the state exercises its discretion to impose the requirement by virtue of a “true choice,” the requirement is not federally mandated.

Division of Occupational Safety & Health v. State Bd. of Control (1987) 189 Cal.App.3d 794 [234 Cal. Rptr. 661] (*Division of Occupational Safety*) is [*766] instructive. The federal Occupational Safety and Health Act of 1970 (Fed. OSHA; 29 U.S.C. § 651 et seq.) preempted states from regulating matters covered by Fed. OSHA unless a [***59] state had adopted its own plan and gained federal approval. (*Division of Occupational Safety, at p. 803.*) No state was obligated to adopt its own plan. But, if a state did so, the plan had to include standards at least as effective as Fed. OSHA's and extend those standards to state and local employees. California adopted its own plan, which was federally approved. [****30] The state then issued a regulation that, according to local fire districts, required them to maintain three-person firefighting teams. Previously, they had been permitted to maintain two-person teams. (*Division of Occupational Safety, at pp. 798–799.*) The local fire districts sought reimbursement for the increased level of service. The state opposed, arguing the requirement was mandated by federal law.

The court agreed with the fire districts. As the court explained, a Fed. OSHA regulation arguably required the maintenance of three-person firefighting teams. (*Division of Occupational*

Safety, supra, 189 Cal.App.3d at p. 802.) However, that federal regulation specifically excluded local fire districts. (*Id. at p. 803.*) Had the state elected to be governed by *Fed. OSHA standards*, that exclusion would have allowed those fire districts to maintain two-person teams. (*Division of Occupational Safety, at p. 803.*) The conditions for approval of the *state's plan* required effective enforcement and coverage of public employees. But those conditions did not make the costs of complying with the state regulation federally mandated. “[T]he initial decision to establish ... a federally approved [local] plan is an option which the state exercises [***369] freely.” (*Ibid.*) In other words, the state was not “compelled to [****31] ... extend jurisdiction over occupational safety to local governmental employers,” which would have otherwise fallen under a federal exclusion. (*Ibid.*) Because the state “was not required to promulgate [the state regulation] to comply with federal law, the exemption for federally mandated costs does not apply.” (*Id. at p. 804.*)¹³

San Diego Unified School Dist. v. Commission on State Mandates (2004) 33 Cal.4th 859 [16 Cal. Rptr. 3d 466, 94 P.3d 589] (*San Diego Unified*) provides another example. In *Goss v. Lopez* (1975) 419 U.S. 565 [42 L. Ed. 2d 725, 95 S. Ct. 729], the United States Supreme Court held that if a school principal chose to recommend a student for expulsion, federal due process principles required the school district to give that student a hearing. *Education Code section 48918* provided for expulsion hearings. (*San Diego Unified, at p. 868.*) Under *Education Code section 48915*, a school principal had [*767] discretion to recommend expulsion under certain circumstances, but was compelled to recommend expulsion for a student who possessed a firearm. (*San Diego Unified, at p. 869.*) Federal law at the time did not require

¹³ In the end, the court held that the challenged state regulation did not obligate the local fire district to maintain three-person firefighting teams. Accordingly, the state regulation did not mandate an increase in costs. (*Division of Occupational Safety, supra*, 189 Cal.App.3d at pp. 807–808.)

expulsion for a student who brought a gun to school. (*Id. at p. 883.*)

The school district argued it was entitled to reimbursement [****32] of all expulsion hearing costs. This court drew a distinction between discretionary and mandatory expulsions. We concluded the costs of hearings for *discretionary* expulsions flowed from a federal mandate. (*San Diego Unified, supra, 33 Cal.4th at pp. 884–890.*) [***60] ¹⁴ We declined, however, to extend that rule to the costs related to *mandatory* expulsions. Because it was *state law* that required an expulsion recommendation for firearm possession, all hearing costs triggered by the mandatory expulsion provision were reimbursable state-mandated expenses. (*San Diego Unified at pp. 881–883.*) As was the case in *Hayes*, the key factor was how the costs came to be imposed on the entity that was required to bear them. The school principal could avoid the cost of a federally mandated hearing by choosing not to recommend an expulsion. But, when a state statute *required* an expulsion recommendation, the attendant hearing costs did not flow from a federal mandate. (*San Diego Unified, supra, 33 Cal.4th at p. 881.*)

2. Application

Review of the Commission's [****33] decision requires a determination as to whether federal statutory, administrative, or case law imposed, or compelled the Regional Board to impose, the challenged requirements on the Operators.

It is clear federal law did not compel the Regional Board to impose these particular requirements. There was no evidence the state was compelled to administer its *own* permitting system rather than allowing the EPA do so under the CWA. (*33 U.S.C.*

¹⁴ To the extent *Education Code section 48918* imposed requirements that went beyond the mandate of federal law, those requirements were merely incidental to the federal mandate, and at most resulted in “a de minimis cost.” (*San Diego Unified, supra, 33 Cal.4th at p. 890.*) The State does not argue here that the costs of the challenged permit conditions were de minimis.

§ 1342(a).) In this respect, the case is similar to *Division of Occupational Safety, supra, 189 Cal.App.3d 794*. Here, as in that case, the State chose to administer its own program, finding it was “in the interest of the people of the state, *in order to avoid direct regulation by the federal government* of persons already subject to regulation” under state law. (*Wat. Code, § 13370, subd. (c)*, italics added.) Moreover, the Regional Board was not required by federal law to impose any specific permit conditions. The federal CWA broadly directed the board to issue permits with conditions designed to reduce pollutant discharges to the maximum [**370] extent practicable. But the EPA's regulations gave the board discretion to determine which [*768] specific controls were necessary to meet that standard. (*40 C.F.R. § 122.26(d)(2)(iv).*) This case is distinguishable from *City of Sacramento, supra, 50 Cal.3d 51*, where the state risked the loss of subsidies [****34] and tax credits for all its resident businesses if it failed to comply with federal legislation. Here, the State was not compelled by federal law to impose any particular requirement. Instead, as in *Hayes, supra, 11 Cal.App.4th 1564*, the Regional Board had discretion to fashion requirements which it determined would meet the CWA's maximum extent practicable standard.

The State argues the Commission failed to account for the flexibility in the CWA's regulatory scheme, which conferred discretion on the State and regional boards in deciding what conditions were necessary to comply with the CWA. In exercising that discretion, those agencies were required to rely on their scientific, technical, and experiential knowledge. Thus, the State contends the Permit itself is the best indication of what requirements *would have been imposed* by the EPA if the Regional Board had not done so, and the Commission should have deferred to [***61] the board's determination of what conditions federal law required.

We disagree that the Permit itself demonstrates what conditions would have been imposed had the

EPA granted the Permit. In issuing the Permit, the Regional Board was implementing both state and federal law and was authorized to include conditions [****35] more exacting than federal law required. (*City of Burbank, supra, 35 Cal.4th at pp. 627–628.*) It is simply not the case that, because a condition was in the Permit, it was, ipso facto, required by federal law.

We also disagree that the Commission should have deferred to the Regional Board's conclusion that the challenged requirements were federally mandated. That determination is largely a question of law. Had the Regional Board found, when imposing the disputed permit conditions, that those conditions were the only means by which the maximum extent practicable standard could be implemented, deference to the board's expertise in reaching that finding would be appropriate. The board's legal authority to administer the CWA and its technical experience in water quality control would call on sister agencies as well as courts to defer to that finding.¹⁵ The State, however, provides no authority for the proposition that, absent such a finding, the Commission should defer to a state agency as to whether requirements were state or federally mandated. Certainly, in a trial court action challenging the *board's authority* to impose specific permit conditions, the board's findings regarding what conditions satisfied the federal standard would be [****36] entitled to deference. (See, e.g., *City of Rancho Cucamonga v. Regional Water Quality Control Bd.* (2006) 135 Cal.App.4th 1377, 1384 [38 Cal. Rptr. 3d 450], citing *Fukuda v. City of Angels* (1999) 20 Cal.4th 805, 817–818 [85 Cal. Rptr. 2d 696, [*769] 977 P.2d 693].) Resolution of those questions would bring into play the particular technical expertise possessed by members of the regional board. In those circumstances, the party challenging the board's decision would have the burden of demonstrating its findings were not supported by substantial evidence or that the board otherwise abused its discretion. (*Rancho*

Cucamonga, at p. 1387; Building Industry, supra, 124 Cal.App.4th at pp. 888–889.)

Reimbursement proceedings before the Commission are different. The question here was not whether the Regional Board had authority to impose the challenged requirements. It did. The narrow question here was who will pay for them. In answering that legal question, the Commission applied California's constitutional, statutory, and common law to the single issue of reimbursement. In the context of these proceedings, the State has the burden to show the challenged conditions were mandated by federal law.

HN6 CA(5) (5) Section 6 establishes a general rule requiring reimbursement of all state-mandated costs. *Government Code section 17556, subdivision (c)*, codifies an exception to that [**371] rule. Typically, the party claiming the applicability of an exception bears the burden of demonstrating that it applies. (See *Simpson Strong-Tie Co., Inc. v. Gore* (2010) 49 Cal.4th 12, 23 [109 Cal. Rptr. 3d 329, 230 P.3d 1117]; see also *Long Beach Police Officers Assn. v. City of Long Beach* (2014) 59 Cal.4th 59, 67 [172 Cal. Rptr. 3d 56, 325 P.3d 460].) Here, the State must explain why [****37] federal law mandated these requirements, rather than forcing the Operators to prove the opposite. The State's proposed rule, requiring the Commission to defer to the Regional Board, would leave the Commission with no role to play on the narrow question of who must pay. Such a result would fail to honor the Legislature's [***62] intent in creating the Commission.

Moreover, the policies supporting article XIII B of the California Constitution and *section 6* would be undermined if the Commission were required to defer to the Regional Board on the federal mandate question. The central purpose of article XIII B is to rein in local government spending. (*City of Sacramento, supra, 50 Cal.3d at pp. 58–59.*) The purpose of *section 6* is to protect local governments from state attempts to impose or shift the costs of new programs or increased levels of service by

¹⁵ Of course, this finding would be case specific, based among other things on local factual circumstances.

entitling local governments to reimbursement. (*County of San Diego, supra, 15 Cal.4th at p. 81.*) Placing the burden on the State to demonstrate that a requirement is federally mandated, and thus excepted from reimbursement, serves those purposes.

CA(6) (6) Applying the standard of review described above, we evaluate the entire record and independently review the Commission's determination the challenged conditions were not federal mandates. We conclude the Commission was correct. These permit conditions were not [****38] federally mandated. [*770]

(a) *The inspection requirements*

Neither the CWA's "maximum extent practicable" provision nor the EPA regulations on which the State relies expressly required the Operators to inspect these particular facilities or construction sites. The CWA makes no mention of inspections. (*33 U.S.C. § 1342(p)(3)(B)(iii).*) The regulations required the Operators to include in their permit application a description of priorities and procedures for inspecting certain industrial facilities and construction sites, but suggested that the Operators would have discretion in selecting which facilities to inspect. (See *40 C.F.R. § 122.26(d)(2)(iv)(C)(1).*) The regulations do not mention commercial facility inspections at all.

HN7 CA(7) (7) Further, as the Operators explained, state law made the *Regional Board* responsible for regulating discharges of waste within its jurisdiction. (*Wat. Code, §§ 13260, 13263.*) This regulatory authority included the power to "inspect the facilities of any person to ascertain whether ... waste discharge requirements are being complied with." (*Wat. Code, § 13267, subd. (c).*) Thus, state law imposed an overarching mandate that the *Regional Board* inspect the facilities and sites.

In addition, federal law and practice required the *Regional Board* to inspect all industrial facilities and [****39] construction sites. Under the CWA,

the State Board, as an issuer of NPDES permits, was required to issue permits for stormwater discharges "associated with industrial activity." (*33 U.S.C. § 1342(p)(3)(A).*) The term "industrial activity" includes "construction activity." (See *40 C.F.R. § 122.26(b)(14)(x).*) The Operators submitted evidence that the State Board had satisfied its obligation by issuing a general industrial activity stormwater permit and a general construction activity stormwater permit. Those statewide permits imposed controls designed to reduce pollutant discharges from industrial facilities and construction sites. Under the CWA, those facilities and sites could operate under the statewide permits rather than obtaining site-specific pollutant discharge permits.

The Operators showed that, in those statewide permits, the State Board had placed responsibility for inspecting facilities and sites on the *Regional Board*. The Operators submitted letters from the EPA indicating the State and regional boards were responsible for enforcing the terms of the statewide permits. The Operators also noted the State Board was authorized [***63] to charge a fee to facilities and sites that subscribed to the statewide permits (*Wat. Code, § 13260, subd. (d)*), [**372] and that a portion of [****40] that fee was earmarked to pay the *Regional Board* for "inspection and regulatory compliance issues." (*Wat. Code, § 13260, subd. (d)(2)(B)(iii).*) Finally, there was evidence the *Regional Board* offered to pay the County to inspect industrial facilities. There would have been little reason to make that offer if federal law required the County to inspect those facilities. [*771]

This record demonstrates that the *Regional Board* had primary responsibility for inspecting these facilities and sites. It shifted that responsibility to the Operators by imposing these Permit conditions. The reasoning of *Hayes, supra, 11 Cal.App.4th 1564*, provides guidance. There, the EHA required the state to provide certain services to special education students, but gave the state discretion in implementing the federal law. (*Hayes, at p. 1594.*)

The state exercised its “true discretion” by selecting the specific requirements it imposed on local governments. As a result, the *Hayes* court held the costs incurred by the local governments were state-mandated costs. (*Ibid.*) Here, state and federal law required the Regional Board to conduct inspections. The Regional Board exercised its discretion under the CWA, and shifted that obligation to the Operators. That the Regional Board did so while exercising its [****41] permitting authority under the CWA does not change the nature of the Regional Board's action under *section 6*. Under the reasoning of *Hayes*, the inspection requirements were not federal mandates.

The State argues the inspection requirements were federally mandated because the CWA required the Regional Board to impose permit controls, and the EPA regulations contemplated that some kind of operator inspections would be required. That the EPA regulations contemplated some form of inspections, however, does not mean that federal law required the scope and detail of inspections required by the Permit conditions.¹⁶ As explained, the evidence before the Commission showed the opposite to be true.

(b) *The trash receptacle requirement*

The Commission concluded the trash receptacle requirement was not a federal mandate [****42] because neither the CWA nor the regulation cited by the State explicitly required the installation and maintenance of trash receptacles. The State contends the requirement was mandated by the CWA and by the EPA regulation that directed the Operators to include in their application a “description of practices for operating and maintaining public streets, roads and highways and procedures for reducing the impact on receiving

waters of discharges from municipal storm sewer systems.” (*40 C.F.R. § 122.26(d)(2)(iv)(A)(3).*)

The Commission's determination was supported by the record. While the Operators were required to include a description of practices and procedures in their permit application, the issuing agency has discretion whether to make [*772] those practices conditions of the permit. (*40 C.F.R. § 122.26(d)(2)(iv).*) No regulation cited by the State required trash receptacles at [***64] transit stops. In addition, there was evidence that the EPA had issued permits to other municipal storm sewer systems in Anchorage, Boise, Boston, Albuquerque, and Washington, D.C., that did not require trash receptacles at transit stops. The fact the EPA itself had issued permits in other cities, but did not include the trash receptacle condition, undermines the argument [****43] that the requirement was federally mandated.

(c) *Conclusion*

Although we have upheld the Commission's determination on the federal mandate question, the State raised other arguments in its writ petition. Further, the issues presented in the Operators' cross-petition were not addressed by either the trial court or the Court of Appeal. We remand the matter so those issues can be addressed in the first instance.

[**373] **III. Disposition**

We reverse the judgment of the Court of Appeal and remand for further proceedings consistent with our opinion.

Cantil-Sakauye, C. J., Werdegar, J., and Chin, J., concurred.

Concur by: Cuellar (In Part)

Dissent by: Cuellar (In Part)

Dissent

CUÉLLAR, J., Concurring and Dissenting.—A

¹⁶ The State also relied on a 2008 letter from the EPA indicating that the requirements to inspect industrial facilities and construction sites fell within the maximum extent practicable standard under the CWA. That letter, however, does not indicate that federal law required municipal storm sewer system operators to inspect all industrial facilities and construction sites within their jurisdictions.

local government is entitled to reimbursement from the state when the Legislature or a state agency requires it to provide new programs or increased service. (*Cal. Const., art. XIII B, § 6, subd. (a).*) But one crucial exception coexists with this rule. It applies where the new program or increased service is mandated by a federal statute or regulation. (*Gov. Code, § 17556, subd. (c).*) We consider in this case whether certain conditions to protect water quality included in a permit from the Regional Water Quality Control Board, Los Angeles Region (Regional Board or Board)—specifically, installation and maintenance of trash receptacles [****44] at transit stops, as well as inspections of certain commercial and industrial facilities and construction sites—constitute state mandates subject to reimbursement, or federal mandates within the statutory reimbursement exception.

What the majority concludes is that federal law did not compel imposition of the conditions, and that the local agencies would not necessarily have been required to comply with them had they not been imposed by the state. In doing so, the majority upholds and treats as correct a decision by the Commission on State Mandates (the Commission) that is flawed in its approach and far too parsimonious in its analysis. This is no small feat: not [*773] only must the majority discount any expertise the Regional Board might bring to bear on the mandate question (see maj. opn., *ante*, at pp. 768–769), but it must also overlook the Commission's reliance on an overly narrow analytical framework and prop up the Commission's decision with evidence on which the agency *could have relied*, rather than that on which it did (see *id.* at pp. 770–772).

Moreover, when the majority considers whether the permit conditions are indeed federally mandated, it purports to apply *de novo* review to the Commission's legal [****45] determination. (See maj. opn., *ante*, at pp. 762, 768, 770.) What it actually applies seems far more deferential to the Commission's decision—something akin to

substantial evidence review—despite the Commission's own failure in affording deference [***65] to the Regional Board and, more generally, its reliance on the wrong decisionmaking framework. (Cf. *People v. Barnwell* (2007) 41 Cal.4th 1038, 1052 [63 Cal. Rptr. 3d 82, 162 P.3d 596] [“A substantial evidence inquiry examines the record in the light most favorable to the judgment and upholds it if the record contains reasonable, credible evidence of solid value upon which a reasonable trier of fact *could* have relied in reaching the conclusion in question”].) Indeed, what the majority overlooks is that the Commission itself should have considered the effect of the evidence on which the majority now relies in deciding whether the challenged permit conditions were necessary to comply with federal law. And in doing so, the Commission should have extended a measure of deference to the Regional Board's expertise in administering the statutory scheme. (See *County of Los Angeles v. State Water Resources Control Bd.* (2006) 143 Cal.App.4th 985, 997 [50 Cal. Rptr. 3d 619] (*State Water Board*).)

Because the Commission failed to do so, and because the Commission's interpretation of the federal Clean Water Act (the CWA; 33 U.S.C. § 1251 *et seq.*) failed to account for the [****46] complexities of the statute, I would reverse the Court of Appeal's judgment and remand with instructions for the Commission to reconsider its decision. So I concur in the majority's judgment reversing the Court of Appeal, but dissent from its conclusion upholding the Commission's decision rather than remanding the matter for further proceedings.

I.

To determine whether it is the state rather than local governments that should bear [**374] the entirety of the financial burden associated with a new program or increased service, the Commission must examine the nature of the federal scheme in question. That scheme is the CWA, a statute Congress amended in 1972 to establish the National

Pollutant Discharge Elimination System (the NPDES) as a means of achieving and enforcing limitations on [*774] pollutant discharges. (See *EPA v. State Water Resources Control Board* (1976) 426 U.S. 200, 203–204 [48 L.Ed.2d 578, 96 S.Ct. 2022].) The role envisioned for the states under the NPDES is a major one, encompassing both the opportunity to assume the primary responsibility for the implementation and enforcement of federal effluent discharge limitations by issuing permits as well as the discretion to enact requirements that are more onerous than the federal standard. (See 33 U.S.C. §§ 1251(b), 1342(b).)

But states undertaking such implementation [****47] must do so in a manner that complies with regulations promulgated by the Environmental Protection Agency (the EPA), as well as the CWA's broad provisions (including the “maximum extent practicable” standard (33 U.S.C. § 1342(p)(3)(B)(iii))), and subject to the EPA's continuing revocation authority (see *id.*, § 1342(c)(3)). Despite the breadth of the requirements the statute imposes on states assuming responsibility for permitting enforcement and the expansive nature of the EPA's revocation authority, neither the statute nor its implementing regulations include a safe harbor provision establishing a minimum level of compliance with the federal standard—an absence the majority tacitly acknowledges. (See maj. opn., *ante*, at p. 767 [“the Regional Board was not required by federal law to impose any specific permit conditions”].) Instead, implementation of the federal mandate requires the state agency—here, the Regional Board—to exercise technical judgments about the feasibility of alternative permitting conditions [***66] necessary to achieve compliance with the federal statute.

With no statutory safe harbor that the Regional Board could have relied on to ensure the EPA's approval of the state permitting process, the Board interpreted [****48] the federal standard in light of the statutory text, implementing regulations, and its technical appraisal of potential alternatives. In

discharging its own role, the Commission was then bound to afford the Regional Board a measure of “sister-agency” deference. (See *Yamaha Corp. of America v. State Bd. of Equalization* (1998) 19 Cal.4th 1, 7 [78 Cal. Rptr. 2d 1, 960 P.2d 1031] [explaining that “the binding power of an agency's interpretation of a statute or regulation is contextual: Its power to persuade is both circumstantial and dependent on the presence or absence of factors that support the merit of the interpretation”].) In this case, the Regional Board informed localities that, in its view, the various permit conditions it imposed would satisfy the maximum extent practicable standard. The EPA agreed the requirements were within the scope of the federal standard. The Regional Board's judgment that these conditions will control pollutant discharges to the extent required by federal law is at the core of the agency's institutional expertise. That expertise merits a measure of deference because the Regional Board's ken includes not only its greater familiarity with the CWA (relative to other entities), but also technical knowledge relevant to judgments about the water quality consequences [****49] of particular permitting conditions relevant to the provisions of the [*775] CWA. (See, e.g., 33 U.S.C. § 1342(p)(3)(B)(iii) [requiring that permits include “management practices, control techniques and system, design and engineering methods, and such other provisions as ... the State determines appropriate for the control of such pollutants”].) Casting aside the Regional Board's expertise on the issue at hand, the majority nonetheless upholds the Commission's ruling.

Remand to the Commission would have been the more appropriate course for multiple reasons. First, the Commission applied the wrong framework for its analysis. It failed to consider all the evidence relevant to whether the permit conditions were necessary for compliance with federal law. The Commission compounded its error by relying on an interpretation of the CWA that misconstrues the federal statutory scheme governing the state permitting process.

[**375] In particular, the Commission treated the problem as essentially a simple matter of searching the statutory text and regulations for precisely the same terms used by the Regional Board's permit conditions. Unless the requirement in question is referenced explicitly in a federal statutory or regulatory provision, [****50] the Commission's analysis suggests, the requirement cannot be a federal mandate. With respect to trash receptacles, the Commission stated: "Because installing and maintaining trash receptacles at transit stops is not expressly required of cities or counties or municipal separate storm sewer dischargers in the federal statutes or regulations, these are activities that 'mandate costs that exceed the mandate in the federal law or regulation.'" And with respect to industrial facility inspections, the Commission said this: "Inasmuch as the federal regulation (40 CFR § 122.26 (c)) authorizes coverage under a statewide general permit for the inspections of industrial activities, and the federal regulation (40 CFR § 122.26 (d)(2)(iv)(D)) does not expressly require those inspections to be performed by the county or cities (or the 'owner or operator of the discharge') the Commission finds that the state has freely chosen to impose [***67] these activities on the permittees." (Fn. omitted.)

Existing law does not support this method of determining what constitutes a federal mandate. Instead, our past decisions emphasize the need to consider the implications of multiple statutory provisions and broader statutory context when interpreting federal law [****51] to determine if a given condition constitutes a federal mandate. (See *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 76 [266 Cal. Rptr. 139, 785 P.2d 522] (*City of Sacramento*); see also *San Diego Unified School Dist. v. Commission on State Mandates* (2004) 33 Cal.4th 859, 890 [16 Cal. Rptr. 3d 466, 94 P.3d 589] ["challenged state rules or procedures that are intended to implement an applicable federal law—and whose costs are, *in context*, *de minimis*—should be treated as part and parcel of the underlying federal mandate" (italics added)].) In contrast, [*776] the Commission's overly narrow

approach to determining what constitutes a federal mandate risks creating a standard that will never be met so long as the state retains any shred of discretion to implement a federal program. It cannot be that so long as a federal statute or regulation does not expressly require every permit term issued by a state agency, then the permit is a state, rather than a federal, mandate. But this is precisely how the Commission analyzed the issue—an analysis that, remarkably, the majority does not even question. Instead, the majority combs the record for evidence that could have supported the result the Commission reached. In so doing, the majority implicitly acknowledges that the Commission's approach to resolving the question at the heart of this case was deficient.

But if the Commission applied the wrong framework [****52] for its analysis, the right course is to remand. Doing so would obviate the need to cobble together scattered support for a decision by the Commission that was premised, in the first instance, on the Commission's own misconstrual of the inquiry before it. Instead, we should give the Commission an opportunity to reevaluate its conclusion in light of the entire record and to, where appropriate, solicit further information from the parties to shed light on what permit conditions are necessary for compliance with federal law.

The potential consequences of allowing the Commission to continue on its present path are quite troubling. For if the law were as the Commission suggests, the state would be unduly discouraged from participating in federal programs like the NPDES—even though participation might otherwise be in California's interest—if the state knows *ex ante* that it will be unable to pass along the expenses to the local areas that experience the most costs and benefits from the mandate at issue. Our law on unfunded mandates does not compel such a result. Nor is there an apparent prudential rationale in support of it.

The Commission's approach also fails to appreciate

the EPA's role [****53] in implementing (through its interpretation and enforcement of the CWA) statutory requirements that the CWA describes in relatively broad terms. Indeed, what may be “practicable” in Los Angeles [**376] may not be in San Francisco, much less in Kansas City or Detroit. (See Building Industry Assn. of San Diego County v. State Water Resources Control Bd. (2004) 124 Cal.App.4th 866, 889 [22 Cal. Rptr. 3d 128] (*Building Industry Assn.*) [explaining that “the maximum extent practicable standard is a highly flexible concept that depends on balancing numerous factors, including the particular control's technical feasibility, cost, public acceptance, regulatory compliance, and effectiveness”].) It also suggests a lack of understanding of two interrelated matters on which the Regional [***68] Board likely has expertise: the consequences of the measures included as permit conditions relative to any [*777] alternatives and the interpretation of a complex federal statute governing regulation of the environment.

Second, beyond failing to consider all the relevant evidence bearing on the necessity of the imposed permit conditions, the Commission failed to extend any meaningful deference to the Regional Board's conclusions—even though such deference was warranted given that the nature of the decisions involved in interpreting the CWA included evaluating [****54] appropriate alternatives and determining which of those were necessary to satisfy the federal standard. (See State Water Board, supra, 143 Cal.App.4th at p. 997 [“we defer to the regional board's expertise in construing language which is not clearly defined in statutes involving pollutant discharge into storm drain sewer systems”]; City of Rancho Cucamonga v. Regional Water Quality Control Bd. (2006) 135 Cal.App.4th 1377, 1384 [38 Cal. Rptr. 3d 450] (*Rancho Cucamonga*) [“consideration [should be] given to the [regional board's] interpretations of its own statutes and regulations”]; Building Industry Assn., supra, 124 Cal.App.4th at pp. 879–880, fn. 9 [“we do consider and give due deference to the Water Boards' statutory interpretations [of the

CWA] in this case”]; see also Building Industry Assn. v. Bay Area Air Quality Management Dist. (2015) 62 Cal.4th 369, 389–390 [196 Cal. Rptr. 3d 94, 362 P.3d 792] [explaining that “an agency's expertise and technical knowledge, especially when it pertains to a complex technical statute, is relevant to the court's assessment of the value of an agency interpretation”].) In the direct challenge to the permit at issue here, the local agencies argued that the Regional Board exceeded even those requirements associated with the maximum extent practicable standard, an argument the appellate court rejected in an unpublished section of its opinion. Because of its failure to afford any deference to the Regional Board or to conduct an analysis more consistent with the relevant standard of review, the Commission essentially [****55] forces the Board to defend its decision twice: once on direct challenge and a second time before the Commission.

Conditions as prosaic as trash receptacle requirements initially may not seem to implicate the Regional Board's expertise. Yet its unique experience and technical competence matter even with respect to these conditions, because the use of such conditions implicates a decision not to use alternatives that might require greater conventional expert judgment to evaluate. Moreover, the Regional Board is likely to accumulate a distinct and greater degree of knowledge regarding issues such as the reactions of stakeholders to different requirements, and related factors relevant to determining which conditions are necessary to satisfy the CWA's maximum extent practicable standard.

The Commission acknowledged that the State Water Resources Control Board—as well as the EPA—believed the permit requirements did not exceed [*778] this federal standard. “The comments of the State Water Board and U.S. EPA,” the Commission noted, “assert that the permit conditions merely implement a federal mandate under the federal Clean Water Act and its regulations.” But the Commission afforded these

conclusions [****56] no clear deference in determining whether the requirements were state mandates.

Nor is the majority correct in suggesting that the Commission had only a limited responsibility, if it had one at all, to extend any deference to the Regional Board. (See maj. opn., *ante*, at pp. 768–769.) [***69] The Regional Board's judgment as to whether the imposed permit [**377] conditions were necessary to comply with federal law was a prerequisite to the Commission's own task, which was to review the Board's determination in light of all the relevant evidence. To the extent ambiguity exists as to whether the Regional Board's conclusions incorporated any findings that these conditions were necessary to meet the federal standard (see *id.* at pp. 768–769), remand to clarify the Board's position is in order. By instead simply upholding the Commission's conclusion without remand, the majority displaces any meaningful role for the Regional Board's expert judgment.

The majority does so even though courts have routinely emphasized the pivotal role regional boards play in interpreting the CWA's intricate mandate. (See *State Water Board, supra*, 143 Cal.App.4th at p. 997; *Rancho Cucamonga, supra*, 135 Cal.App.4th at p. 1384.) And for good reason: If the Regional Board's judgment is that the trash receptacle and inspection requirements are necessary [****57] to control pollutant discharges to the maximum extent practicable, such a conclusion is well within the purview of its expertise. Unsurprisingly, then, we have never concluded that the technical knowledge relevant to interpreting the requirements of the CWA—a statute that lacks a safe harbor and where discerning what phrases such as maximum extent practicable mean given existing conditions and technology is complex—lies beyond the ambit of the Regional Board's expertise, or otherwise proves distinct from the sort of expertise that merits deference.

Third, the Commission devoted insufficient

attention in its analysis to the role of states in implementing the CWA, and to how that role can be harmonized with the significant protections against unfunded mandates that the state Constitution provides. (See *Cal. Const., art. XIII B, § 6, subd. (a).*) By allowing states to assume such an important role in implementing its provisions, the CWA reflects principles of cooperative federalism. (See 33 U.S.C. §§ 1251(b), 1342(b); see also *Boise Cascade Corp. v. EPA (9th Cir. 1991) 942 F.2d 1427, 1430* [“The federal-state relationship established by the [Clean Water] Act is ... illustrated in Congress' goal of encouraging states to ‘assume the major role in the operation of the NPDES program’ ”].) In accordance with the CWA's [****58] express provisions, California chose to assume [*779] the responsibility for implementation of the NPDES program in the state—a role that requires further specification of permitting conditions. (See 33 U.S.C. § 1342(c)(3) [states must administer permitting programs “in accordance with requirements of this section,” including compliance with the maximum extent practicable standard].) In the process, the state must comply with the constitutional protections against unfunded mandates requiring reimbursement of localities if permit conditions exceed what is necessary to comply with the relevant federal mandate. But given the nature of the relevant CWA provisions—and particularly the maximum extent practicable standard—it is wrong to assume that the conditions at issue in this case exceed what is necessary to comply with the CWA simply because neither the statute nor its regulations explicitly mention those conditions. The consequence of that assumption, moreover, risks discouraging the state from assuming cooperative federalism responsibilities—and may even encourage the state to withdraw from administering the NPDES. Indeed, counsel for the state indicated at oral argument that if the Commission's reasoning [****59] were upheld—and the state were required to foot the bill for any [***70] conditions not expressly mentioned in the applicable federal statutes or regulations—it might

think twice about entering into such arrangements of cooperative federalism.

In light of these concerns with the Commission's approach to this case, it is difficult to see the basis for—or utility of—upholding the Commission's decision, even under the inscrutable standard of review the majority employs. (See *California Youth Authority v. State Personnel Bd.* (2002) 104 Cal.App.4th 575, 586 [128 Cal. Rptr. 2d 514] [substantial evidence review requires that all evidence be considered, including evidence that does not support the agency's decision]; see also *Sierra Club v. U.S. Army Corps of Engineers* (2d Cir. 1983) 701 F.2d 1011, 1030 [“the court may properly be skeptical as to whether an [agency report's] conclusions have a substantial basis in fact if the responsible agency has [**378] apparently ignored the conflicting views of other agencies having pertinent expertise”].) The better course, in my view, would be for us to articulate the appropriate standard for evaluating the question whether these permit conditions are state mandates and then remand for the Commission to apply it in the first instance.

II.

The Commission relied on a narrow approach that only compares the terms of a permit with the text of the CWA [****60] and its implementing regulations. Instead, the Commission should have employed a more flexible methodology in determining whether the permit conditions were federally mandated. Such a flexible approach accords with our prior case law. (See *City of Sacramento, supra*, 50 Cal.3d at p. 76 [whether local government appropriations are [*780] federally mandated and therefore exempt from taxing and spending limitations under § 9, *subd. (b)*, of art. XIII B of the Cal. Const. depends on, inter alia, the nature and purpose of the federal program, whether its design suggests an intent to coerce, when state or local participation began, and the legal and practical consequences of nonparticipation or withdrawal].) Moreover, it

would have the added benefit of not discouraging the state from participating in ventures of cooperative federalism.

The majority may be correct that the facts of *City of Sacramento* are distinguishable. (See maj. opn., *ante*, at p. 768.) In that case, the state risked forsaking subsidies and tax credits for its resident businesses if it failed to comply with federal law requiring that unemployment insurance protection be extended to local government employees. (*Id.* at p. 764.) Here, in contrast, the negative consequences of failing to comply with federal law may seem less severe, at least [****61] in fiscal terms: the EPA may determine that the state is not in compliance with the CWA and reassert authority over permitting. (See 33 U.S.C. § 1342(c)(3).) But *City of Sacramento* nonetheless remains relevant, even though a precisely comparable level of coercion may not exist here. The flexible approach we articulated in that case remains the best way to ensure that some weight is given to the Regional Board's technical expertise, and the conclusions resulting therefrom, while also taking account of the cooperative federalism arrangements built into the CWA.

So instead of adopting an approach foreign to our precedent, the Commission should have begun its analysis with the statutory and regulatory text—and then it should have considered other relevant materials and record evidence bearing on whether the permit conditions are necessary [***71] to satisfy federal law. Crucially, such evidence includes how the federal regulatory scheme operates in practice. The Commission could have examined, for instance, previous permits issued by the EPA in similarly situated jurisdictions, comparing them to the inspection and trash receptacle requirements the Regional Board imposed here and giving due consideration to the EPA's [****62] conclusion that the maximum extent practicable standard is applied in a highly site-specific and flexible manner in order to account for unique local challenges and conditions. (See 64 Fed.Reg. 68722, 68754 (Dec. 8, 1999).)

The Commission could also have considered whether, instead of identifying permitting conditions necessary to comply with the CWA, the state shifted onto local governments responsibility to conduct inspections or provide trash receptacles. The majority wisely notes that these are factors the Commission *could* have examined. (See maj. opn., *ante*, at pp. 770–772.) But the Commission mentioned this evidence only briefly, failing to grapple in any meaningful way with its implications for the issue at hand. We should allow the Commission an opportunity to do so in the first instance.

[*781]

The Commission should have also accorded appropriate deference to the Regional Board's conclusions regarding how best to comply with the federal maximum extent practicable standard. One way to ensure that such deference is given would be to place on the party seeking reimbursement the burden of demonstrating that the challenged permit conditions clearly exceed the federal standard, or that they were otherwise unnecessary [**379] to reduce [****63] pollutant discharges to the maximum extent practicable. Doing so would make sense where the state is implementing a federal program that envisions routine state participation, the federal program does not itself define the minimum degree of compliance required, and the state's implementing agency reasonably determines in its expertise that certain conditions are necessary to comply with the applicable federal standard.

* * *

The Commission's decision—and the approach that produced it—fails to accord with existing law and with the nature of the applicable federal scheme. The state is not responsible for reimbursing localities for permit conditions that are necessary to comply with federal law, a circumstance that renders interpretation of the CWA central to this case. A core principle of the CWA is to facilitate cooperative federalism, by allowing states to take on a critical responsibility in exchange for

compliance with a set of demanding standards overseen by a federal agency capable of withdrawing approval for noncompliance. (See *Arkansas v. Oklahoma* (1992) 503 U.S. 91, 101 [117 L.Ed.2d 239, 112 S.Ct. 1046] [“The Clean Water Act anticipates a partnership between the States and the Federal Government, animated by a shared objective: ‘to restore and maintain [****64] the chemical, physical, and biological integrity of the Nation's waters’ ”]; *Shell Oil Co. v. Train* (9th Cir. 1978) 585 F.2d 408, 409 [“Shell's complaint must be read against the background of the cooperative federal-state scheme for the control of water pollution”].) The Commission failed to interpret the statute in light of nuances in its text and structure. And it failed to offer even a modicum of deference to the Regional Board's interpretation, despite the Board's clear expertise that the technical nature of the questions necessary to interpret the scope of the CWA demands.

Accordingly, I would remand the matter to the Court of Appeal with directions that it instruct the Commission to reconsider its decision. On reconsideration, the Commission should appropriately defer to the [***72] Regional Board, consider all relevant evidence bearing on the question at hand, and ensure the evidence clearly shows the challenged permit conditions were not necessary to comply with the federal mandate. This is the standard that most [*782] thoroughly reflects our existing law and the nature of the CWA. Any dilution of it exacerbates the risk of undermining the nuanced federal-state arrangement at the heart of the CWA.

Liu, J., and Kruger, J., concurred.

COUNTY OF LOS ANGELES et al., Cross-complainants and Appellants, v. COMMISSION ON STATE MANDATES, Cross-defendant and Respondent; DEPARTMENT OF FINANCE et al., Cross-Real Parties in Interest and Respondents.

Prior History: **[**1]** APPEAL from a judgment of the Superior Court of Los Angeles County, No. BS130730, Amy D. Hogue, Judge.

Department of Finance v. Commission on State Mandates, 1 Cal. 5th 749, 207 Cal. Rptr. 3d 44, 378 P.3d 356, 2016 Cal. LEXIS 7123 (Aug. 29, 2016)

Disposition: Reversed with directions.

Core Terms

local government, inspection, trash receptacle, state agency, transit, stormwater, stops, costs, property owner, subvention, programs, pollution, charges, levy, school district, public agency, mandated, higher level of service, provide a service, regulations, compliance, reimburse, governmental function, public utility, regional board, customers, agencies, parcel, cost of complying, public entity

Case Summary

Overview

HOLDINGS: [1]-Costs incurred by local governments to inspect facilities and to install trash receptacles at transit stops, which a stormwater drainage permit required, were state mandates under Cal. Const., art. XIII B, § 6, because they were programs that provided a higher level of service and imposed unique local requirements; [2]-Reimbursement was not available under Gov. Code, § 17556, subd. (d), for the inspections because local police powers under Cal. Const., art. XI, § 7, provided authority to levy inspection fees, which were not preempted as duplicative of Wat. Code, § 13260, fees but, under Wat. Code, § 13002, subd. (a), were local regulations not in conflict; [3]-Subvention was required as to the trash receptacles because the local governments could neither levy fees on transit agencies under Gov. Code, § 54999.7, nor charge property owners under Cal. Const., art. XIII D, § 6.

Outcome

Reversed and remanded.

HN1[\[↕\]](#) Standards of Review, De Novo Standard of Review

The California Commission on State Mandates, as a quasi-judicial body, has the sole and exclusive authority to adjudicate whether a state mandate exists. Review of its decisions is by writ of administrative mandamus to the trial court. Gov. Code, § 17559, subd. (b). On appeal from the trial court's decision, the appellate court's review of disputed factual determinations is the same as the trial court, that is, to review the administrative decision to determine whether it is supported by substantial evidence on the whole record. However, the appellate court independently reviews conclusions as to the meaning and effect of constitutional and statutory provisions and, more particularly, a determination that permit conditions are state mandates.

HN3[\[↕\]](#) Local Governments, Finance

Cal. Const., art. XIII B, generally restricts the amounts state and local governments may appropriate and spend each year from the proceeds of taxes. The drafters of the initiative perceived that the restriction on state government spending could result in attempts by legislators seeking to establish or expand a government program to require local governments implement the desired program, thus effectively shifting the financial responsibility for the program to the local governments. To protect local governments from such attempts, the drafters included Cal. Const., art. XIII B, § 6, which provides that whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service. Cal. Const., art. XIII B, § 6, subd. (a). As a result, the state, with certain exceptions, must pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies.

Civil Procedure > Judgments > Preclusion of
Judgments > Law of the Case

HN2[\[↕\]](#) Preclusion of Judgments, Law of the Case

Under the law of the case doctrine, an appellate court, stating a rule of law necessary to the decision of the case, conclusively establishes that rule and makes it determinative of the rights of the same parties in any subsequent retrial or appeal in the same case. Generally, the doctrine of law of the case does not extend to points of law which might have been but were not presented and determined in the prior appeal. A statement as to an issue that the parties did not dispute does not constitute a rule of law necessary to the decision of the case. An exception to this rule applies when a question is implicitly decided because it was essential to the

HN4[\[↕\]](#) Governments, Local Governments

The phrase "higher level of service" in Cal. Const., art. XIII B, § 6, refers to state-mandated increases

in the services provided by local agencies in existing programs. Whether a program is new or provides a higher level of service is determined by comparing the legal requirements before and after the issuance of the executive order or the change in law.

Business & Corporate Compliance > ... > Local Governments > Governments > Local Governments

HN5 **Governments, Local Governments**

The term "program" is not defined in Cal. Const., art. XIII B, § 6. The California Supreme Court has established a two-part definition. Programs, for purposes of Cal. Const., art. XIII B, § 6, are programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. The two parts are alternatives; either will trigger the subvention obligation unless an exception applies.

Evidence > Burdens of Proof > Allocation

Governments > Local Governments > Finance

HN6 **Burdens of Proof, Allocation**

Under Gov. Code, § 17556, subd. (d), when the state imposes on local governments a new program or higher level of service, the state is not required to provide subvention to the local government if the local government has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service. § 17556, subd. (d). The state agencies have the burden of demonstrating the applicability of statutory exceptions to the subvention requirement.

Governments > Local

Governments > Ordinances & Regulations

Governments > Local Governments > Police Power

HN7 **Local Governments, Ordinances & Regulations**

Under Cal. Const., art. XI, § 7, a county or city may make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws. These powers are known generally as the police powers of local government.

Governments > Local Governments > Finance

Governments > Local Governments > Police Power

HN8 **Local Governments, Finance**

The police power includes the authority to impose a regulatory fee to further the purpose of a valid exercise of that power. The services for which a regulatory fee may be charged include those that are incident to the issuance of a license or permit, investigation, inspection, administration, maintenance of a system of supervision and enforcement.

Governments > Local Governments > Finance

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN9 **Tax, State & Local Taxes**

A regulatory fee is valid if (1) the amount of the fee does not exceed the reasonable costs of providing the services for which it is charged, (2) the fee is not levied for unrelated revenue purposes, and (3) the amount of the fee bears a reasonable relationship to the burdens created by the fee payers' activities or operations or the benefits the fee payers receive from the regulatory activity. The third element is a question of fair allocation that considers whether any class of fee payers is shouldering too large a portion of the associated regulatory costs. Whether a statute imposes a fee or a tax is a question of law to be decided upon an independent review of the record.

Environmental
Law > ... > Enforcement > Discharge
Permits > Storm Water Discharges

Governments > Local Governments > Finance

HN10[↓] Discharge Permits, Storm Water Discharges

Although Wat. Code, § 13260, requires that regional boards use a portion of the fees they receive from certain waste dischargers for stormwater inspection and regulatory compliance issues associated with industrial and construction stormwater programs, as provided in § 13260, subd. (d)(2)(B)(iii), nothing in the statute requires a regional board to inspect a fee payer's site.

Governments > Relations With Governments

HN11[↓] Local Governments, Ordinances & Regulations

Under the doctrine of preemption, a local ordinance that conflicts with state law is preempted by the

state law and void. Such a conflict exists if the local legislation duplicates, contradicts, or enters an area fully occupied by general law, either expressly or by legislative implication. A local ordinance duplicates state law when it is coextensive with state law.

Environmental
Law > ... > Enforcement > Discharge
Permits > Storm Water Discharges

Governments > Local Governments > Finance

Governments > State & Territorial
Governments > Relations With Governments

HN12[↓] Discharge Permits, Storm Water Discharges

No provision within Wat. Code, § 13260, implies that the Legislature intended to occupy the field of stormwater program inspections or inspection fees. Indeed, the Porter-Cologne Water Quality Control Act, Wat. Code, §§ 13000-16104, which includes § 13260, provides that its provisions do not limit the power of a city or county to adopt and enforce additional regulations, not in conflict therewith, imposing further conditions, restrictions, or limitations with respect to the disposal of waste or any other activity which might degrade the quality of the waters of the state. Wat. Code, § 13002, subd. (a).

Energy & Utilities Law > Regulators > Public
Utility Commissions > Ratemaking Procedures

HN13[↓] Public Utility Commissions, Ratemaking Procedures

Gov. Code, § 54999.7, subd. (b), requires a public utility to determine the amount of the fee for service provided to a public agency based on the same objective criteria and methodology applicable to comparable nonpublic users, based on customer

classes established in consideration of service characteristics, demand patterns, and other relevant factors.

Energy & Utilities Law > Utility Companies

Governments > Local Governments > Property

HN14 **Energy & Utilities Law, Utility Companies**

Gov. Code, § 54999.7, contemplates that the public entity to whom the service is provided has generally agreed to receive the utility's services; that is, the public entity is a voluntary customer of the public utility. Thus, judicial decisions addressing the statutory scheme have arisen from disputes between public utilities and their customers. Viewed in this light, the reference in § 54999.7 to the power of one public agency to impose a fee for a public utility service provided to another public agency contemplates that the receiving public agency is a public utility customer that solicited and uses the services for which it is charged. The statute does not permit one public entity to simply install equipment—such as trash receptacles—on another public entity's premises and then charge the other entity for their installation and ongoing maintenance.

Governments > Local Governments > Finance

HN15 **Local Governments, Finance**

Levying a charge, fee, or assessment on property owners implicates Cal. Const., art. XIII D, enacted as Proposition 218 (approved 1996). That article places procedural and substantive requirements on charges, fees, and assessments on real property. Procedurally, Cal. Const., art. XIII D, provides generally for protest procedures and voter approval for fees and charges. Cal. Const., art. XIII D, § 6, subds. (a), (c). Substantively, a fee or charge may not be imposed on a parcel or upon a person as an

incident of property ownership unless, among other requirements, the fee or charge does not exceed the proportional cost of the service attributable to the parcel, the fee or charge is for a service that is actually used by, or immediately available to, the owner of the property in question, and it is not imposed for general governmental services. Cal. Const., art. XIII D, § 6, subd. (b)(3)-(5).

Governments > Local Governments > Finance

HN16 **Local Governments, Finance**

Pub. Resources Code, § 40059, enacted as part of the California Integrated Waste Management Act of 1989, reserves to local governments decisions concerning waste management that are of local concern. Although such decisions include charges and fees, this statute does not authorize local governments to impose charges and fees against persons or property without regard to constitutional provisions.

Headnotes/Summary

Summary

[*546] CALIFORNIA OFFICIAL REPORTS SUMMARY

The superior court granted a writ of administrative mandamus to command the Commission on State Mandates to set aside its decision that costs incurred by local governments to comply with requirements of a stormwater drainage permit were state mandates (Cal. Const., art. XIII B, § 6) as to which subvention was required for installing trash receptacles at transit stops, but not for inspecting facilities. (Superior Court of Los Angeles County, No. BS130730, Amy D. Hogue, Judge.)

The Court of Appeal reversed and remanded. The court held that the requirements were state mandates because they were programs that provided a higher level of service and imposed unique local requirements. Reimbursement was not

available for the inspections (Gov. Code, § 17556, subd. (d)) because local police powers (Cal. Const., art. XI, § 7) provided authority to levy inspection fees, which were not preempted as duplicative of regional water quality board fees (Wat. Code, § 13260) but were local regulations not in conflict (Wat. Code, § 13002, subd. (a)). Subvention was required as to the trash receptacles because the local governments could neither levy fees on transit agencies (Gov. Code, § 54999.7), nor charge property owners (Cal. Const., art. XIII D, § 6). (Opinion by Rothschild, P. J., with Chaney and Bendix, JJ., concurring.)

Headnotes

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1)[↓] (1)

State of California § 11—Fiscal Matters— Reimbursing Local Governments for State Mandates—Determinations and Review.

The Commission on State Mandates, as a quasi-judicial body, has the sole and exclusive authority to adjudicate whether a state mandate exists. Review of its decisions is by writ of administrative mandamus to the trial court (Gov. Code, § 17559, subd. (b)). On appeal from the trial court's decision, the appellate court's review of disputed factual determinations is the same as the trial court, that is, to review the administrative decision to determine whether it is supported by substantial evidence on the whole record. However, the appellate court independently reviews conclusions as to the meaning and effect of constitutional and statutory provisions and, more particularly, a determination that permit conditions are state mandates.

CA(2)[↓] (2)

Appellate Review § 157—Scope of Review— Successive Appeals and Law of the Case—

Questions Concluded—Rule of Law Necessary to Decision.

Under the law of the case doctrine, an appellate court, stating a rule of law necessary to the decision of the case, conclusively establishes that rule and makes it determinative of the rights of the same parties in any subsequent retrial or appeal in the same case. Generally, the doctrine of law of the case does not extend to points of law which might have been but were not presented and determined in the prior appeal. A statement as to an issue that the parties did not dispute does not constitute a rule of law necessary to the decision of the case. An exception to this rule applies when a question is implicitly decided because it was essential to the appellate court's decision.

CA(3)[↓] (3)

State of California § 11—Fiscal Matters— Reimbursing Local Governments for State Mandates—Higher Levels of Service Under Existing Programs.

Cal. Const., art. XIII B, generally restricts the amounts state and local governments may appropriate and spend each year from the proceeds of taxes. The drafters of the initiative perceived that the restriction on state government spending could result in attempts by legislators seeking to establish or expand a government program to require local governments implement the desired program, thus effectively shifting the financial responsibility for the program to the local governments. To protect local governments from such attempts, the drafters included Cal. Const., art. XIII B, § 6, which provides that whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service (Cal. Const., art. [*548] XIII B, § 6, subd. (a)). As a result, the state, with certain exceptions, must pay for any new governmental programs, or for higher levels of

service under existing programs, that it imposes upon local governmental agencies.

CA(4) [↓] (4)

**State of California § 11—Fiscal Matters—
Reimbursing Local Governments for State
Mandates—Higher Levels of Service Under
Existing Programs.**

The phrase “higher level of service” in Cal. Const., art. XIII B, § 6, refers to state-mandated increases in the services provided by local agencies in existing programs. Whether a program is new or provides a higher level of service is determined by comparing the legal requirements before and after the issuance of the executive order or the change in law.

CA(5) [↓] (5)

**State of California § 11—Fiscal Matters—
Reimbursing Local Governments for State
Mandates—Definitions—Program.**

The term “program” is not defined in Cal. Const., art. XIII B, § 6. The California Supreme Court has established a two-part definition. Programs, for purposes of Cal. Const., art. XIII B, § 6, are programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state. The two parts are alternatives; either will trigger the subvention obligation unless an exception applies.

CA(6) [↓] (6)

**State of California § 11—Fiscal Matters—
Reimbursing Local Governments for State
Mandates—Local Authority to Levy Service
Charges, Fees, or Assessments.**

Under Gov. Code, § 17556, subd. (d), when the state imposes on local governments a new program or higher level of service, the state is not required to provide subvention to the local government if the local government has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service (§ 17556, subd. (d)). The state agencies have the burden of demonstrating the applicability of statutory exceptions to the subvention requirement.

CA(7) [↓] (7)

**State of California § 11—Fiscal Matters—
Reimbursing Local Governments for State
Mandates—Local Authority to Levy Service
Charges, Fees, or Assessments.**

The Commission on State Mandates determined that local governments seeking reimbursement for costs related to a stormwater drainage permit had the authority to levy service charges, fees, or assessments (Gov. Code, § 17556, subd. (d)) sufficient to pay for [*549] inspection requirements, but not for a requirement to install and maintain trash receptacles at transit stops. The commission was correct.

[Cal. Forms of Pleading and Practice (2021) ch. 126A, Constitutional Law, § 126A.24.]

CA(8) [↓] (8)

**Municipalities § 26—Powers—Police Power—
Scope—Under California Constitution.**

Under Cal. Const., art. XI, § 7, a county or city may make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws. These powers are known generally as the police powers of local government.

CA(9) [↓] (9)

**Municipalities § 30—Powers—Police Power—
Regulation—Imposition of Regulatory Fee.**

The police power includes the authority to impose a regulatory fee to further the purpose of a valid exercise of that power. The services for which a regulatory fee may be charged include those that are incident to the issuance of a license or permit, investigation, inspection, administration, maintenance of a system of supervision and enforcement.

CA(10)[↓] (10)

**Municipalities § 30—Powers—Police Power—
Regulation—Imposition of Regulatory Fee—
Validity.**

A regulatory fee is valid if (1) the amount of the fee does not exceed the reasonable costs of providing the services for which it is charged, (2) the fee is not levied for unrelated revenue purposes, and (3) the amount of the fee bears a reasonable relationship to the burdens created by the fee payers' activities or operations or the benefits the fee payers receive from the regulatory activity. The third element is a question of fair allocation that considers whether any class of fee payers is shouldering too large a portion of the associated regulatory costs. Whether a statute imposes a fee or a tax is a question of law to be decided upon an independent review of the record.

CA(11)[↓] (11)

**Pollution and Conservation Laws § 5—Water
Pollution—Use of Fees by Regional Boards—
Stormwater Inspection and Regulatory
Compliance.**

Although Wat. Code, § 13260, requires that regional boards use a portion of the fees they receive from certain waste dischargers for stormwater inspection and regulatory compliance issues associated with industrial and construction

stormwater programs (§ 13260, subd. (d)(2)(B)(iii)), nothing in the statute requires a regional board to inspect a fee payer's site.

CA(12)[↓] (12)

**Municipalities § 56—Ordinances—Validity—
Conflict with Statutes—Test for Preemption—
Duplication, Contradiction, or Entering Area Fully
Occupied.**

Under the doctrine of preemption, a local ordinance [*550] that conflicts with state law is preempted by the state law and void. Such a conflict exists if the local legislation duplicates, contradicts, or enters an area fully occupied by general law, either expressly or by legislative implication. A local ordinance duplicates state law when it is coextensive with state law.

CA(13)[↓] (13)

**Pollution and Conservation Laws § 5—Water
Pollution—Use of Fees by Regional Boards—
Stormwater Inspection and Regulatory
Compliance—Local Regulatory Authority.**

No provision within Wat. Code, § 13260, implies that the Legislature intended to occupy the field of stormwater program inspections or inspection fees. Indeed, the Porter-Cologne Water Quality Control Act (Wat. Code, §§ 13000–16104), which includes § 13260, provides that its provisions do not limit the power of a city or county to adopt and enforce additional regulations, not in conflict therewith, imposing further conditions, restrictions, or limitations with respect to the disposal of waste or any other activity which might degrade the quality of the waters of the state (Wat. Code, § 13002, subd. (a)).

CA(14)[↓] (14)

**Municipalities § 98—Public Utilities—Rates—
Service Provided to Public Agency—**

Determinations.

Gov. Code, § 54999.7, subd. (b), requires a public utility to determine the amount of the fee for service provided to a public agency based on the same objective criteria and methodology applicable to comparable nonpublic users, based on customer classes established in consideration of service characteristics, demand patterns, and other relevant factors.

CA(15)[↓] (15)**Municipalities § 98—Public Utilities—Rates—Service Provided to Public Agency—As Voluntary Customer.**

Gov. Code, § 54999.7, contemplates that the public entity to whom the service is provided has generally agreed to receive the utility's services; that is, the public entity is a voluntary customer of the public utility. Thus, judicial decisions addressing the statutory scheme have arisen from disputes between public utilities and their customers. Viewed in this light, the reference in § 54999.7 to the power of one public agency to impose a fee for a public utility service provided to another public agency contemplates that the receiving public agency is a public utility customer that solicited and uses the services for which it is charged. The statute does not permit one public entity to simply install equipment—such as trash receptacles—on another public entity's premises and then charge the other entity for their installation and ongoing maintenance.

CA(16)[↓] (16)**Property Taxes § 7.8—Real Property Tax Limitation—Charges, Fees, and Assessments.**

Levying a charge, fee, or assessment on property owners implicates Cal. Const., art. XIII D, enacted as Prop. 218 [*551] (approved 1996). That article places procedural and substantive requirements on

charges, fees, and assessments on real property. Procedurally, Cal. Const., art. XIII D, provides generally for protest procedures and voter approval for fees and charges (Cal. Const., art. XIII D, § 6, subs. (a), (c)). Substantively, a fee or charge may not be imposed on a parcel or upon a person as an incident of property ownership unless, among other requirements, the fee or charge does not exceed the proportional cost of the service attributable to the parcel, the fee or charge is for a service that is actually used by, or immediately available to, the owner of the property in question, and it is not imposed for general governmental services (Cal. Const., art. XIII D, § 6, subd. (b)(3)–(5)).

CA(17)[↓] (17)**Pollution and Conservation Laws § 3.2—Pollution—Waste Management—Local Government Decisions.**

Pub. Resources Code, § 40059, enacted as part of the California Integrated Waste Management Act of 1989, reserves to local governments decisions concerning waste management that are of local concern. Although such decisions include charges and fees, this statute does not authorize local governments to impose charges and fees against persons or property without regard to constitutional provisions.

Opinion by: Rothschild, P. J.

Opinion

ROTHSCHILD, P. J.—The Regional Water Quality Control Board, Los Angeles Region (the Regional Board), issued a permit authorizing the County of Los Angeles (the County) [*3] and certain cities (collectively, the Operators) to operate stormwater drainage systems. The permit requires the Operators (1) to install and maintain trash receptacles at transit stops (the trash receptacle requirement) and (2) periodically inspect commercial facilities, industrial facilities, and construction sites to ensure compliance with various environmental regulatory requirements (the inspection requirements). Some of the Operators filed claims with the Commission on State Mandates (the Commission) seeking a determination that the state must reimburse them for the costs related to the trash receptacle and inspection requirements pursuant to article XIII B, section 6 of the California Constitution (section 6). The Commission determined that the trash receptacle requirement is a reimbursable state mandate and that the inspection requirements are not.

The Department of Finance, State Water Resources Control Board, and the Regional Board (collectively, the state agencies) filed a petition in the superior court for a writ of administrative mandamus to command the [*553] Commission to set aside its decision concerning the trash receptacle requirement.¹ The County and the Cities of Bellflower, Carson, Commerce, Covina, Downey and Signal Hill (collectively, [*4] the local governments) filed a cross-petition challenging the Commission's decision as to the inspection requirements. The superior court granted the state agencies' petition and denied the cross-petition as moot. The local governments appealed. We agree with the Commission that the trash receptacle requirement requires subvention and the inspection requirements do not. We therefore

¹ The state agencies identified as real parties in interest: County of Los Angeles and the Cities of Artesia, Azusa, Bellflower, Beverly Hills, Carson, Commerce, Covina, Downey, Monterey Park, Norwalk, Rancho Palo Verdes, Signal Hill, Vernon, and Westlake Village.

reverse the judgment of the superior court.

FACTUAL AND PROCEDURAL SUMMARY

In December 2001, the Regional Board issued its permit No. 01-182 (the permit) concerning waste discharge requirements for municipal stormwater and urban runoff discharges within Los Angeles County and certain cities in the Los Angeles County Flood Control District. The permit includes the trash receptacle requirement² and inspection requirements.³

In 2003, the local governments, among others, filed test claims⁴ with the Commission seeking

²The trash receptacle requirement is set forth in part 4.f.5.c.3 of the permit, which provides that the Operators shall “[p]lace trash receptacles at all transit stops within its jurisdiction” and that “[a]ll trash receptacles shall be maintained as necessary.”

³The inspection requirements were summarized by our Supreme Court in *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749 [207 Cal. Rptr. 3d 44, 378 P.3d 356] (*Department of Finance*) as follows:

“As to commercial facilities, [the permit] required each Operator to inspect each restaurant, automotive service facility, retail gasoline outlet, and automotive dealership within its jurisdiction, and to confirm that the facility employed best management practices in compliance with state law, county and municipal ordinances, a Regional Board resolution, and the Operators' stormwater quality management program (SQMP). For each type of facility, the [p]ermit set forth specific inspection tasks.

“[The permit] addressed industrial facilities, requiring the Operators to inspect them and confirm that each complied with county and municipal ordinances, a Regional Board resolution, and the SQMP. The Operators also were required to inspect industrial facilities for violations of the general industrial activity stormwater permit, a statewide permit issued by the State [Water Resources Control] Board that regulates discharges from industrial facilities.” (*Department of Finance, supra*, 1 Cal.5th at p. 758, fn. 5.)

“[The permit] required inspections for violations of the general construction activity stormwater permit, another statewide permit issued by the State Board.” (*Department of Finance, supra*, 1 Cal.5th at p. 758, fn. 6.)

⁴A “[t]est claim” is “the first claim filed with the [C]ommission alleging that a particular statute or executive order imposes costs mandated by the state.” (*Gov. Code, § 17521.*) The Commission's adjudication of the test claim “governs all subsequent claims based

subvention of funds to cover the costs of the trash [*554] receptacle and inspection requirements pursuant to section 6.⁵ That section provides generally that the state must reimburse local governments for the costs of any state-mandated “new program or higher level of service.” (*Cal. Const., art. XIII B, § 6, subd. (a).*) This general [**5] rule does not apply under certain circumstances, such as when the requirement is mandated by federal law or the local agency has the authority to levy fees sufficient to pay for the program or increased level of service. (*Gov. Code, § 17556, subs. (c) & (d).*)

In July 2009, the Commission determined that the challenged requirements imposed new programs or higher levels of service within the meaning of section 6. Because no exception applied to the trash receptacle requirement, subvention was required to reimburse the local governments for the cost of complying with the requirement. The Commission determined that subvention was not required for the cost of complying with the inspection requirements, however, because the local governments have the authority to impose fees that could pay for the required inspections. (See *Gov. Code, § 17556, subd. (d).*)

In February 2011, the state agencies filed a petition for writ of administrative mandamus challenging the Commission's decision on three grounds: (1) the challenged requirements are mandated by federal law; (2) the challenged requirements do not impose new programs or higher levels of service; and (3) subvention for the costs of complying with the trash receptacle requirement is not required because the local [**6] governments have authority to levy fees to cover such costs. The local governments

on the same statute.” (*City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802, 1807 [53 Cal. Rptr. 2d 521].)

⁵Additional procedural and background facts regarding the permit and the test claims not necessary to our decision are described in *County of Los Angeles v. State Water Resources Control Bd.* (2006) 143 Cal.App.4th 985 [50 Cal. Rptr. 3d 619], *County of Los Angeles v. Commission on State Mandates* (2007) 150 Cal.App.4th 898 [58 Cal. Rptr. 3d 762], and *Department of Finance, supra*, 1 Cal.5th 749.

filed a cross-petition challenging the Commission's determination that the local governments could levy fees to cover the costs of the required inspections.

In August 2011, the trial court granted the state agencies' petition on the ground that the challenged conditions impose requirements mandated by federal law and, therefore, the costs of complying with the requirements are not reimbursable. (See Gov. Code, § 17556, subd. (c).) The court did not address the other arguments by the state agencies or the local governments' cross-petition. After we affirmed the court's decision in October 2013, the Supreme Court reversed. (*Department of Finance, supra*, 1 Cal.5th at p. 772.)

The Supreme Court held that the federal mandate exception did not apply to the challenged requirements. (*Department of Finance, supra*, 1 Cal.5th at [*555] pp. 771–772.) The court directed the trial court to address the remaining issues raised by the petition and cross-petition. (*Id.* at p. 772.)

In February 2018, the trial court again granted the state agencies' petition, this time on the ground that neither the trash receptacle requirement nor the inspection requirements are state mandated programs within the meaning of section 6. The local governments' cross-petition was therefore moot. The [**7] court did not reach the parties' arguments concerning the local governments' authority to levy fees to pay for the costs of implementing the requirements.

The local governments timely appealed.

The parties briefed issues arising from the trial court's ruling that the trash receptacle requirement and inspection requirements are not state mandates. In June 2020, we requested the parties further brief the questions whether the Commission erred in finding that (1) the costs of the trash receptacle requirement are costs mandated by the state, and (2) the costs of the challenged inspection requirements are not costs mandated by the state. In October 2020, we requested further supplemental briefing to address the questions whether Health

and Safety Code section 5471 or Government Code section 54999.7 provides the local governments with the authority to levy service charges, fees, or assessments sufficient to pay for the trash receptacle requirement. We received and have considered the requested supplemental briefs.

DISCUSSION

A. Standards of Review

HN1 [↑] CA(1) [↑] (1) “[T]he Commission, as a quasi-judicial body, has the sole and exclusive authority to adjudicate whether a state mandate exists.” (*County of Los Angeles v. Commission on State Mandates* (1995) 32 Cal.App.4th 805, 819 [38 Cal. Rptr. 2d 304].) Review of its decisions is by writ of administrative mandamus to the trial court. [**8] (Gov. Code, § 17559, subd. (b).) On appeal from the trial court's decision, our review of disputed factual determinations is the same as “the trial court, that is, to review the administrative decision to determine whether it is supported by substantial evidence on the whole record.” (*County of Los Angeles v. Commission on State Mandates, supra*, 32 Cal.App.4th at p. 814; accord, *Paradise Irrigation Dist. v. Commission on State Mandates* (2019) 33 Cal.App.5th 174, 185 [244 Cal. Rptr. 3d 769] (*Paradise Irrigation*).) However, we “independently review[] conclusions as to the meaning and effect of constitutional and statutory provisions” and, more particularly, the determination that the permit conditions are state mandates. (*Department of Finance, supra*, 1 Cal.5th at p. 762.)

[*556]

B. New Program or Higher Level of Service⁶

⁶ CA(2) [↑] (2) In *Department of Finance*, the Supreme Court noted that the state agencies and the local governments “d[id] not dispute here that each challenged requirement is a new program or higher level of service.” (*Department of Finance, supra*, 1 Cal.5th at p. 762.) The local governments contend that this statement “could be treated as law of the case”; that is, that the Supreme Court implicitly decided that the trash receptacle and inspection requirements are new programs or higher levels of service. HN2 [↑] Under the law of the

CA(3) **(3)** In 1979, the California electorate added article XIII B to our state constitution. **HN3** That article generally “restricts the amounts state and local governments may appropriate and spend each year from the ‘proceeds of taxes.’” (*City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 58–59 [266 Cal. Rptr. 139 785 P.2d 522].) The drafters of the initiative perceived that the restriction on state government spending could result in attempts by legislators seeking to establish or expand a government program to require local governments implement the desired program, thus effectively shifting the financial responsibility for the program to the local governments. (*County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56 [233 Cal. Rptr. 38, 729 P.2d 202]; *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487 [280 Cal. Rptr. 92, 808 P.2d 235].) To protect local governments from such **[**9]** attempts, the drafters included section 6, which provides that “[w]henver the Legislature or any state agency mandates a new program or higher level of service on any local government, the [s]tate shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service.” (Cal. Const., art. XIII B, § 6, subd. (a); see *Department of Finance, supra*, 1 Cal.5th at p. 769.) “As a result, the state ... , with certain exceptions, must “pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies.”” (*County of San Diego v. Commission on State Mandates*

(2018) 6 Cal.5th 196, 207 [240 Cal. Rptr. 3d 52, 430 P.3d 345].)

HN4 **CA(4)** **(4)** The phrase “higher level of service” in section 6 refers to “state mandated increases in the services provided by local agencies in existing ‘programs.’” (*County of Los Angeles v. State of California, supra*, 43 Cal.3d **[*557]** at p. 56.) Whether a program is “new” or provides a “higher level of service” is determined by comparing the legal requirements before and after the issuance of the executive order or the change in law. (See, e.g., *San Diego Unified School Dist. v. Commission on State Mandates* (2004) 33 Cal.4th 859, 878 [16 Cal. Rptr. 3d 466, 94 P.3d 589] (*San Diego U.S.D.*); *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 835 [244 Cal. Rptr. 677, 750 P.2d 318].)

HN5 **CA(5)** **(5)** The term, “program,” is not defined in section 6. Our Supreme Court has established a two-part definition. Programs, for purposes of section 6, are “programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements **[**10]** on local governments and do not apply generally to all residents and entities in the state.” (*County of Los Angeles v. State of California, supra*, 43 Cal.3d at p. 56.) The two parts are alternatives; either will trigger the subvention obligation unless an exception applies. (*Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal.App.3d 521, 537 [234 Cal. Rptr. 795] (*Carmel Valley*).)

case doctrine, ““an appellate court, stating a rule of law necessary to the decision of the case, conclusively establishes that rule and makes it determinative of the rights of the same parties in any subsequent retrial or appeal in the same case.” [Citation.] [Citation.] ‘Generally, the doctrine of law of the case does not extend to points of law which might have been but were not presented and determined in the prior appeal.’” (*Leider v. Lewis* (2017) 2 Cal.5th 1121, 1127 [218 Cal. Rptr. 3d 127, 394 P.3d 1055].) The Supreme Court’s statement in *Department of Finance* as to an issue that the parties did not dispute does not constitute “a rule of law necessary to the decision of the case.” Although an exception to this rule applies when a question is implicitly decided because it was essential to the appellate court’s decision, the general rule and not the exception apply here. We therefore reject the argument that the Supreme Court has decided the issues before us.

State mandates that satisfy the first part of the definition—i.e., the program carries out a governmental function of providing services to the public—are illustrated in a line of cases that includes *San Diego U.S.D., supra*, 33 Cal.4th 859, *Carmel Valley, supra*, 190 Cal.App.3d 521, and *Long Beach Unified Sch. Dist. v. State of California* (1990) 225 Cal.App.3d 155 [275 Cal. Rptr. 449] (*Long Beach*).

In *San Diego U.S.D.*, the court considered a state law that required public school principals to

suspend immediately any student who possesses a firearm at school and make a recommendation to the school district board that the student be expelled. (*San Diego U.S.D., supra*, 33 Cal.4th at pp. 867–871.) In that situation, the law further requires that the suspended student be entitled to a hearing and other procedural protections prior to expulsion. (*Id.* at p. 866.) The San Diego Unified School District contended that the cost associated with such procedural protections was reimbursable under section 6, and the Supreme Court agreed. (*Id.* at pp. 877–878.) The new law required subvention because “public schooling ... constitutes a governmental function” (*id.* at p. 879), and the mandatory suspension of students who possess firearms provided “a ‘higher [**11] level of service’ to the public,” specifically, safer schools for other students. (*Id.* at p. 878.)

In *Carmel Valley*, the County of Los Angeles sought reimbursement from the state for the increased costs of complying with an executive order that established minimum requirements for protective clothing and equipment for firefighters. (*Carmel Valley, supra*, 190 Cal.App.3d at pp. 530–531.) The [*558] Court of Appeal stated that firefighting is a “peculiarly governmental function” that provides services to the public and held that the cost of complying with the new requirements required subvention under section 6. (*Carmel Valley, at p. 537.*) The Supreme Court later explained the holding in *Carmel Valley* by stating that subvention was required in that case because the “increased safety equipment apparently was designed to result in more effective fire protection” and thus “intended to produce a higher level of service to the public.” (*San Diego U.S.D., supra*, 33 Cal.4th at p. 877.)

In *Long Beach*, a school district sought subvention under section 6 for costs associated with an executive order that required school districts to “develop and adopt a reasonably feasible plan for the alleviation and prevention of racial and ethnic segregation of minority students.” (*Long Beach, supra*, 225 Cal.App.3d at p. 165.) Although school

districts had an existing “constitutional obligation to alleviate [**12] racial segregation,” the “specific actions” required by the executive order constituted a “higher level of service” requiring reimbursement under section 6. (*Long Beach, at p. 173.*)

Turning to the instant case, there are three pertinent governmental functions implicated by the challenged requirements for purposes of section 6: The operation of stormwater drainage and flood control systems; the installation and maintenance of trash receptacles at transit stops; and the inspection of commercial, industrial, and construction facilities and sites to ensure compliance with environmental laws and regulations. The first existed prior to the Regional Board's permit; the other two are new. Each is a governmental function that provides services to the public, and the carrying out of such functions are thus programs under the first part of the Supreme Court's definition of that term.

In the case of the provision of stormwater drainage and flood control services, the trash receptacle requirement provides a higher level of service because it, together with other requirements, will reduce pollution entering stormwater drainage systems and receiving waters. In addition, litter will presumably be reduced at transit stops and adjacent streets [**13] and sidewalks; as the local governments put it, the “community is cleaner as a result.”

The inspection requirements provide a higher level of service because they promote and enforce third party compliance with environmental regulations limiting the amount of pollutants that enter storm drains and receiving waters.

Alternatively, the trash receptacle services and inspections can be viewed, as the Commission viewed them, as government functions that provide services to the public. That is, even if the installation and maintenance of trash receptacles at transit stops does not result in a higher level of stormwater drainage and flood control services,

trash collection is itself a government [*559] function that provides a service to the public by producing cleaner transit stops, sidewalks, streets, and, ultimately, stormwater drainage systems and receiving waters. Under this view, the mandate to install and maintain trash receptacles at transit stops is a “new program” within the meaning of section 6 because it was not required prior to the Regional Board's issuance of the permit. Similarly, the inspection requirements not only increase the level of service provided by the existing stormwater drainage [**14] and flood control system, but also constitute new programs mandated by the state to ensure third party compliance with environmental regulations.

The challenged requirements also meet the alternative test of a “program”—i.e., a law or order that “impose[s] unique requirements on local governments” “to implement a state policy.” (*County of Los Angeles v. State of California*, supra, 43 Cal.3d at p. 56.) This alternative was addressed in *County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal.App.3d 1538 [263 Cal. Rptr. 351]. In that case, the California Occupational Safety and Health Administration promulgated new earthquake and fire safety regulations concerning elevators. (*Id.* at p. 1540.) The County of Los Angeles, which owns buildings with elevators, filed a claim for reimbursement for the cost of complying with the regulations. The Court of Appeal affirmed the trial court's rejection of the claim, holding that the regulations did not impose a unique requirement on local governments because the regulations applied “to all elevators, not just those which are publicly owned.” (*Id.* at p. 1545.)

A similar result was reached in *County of Los Angeles v. State of California*, supra, 43 Cal.3d 46, where the enactment of laws that increased the amounts that all employers, including local governments, must pay in worker's compensation benefits, did not impose unique requirements on local governments. (*Id.* at pp. 57–58.) By contrast, the requirements for protective [**15] clothing and

equipment for firefighters in *Carmel Valley* imposed unique requirements on local agencies because they applied “only to those involved in fire fighting” and “fire fighting is overwhelmingly engaged in by local agencies.” (*Carmel Valley*, supra, 190 Cal.App.3d at p. 538; see also *San Diego U.S.D.*, supra, 33 Cal.4th at p. 877 [law requiring procedural protections prior to student expulsion imposed unique requirements on school districts].)

The pertinent state policy, as expressed in the Regional Board's permit, is “to protect the beneficial uses of receiving waters in Los Angeles County” and “reduce the discharge of pollutants in storm water to the maximum extent practicable.” The challenged requirements are unique to local governments in two ways. First, as the Commission found, the Regional Board's permit applies by its terms only to the local governmental entities identified in the [*560] permit; no one else is bound by it. Second, the activities compelled by the challenged requirements—collecting trash at transit stops and inspecting businesses and construction sites to ensure environmental regulatory compliance—are, like the firefighting services in *Carmel Valley*, typically within the purview of government agencies. The requirements therefore constitute programs within [**16] the meaning of both alternative definitions. By requiring the local governments to comply with the trash receptacle and inspection requirements, the state agencies have effectively shifted the financial responsibility for such programs to the local governments.

The trial court agreed with the state agencies that the trash receptacle and inspection requirements are mere manifestations of policies to prohibit pollution. As the trial court stated, the requirements “enforce a prohibition rather than initiate or upgrade ‘classic’ or ‘peculiarly governmental functions[s]’ like the firefighting services affected by the executive order in *Carmel Valley*. ... Because the requirements were implemented to prevent pollution (enforce a ban on pollution) rather than to provide a service to the public, it is

difficult to regard them as ‘programs that carry out the governmental function of providing services to the public.’” This view, however, ignores the terms of the Regional Board’s permit; the challenged requirements are not bans or limits on pollution levels, they are mandates to perform specific actions—installing and maintaining trash receptacles and inspecting business sites—that the local [**17] governments were not previously required to perform. Although the purpose of requiring trash collection at transit stops and business site inspections was undoubtedly to reduce pollution in waterways, the state sought to achieve that goal by requiring local governments to undertake new affirmative steps resulting in costs that must be reimbursed under section 6.

Lastly, the state agencies assert that the challenged requirements are not state mandates because the local governments applied for the permit to operate their stormwater drainage systems and “chose a management permit rather than a numeric end-of-pipe permit.” That is, although the local governments could arguably have applied for a permit that simply mandated particular effluent limits on discharges—a so-called end-of-pipe permit—they elected to apply for a “management permit,” which imposes requirements designed to reduce the discharge of pollutants to the maximum extent practicable. (See City of Abilene v. U.S. E.P.A. (5th Cir. 2003) 325 F.3d 657, 659–660; 33 U.S.C. § 1342(p)(3)(B)(iii).) “Having elected a management permit that imposes the challenged conditions in lieu of more rigid requirements,” the state agencies argue, the local governments “should not be allowed to force the [s]tate to pay for that choice.”

The state agencies [**18] rely on Department of Finance v. Commission on State Mandates (2003) 30 Cal.4th 727 [134 Cal. Rptr. 2d 237, 68 P.3d 1203] (Kern [*561] High School District). In that case, the Supreme Court held that school districts that voluntarily elect to participate in particular education-related programs were not entitled to subvention for costs required by such programs.

(*Id.* at p. 743.) This holding does not apply here, however, because, as our Supreme Court explained, the local governments are required under federal and state law to obtain a permit “for any discharge from a municipal storm sewer system serving a population of 100,000 or more.” (Department of Finance, supra, 1 Cal.5th at p. 757.) The permit “must effectively prohibit non-stormwater discharges into the storm sewers, and must ‘require controls to reduce the discharge of pollutants to the maximum extent practicable.’” (*Ibid.*, italics omitted.) Although the storm sewer system operator must propose “management practices; control techniques; and system, design, and engineering methods to reduce the discharge of pollutants to the maximum extent practicable,” it is the “permit-issuing agency” that “determine[s] which practices, whether or not proposed by the applicant, will be imposed as conditions.” (*Ibid.*) Thus, as the Commission concluded, in contrast to the school districts’ participation in educational programs [**19] in Kern High School District, the local governments in the instant case “[did] not voluntarily participate” in applying for a permit to operate their stormwater drainage systems; they were required to do so under state and federal law and the challenged requirements were mandated by the Regional Board.

C. Whether the Local Government Can Levy Fees or Assessments To Pay for the Programs

HN6 [↑] **CA(6)** [↑] (6) Under Government Code section 17556, subdivision (d), when, as here, the state imposes on local governments a new program or higher level of service, the state is not required to provide subvention to the local government if the local government “has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service.” (Gov. Code, § 17556, subd. (d).) The state agencies have the burden of demonstrating the applicability of statutory exceptions to the subvention requirement. (Department of Finance, supra, 1 Cal.5th at p. 769.)

CA(7) [↑] (7) Here, the Commission determined

that the local governments have the authority to levy service charges, fees, or assessments sufficient to pay for the inspection requirements, but not for the trash receptacle requirement. We agree with the Commission.

1. *The Inspection Requirements*

HN7 **CA(8)** **(8)** Under article XI, section 7 of our state constitution, a “county or city may make ****20** and enforce within its limits all local, police, sanitary, and other ***562** ordinances and regulations not in conflict with general laws.” (Cal. Const., art. XI, § 7.) These powers are known generally as the police powers of local government. (*City and County of San Francisco v. Regents of University of California* (2019) 7 Cal.5th 536, 544 [248 Cal. Rptr. 3d 352, 442 P.3d 671].) The parties do not dispute that the challenged inspection requirements are within the government’s police power. (See *Freeman v. Contra Costa County Water Dist.* (1971) 18 Cal.App.3d 404, 408 [95 Cal. Rptr. 852] [“prevention of water pollution is a legitimate governmental objective, in furtherance of which the police power may be exercised”]; *Cowing v. City of Torrance* (1976) 60 Cal.App.3d 757, 764 [131 Cal. Rptr. 830] [local government may enter business property to make reasonable inspection for compliance with public health and safety regulations]; *Sullivan v. City of Los Angeles* (1953) 116 Cal.App.2d 807, 811 [254 P.2d 590] [city officials may inspect private property for compliance with sewage regulations].)

HN8 **CA(9)** **(9)** The police power also includes the authority to impose a regulatory fee to further the purpose of a valid exercise of that power. (*Mills v. County of Trinity* (1980) 108 Cal.App.3d 656, 662 [166 Cal. Rptr. 674].) The services for which a regulatory fee may be charged include those that are “incident to the issuance of [a] license or permit, investigation, inspection, administration, maintenance of a system of supervision and enforcement.” (*California Assn. of Prof. Scientists v. Department of Fish & Game* (2000) 79 Cal.App.4th 935, 945 [94 Cal. Rptr. 2d

535].)

HN9 **CA(10)** **(10)** A regulatory fee is valid “if (1) the amount of the fee does not exceed the reasonable costs of providing the services for which it is charged, ****21** (2) the fee is not levied for unrelated revenue purposes, and (3) the amount of the fee bears a reasonable relationship to the burdens created by the fee payers’ activities or operations” or the benefits the fee payers receive from the regulatory activity. (*California Building Industry Assn. v. State Water Resources Control Bd.* (2018) 4 Cal.5th 1032, 1046 [232 Cal. Rptr. 3d 64, 416 P.3d 53], citing *Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 881 [64 Cal. Rptr. 2d 447, 937 P.2d 1350].) The third element is a question “of fair allocation” that “considers whether any class of fee payers is shouldering too large a portion of the associated regulatory costs.” (*California Building Industry Assn. v. State Water Resources Control Bd., supra*, at p. 1052.) “Whether a statute imposes a fee or a tax is a question of law to be decided upon an independent review of the record.” (*Id.* at p. 1046.)

Here, we are not faced with the question whether any ordinance imposing a fee on businesses to cover the local governments’ inspection costs constitutes a tax or regulatory fee; the issue is whether the local governments have the authority to levy such a fee “sufficient to pay for the mandated program or increased level of service.” (*Gov. Code, § 17556, subd. (d).*) We agree with ***563** the Commission that, based upon the local governments’ constitutional police power and their ability to impose a regulatory fee that (1) does not exceed the reasonable cost of the inspections, (2) is not levied for unrelated revenue purposes, and (3) is fairly allocated among ****22** the fee payers, the local governments have such authority.⁷

⁷The state agencies also assert that the local governments have the authority to levy charges to pay for the inspections under section 5471 of the Health and Safety Code. Because we hold that the police power under the constitution provides such authority, we do not address this issue.

CA(11)[↑] (11) The local governments contend that they could not impose a fee for the costs of the inspections as to some businesses because the state already imposes a fee for industrial and construction site inspections, and the local governments are “constitutionally constrained from imposing a second fee for those same inspections.” Specifically, the local governments contend that the owners of some of the sites they must inspect pay fees to the state, a portion of which the Regional Board must spend “solely on stormwater inspection and regulatory compliance issues associated with industrial and construction stormwater programs.” (Wat. Code, § 13260, subd. (d)(2)(B)(iii).) They argue that any regulatory fee the local governments impose for their inspections would duplicate the fees paid to the state and thus (1) exceed the reasonable cost of providing services for which the fee is charged and (2) not bear a fair or reasonable relationship to the pertinent burdens or benefits.⁸ This argument assumes that the local government's inspection would replace or supplant inspections the Regional Board is required to conduct. The local governments, however, do not cite to the record or ****23** authority to support that assumption. **HN10[↑]** Although Water Code section 13260 requires that regional boards use a portion of the fees they receive from certain waste dischargers for “stormwater inspection and regulatory compliance issues associated with industrial and construction stormwater programs” (Wat. Code, § 13260, subd. (d)(2)(B)(iii)), nothing in the statute requires a regional board to inspect a fee payer's site. Thus, the permit's inspection requirements and Water Code section 13260 can be applied without duplication or conflict; the local governments can impose and collect a fee to cover the reasonable costs of the particular inspections they are required to undertake and the Regional Board can fulfill its expenditure requirements by

⁸ We do not express any view as to whether a particular fee a local government could impose would either exceed the reasonable cost of providing the services for which the fee is charged or not bear a fair or reasonable relationship to the payor's burdens or benefits from the inspection.

addressing “stormwater inspection and regulatory compliance issues” in other ways. (Wat. Code, § 13260, subd. (d)(2)(B)(iii).)

The local governments further argue that, because any regulatory fee they could impose to pay for the required inspections would be duplicative of the ***564** fee some businesses are required to pay to the state under Water Code section 13260, the local government fee would be void under principles of preemption. We disagree.

HN11[↑] **CA(12)[↑]** (12) Under the doctrine of preemption, a local ordinance that conflicts with state law is preempted by the state law and void. (*O'Connell v. City of Stockton* (2007) 41 Cal.4th 1061, 1067 [63 Cal. Rptr. 3d 67, 162 P.3d 583].) Such a ““conflict exists if the ****24** local legislation “*duplicates, contradicts, or enters an area fully occupied* by general law, either expressly or by legislative implication.”””” (*Ibid.*) “A local ordinance *duplicates* state law when it is ‘coextensive’ with state law.” (*Ibid.*)

CA(13)[↑] (13) The local governments have failed to show how a fee it could impose to pay for the required inspections conflicts with state law, specifically, Water Code section 13260. As discussed above, that statute obligates the waste dischargers described in that statute to pay annual fees to the state, and requires some of those fees be used for “stormwater inspection and regulatory compliance issues.” (Wat. Code, § 13260, subd. (d)(2)(B)(iii).) There is nothing in our record to indicate that a local government's inspection fee would necessarily duplicate the annual fees imposed under Water Code section 13260; the local government fee would pay for the costs of the local government's inspection and the fees paid to the state could be used for the activities required or permitted under state law other than the local government's inspection. **HN12[↑]** Nor does any provision within Water Code section 13260 imply that the Legislature intended to “occupy the field” of stormwater program inspections or inspection fees. Indeed, the Porter-Cologne Water Quality

Control Act (Wat. Code, §§ 13000–16104), which **[**25]** includes Water Code section 13260, provides that its provisions do not limit “the power of a city or county ... to adopt and enforce additional regulations, not in conflict therewith, imposing further conditions, restrictions, or limitations with respect to the disposal of waste or any other activity which might degrade the quality of the waters of the state.” (Wat. Code, § 13002, subd. (a).) We therefore reject the local government's preemption arguments.

The local governments also argue that a fee that must be no more than necessary to cover the reasonable costs of the inspections “would be difficult to accomplish.” They refer to problems that would arise from a general business license fee on all businesses, including those not subject to inspection, and to charging fees for inspections in years in which no inspection would take place. Even if we assume that drafting or enforcing a law that imposes fees to pay for inspections would be difficult, the issue is whether the local governments have the authority to impose such a fee, not how easy it would be to do so. (*Connell v. Superior Court* (1997) 59 Cal.App.4th 382, 401 [69 Cal. Rptr. 2d 231].) As explained above, the police powers provision **[*565]** of the constitution and the judicial authorities we have cited provide that authority. Moreover, as the Commission pointed **[**26]** out, at least one city—Covina—has enacted “stormwater inspection fees on [commercial establishments] ... expressly for the purpose of complying with the permit.”

2. The Trash Receptacle Requirement

The Commission determined that the local governments do not have the authority to levy charges, fees, or assessments to cover the costs of the trash receptacle requirement. In part, the Commission reasoned that, “[b]ecause the trash receptacles are required to be placed at transit stops that would typically be on city property (sidewalks) or transit district property (for bus, metro, or subway stations), there are no entities on which the [local governments] would have authority to

impose the fees.”⁹ (Fn. omitted.) The trash receptacle requirement, therefore, requires subvention under section 6. The state agencies challenge this determination.

In their initial appellate brief addressing this issue, the state agencies asserted that the local governments could have charged a fee to transit agencies or transit riders. They made the assertion, however, without citation to authority or evidence. We requested that the parties brief the question whether the local governments have authority to charge a fee **[**27]** to transit agencies pursuant to Government Code section 54999.7. In response the state agencies argue that this statute provides such authority; the local governments contend it does not.

Government Code section 54999.7, subdivision (a) provides: “Any public agency providing public utility service may impose a fee, including a rate, charge, or surcharge, for any product, commodity, or service provided to a public agency, and any public agency receiving service from a public agency providing public utility service shall pay that fee so imposed. Such a fee for public utility service, other than electricity or gas, shall not exceed the reasonable cost of providing the public utility service.” We agree with the local governments that their installation and maintenance of trash receptacles at transit stops pursuant to the permit is not a service “provided to a public agency” within the meaning of the statute.

The Legislature enacted Government Code sections 54999 through 54999.7 to address fee disputes among public utilities, such as water districts, and **[*566]** public agencies that received the

⁹ It is not clear from our record whether the local governments have authority to install and maintain trash receptacles on property they do not own, including property owned by transit authorities. When counsel for the Regional Board was asked at a hearing before the Commission about the ability of the local governments to fulfill the trash receptacle requirement with respect to transit authority property, counsel suggested that the local governments could work “cooperatively” with transit authorities to implement the requirement.

services, such as school districts and state universities. (Assem. Floor Analysis, Assem. Bill No. 2951 (2005–2006 Reg. Sess.) as amended Aug. 29, 2006, pp. 3–7.) These disputes and the Legislature's responses have been shaped [**28] by the Supreme Court's decision in San Marcos Water Dist. v. San Marcos Unified School Dist. (1986) 42 Cal.3d 154 [228 Cal. Rptr. 47, 720 P.2d 935] (*San Marcos*). In that case, a school district connected its facilities to the water district's sewer system and paid monthly service fees, which were not disputed. (*Id.* at pp. 158, 167.) The water district, however, also charged a “capacity fee” to pay for capital improvements to the sewer system, which the school district challenged. (*Id.* at pp. 157–158.) The Supreme Court held that the capacity fee constituted an assessment, which the school district, as a public agency, was not required to pay. (*Id.* at pp. 164–165.) The court rejected the argument that the capacity fee was similar to a usage fee, which is “‘voluntary’—in the sense that it is the payer's solicitation and utilization of the [public utility] service which triggers the charge.” (*Id.* at p. 161.) A usage fee, the court noted, “typically is charged only to those who use the goods or services” and “is related to the actual goods or services provided to the payer.” (*Id.* at p. 162.) The capacity fee, by contrast, was an “involuntary” assessment, which the school district did not agree to pay and the water district could not lawfully impose on its public entity customers. (*Ibid.*)

CA(14)[↑] (14) In 1988, the Legislature responded to the San Marcos decision by enacting Government Code sections 54999 through 54999.6—what courts have [**29] referred to as the San Marcos legislation. (Utility Cost Management v. Indian Wells Valley Water Dist. (2001) 26 Cal.4th 1185, 1189 [114 Cal. Rptr. 2d 459, 36 P.3d 2] (*Utility Cost Management*); Regents of University of California v. City and County of San Francisco (2004) 115 Cal.App.4th 1109, 1111 [9 Cal. Rptr. 3d 728] (*Regents*)). The San Marcos legislation authorized public utilities to charge their public entity customers a “capital

facilities fee” and required the public entities “receiving a public utility's service” to pay the fee. (Gov. Code, § 54999.2.) Subsequent litigation among public utilities and public agencies led the Legislature in 2006 to “fine-tune[]” the statutory scheme by adding section 54999.7. (Assem. Conc. Sen. Amends. to Assem. Bill No. 2951 (2005–2006 Reg. Sess.) as amended Aug. 29, 2006, p. 7.) In addition to subdivision (a) of section 54999.7, quoted above, **HN13[↑]** subdivision (b) requires the public utility to determine the amount of the fee for service provided to a public agency based on “the same objective criteria and methodology applicable to comparable nonpublic users, based on customer classes established in consideration of service characteristics, demand patterns, and other relevant factors.” (Gov. Code, § 54999.7, subd. (b).)

CA(15)[↑] (15) Although San Marcos and the legislation it evoked clarified the type of fees a public utility can charge public entities, **HN14[↑]** the legislation contemplates that the public entity to whom the service is provided has generally agreed to [*567] receive the utility's services; that is, the public [**30] entity is a voluntary customer of the public utility. (See Assem. Conc. Sen. Amends. to Assem. Bill No. 2951 (2005–2006 Reg. Sess.) as amended Aug. 29, 2006, p. 3 [Gov. Code, § 54999.7 “authorizes a public agency utility to charge public agency customers rates or charges on the same basis as comparable nonpublic users, except for capital facilities fees”].) Thus, judicial decisions addressing the statutory scheme have arisen from disputes between public utilities and their customers. (See Utility Cost Management, supra, 26 Cal.4th at pp. 1188, 1194 [assignee of Kern Community College District—a “customer” of the defendant water district—sued to recover sums allegedly charged in excess of limits under Gov. Code, § 54999.3]; Regents, supra, 115 Cal.App.4th at p. 1111 [University of California Regents sued provider of water and sewer services in case that “involves setting and collecting proper charges for public entities as customers of public utilities”].)

Viewed in this light, Government Code section 54999.7's reference to the power of one public agency to impose a fee for a public utility service “provided to [another] public agency” contemplates that the receiving public agency is a public utility customer that solicited and uses the services for which it is charged. The statute does not permit one public entity to simply install equipment—such as trash receptacles—on **[**31]** another public entity's premises and then charge the other entity for their installation and ongoing maintenance. We therefore reject the state agencies' argument that the statute authorizes the local governments to impose on transit agencies service charges, fees, or assessments to pay the costs of complying with the trash receptacle requirement.

CA(16)[↑] (16) The state agencies focus their argument on the assertion that the local governments could levy a fee on property owners “in accordance with the burdens created and benefits enjoyed by each parcel.” As the state agencies acknowledge, **HN15[↑]** levying a charge, fee, or assessment on property owners implicates article XIII D of our state constitution, enacted in 1996 as Proposition 218. That article places procedural and substantive requirements on charges, fees, and assessments on real property. Procedurally, article XIII D of the California Constitution provides generally for protest procedures and voter approval for fees and charges. (Cal. Const., art. XIII D, § 6, subs. (a) & (c).) Substantively, a fee or charge may not be imposed on a parcel or upon a person as an incident of property ownership unless, among other requirements, the fee or charge “[does] not exceed the proportional cost of the service attributable to the parcel,” the **[**32]** fee or charge is for a service that “is actually used by, or immediately available to, the owner of the property in question,” and it is not “imposed for general governmental services.” (Cal. Const., art. XIII D, § 6, subd. (b)(3)–(5).)

[*568]

The state agencies discuss at some length how the procedural requirements under article XIII D of the

California Constitution do not apply to fees for sewer and refuse collection services and, if they do apply, they do not negate the local government's authority to impose fees and charges to pay for the trash receptacle. (See Cal. Const., art. XIII D, § 6, subd. (d); Gov. Code, §§ 53750, subd. (k), 53751, subd. (l); *Paradise Irrigation, supra*, 33 Cal.App.5th at p. 194.) They address only briefly, and unpersuasively, the substantive requirements that the trash collection service for which the fee or charge would be imposed must be used by or immediately available to the property in question and the fee cannot exceed the cost attributable to the parcel that is charged.

Under the state agencies' theory, the local governments can charge any property owner “in the vicinity of the trash receptacles” installed at bus stops for the cost of collecting trash at the bus stop. The adjacent property owners, they argue, would benefit by the reduction of trash on the streets and sidewalks next to their properties.

Even if we assume that a fee imposed on adjacent property owners for trash collection **[**33]** at transit stops could overcome the procedural hurdles applicable to most fees, charges, and assessments imposed on property owners (see Cal. Const., art. XIII D, §§ 4, 6), the proponent of the fee would have to establish that the fee is for a service that is to some extent “attributable to the parcel,” that the “service is actually used by, or immediately available to, the owner of the property,” and that the service is not “for general governmental services ... where the service is available to the public at large in substantially the same manner as it is to property owners.” (*Id.*, art. XIII D, § 6, subd. (b)(3)–(5).) In a dispute between the property owner and a local government that has imposed such a fee, the local government would have the burden of proof on that issue. (*Id.*, art. XIII D, § 6, subd. (b)(5); *Moore v. City of Lemon Grove (2015)* 237 Cal.App.4th 363, 368 [188 Cal. Rptr. 3d 130].) In the procedural situation in this case, however, it is the state agencies that are asserting that the local governments have authority to impose such a fee;

they therefore have the burden of proving that the local governments could satisfy these tests. (Cf. Department of Finance, supra, 1 Cal.5th at p. 769 [party claiming the applicability of federal mandate exception to subvention “bears the burden of demonstrating that it applies”].)

The state agencies have not satisfied their burden. Not only have the [**34] state agencies failed to cite to the record or authority to support the point that a fee imposed on property owners adjacent to transit stops could satisfy the substantive constitutional requirements, but common sense dictates that the vast majority of persons who would use and benefit from trash receptacles at transit stops are not the owners of adjacent properties but rather pedestrians, [*569] transit riders, and other members of the general public; any benefit to property owners in the vicinity of bus stops would be incidental. Even if the state agencies could establish that the need for the trash receptacles is in part attributable to adjacent property owners and that the property owners would use the trash receptacles (see Cal. Const., art. XIII D, § 6, subd. (b)(3)–(4)), the placement of the receptacles at public transit stops makes the “service available to the public at large in substantially the same manner as it is to property owners” (*id.*, art. XIII D, § 6, subd. (b)(5)). The state agencies, therefore, failed to establish that the local governments could impose on property owners adjacent to transit stops a fee that could satisfy these constitutional requirements.

In their briefs in the trial court, the state agencies relied on Health and Safety Code section 5471, but did not assert it in [**35] their respondents' brief or first supplemental brief on appeal. We requested the parties address the issue in further supplemental briefs, which we have received. Health and Safety Code section 5471, subdivision (a) provides that “any entity shall have power, by an ordinance or resolution approved by a two-thirds vote of the members of the legislative body thereof, to prescribe, revise and collect, fees, tolls, rates, rentals, or other charges for services and facilities

furnished by it, either within or without its territorial limits, in connection with its water, sanitation, storm drainage, or sewerage system.” The local governments do not dispute that this statute generally authorizes fees to pay for the costs of complying with the trash receptacle requirement, but correctly assert the fee or charge must also comply with constitutional limits on local government fees. (See generally Cal. Const., art. XIII D.) To the extent a fee enacted under Health and Safety Code section 5471 is imposed on transit agencies or property owners, it cannot survive scrutiny for the reasons explained above; and no cogent argument has been made as to how a fee could be imposed on pedestrians or transit riders who would be the primary users and beneficiaries of the trash receptacles.

The state agencies rely on [**36] an opinion of the Attorney General which concludes that “[a] city may impose storm drainage pollution abatement charges with respect to property owned by school districts within the city's boundaries to fund the city's activities in meeting federal stormwater discharge requirements if the activities do not include the construction of capital improvements.” (84 Ops.Cal.Atty.Gen. 61, 61 (2001).) The Attorney General's opinion expressly assumes that a city would create “storm drainage services as a utility enterprise of the city” and pass “a resolution establishing storm drainage pollution abatement charges applicable to all parcels of property in the city, apportioned in accordance with a per-parcel runoff formula.” (*Id.* at p. 62.) The opinion implies that charges for storm drainage pollution abatement can be constitutionally imposed by allocating the costs of storm drainage services among all parcels of property based on the amount of [*570] water that runs off each parcel. Without commenting on the correctness of the opinion, it is inapposite here. The state agencies are attempting to justify a fee imposed on parcels adjacent to transit stops to pay for the cost of trash collection at the transit stops. The Attorney General's opinion [**37] offers no guidance on this issue.

CA(17)[↑] (17) Lastly, the state agencies assert that the local governments have authority to levy fees to pay for the trash receptacle requirements based on Public Resources Code section 40059. Subdivision (a) of that statute provides: “Notwithstanding any other provision of law, each county, city, district, or other local governmental agency may determine all of the following: [¶] (1) Aspects of solid waste handling which are of local concern, including, but not limited to, frequency of collection, means of collection and transportation, level of services, charges and fees, and nature, location, and extent of providing solid waste handling services.” HN16[↑] This statute, enacted as part of the California Integrated Waste Management Act of 1989, reserves to local governments decisions concerning waste management that are of local concern. Although such decisions include “charges and fees,” this statute does not authorize local governments to impose charges and fees against persons or property without regard to the constitutional provisions discussed above.

DISPOSITION

The judgment is reversed. The court shall vacate its order granting the state agencies' petition for writ of administrative mandamus and denying the local governments' [**38] cross-petition for writ of administrative mandamus as moot, and enter a new order denying both petitions.

The parties shall bear their own costs on appeal.

Chaney, J., and Bendix, J., concurred.

Div. of Occupational Safety & Health v. State Bd. of Control

Court of Appeal of California, Third Appellate District

February 19, 1987

No. C000006

Reporter

189 Cal. App. 3d 794 *; 234 Cal. Rptr. 661 **; 1987 Cal. App. LEXIS 1410 ***; 1987 OSHD (CCH) P27,921 court's decision.

DIVISION OF OCCUPATIONAL SAFETY AND HEALTH, Plaintiff and Respondent, v. STATE BOARD OF CONTROL, Defendant and Respondent; ARCADE FIRE DISTRICT, Real Party in Interest and Appellant

Subsequent History: [***1] A Petition for a Rehearing was Denied March 17, 1987.

Prior History: Superior Court of Sacramento County, No. 299306, Roger K. Warren, Judge.

Disposition: The order granting the Division's petition for a writ of mandate is affirmed.

Core Terms

regulation, subdivision, costs, reimbursement, atmosphere, levels, occupational safety, executive order, mandated, federal mandate, mandated costs, firefighting, standby, state-mandated, state regulation, local agency, local fire, districts, teams, federal law, three-person, promulgated, manpower, repealed

Case Summary

Procedural Posture

Defendant board found that Cal. Admin. Code, tit. 8, § 5144 (g), which imposed higher safety standards, created a reimbursable state mandated cost; therefore defendant approved appellant fire district's reimbursement claim. Plaintiff division sought review of defendant's decision by mandamus and the Superior Court of Sacramento County (California), granted the writ. Appellant then filed a writ of mandamus challenging the trial

Overview

Appellant fire district filed a claim with defendant board asserting that Cal. Admin. Code, tit. 8, § 5144 (g) (Regulation), imposed additional manpower requirements upon it and other local fire protection districts and therefore it was entitled to state reimbursement under former Cal. Rev. & Tax. Code § 2231. Defendant board held that the Regulation created a reimbursable state mandated cost and approved appellant's reimbursement claim. Plaintiff division sought review of defendant's decision, by mandamus and the trial court granted its request. Appellant petitioned the court for a peremptory writ of mandate directing defendant's decision to be set aside. On appeal, the court applied the substantial evidence standard of review and affirmed the trial court's decision. The court held that since plaintiff was not required to promulgate the Regulation in order to comply with federal law, the exemption for federally mandated costs did apply. The court further found that the regulation did not mandate an increase in appellant's fire protection costs, and therefore the trial court did not err when it directed defendant to vacate its decision.

Outcome

The court affirmed the trial court's decision granting defendant board's petition for a writ mandamus. The court held that the regulation, which raised safety requirements, did not create a reimbursable interest, because the regulation did not mandate an increase in appellant's fire protection costs.

As defined by Cal. Rev. & Tax. § 2206, costs mandated by the federal government include any increased costs mandated upon a local agency after January 1, 1973, in order to comply with the requirements of federal statute or regulation. Although an executive order implementing a federal law may result in federally mandated costs

in this general definitional sense, former § 2253.2(b)(3), as amended in 1978 (see now Cal. Gov't. Code, § 17556 (c)), provided that state reimbursement is available to a claimant if the executive order mandates costs which "exceed the mandate" of federal law or regulation.

Headnotes/Summary

Summary

**CALIFORNIA OFFICIAL REPORTS
SUMMARY**

The trial court granted the petition of the State Division of Occupational Safety and Health challenging a decision of the State Board of Control approving the claim of a local fire control district for reimbursement, under Rev. & Tax. Code, § 2207 (state reimbursement of state-mandated local costs), for expenses incurred in maintaining additional firefighters on duty at fires requiring the use of artificial breathing devices pursuant to a regulation delineating standby and rescue procedures. The district construed the regulation as requiring, in addition to the "buddy system" pairs of firefighters with respirators it employed as a standard firefighting practice, a third standby firefighter prepared to undertake rescue of the others, if necessary. The division took the position that the regulation merely passed on nonreimbursable standards mandated by the federal government. (Superior Court of Sacramento County, No. 299306, Roger K. Warren, Judge.)

The Court of Appeal affirmed, holding that Rev. & Tax. Code, § 2207, subd. (f), which did not become effective until after the fiscal years for which reimbursement was sought, was not intended to be retroactive and could not support the claim. Turning to Rev. & Tax. Code, § 2207, subd. (c), which was in effect during those fiscal years, the court deferred to the division's interpretation of the regulation, concluding that, so construed, it did not require the district to increase its respirator-equipped manpower; rather, it contemplated that one firefighter so equipped be maintained on standby, whether two "buddies" or a single firefighter entered the hazardous atmospheres to which the regulation applied. Thus, the court held that the district sought reimbursement for its own interpretation that the "buddy system" was a minimum standard to which the standby requirement had been added, not an express state mandate that three firefighters be deployed at every hazardous-atmosphere fire. (Opinion by Puglia, P. J., with Regan and Sparks, JJ., concurring.)

Headnotes

CA(1)[↓] (1)**Mandamus and Prohibition § 74—Mandamus—
Review—Administrative Regulation.**

--The interpretation of an administrative regulation, like the interpretation of a statute, is a question of law ultimately to be resolved by the courts. Where the substantial evidence test applies, the superior court exercises an essentially appellate function in determining whether the administrative findings are supported by substantial evidence and the proceedings are free from legal error. The scope of the Court of Appeal's review is coextensive with that of the superior court.

CA(2)[↓] (2)**Fires and Fire Districts § 2—Statutes and
Ordinances—Occupational Safety and Health—
Reimbursement of State-mandated Local Costs.**

--The 1974 legislative finding of federal mandate underlying the state Occupational Safety and Health Act (Lab. Code, § 6300 et seq.) has been superseded by former Rev. & Tax. Code, § 2253, subds. (b) and (c), as amended, and does not in and of itself preclude an administrative finding that there is no federal mandate preventing reimbursement to a local fire district for state-mandated costs.

CA(3a)[↓] (3a) CA(3b)[↓] (3b)**Fires and Fire Districts § 2—Statutes and
Ordinances—Health and Safety Regulations—
State-mandated Local Costs—Federally Mandated
Costs.**

--Because the state was not required to promulgate a health and safety regulation requiring certain manpower and equipment minimums for firefighting in hazardous atmospheres in order to comply with federal law, the exception for federally mandated costs, to the requirement that the state

reimburse local agencies for costs incurred by compliance with state-mandated standards, did not apply to a local fire district's claim for reimbursement for the costs of compliance with the state regulation.

CA(4)[↓] (4)**Labor § 6—Regulation of Working Conditions—
Occupational Safety and Health Regulations—
Federal Preemption.**

--Under § 667 of the federal Occupational Safety and Health Act (OSHA) (29 U.S.C. § 651 et seq.), California is preempted from regulating matters covered by the federal OSHA standards unless the state has adopted a federally approved plan. The federal law does not, however, confer federal power upon a state that has adopted such a plan. It merely removes federal preemption so that the state may exercise its own sovereign powers over occupational safety and health. There is no indication in the language of the act that a state with an approved plan may not establish more stringent standards than those developed by the federal OSHA, or grant to its own occupational safety and health agency more extensive jurisdiction than that enjoyed by the federal OSHA.

CA(5)[↓] (5)**State of California § 11—Fiscal Matters—
Reimbursement of Local Governments—
Reimbursement for Increased Program Levels.**

--State regulations that do not increase program levels above those required prior to January 1, 1973, do not result in "costs mandated by the state" within the meaning of Rev. & Tax. Code, § 2207, subd. (c), which requires that the state reimburse local governments for costs incurred in meeting state mandates.

CA(6)[↓] (6)

**State of California § 11—Fiscal Matters—
Reimbursement of Local Governments for State-
mandated Costs—Statute—Construction—
Retroactivity of Amendments.**

--The 1980 amendment to Rev. & Tax. Code, § 2207 (reimbursement of local agency for "costs mandated by the state"), was substantive in nature, rather than procedural or remedial, since it significantly expanded the situations in which a claimant could seek reimbursement for such costs. Nothing in the legislative history of the 1980 amendment expressed a legislative intent that the amendment's provisions be applied retroactively. A statute affecting substantive rights is presumed not to have retrospective application unless the courts can clearly discern from the express language of the statute or extrinsic interpretive aids that the Legislature intended otherwise.

CA(7)[↓] (7)

**State of California § 11—Fiscal Matters—
Reimbursement of Local Governments—State-
mandated Costs—Retroactivity.**

-- Rev. & Tax. Code, § 2207, subd. (f), which provides for state reimbursement of local governmental agencies for costs incurred as a result of enactments after January 1, 1973, that remove options previously available to such agencies, thereby increasing program or service levels, or that prohibit specific activities with the result that such agencies use more costly alternatives, applies prospectively only to costs incurred by local agencies after its effective date, by Jan. 1, 1981. The statute cannot support a claim for reimbursement arising before its effective date.

CA(8)[↓] (8)

**Statutes § 31—Construction—Language—Words
and Phrases—Singular and Plural.**

--As a general rule of construction, words used in

the singular include the plural and vice versa.

CA(9)[↓] (9)

**Statutes § 44—Construction—Aids—
Contemporaneous Administrative Construction—
Ambiguous Statutes.**

--In view of inherent ambiguities in a regulation of the state Division of Occupational Safety and Health (Division) delineating firefighting manpower and equipment safety and health standards, the interpretation given the regulation by the Division, which is charged with its enforcement, was entitled to great weight. Thus, it was proper to defer to that agency's interpretation that the regulation requires the presence of only two persons using respiratory equipment in work places involving hazardous atmospheres, notwithstanding that the State Board of Control, in ruling on a claim of reimbursement, had adopted a different interpretation.

CA(10)[↓] (10)

**Fires and Fire Districts § 2—Statutes and
Ordinances—Hazardous Atmospheres
Regulations—Standby Regulation—State-
mandated Costs.**

--Increased local program levels, such as would be reimbursable by the state under Rev. & Tax. Code, § 2207, subd. (c), were not mandated by the adoption of hazardous atmospheres firefighting regulations by the Division of Occupational Safety and Health. Although division inspectors previously gave firefighting agencies the impression that three-person teams equipped with respirators would be required, rather than the standard-practice two-person teams, the practice of continuing to use the two-person teams while adding a third to stand by was a choice made by local fire districts. The regulation did not expressly require three-person teams, and no agency had been cited for failure to use them. Verbal exchanges

between regulators and the agencies do not rise to the level of a legislative mandate or official policy.

Judges: Opinion by Puglia, P. J., with Regan and Sparks, JJ., concurring.

Opinion by: PUGLIA

Opinion

[*797] [**663] In this appeal we consider whether a safety regulation promulgated by the Division of Occupational Safety and Health (Division) of the Department of Industrial Relations mandates increased costs to local [*798] government such that they are reimbursable under the provisions of Revenue and Taxation Code section 2201 et seq.¹ With respect to the period of time in issue, we conclude that the regulation does not create reimbursable state-mandated costs.

[***2] On October 8, 1980, Arcade Fire District (Arcade) filed a test claim with the State Board of Control (Board) asserting that title 8, section 5144, subdivision (g), of the California Administrative Code (hereafter referred to as Regulation) imposed additional manpower requirements upon it and other local fire protection districts beyond service levels required prior to January 1, 1973.² A local

¹ All references to sections or former sections of an unspecified code are to the Revenue and Taxation Code.

² In 1985, administrative jurisdiction to hear and decide claims for reimbursement of state-mandated costs was transferred from the State Board of Control to the newly created Commission on State Mandates. (Gov. Code, § 17500 et seq.)

governmental agency (§ 2211), Arcade sought state reimbursement under former section 2231. (Repealed Stats. 1986, ch. 879, § 23; see now Gov. Code, § 17561.) Arcade claimed it incurred additional manpower costs during [**664] fiscal years 1978-1979 and 1979-1980 as a result of Regulation 5144, subdivision (g), and that these costs were mandated by the state within the meaning of section 2207.

[***3] HN1 [↑]

Section 2207 defines reimbursable "Costs mandated by the state." They include "any increased costs which a local agency is required to incur as a result of . . . (c) Any executive order issued after January 1, 1973, which (i) implements or interprets a state statute and (ii), by such implementation or interpretation, increases program levels above the levels required prior to January 1, 1973." An "executive order" includes a regulation issued by a state agency such as the Division (§ 2209, subd. (c)). Specifically excluded from the definition of "[costs] mandated by the State" are "[costs] mandated by the federal government" as defined in section 2206 and former section 2253.2, subdivision (b)(3) (repealed Stats. 1986, ch. 879, § 41; see now Gov. Code, § 17556, subd. (c)).

Regulation 5144, subdivision (g), was first adopted by the Division effective August 11, 1974. As amended effective October 14, 1978, the regulation provides: "In atmospheres immediately hazardous to life or health, at least two persons equipped with approved respiratory equipment shall be on the job. Communications shall be maintained between both or all individuals present. Standby persons, [***4] at least one of which shall be in a location which [*799] will not be affected by any likely incidents, shall be present with suitable rescue equipment including self-contained breathing apparatus."³

³ The 1978 amendment deleted from the last sentence the concluding clause "in accordance with Section 5182, Confined Spaces," which had been included in the original version in 1974.

At the administrative hearing, Arcade established that it has always adhered to a practice, known as the "buddy system," whereby two firefighters enter a burning structure together. Arcade also presented evidence that the buddy system is considered essential to the safety of both firefighters and the public and is practiced by firefighting agencies nationwide. Prior to the 1974 effective date of Regulation 5144, subdivision (g), Arcade was unaware of any standby requirement and used only two-person teams in its engine companies. After its effective date, Arcade interpreted the regulation to mandate a minimum firefighting team [***5] of at least three persons equipped with respiratory equipment, one of whom was required to stand by outside a burning structure while the other two operated together under the "buddy system." In support of this interpretation, Arcade presented evidence that Division inspectors had previously informed local fire protection districts that Regulation 5144, subdivision (g), requires a minimum of three fire fighters at the scene.

In opposition to Arcade's claim, the Division maintained that any costs incurred as a result of Regulation 5144, subdivision (g), were federally mandated because the state regulation merely implemented a federal regulation under the 1979 Federal Occupational Safety and Health Act. (29 U.S.C. § 651 et seq.) Even if a state mandate were involved, the Division contended, Arcade's interpretation of the regulation was erroneous. In the Division's view, HN2[↑] Regulation 5144, subdivision (g), requires only two persons to be on the job when atmospheres immediately hazardous to life or health are encountered -- one person to stand by in a location unaffected by likely incidents and the other to encounter the dangerous atmosphere itself. While the Division would certainly [***6] encourage the use of three-person teams at the option of local fire districts, it takes the position that additional manpower is neither mandated by the express language of the regulation nor, as a matter of official policy, a firefighting standard which the Division seeks to enforce.

The Board found the regulation created a reimbursable state-mandated cost and approved Arcade's claim. The Board apparently concluded the regulation did not "explicitly require three-person companies" but considered its effect nonetheless "was to remove the previously existing option of public fire departments to deploy two-person [**665] companies," and that this requirement "exceeded federal and prior state safety regulations."

[*800] The Division sought mandamus to review the Board's ruling. (See former § 2253.5 repealed Stats. 1986, ch. 879, § 44; see now Gov. Code, § 17559; Code Civ. Proc., § 1094.5.) The superior court found the Board had abused discretion in allowing Arcade's claim and issued a peremptory writ of mandate directing the Board to set aside its decision.

Arcade appeals from the order granting the Division mandamus relief. In challenging the court's conclusion that [***7] Regulation 5144, subdivision (g), did not create state-mandated costs, Arcade contends the court (1) applied the wrong standard of review, (2) improperly considered new evidence and legal issues which were not presented at the administrative hearing, and (3) erred in ruling that section 2207, subdivision (f), did not apply.

I

Preliminarily, we set forth the applicable standard of review. HN3[↑] In an administrative mandamus proceeding, we are bound by the Board's findings on all issues of fact within its jurisdiction which are supported by substantial evidence on the record. (See former § 2253.5; Gov. Code, § 17559.) CA(1)[↑] (1) The interpretation of an administrative regulation, however, like the interpretation of a statute, is a question of law ultimately to be resolved by the courts. (Carmona v. Division of Industrial Safety (1975) 13 Cal.3d 303, 310 [118 Cal.Rptr. 473, 530 P.2d 161]; Skyline Homes, Inc. v. Occupational Safety & Health Appeals Bd. (1981) 120 Cal.App.3d 663, 669 [174

Cal.Rptr. 665]; see also *People ex rel. Fund American Companies v. California Ins. Co.* (1974) 43 Cal.App.3d 423, 431 [117 Cal.Rptr. 623].)

HN4 [↑] Where the substantial evidence test applies, [***8] the superior court exercises an essentially appellate function in determining whether the administrative findings are supported by substantial evidence and the proceedings free from legal error; the scope of our appellate review is coextensive with that of the superior court. (*Bank of America v. State Water Resources Control Bd.* (1974) 42 Cal.App.3d 198, 207 [116 Cal.Rptr. 770]; *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182, 190 [203 Cal.Rptr. 258], disapproved on other grounds in *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 58, fn. 10 [233 Cal.Rptr. 38].; see also *Swaby v. Unemployment Ins. Appeals Bd.* (1978) 85 Cal.App.3d 264, 269 [149 Cal.Rptr. 336].) We therefore focus our review on the administrative proceedings, declining to consider specific claims of error committed by the superior court.

We shall also consider, as a preliminary matter, whether a federal mandate or an equally or more restrictive pre-1973 state regulation exists which would [*801] bar Arcade's claim for reimbursement. (See §§ 2206; 2207, subds. (c), (f); former § 2253.2, subd. (b)(3).) Although these legal theories may [***9] not have been thoroughly developed by the Division in the administrative proceedings, we are not foreclosed from addressing them on appeal. (See *City of Merced v. State of California* (1984) 153 Cal.App.3d 777, 781 [200 Cal.Rptr. 642]; *Frink v. Prod* (1982) 31 Cal.3d 166, 170-171 [181 Cal.Rptr. 893, 643 P.2d 476].) Such consideration will not involve receipt of evidence not before the Board. The Board found Regulation 5144, subdivision (g), exceeded the requirements of both federal and pre-1973 state safety regulations. Our review necessarily requires that we take judicial notice of any statutes and published administrative regulations which impact upon the contentions of the parties. (See *Evid. Code*, § 451, subds. (a), (b); *Gov. Code*, § 11343.6; 44 U.S.C. §

1507.) In any event, Arcade is not prejudiced by our consideration of these issues on appeal because, as will appear, we reject the Division's arguments that a federal mandate or a pre-1973 state regulation bars Arcade's claim.

II

CA(2) [↑] (2) The California Occupational Safety and Health Act (state OSHA; *Lab. Code*, [***666] § 6300 et seq.), from which the Division derives its regulatory authority, was enacted [***10] in 1973 (Stats. 1973, ch. 993, §§ 39-107) as a state plan under the Federal Occupational Safety and Health Act of 1970 (federal OSHA; see 29 U.S.C. § 667). In 1974, an uncodified amendment to state OSHA was enacted which provided: "Notwithstanding Section 2231 of the Revenue and Taxation Code [providing for reimbursement to local governments for state-mandated costs], there shall be no reimbursement pursuant to this section . . . because the Legislature finds that this act and any executive regulations or safety orders issued pursuant thereto merely implement federal law and regulations." (Stats. 1974, ch. 1284, § 36, adding § 106 to ch. 993 of the Stats. of 1973.)⁴ However, this legislative disclaimer of any reimbursable mandate with respect to state OSHA and regulations thereunder is not controlling here. Former section 2253, subdivisions (b) and (c) as amended (Stats. 1978, ch. 794, § 6; repealed Stats. 1986, ch. 879, § 40), permitted reimbursement claims for costs incurred after January 1, 1978, under an executive order or a bill chaptered after January 1, 1973, even though the bill or executive order contained a provision making inoperative former section 2231. Thus [***11] the legislative finding of federal mandate underlying [*802] state OSHA (Stats. 1974, ch. 1284, § 36) has been superseded and does not in and of itself preclude a finding such as the Board made here that there is no federal mandate

⁴Chapter 993 of Statutes 1973 already had a section 106 as part of the original enactment. The original section 106 disclaimed any obligation to reimburse local costs incurred in complying with state OSHA "because the cost of implementing this act is minimal on a statewide basis in relation to the effect on local tax rates." (P. 1954.)

preventing reimbursement of Arcade.

CA(3a) [↑] (3a) Having disposed of the express legislative declaration on the subject, we next consider whether state OSHA, under authority of which Regulation 5144, subdivision (g), was promulgated, in fact did no more than impose costs mandated by federal law.

HN5 [↑] As defined by section 2206, "[costs] mandated by the federal government" include "any increased costs mandated . . . upon a local agency . . . after January [***12] 1, 1973, in order to comply with the requirements of federal statute or regulation." Although an executive order implementing a federal law may result in federally mandated costs in this general definitional sense, former section 2253.2, subdivision (b)(3), as amended in 1978 (see now Gov. Code, § 17556, subd. (c)), provided that state reimbursement is available to a claimant if the executive order mandates costs which "exceed the mandate" of federal law or regulation. (Stats. 1978, ch. 794, § 10, eff. Sept. 18, 1978.)⁵

[***13] We accept for purposes of discussion the Division's assertion that Regulation 5144, subdivision (g), simply mandates a safety standard patterned after and commensurate with a regulation

⁵ Effective January 1, 1981, section 2206 was amended to limit the definition of "costs mandated by the federal government" to increased costs mandated *specifically* by the federal government upon a local agency and to exclude from that definition those costs which result from programs or services "implemented at the option of the state, . . ." (Stats. 1980, ch. 1256, § 3.) Correspondingly, subdivision (d) was added to section 2207 to include within the definition of "costs mandated by the state" any increased costs a local agency is required to incur as a result of a post-1973 executive order which implements or interprets a federal or state regulation and by such implementation or interpretation "increases program or service levels above the levels required by such federal statute or regulation." (Stats. 1980, ch. 1256, § 4; see also Gov. Code, § 17513, which excludes from "[costs] mandated by the federal government" "programs or services which may be implemented at the option of the state, . . .") While these amendments are supportive of the conclusion we reach, we assume for present purposes they have no retrospective operation with respect to costs incurred by Arcade during fiscal years 1978-1979 and 1979-1980.

promulgated under federal OSHA. Also governing the use of respirators, **HN6** [↑] 29 Code of Federal Regulations, section 1910.134(e)(3) (1986) reads in pertinent part: ". . . (i) In areas where the wearer, with failure of the respirator, could [**667] be overcome by a toxic or oxygen-deficient atmosphere, at least one additional man shall be present. Communications . . . shall be maintained between both or all individuals present. Planning shall be such that one individual will be unaffected by any likely incident and have the proper rescue equipment to be able to assist the other(s) in case of emergency. [para.] (ii) When self-contained apparatus or hose [*803] masks with blowers are used in atmospheres immediately dangerous to life or health, standby men must be present with suitable rescue equipment."

The federal regulation, unlike the state regulation in issue, has no applicability to local fire departments such as Arcade. **HN7** [↑] By definition, regulated employers under federal OSHA do not include [***14] the political subdivisions of a state. (29 U.S.C. § 652(5); 29 C.F.R. § 1910.2(c).)⁶ On the other hand, the state OSHA broadly defines the "places of employment" over which the Division exercises safety jurisdiction to include public agency employers within the state. (Lab. Code, § 6303, subd. (a); see also United Air Lines, Inc. v. Occupational Safety & Health Appeals Bd. (1982) 32 Cal.3d 762, 767 [187 Cal.Rptr. 387, 654 P.2d 157].)

HN8 [↑] Where a state chooses to adopt its own occupational safety and health plan, the federal OSHA requires as a condition for approval of the plan that the state establish and maintain a comprehensive program which extends, to the extent permitted by state law, "to all [***15] employees of public agencies of the State and its

⁶ Indeed, to our knowledge the federal government did not assert safety jurisdiction over "private fire brigades until federal regulations on the subject were first published in September 1980. (See 29 C.F.R. § 1910.156(a)(2) and (f)(1)(i); 45 Fed. Reg. 60706, amended May 1, 1981, 46 Fed. Reg. 24557.)

political subdivisions." (29 U.S.C. § 667(c)(6); 29 C.F.R. § 1902.3(j).) A state plan, if approved, must also provide for the development and enforcement of safety standards "at least as effective" as the standards promulgated under federal OSHA. (29 U.S.C. § 667(c)(2).) However, these conditions for approval do not render costs incurred by a local agency as a result of a state safety regulation federally mandated costs within the meaning of former section 2253.2, subdivision (b)(3). Clearly, the initial decision to establish locally a federally approved plan is an option which the state exercises freely. In no sense is the state *compelled* to enter a compact with the federal government to extend jurisdiction over occupational safety to local government employers in exchange for the removal of federal preemption. (29 U.S.C. § 667(b).) (Accord, *City of Sacramento v. State of California*, *supra*, 156 Cal.App.3d at pp. 194-199.)

CA(4)[↑] (4) In *United Air Lines, Inc. v. Occupational Safety & Health Appeals Bd.*, *supra*, 32 Cal.3d 762, the court expressed this principle as follows: "Under the [29 United States Code] section [***16] 667 scheme, California is preempted from regulating matters covered by Fed/OSHA [Federal Occupational Safety and Health Administration] standards unless the state has adopted a federally approved plan. The section does not, however, confer federal power on a state - like California -- that has adopted such a plan; it merely removes federal preemption so that the state may exercise its own sovereign powers [*804] over occupational safety and health. (See, e.g., *American Federation of Labor, etc. v. Marshall* (D.C.Cir. 1978) 570 F.2d 1030, 1033; *Green Mt. Power v. Com'r of Labor and Industry* (1978) 136 Vt. 15 [383 A.2d 1046, 1051]. See also 29 U.S.C. § 651(b)(11).) There is no indication in the language of the act that a state with an approved plan may not establish more stringent standards than those developed by Fed/OSHA (see *Skyline Homes, Inc. v. Occupational Safety & Health Appeals Bd.* (1981) 120 Cal.App.3d 663, 671 . . .) or grant to its own occupational safety and health agency more extensive jurisdiction than that enjoyed by

Fed/OSHA." (*United Air Lines, Inc.*, *supra*, 32 Cal.3d at pp. 772-773.) **CA(3b)[↑]** (3b) Thus since Division was not required to promulgate [***17] [**668] Regulation 5144, subdivision (g), to comply with federal law, the exemption for federally mandated costs does not apply.

III

CA(5)[↑] (5) State regulations which do not *increase* program levels above the levels required prior to January 1, 1973, do not result in "costs mandated by the state" within the meaning of section 2207, subdivision (c). The Division submits that former Regulation 5182, which existed prior to 1973, provided standby personnel requirements which were equal to, if not more stringent than, those set forth in Regulation 5144, subdivision (g). A comparison of the two regulations, however, convinces us that former Regulation 5182 was limited to employees working within tanks, vessels, and similar "confined spaces" and was never intended more broadly to encompass fire fighters working in burning structures.

Subdivision (c) of former Regulation 5182 expressly required at least two persons on the job in addition to the standby employee when conditions necessitated the wearing of respiratory equipment in a confined space. ⁷ It was not replaced until

⁷ As pertinent here, former **HN9[↑]** Regulation 5182 provided: ". . . (b) An approved safety belt with a life line attached or other approved device shall be used by employees wearing respiratory equipment within tanks, vessels, or confined spaces . . . At least one employee shall stand by on the outside while employees are inside, ready to give assistance in case of emergency. If entry is through a top opening, at least one additional employee, who may have other duties, shall be within sight and call of the stand-by employee. [para.] (c) When conditions require the wearing of respiratory equipment in a confined space, at least two men equipped with approved respiratory equipment, exclusive of the employees that may be necessary to operate blowers and perform stand-by duties, shall be on the job. One or more of the employees so equipped may be within the confined space at the same time, provided, however, that this shall not apply to tanks of less than 12 feet in diameter, when entrance is through a side manhole." (Cal. Admin. Notice Register, tit. 8, Register 72, No. 6, dated Feb. 5, 1972.)

1978, when new article 108 (Regulations 5156-5159, Cal. Admin. Code, tit. 8), entitled "Confined Spaces," was added. [***18] (Cal. Admin. Notice Register, tit. 8, Register 78, No. 37.) We do not agree with the Division that Regulation 5182 covered fire fighters (see *Carmona v. [**805] Division of Industrial Safety, supra*, 13 Cal.3d at p. 310). Moreover, we note that the Division's reading of the regulation would undermine, if not invalidate, its alternative position that it has always required only a minimum two-person, firefighting team. Thus if Regulation 5144, subdivision (g), properly interpreted, requires a minimum of three persons as contended by Arcade, it does increase program levels above those required prior to January 1, 1973. Before we address that issue directly, we consider the rationale of the Board's decision.

[***19] IV

The Board's approval of Arcade's claim was based on the conclusion that, although Regulation 5144, subdivision (g), did not expressly require three-person engine companies, its effect was to remove a previous option of local fire districts to use only two person companies. In so concluding, the Board apparently relied on the definition of "[costs] mandated by the state" as expressed in subdivision (f) rather than subdivision (c) of section 2207. Under subdivision (f), costs are mandated and reimbursable when they result from "Any . . . executive order issued after January 1, 1973, which . . . *removes an option previously available to local agencies and thereby increases program or service levels . . .*" (Italics added.)

Because subdivision (f) did not become effective until January 1, 1981 (Stats. 1980, ch. 1256, § 4), the Division contends the Board could not retroactively apply the removal-of-an-option criterion to Arcade's October 1980 reimbursement claim for costs incurred during fiscal years 1978-1979 and 1979-1980. We agree.

CA(6)[**] (6) We observe first that the amendment which added subdivisions (d) through (h) to section

2207 significantly expanded the situations in [***20] which a claimant could seek reimbursement for "[costs] mandated by the state." (See *County of Los Angeles v. [**669] State of California* (1984) 153 Cal.App.3d 568, 572 [200 Cal.Rptr. 394].) Before 1981, the entire spectrum of state-mandated costs was confined to those defined in subdivisions (a) through (c) of section 2207.⁸ As the 1980 amendment necessarily increased the state's liability for [**806] locally incurred costs, it must be construed as substantive rather than

⁸ HN10[**] As amended, section 2207 now reads in full: "Costs mandated by the state' means any increased costs which a local agency is required to incur as a result of the following:

"(a) Any law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program;

"(b) Any executive order issued after January 1, 1973, which mandates a new program;

"(c) Any executive order issued after January 1, 1973, which (i) implements or interprets a state statute and (ii), by such implementation or interpretation, increases program levels above the levels required prior to January 1, 1973.

"(d) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which implements or interprets a federal statute or regulation and, by such implementation or interpretation, increases program or service levels required by such federal statute or regulation.

"(e) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which implements or interprets a statute or amendment adopted or enacted pursuant to the approval of a statewide ballot measure by the voters and, by such implementation or interpretation, increases program or service levels above the levels required by such ballot measure.

"(f) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which (i) removes an option previously available to local agencies and thereby increases program or service levels or (ii) prohibits a specific activity which results in the local agencies using a more costly alternative to provide a mandated program or service.

"(g) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which requires that an existing program or service be provided in a shorter time period and thereby increases the costs of such program or service.

"(h) Any statute enacted after January 1, 1973, or executive order issued after January 1, 1973, which adds new requirements to an existing optional program or service and thereby increases the cost of such program or service if the local agencies have no reasonable alternatives other than to continue the optional program."

procedural or remedial in nature. (See *Alta Loma School Dist. v. San Bernardino County Com. on School Dist. Reorganization* (1981) 124 Cal.App.3d 542, 553 [177 Cal.Rptr. 506].) A statute affecting substantive rights is presumed not to have retrospective application unless the courts can clearly discern from the express language of the statute or extrinsic interpretive aids that the Legislature intended otherwise. (*In re Marriage of Bouquet* (1976) 16 Cal.3d 583, 587 [128 Cal.Rptr. 427, 546 P.2d 1371]; *Thompson v. Modesto City High School Dist.* (1977) 19 Cal.3d 620, 625, fn. 3 [139 Cal.Rptr. 603, 566 P.2d 237]; *Alta Loma School Dist., supra*, at p. 553.)

[***21] Although all of the new subdivisions added by the 1980 amendment to section 2207 expressly deal with executive orders issued after January 1, 1973, nothing has been brought to our attention which would indicate the Legislature intended retroactive operation of the expanded definition to resulting costs *incurred* before the 1981 effective date of the amendment. When section 2207 was originally enacted in 1975, the Legislature provided that subdivisions (a) through (c) were "declaratory of existing law." (Stats. 1975, ch. 486, § 18.6.) However, the 1980 amendment adding subdivisions (d) through (h) conspicuously omits any such statement or other indication of retrospective application. CA(7)[↑] (7) Moreover, other related statutory provisions make it clear that the Legislature intended strictly to limit the time period within which a reimbursement claim may be brought for costs incurred during a prior fiscal year. (Former § 2218.5, see now Gov. Code, § 17560; former § 2231, subd. (d)(2), see now Gov. Code, § 17561, subd. [*807] (d)(2); former § 2253; former § 2253.8, repealed Stats. 1986, ch. 879, § 45, see now Gov. Code, § 17557.) Hence, we presume that subdivision (f) of section [***22] 2207 applies prospectively only to costs incurred by local agencies after its effective date, January 1, 1981, and not before. (Accord, *City of Sacramento v. State of California, supra*, 156 Cal.App.3d at p. 194, disapproved on other [**670] grounds in *County of Los Angeles v. State of California, supra*,

43 Cal.3d at p. 58, fn. 10.) Subdivision (f) therefore is not available to support Arcade's claim.

V

The remaining issue is whether Arcade incurred state-mandated costs within the meaning of subdivision (c) of section 2207. It will be recalled that under subdivision (c) of section 2207, reimbursable costs mandated by the state include "any increased costs which a local agency is required to incur as a result of . . . (c) Any executive order issued after January 1, 1973, which (i) implements or interprets a state statute and (ii), by such implementation or interpretation, increases program levels above the levels required prior to January 1, 1973."

As recognized by the Board, the problem resides in the ambiguity of Regulation 5144, subdivision (g). No one contests the regulation's applicability to the occupation of fire fighting. CA(8)[↑] (8) (See fn. 9) But depending on the significance [***23] ascribed to certain of its language, e.g., "In atmospheres," "on the job," "Communications . . . between *both* or all" (italics added) and "standby persons," the regulation is reasonably susceptible to alternative interpretations: (1) at least two persons must *enter* a dangerous atmosphere, (i.e., to be "on the job" one must be "in" the atmosphere) while a third remains outside, (2) at least two persons must stand by (i.e., "standby persons") while others(s) perform a job in a dangerous atmosphere,⁹ or (3) a total of two persons -- one active and one standing by -- is all that is required when working in a dangerous atmosphere.

CA(9)[↑] (9) In view of these inherent ambiguities, the interpretation given the regulation by the Division [***24] as the administrative agency charged with its enforcement is entitled to

⁹ Notwithstanding the use of the plural ("standby persons"), a general rule of construction is that words used in the singular include the plural and vice versa. (See Lab. Code, § 13; Civ. Code, § 14.) Arcade does not contend the regulation requires more than one standby person.

great weight. (*People v. French* (1978) 77 Cal.App.3d 511, 521 [143 Cal.Rptr. 782]; see also *Pacific Legal Foundation v. Unemployment Ins. Appeals Bd.* (1981) 29 Cal.3d 101 111 [172 Cal.Rptr. 194, 624 P.2d 244]; *Carmona v. Division of Industrial Safety, supra*, 13 Cal.3d at p. 310.) We shall defer to the Division's interpretation that the [*808] intended meaning of the regulation, when considered generally and in the abstract, is to require the presence of only two persons using respiratory equipment in workplaces involving hazardous atmospheres. Such deference does not undercut the authority vested in the Board to determine the existence of state-mandated costs under section 2201 et seq. In the exercise of that authority the Board also owes a duty of deference to the administrative agency's interpretation of its regulation. The Board is not licensed to impress its own interpretation upon an administrative regulation in derogation of the reasonable construction of the responsible agency.

CA(10)[↑] (10) In this regard, Arcade contends that substantial evidence supports the conclusion that the [***25] practical consequence of Regulation 5144, subdivision (g), is to mandate an increase in firefighting manpower from two to three persons. Viewing as we must the evidence at the hearing in a light most favorable to Arcade, we accept as true the proposition that fire fighting agencies universally consider the two-person "buddy" system essential to the safety of the workers. We also accept as true that Division inspectors previously gave firefighting agencies the impression that three-person teams are a necessary safeguard.

It does not follow, however, that the regulation in question *mandates* an increase in "program levels above the levels *required* prior to January 1, 1973" as defined by section 2207, subdivision (c). (Italics added.) Although founded on safety reasons, the continued practice of using two fire fighters to enter a burning structure [**671] while adding a third to meet the requirement of a standby was a choice which rested with the local fire districts. As the

Board recognized, the regulation does not expressly require three-person teams nor has the Division issued a citation for failure to use the additional manpower. Verbal exchanges between Division [***26] personnel and the fire districts do not rise to the level of a legislative mandate or official policy. Failing proof that it is impossible to fight fires without the use of "buddies," Arcade cannot inject its own safety standards into a state regulation and say it is a "requirement" of the state.

We conclude that Regulation 5144, subdivision (g), did not mandate an increase in Arcade's fire protection costs for the 1978-1979 and 1979-1980 fiscal years. Accordingly, there was no error in the superior court's order directing the Board to vacate its decision allowing Arcade's claim.

The order granting the Division's petition for a writ of mandate is affirmed.

Case Summary

Procedural Posture

Appellant Riverside Schools sought review from a decision of the Superior Court of Sacramento County (California), which set aside an administrative decision that all local special education costs were state mandated and subject to state reimbursement and, denied appellant's writ of mandate that would have ordered respondent controller to issue a warrant in payment of its claim.

Overview

Appellant Riverside Schools filed claims seeking state reimbursement for alleged state-mandated costs incurred in connection with special education programs. After lengthy proceedings, the administrative agency decided that all local special education costs were state mandated and subject to reimbursement. On appeal, the lower court issued a writ of administrative mandate directing the agency to reconsider the matter and denying appellant's petition for a writ of mandate that would have directed issuance of a warrant in payment of its claim. The court affirmed the lower court decision and clarified the criteria to be applied by the administrative agency. The court concluded that, all financial assistance or funds under the Rehabilitation Education Act, 29 U.S.C.S. § 794 (1973) or, under the Education of the Handicapped Act, 20 U.S.C.S. § 1400 et seq., were federally mandated and thus, appellant was not entitled to reimbursement from the state for these types of programs.

Outcome

The court affirmed the judgment of the lower court,

which set aside an administrative decision that all local special education costs were state mandated and subject to state reimbursement because the special education costs were federally mandated and thus, appellant Riverside Schools was not entitled to reimbursement from the state for these types of programs.

HN4[📌] Federal Employment & Services, Remedies

Federal financial assistance is not the only incentive for a state to comply with the Education of the Handicapped Act, 20 U.S.C.S. § 1400 et seq. Congress intends the act to serve as a means by which state and local educational agencies can fulfill their obligations under the equal protection and due process provisions of the Constitution and under § 504 of the Rehabilitation Act of 1973, 29 U.S.C.S. § 794. Accordingly, where it is applicable the act supersedes claims under the Civil Rights Act, 42 U.S.C.S. § 1983 and § 504 of the Rehabilitation Act of 1973, and the administrative remedies provided by the act constitute the exclusive remedy of handicapped children and their parents or other representatives.

HN5[📌] Administrative Law, Judicial Review

As a result of the exclusive nature of the Education of the Handicapped Act, 20 U.S.C.S. § 1415(e)(2), dissatisfied parties in recipient states must exhaust their administrative remedies under the act before resorting to judicial intervention. This gives local agencies the first opportunity and the primary authority to determine appropriate placement and to resolve disputes. If a party is dissatisfied with the final result of the administrative process then he or she is entitled to seek judicial review in a state or federal court. In such a proceeding the court independently reviews the evidence but its role is restricted to that of review of the local decision and the court is not free to substitute its view of sound educational policy for that of the local authority.

HN7[↓] Constitutional Law, State Constitutional Operation

As a general rule and unless the context clearly requires otherwise, reviewing court must assume that the meaning of a term or phrase is consistent throughout the entire act or constitutional article of which it is a part.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

Two school districts filed claims with the State Board of Control for state reimbursement of alleged state-mandated costs incurred in connection with special education programs. The board determined that the costs were state mandated and subject to reimbursement by the state. In a mandamus proceeding, the trial court entered a judgment by which it issued a writ of administrative mandate directing the Commission on State Mandates (the successor to the board) to set aside the board's administrative decision and to reconsider the matter in light of an intervening decision by the California Supreme Court, and by which it denied the petition of one of the school districts for a writ of mandate

that would have directed the State Controller to issue a warrant in payment of the district's claim. (Superior Court of Sacramento County, No. 352795, Eugene T. Gualco, Judge.)

The Court of Appeal affirmed. It held that the 1975 amendments to the federal Education of the Handicapped Act (20 U.S.C. § 1401 et seq.) constituted a federal mandate with respect to the state. However, even though the state had no real choice in deciding whether to comply with the act, the act did not necessarily require the state to impose all of the costs of implementation upon local school districts. The court held that to the extent the state implemented the act by freely choosing to impose new programs or higher levels of service upon local school districts, the costs of such programs or higher levels of service are state-mandated and subject to subvention under Cal. Const., art. XIII B, § 6. Thus, on remand to the commission, the court held, the commission was required to focus on the costs incurred by local school districts and on whether those costs were imposed by federal mandate or by the state's voluntary choice in its implementation of the federal program. (Opinion by Sparks, Acting P. J., with Davis and Scotland, JJ., concurring.)

Headnotes

CA(1)[↓] (1)

State of California § 11 — Fiscal Matters — Reimbursement to Local Governments — State-mandated Costs: Words, Phrases, and Maxims — Subvention.

--"Subvention" generally means a grant of financial aid or assistance, or a subsidy. The constitutional rule of state subvention provides that the state is required to pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies. This does not mean that the state is required to reimburse local agencies for any incidental cost that may result

from the enactment of a state law; rather, the subvention requirement is restricted to governmental services that the local agency is required by state law to provide to its residents. The subvention requirement is intended to prevent the state from transferring the costs of government from itself to local agencies. Reimbursement is required when the state freely chooses to impose on local agencies any peculiarly governmental cost which they were not previously required to absorb.

CA(2)[↓] (2)

Schools § 4 — School Districts — Relationship to State.

--A school district's relationship to the state is different from that of local governmental entities such as cities, counties, and special districts. Education and the operation of the public school system are matters of statewide rather than local or municipal concern. Local school districts are agencies of the state and have been described as quasi-municipal corporations. They are not distinct and independent bodies politic. The Legislature's power over the public school system is exclusive, plenary, absolute, entire, and comprehensive, subject only to constitutional constraints. The Legislature has the power to create, abolish, divide, merge, or alter the boundaries of school districts. The state is the beneficial owner of all school properties, and local districts hold title as trustee for the state. School moneys belong to the state, and the apportionment of funds to a school district does not give the district a proprietary interest in the funds. While the Legislature has chosen to encourage local responsibility for control of public education through local school districts, that is a matter of legislative choice rather than constitutional compulsion, and the authority that the Legislature has given to local districts remains subject to the ultimate and nondelegable responsibility of the Legislature.

CA(3)[↓] (3)

Property Taxes § 7.8 — Real Property Tax Limitation — Exemptions and Special Taxes — Federally Mandated Costs.

--Pursuant to Rev. & Tax. Code, § 2271 (local agency may levy rate in addition to maximum property tax rate to pay costs mandated by federal government that are not funded by federal or state government), costs mandated by the federal government are exempt from an agency's taxing and spending limits.

CA(4)[↓] (4)

State of California § 11 — Fiscal Matters — Reimbursement to Local Governments — State-mandated Costs — Costs Incurred Before Effective Date of Constitutional Provision.

--Since Cal. Const., art. XIII B, requiring subvention for state mandates enacted after Jan. 1, 1975, had an effective date of July 1, 1980, a local agency may seek subvention for costs imposed by legislation after Jan. 1, 1975, but reimbursement is limited to costs incurred after July 1, 1980. Reimbursement for costs incurred before July 1, 1980, must be obtained, if at all, under controlling statutory law.

CA(5)[↓] (5)

Schools § 53 — Parents and Students — Right or Duty to Attend — Handicapped Children — Federal Rehabilitation Act — Obligations Imposed on Districts.

--Section 504 of the federal Rehabilitation Act of 1973 (29 U.S.C. § 794) does not only obligate local school districts to prevent handicapped children from being excluded from school. States typically purport to guarantee all of their children the opportunity for a basic education. In California, basic education is regarded as a fundamental right. All basic educational programs are essentially

affirmative action activities in the sense that educational agencies are required to evaluate and accommodate the educational needs of the children in their districts. Section 504 does not permit local agencies to accommodate the educational needs of some children while ignoring the needs of others due to their handicapped condition. The statute imposes an obligation upon local school districts to take affirmative steps to accommodate the needs of handicapped children.

CA(6)[↓] (6)

Schools § 53 — Parents and Students — Right or Duty to Attend — Handicapped Children — Education of the Handicapped Act.

--The federal Education of the Handicapped Act (20 U.S.C. § 1401 et seq.), which since its 1975 amendment has required recipient states to demonstrate a policy that assures all handicapped children the right to a free appropriate education, is not merely a funding statute; rather, it establishes an enforceable substantive right to a free appropriate public education in recipient states. Congress intended the act to establish a basic floor of opportunity that would bring into compliance all school districts with the constitutional right to equal protection with respect to handicapped children. It is also apparent that Congress intended to achieve nationwide application.

CA(7)[↓] (7)

Civil Rights § 6 — Education — Handicapped — Scope of Federal Statute.

--Congress intended the Education of the Handicapped Act (20 U.S.C. § 1401 et seq.) to serve as a means by which state and local educational agencies could fulfill their obligations under the equal protection and due process provisions of the Constitution and under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. § 794). Accordingly, where it is applicable, the act

supersedes claims under the Civil Rights Act (42 U.S.C. § 1983) and section 504, and the administrative remedies provided by the act constitute the exclusive remedy of handicapped children and their parents or other representatives. As a result of the exclusive nature of the Education of the Handicapped Act, dissatisfied parties in recipient states must exhaust their administrative remedies under the act before resorting to judicial intervention.

CA(8a)[↓] (8a) CA(8b)[↓] (8b)

State of California § 11 — Fiscal Matters — Reimbursement to Local Governments — State-mandated Costs — Special Education: Schools § 4 — School Districts; Financing; Funds — Special Education Costs — Reimbursement by State.

--The 1975 amendments to the federal Education of the Handicapped Act (20 U.S.C. § 1401 et seq.) constituted a federal mandate with respect to the state. However, even though the state had no real choice in deciding whether to comply with the act, the act did not necessarily require the state to impose all of the costs of implementation upon local school districts. To the extent the state implemented the act by freely choosing to impose new programs or higher levels of service upon local school districts, the costs of such programs or higher levels of service are state mandated and subject to subvention under Cal. Const., art. XIII B, § 6. Thus, on remand of a proceeding by school districts to the Commission on State Mandates for consideration of whether special education programs constituted new programs or higher levels of service mandated by the state entitling the districts to reimbursement, the commission was required to focus on the costs incurred by local school districts and whether those costs were imposed by federal mandate or by the state's voluntary choice in its implementation of the federal program.

CA(9)[↓] (9)

**State of California § 11 — Fiscal Matters —
Reimbursement to Local Governments —
Federally Mandated Costs.**

--The constitutional subvention provision (Cal. Const., art. XIII B, § 6) and the statutory provisions which preceded it do not expressly say that the state is not required to provide a subvention for costs imposed by a federal mandate. Rather, that conclusion follows from the plain language of the subvention provisions themselves. The constitutional provision requires state subvention when "the Legislature or any State agency mandates a new program or higher level of service" on local agencies. Likewise, the earlier statutory provisions required subvention for new programs or higher levels of service mandated by legislative act or executive regulation. When the federal government imposes costs on local agencies, those costs are not mandated by the state and thus would not require a state subvention. Instead, such costs are exempt from local agencies' taxing and spending limitations. This should be true even though the state has adopted an implementing statute or regulation pursuant to the federal mandate, so long as the state had no "true choice" in the manner of implementation of the federal mandate.

CA(10)[↓] (10)

**Statutes § 28 — Construction — Language —
Consistency of Meaning Throughout Statute.**

--As a general rule and unless the context clearly requires otherwise, it must be assumed that the meaning of a term or phrase is consistent throughout the entire act or constitutional article of which it is a part.

CA(11)[↓] (11)

**State of California § 11 — Fiscal Matters —
Reimbursement to Local Governments —
Federally Mandated Costs — Subvention.**

--Subvention principles are part of a more comprehensive political scheme. The basic purpose of the scheme as a whole was to limit the taxing and spending powers of government. The taxing and spending powers of local agencies were to be "frozen" at existing levels with adjustments only for inflation and population growth. Since local agencies are subject to having costs imposed upon them by other governmental entities, the scheme provides relief in that event. If the costs are imposed by the federal government or the courts, then the costs are not included in the local government's taxing and spending limitations. If the costs are imposed by the state, then the state must provide a subvention to reimburse the local agency. Nothing in the scheme suggests that the concept of a federal mandate should have different meanings depending upon whether one is considering subvention or taxing and spending limitations. Thus, the criteria set forth in a California Supreme Court case concerning whether costs mandated by the federal government are exempt from an agency's taxing and spending limits are applicable when subvention is the issue.

CA(12)[↓] (12)

**State of California § 11 — Fiscal Matters —
Reimbursement to Local Governments — State-
mandated Costs — Special Education —
Applicable Criteria in Determining Whether
Subvention Required.**

--In a proceeding for a writ of mandate to direct the Commission on State Mandates to set aside an administrative decision by the State Board of Control (the commission's predecessor), in which the board found that all local special education costs were state mandated and thus subject to state reimbursement, the trial court did not err in determining that the board failed to consider the issues under the appropriate criteria as set forth in a California Supreme Court case concerning whether costs mandated by the federal government are exempt from an agency's taxing and spending

limits. The board relied upon the "cooperative federalism" nature of the Education of the Handicapped Act (20 U.S.C. § 1401 et seq.) without any consideration of whether the act left the state any actual choice in the matter. It also relied on litigation involving another state. However, under the criteria set forth in the Supreme Court's case, the litigation in the other state did not support the board's decision but in fact strongly supported a contrary result.

CA(13) (13)

Courts § 34 — Decisions and Orders — Prospective and Retroactive Decisions — Opinion Elucidating Existing Law.

--In a California Supreme Court case concerning whether costs mandated by the federal government are exempt from an agency's taxing and spending limits, the court elucidated and enforced existing law. Under such circumstances, the rule of retrospective operation controls. Thus, in a proceeding for a writ of mandate to direct the Commission on State Mandates to set aside an administrative decision by the State Board of Control (the commission's predecessor), in which the board found that all local special education costs were state mandated and thus subject to state reimbursement, the trial court correctly applied the Supreme Court decision to the litigation pending before it.

Opinion

[*1570] [**550] This appeal involves a decade-long battle over claims for subvention by two county superintendents of schools [***2] for reimbursement for mandated special education programs. Section 6 of article XIII B of the California Constitution directs, with exceptions not relevant here, that "[w]henver the Legislature or any State agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, ..." The issue on appeal is whether the special education programs in question constituted new programs or higher levels of service mandated by the state entitling the school districts to reimbursement under section 6 of article XIII B of the California Constitution and related statutes for the cost of implementing them or whether these programs were instead mandated by the federal government for which no reimbursement is due.

The Santa Barbara County Superintendent of Schools and the Riverside County Superintendent of Schools each filed claims with the Board of Control for state reimbursement for alleged state-mandated costs incurred in connection with special education programs. After a lengthy administrative process, the Board of Control rendered a decision [***3] finding that all local special

education costs were state mandated and subject to state reimbursement. That decision was then successfully challenged in the Sacramento County Superior Court. The superior court entered a judgment by which it: (1) issued a writ of administrative mandate (Code Civ. Proc., § 1094.5), directing the Commission on State Mandates (the successor to the Board of [*1571] Control) to set aside the administrative decision and to reconsider the matter in light of the California Supreme Court's intervening decision in City of Sacramento v. State of California (1990) 50 Cal.3d 51 [266 Cal.Rptr. 139, 785 P.2d 522]; and (2) denied the Riverside County Superintendent of School's petition for a writ of mandate (Code Civ. Proc., § 1085), which would have directed the State Controller to issue a warrant in payment of the claim. The Riverside County Superintendent of Public Schools appeals. We shall clarify the criteria to be applied by the Commission on State Mandates on remand and affirm the judgment.

I. THE PARTIES

This action was commenced in July 1987 by Jesse R. Huff, then the Director of the [***4] California Department of Finance. Huff petitioned for a writ of administrative mandate to set aside the administrative decision which found all the special education costs to be state mandated. On appeal Huff appears as a respondent urging that we affirm the judgment.

The Commission on State Mandates (the Commission) is the administrative agency which now has jurisdiction over local agency claims for reimbursement for state-mandated costs. (Gov. Code, § 17525.) In this respect the Commission is the successor to the Board of Control. The Board of Control rendered the administrative decision which is at issue here. Since an appropriation for payment of these claims was not included in a local government claims bill before January 1, 1985, administrative jurisdiction over the claims has been transferred from the Board of Control to the Commission. (Gov. Code, § 17630.) The Commission is the named defendant in the petition

for a writ of administrative mandate. In the trial court and on appeal the Commission has appeared as the agency having administrative jurisdiction over the claims, but has not expressed a position on the merits of the litigation.

[**551] The Santa Barbara County Superintendent [***5] of Schools (hereafter Santa Barbara) is a claimant for state reimbursement of special education costs incurred in the 1979-1980 fiscal year. Santa Barbara is a real party in interest in the proceeding for administrative mandate. Santa Barbara has not appealed from the judgment of the superior court and, although a nominal respondent on appeal, has not filed a brief in this court.

The Riverside County Superintendent of Schools (hereafter Riverside) represents a consortium of school districts which joined together to provide special education programs to handicapped students. Riverside seeks reimbursement for special education costs incurred in the 1980-1981 fiscal year. [*1572] Riverside is a real party in interest in the proceeding for writ of administrative mandate. It filed a cross-petition for a writ of mandate directing the Controller to pay its claim. Riverside is the appellant in this appeal.

The State of California and the State Treasurer are named cross- defendants in Riverside's cross-petition for a writ of mandate. They joined with Huff in this litigation. The State Controller is the officer charged with drawing warrants for the payment of moneys from the State [***6] Treasury upon a lawful appropriation. (Cal. Const., art. XVI, § 7.) The State Controller is a named defendant in Riverside's petition for a writ of mandate. In the trial court and on appeal the State Controller expresses no opinion on the merits of Riverside's reimbursement claim, but asserts that the courts lack authority to compel him to issue a warrant for payment of the claim in the absence of an appropriation for payment of the claim.

In addition to the briefing by the parties on appeal, we have permitted a joint amici curiae brief to be filed in support of Riverside by the Monterey

County Office of Education, the Monterey County Office of Education Special Education Local Planning Area, and 21 local school districts.

II. FACTUAL AND PROCEDURAL BACKGROUND

The Legislature has provided an administrative remedy for the resolution of local agency claims for reimbursement for state mandates. In *County of Contra Costa v. State of California* (1986) 177 Cal.App.3d 62 [222 Cal.Rptr. 750], at pages 71 and 72, we described these procedures as follows (with footnotes deleted): " Section 2250 [Revenue & Taxation Code] and those following [***7] it provide a hearing procedure for the determination of claims by local governments. The State Board of Control is required to hear and determine such claims. (§ 2250.) For purposes of such hearings the board consists of the members of the Board of Control provided for in part 4 (commencing with § 13900) of division 3 of title 2 of the Government Code, together with two local government officials appointed by the Governor. (§ 2251.) The board was required to adopt procedures for receiving and hearing such claims. (§ 2252.) The first claim filed with respect to a statute or regulation is considered a 'test claim' or a 'claim of first impression.' (§ 2218, subd. (a).) The procedure requires an evidentiary hearing where the claimant, the Department of Finance, and any affected department or agency can present evidence. (§ 2252.) If the board determines that costs are mandated, then it must adopt parameters and guidelines for the reimbursement of such claims. (§ 2253.2.) The claimant or the state is entitled to commence an action in administrative mandate pursuant to Code of Civil Procedure section 1094.5 to set aside a decision of the board on the grounds that the board's decision [***8] is not supported by substantial evidence. (§ 2253.5.)

[*1573] "At least twice each calendar year the board is required to report to the Legislature on the number of mandates it has found and the estimated statewide costs of these mandates. (§ 2255, subd. (a).) In addition to the estimate of the statewide

costs for each mandate, the report must also contain the reasons for recommending reimbursement. (§ 2255, subd. (a).) Immediately upon receipt of the report a local government claims bill shall be introduced in the Legislature which, when introduced, must contain an appropriation sufficient to pay for the estimated costs of the mandates.

[**552] (§ 2255, subd. (a).) In the event the Legislature deletes funding for a mandate from the local government claims bill, then it may take one of the following courses of action: (1) include a finding that the legislation or regulation does not contain a mandate; (2) include a finding that the mandate is not reimbursable; (3) find that a regulation contains a mandate and direct that the Office of Administrative Law repeal the regulation; (4) include a finding that the legislation or regulation contains a reimbursable mandate and direct that the [***9] legislation or regulation not be enforced against local entities until funds become available; (5) include a finding that the Legislature cannot determine whether there is a mandate and direct that the legislation or regulation shall remain in effect and be enforceable unless a court determines that the legislation or regulation contains a reimbursable mandate in which case the effectiveness of the legislation or regulation shall be suspended and it shall not be enforced against a local entity until funding becomes available; or (6) include a finding that the Legislature cannot determine whether there is a reimbursable mandate and that the legislation or regulation shall be suspended and shall not be enforced against a local entity until a court determines whether there is a reimbursable mandate. (§ 2255, subd. (b).) If the Legislature deletes funding for a mandate from a local government claims bill but does not follow one of the above courses of action or if a local entity believes that the action is not consistent with article XIII B of the Constitution, then the local entity may commence a declaratory relief action in the Superior Court of the County of Sacramento to declare [***10] the mandate void and enjoin its enforcement. (§ 2255, subd. (c).)

"Effective January 1, 1985, the Legislature has

established a new commission to consider and determine claims based upon state mandates. This is known as the Commission on State Mandates and it consists of the Controller, the Treasurer, the Director of Finance, the Director of the Office of Planning and Research, and a public member with experience in public finance, appointed by the Governor and approved by the Senate. (Gov. Code, § 17525.) 'Costs mandated by the state' are defined as 'any increased costs which a local agency or school district is required to incur after July 1, 1980, as a result of any statute enacted after January 1, 1975, or any executive order implementing any statute enacted on or after January 1, 1975, which [*1574] mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution.' (Gov. Code, § 17514.) The procedures before the Commission are similar to those which were followed before the Board of Control. (Gov. Code, § 17500 et seq.) Any claims which had not been included in a local government claims [***11] bill prior to January 1, 1985, were to be transferred to and considered by the commission. (Gov. Code, § 17630; [Rev. & Tax. Code.] § 2239.)"

On October 31, 1980, Santa Barbara filed a test claim with the Board of Control seeking reimbursement for costs incurred in the 1979-1980 fiscal year in connection with the provision of special education services as required by Statutes 1977, chapter 1247, and Statutes 1980, chapter 797. Santa Barbara asserted that these acts should be considered an ongoing requirement of increased levels of service.

Santa Barbara's initial claim was based upon the "mandate contained in the two bills specified above [which require] school districts and county offices to provide full and formal due process procedures and hearings to pupils and parents regarding the special education assessment, placement and the appropriate education of the child." Santa Barbara asserted that state requirements exceeded those of federal law as reflected in section 504 of the

Rehabilitation Act of 1973 (29 U.S.C. § 794).¹ Santa [**553] Barbara's initial claim was for \$ 10,500 in state-mandated costs for the 1979-1980 fiscal year.

[***12] During the administrative proceedings Santa Barbara amended its claim to reflect the following state-mandated activities alleged to be in excess of federal requirements: (1) the extension of eligibility to children younger and older than required by federal law; (2) the establishment of procedures to search for and identify children with special needs; (3) assessment and evaluation; (4) the preparation of "Individual Education Plans" (IEP's); (5) due process hearings in placement determinations; (6) substitute teachers; and (7) staff development programs. Santa Barbara was claiming reimbursement in excess of \$ 520,000 for the cost of these services during the 1979- 1980 fiscal year.

[*1575] Also, during the administrative proceedings the focus of federally mandated requirements shifted from section 504 of the Rehabilitation Act to federal Public Law No. 94-142, which amended the Education of the Handicapped Act. (20 U.S.C. § 1401 et seq.)²

¹ Section 794 of title 29 of the United States Code will of necessity play an important part in our discussion of the issues presented in this case. That provision was enacted as section 504 of the Rehabilitation Act of 1973. (Pub.L. No. 93-112, tit. V, § 504 (Sept. 26, 1973) 87 Stat. 394.) It has been amended several times. (Pub.L. No. 95-602, tit. I, § 119, 122(d)(2) (Nov. 6, 1978) 92 Stat. 2982, 2987 [Rehabilitation, Comprehensive Services, and Developmental Disabilities Act of 1978]; Pub.L. No. 99- 506, tit. I, § 103(d)(2)(B), tit. X, § 1002(e)(4) (Oct. 21, 1986) 100 Stat. 1810, 1844; Pub.L. No. 100-259, § 4 (Mar. 22, 1988) 102 Stat. 29; Pub.L. No. 100-630, tit. II, § 206(d) (Nov. 7, 1988) 102 Stat. 3312.) The decisional authorities universally refer to the statute as "section 504." We will adhere to this nomenclature and subsequent references to section 504 will refer to title 29, United States Code, section 794.

² The Education of the Handicapped Act was enacted in 1970. (Pub.L. No. 91-230, tit. VI (Apr. 13, 1970) 84 Stat. 175.) It has been amended many times. The amendment of primary interest here was enacted as the Education for All Handicapped Children Act of 1975. (Pub.L. No. 94-142 (Nov. 29, 1975) 89 Stat. 774.) The 1975 legislation significantly amended the Education of the Handicapped Act, but did not change its short title. The Education of the

[***13] The Board of Control adopted a decision denying Santa Barbara's claim. The board concluded that the Education of the Handicapped Act resulted in costs mandated by the federal government, that state special education requirements exceed those of federal law, but that "the resulting mandate is not reimbursable because the Legislature already provides funding for all Special Education Services through an appropriation in the annual Budget Act."

Santa Barbara sought judicial review by petition for a writ of administrative mandate. The superior court found the administrative record and the Board of Control's findings to be inadequate. Judgment was rendered requiring the Board of Control to set aside its decision and to rehear the matter to establish a proper record, including findings. That judgment was not appealed.

On October 30, 1981, Riverside filed a test claim for reimbursement of \$ 474,477 in special education costs incurred in the 1980-1981 fiscal year. Riverside alleged that the costs were state mandated by chapter 797 of Statutes 1980. The basis of Riverside's claim was Education Code section 56760, a part of the state special education funding formula which, according [***14] to Riverside, "mandates a 10%% cap on ratio of students served by special education and within that 10%% mandates the ratio of students to be served by certain services." Riverside explained that chapter 797 of Statutes 1980 was enacted as urgency legislation effective July 28, 1980, and that at that time it was already "locked into" providing special education services to more than 13 percent of its students in accordance with prior state law and funding formulae.³

Handicapped Act has now been renamed the Individuals with Disabilities Education Act. (Pub.L. No. 101-476, tit. IX, § 901(b)(21) (Oct. 30, 1990) 104 Stat. 1143; Pub.L. No. 101-476, tit. IX, § 901b; Pub.L. No. 102-119, § 25(b) (Oct. 7, 1991) 105 Stat. 607.) Since at all times relevant here the federal act was known as the Education of the Handicapped Act, we will adhere to that nomenclature.

³ The 1980 legislation required that a local agency adopt an annual

[***15] [**554] The Riverside claim, like Santa Barbara's, evolved over time with increases in the amount of reimbursement sought. Eventually the Board of [*1576] Control denied Riverside's claim for the same reasons the Santa Barbara claim was denied. Riverside sought review by petition for a writ of administrative mandate. In its decision the superior court accepted the board's conclusions that the Education of the Handicapped Act constitutes a federal mandate and that state requirements exceed those of the federal mandate. However, the court disagreed with the board that any appropriation in the state act necessarily satisfies the state's subvention obligation. The court concluded that the Board of Control had failed to consider whether the state had fully reimbursed local districts for the state-mandated costs which were in excess of the federal mandate, and the matter was remanded for consideration of that question. That judgment was not appealed.

On return to the Board of Control, the Santa Barbara claim and the Riverside claim were consolidated. The Board of Control adopted a decision holding that all special education costs under Statutes 1977, chapter 1247, and Statutes 1980, chapter [***16] 797, are state-mandated costs subject to subvention. The board reasoned that the federal Education of the Handicapped Act

budget plan for special education services. (Ed. Code, § 56200.) Education Code section 56760 provided that in the local budget plan the ratio of students to be served should not exceed 10 percent of total enrollment. However, those proportions could be waived for undue hardship by the Superintendent of Public Instruction. (Ed. Code, § 56760, 56761.) In addition, the 1980 legislation included provisions for a gradual transition to the new requirements. (Ed. Code, § 56195 et seq.) The transitional provisions included a guarantee of state funding for 1980-1981 at prior student levels with an inflationary adjustment of 9 percent. (Ed. Code, § 56195.8.) The record indicates that Riverside applied for a waiver of the requirements of Education Code section 56760, but that the waiver request was denied due to a shortage of state funding. It also appears that Riverside did not receive all of the 109 percent funding guarantee under Education Code section 56195.8. In light of the current posture of this appeal we need not and do not consider whether the failure of the state to appropriate sufficient funds to satisfy its obligations under the 1980 legislation can be addressed in a proceeding for the reimbursement of state-mandated costs or must be addressed in some other manner.

is a discretionary program and that section 504 of the Rehabilitation Act does not require school districts to implement any programs in response to federal law, and therefore special education programs are optional in the absence of a state mandate.

The claimants were directed to draft, and the Board of Control adopted, parameters and guidelines for reimbursement of special education costs. The board submitted a report to the Legislature estimating that the total statewide cost of reimbursement for the 1980-1981 through 1985-1986 fiscal years would be in excess of \$ 2 billion. Riverside's claim for reimbursement for the 1980-1981 fiscal year was now in excess of \$ 7 million. Proposed legislation which would have appropriated funds for reimbursement of special education costs during the 1980-1981 through 1985-1986 fiscal years failed to pass in the Legislature. (Sen. Bill No. 1082 (1985-1986 Reg. Sess.)) A separate bill which would have appropriated funds to reimburse Riverside [*1577] for its 1980-1981 claim also failed to pass. (Sen. Bill No. 238 [***17] (1987-1988 Reg. Sess.))

At this point Huff, as Director of the Department of Finance, brought an action in administrative mandate seeking to set aside the decision of the Board of Control. Riverside cross-petitioned for a writ of mandate directing the state, the Controller and the Treasurer to issue a warrant in payment of its claim for the 1980-1981 fiscal year.

The superior court concluded that the Board of Control did not apply the appropriate standard in determining whether any portion of local special education costs are incurred pursuant to a federal mandate. The court found that the definition of a federal mandate set forth by the *Supreme Court in City of Sacramento v. State of California, supra, 50 Cal.3d 51*, "marked a departure from the narrower 'no discretion' test" of this court's earlier decision in *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182 [203 Cal.Rptr. 258]. It further found that the standard set forth in the high court's

decision in *City of Sacramento* "is to be applied retroactively." Accordingly, the superior court issued a [***18] peremptory writ of mandate directing the Commission on State Mandates to set aside [***555] the decision of the Board of Control, to reconsider the claims in light of the decision in *City of Sacramento v. State of California, supra, 50 Cal.3d 51*, and "to ascertain whether certain costs arising from Chapter 797/80 and Chapter 1247/77 are federally mandated, and if so, the extent, if any, to which the state-mandated costs exceed the federal mandate." Riverside's cross-petition for a writ of mandate was denied. This appeal followed.

III. PRINCIPLES OF SUBVENTION

CA(1)[↑] (1) "Subvention" generally means a grant of financial aid or assistance, or a subsidy. (See Webster's Third New Internat. Dict. (1971) p. 2281.) As used in connection with state-mandated costs, the basic legal requirements of subvention can be easily stated; it is in the application of the rule that difficulties arise.

HN1[↑] Essentially, the constitutional rule of state subvention provides that the state is required to pay for any new governmental programs, or for higher levels of service under existing programs, that it imposes upon local governmental agencies. (*County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56 [233 Cal.Rptr. 38, 729 P.2d 202].) [***19] This does not mean that the state is required to reimburse local agencies for any incidental cost that may result from the enactment of a state law; rather, the subvention requirement is restricted to governmental services which the local agency is required by [*1578] state law to provide to its residents. (*City of Sacramento v. State of California, supra, 50 Cal.3d at p. 70.*) The subvention requirement is intended to prevent the state from transferring the costs of government from itself to local agencies. (*Id.* at p. 68.) Reimbursement is required when the state "freely chooses to impose on local agencies *any* peculiarly 'governmental' cost which they were not previously required to absorb." (*Id.* at p. 70, italics in original.)

The requirement of subvention for state-mandated costs had its genesis in the "Property Tax Relief Act of 1972" which is also known as "SB 90" (Senate Bill No. 90). (*City of Sacramento v. State of California, supra*, 156 Cal.App.3d at p. 188.) That act established limitations upon the power of local governments to levy taxes and concomitantly prevented [***20] the state from imposing the cost of new programs or higher levels of service upon local governments. (*Ibid.*) The Legislature declared: "It is the intent in establishing the tax rate limits in this chapter to establish limits that will be flexible enough to allow local governments to continue to provide existing programs, that will be firm enough to insure that the property tax relief provided by the Legislature will be long lasting and that will afford the voters in each local government jurisdiction a more active role in the fiscal affairs of such jurisdictions." (Rev. & Tax. Code, former § 2162, Stats. 1972, ch. 1406, § 14.7, p. 2961.)⁴ The act provided that the state would pay each county, city and county, city, and special district the sums which were sufficient to cover the total cost of new state-mandated costs. (See Rev. & Tax. Code, former § 2164.3, Stats. 1972, ch. 1406, § 14.7, pp. 2962-2963.) New state-mandated costs would arise from legislative action or executive regulation after January 1, 1973, which mandated a new program or higher level of service under an existing mandated program. (*Ibid.*)

[***21] CA(2)[↑] (2) [**556] (See fn. 5.) Senate Bill No. 90 did not specifically include school districts in the group of agencies entitled to

⁴In addition to requiring subventions for new state programs and higher levels of service, Senate Bill No. 90 required the state to reimburse local governments for revenues lost by the repeal or reduction of property taxes on certain classes of property. In this connection the Legislature said: "It is the purpose of this part to provide property tax relief to the citizens of this state, as undue reliance on the property tax to finance various functions of government has resulted in serious detriment to one segment of the taxpaying public. The subventions from the State General Fund required under this part will serve to partially equalize tax burdens among all citizens, and the state as a whole will benefit." (*Gov. Code*, § 16101, Stats. 1972, ch. 1406, § 5, p. 2953.)

reimbursement for state-mandated costs.⁵ [***23] (Rev. & Tax. Code, former § 2164.3, Stats. 1972, ch. 1406, § 14.7, pp. 2962-2963.) In fact, at that time methods of financing education in this state were [**1579] undergoing fundamental reformation as the result of the litigation in *Serrano v. Priest* (1971) 5 Cal.3d 584 [96 Cal.Rptr. 601, 487 P.2d 1241, 41 A.L.R.3d 1187]. At the time of the *Serrano* decision local property taxes were the primary source of school revenue. (*Id.* at p. 592.) In *Serrano*, the California Supreme Court held that education is a fundamental interest, that wealth is a suspect classification, and that an educational system which produces disparities of opportunity based upon district wealth would violate principles of equal protection. (*Id.* at pp. 614-615, 619.) A major portion of Senate Bill No. 90 constituted new formulae for state and local contributions to education in a legislative response to the decision in *Serrano*. (Stats. 1972, ch. 1406, § 1.5-2.74, pp. 2931-2953. See *Serrano v. Priest* (1976) 18 Cal.3d 728, 736- 737 [135 Cal.Rptr. 345, 557 P.2d 929].) [***22]⁶

⁵A school district's relationship to the state is different from that of local governmental entities such as cities, counties, and special districts. Education and the operation of the public school system are matters of statewide rather than local or municipal concern. (*California Teachers Assn. v. Huff* (1992) 5 Cal.App.4th 1513, 1524 [7 Cal.Rptr.2d 699].) Local school districts are agencies of the state and have been described as quasi-municipal corporations. (*Ibid.*) They are not distinct and independent bodies politic. (*Ibid.*) The Legislature's power over the public school system has been described as exclusive, plenary, absolute, entire, and comprehensive, subject only to constitutional constraints. (*Ibid.*) The Legislature has the power to create, abolish, divide, merge, or alter the boundaries of school districts. (*Id.* at p. 1525.) The state is the beneficial owner of all school properties and local districts hold title as trustee for the state. (*Ibid.*) School moneys belong to the state and the apportionment of funds to a school district does not give the district a proprietary interest in the funds. (*Ibid.*) While the Legislature has chosen to encourage local responsibility for control of public education through local school districts, that is a matter of legislative choice rather than constitutional compulsion and the authority that the Legislature has given to local districts remains subject to the ultimate and nondelegable responsibility of the Legislature. (*Id.* at pp. 1523-1524.)

⁶After the first *Serrano* decision, the United States Supreme Court held that equal protection does not require dollar-for-dollar equality

[**24] The provisions of Senate Bill No. 90 were amended and refined in legislation enacted the following year. (Stats. 1973, ch. 358.) Revenue and Taxation Code section 2231, subdivision (a), was enacted to require the state to reimburse local agencies, including school districts, for the full costs of new programs or increased levels of service mandated by the Legislature after January 1, 1973. Local agencies except school districts were also entitled to reimbursement for costs mandated by executive regulation after January 1, 1973. (Rev. & Tax. Code, § 2231, subd. (d), added by Stats. 1973, ch. 358, § 3, p. 783 [*1580] and repealed by Stats. 1986, ch. 879, § 23, p. 3045.) In subsequent years legislation was enacted to entitle school districts to subvention for state-mandated costs imposed by legislative acts after January 1, 1973, or by executive regulation after January 1, 1978. (Rev. & Tax. Code, former § 2207.5, added by Stats. 1977, ch. 1135, § 5, p. 3646 and amended by Stats. 1980, ch. 1256, § 5, pp. 4248-4249.)

[**557] In the 1973 legislation, Revenue and Taxation Code section 2271 was enacted to provide, among other things: "A local agency may levy, or have levied on its behalf, [**25] a rate in addition to the maximum property tax rate established pursuant to this chapter (commencing with Section 2201) to pay costs mandated by the federal government or costs mandated by the courts

between school districts. (*San Antonio School District v. Rodriguez* (1973) 411 U.S. 1, 33-34 48-56, 61-62 [36 L.Ed.2d 16, 42-43, 51-56, 59-60, 93 S.Ct. 1278].) In the second *Serrano* decision, the California Supreme Court adhered to the first *Serrano* decision on independent state grounds. (*Serrano v. Priest, supra*, 18 Cal.3d at pp. 761-766.) The court concluded that Senate Bill No. 90 and Assembly Bill No. 1267, enacted the following year (Stats. 1973, ch. 208, p. 529 et seq.), did not satisfy equal protection principles. (*Serrano v. Priest, supra*, 18 Cal.3d at pp. 776-777.) Additional complications in educational financing arose as the result of the enactment of article XIII A of the California Constitution at the June 1978 Primary Election (Proposition 13), which limited the taxes which can be imposed on real property and forced the state to assume greater responsibility for financing education (see Ed. Code, § 41060), and the enactment of Propositions 98 and 111 in 1988 and 1990, respectively, which provide formulae for minimum state funding for education. (See generally *California Teachers Assn. v. Huff, supra*, 5 Cal.App.4th 1513.)

or costs mandated by initiative enactment, which are not funded by federal or state government." CA(3)[↑] (3) In this respect costs mandated by the federal government are exempt from an agency's taxing and spending limits. (*City of Sacramento v. State of California, supra*, 50 Cal.3d at p. 71, fn. 17.)

At the November 6, 1979, General Election, the voters added article XIII B to the state Constitution by enacting Proposition 4. That article imposes spending limits on the state and all local governments. For purposes of article XIII B the term "local government" includes school districts. (Cal. Const., art. XIII B, § 8, subd. (d).) The measure accomplishes its purpose by limiting a governmental entity's annual appropriations to the prior year's appropriations limit adjusted for changes in the cost of living and population growth, except as otherwise provided in the article. (Cal. Const., art. XIII B, § 1.)⁷ The appropriations subject [**26] to limitation do not include, among other things: "Appropriations required to comply with mandates of the courts or the federal government which, without discretion, require an expenditure for additional services or which unavoidably make the provision of existing services more costly." (Cal. Const., art. XIII B, § 9, subd. (b).)

Like its statutory predecessor, the constitutional initiative measure includes a provision [**27] designed "to preclude the state from shifting to local agencies the financial responsibility for providing public services in view of these restrictions on the taxing and spending power of the local entities." (*Lucia Mar Unified School Dist. v.*

⁷As it was originally enacted, article XIII B required that all governmental entities return revenues in excess of their appropriations limits to the taxpayers through tax rate or fee schedule revisions. In Proposition 98, adopted at the November 1988 General Election, article XIII B was amended to provide that half of state excess revenues would be transferred to the state school fund for the support of school districts and community college districts. (See Cal. Const., art. XVI, § 8.5; *California Teachers Assn. v. Huff, supra*, 5 Cal.App.4th 1513.)

Honig (1988) 44 Cal.3d 830, 835-836 [244 Cal.Rptr. 677, 750 P.2d 318].) Section 6 of article XIII B of the state Constitution provides: "Whenever the Legislature or any State agency mandates a new program or higher level of service on any local government, the [*1581] State shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [P] (a) Legislative mandates requested by the local agency affected; [P] (b) Legislation defining a new crime or changing an existing definition of a crime; or [P] (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975."

Although article XIII B of the state Constitution [***28] requires subvention for state mandates enacted after January 1, 1975, the article had an effective date of July 1, 1980. (Cal. Const., art. XIII B, § 10.) CA(4)[↑] (4) Accordingly, under the constitutional provision, a local agency may seek subvention for costs imposed by legislation after January 1, 1975, but reimbursement is limited to costs incurred after July 1, 1980. (*City of Sacramento v. State of California, supra*, 156 Cal.App.3d at pp. 190-193.) Reimbursement for costs incurred before July 1, 1980, must be obtained, if at all, under controlling statutory law. (See 68 Ops.Cal.Atty.Gen. 244 (1985).)

The constitutional subvention provision, like the statutory scheme before it, requires state reimbursement whenever "the Legislature or any State agency" mandates a new program or higher level of service. (Cal. Const., art. XIII B, § 6.) Accordingly, it has been held that state [**558] subvention is not required when the federal government imposes new costs on local governments. (*City of Sacramento v. State of California, supra*, 156 Cal.App.3d at p. 188; see also *Carmel Valley Fire Protection Dist. v. State of*

California (1987) 190 Cal.App.3d 521, 543 [234 Cal.Rptr. 795].) [***29] In our *City of Sacramento* decision this court held that a federal program in which the state participates is not a federal mandate, regardless of the incentives for participation, unless the program leaves state or local government with no discretion as to alternatives. (156 Cal.App.3d at p. 198.)

In its *City of Sacramento* opinion,⁸ the California Supreme Court rejected this court's earlier formulation. In doing so the high court noted that the vast bulk of cost-producing federal influence on state and local government is by inducement or incentive rather than direct compulsion. (50 Cal.3d at p. 73.) However, "certain regulatory standards imposed by the federal government [*1582] under 'cooperative federalism' schemes are coercive on the states and localities in every practical sense." (*Id.* at pp. 73-74.) The test for determining whether there is a federal mandate is whether compliance with federal standards "is a matter of true choice," that is, whether participation in the federal program "is truly voluntary." (*Id.* at p. 76.) The court went on to say: "Given the variety [***30] of cooperative federal-state-local programs, we here attempt no final test for 'mandatory' versus 'optional' compliance with federal law. A determination in each case must depend on such factors as the nature and purpose of the federal program; whether its design suggests an intent to coerce; when state and/or local participation began; the penalties, if any, assessed for withdrawal or refusal to participate or comply; and any other legal and practical consequences of nonparticipation, noncompliance, or withdrawal." (*Ibid.*)

⁸The Supreme Court's decision in *City of Sacramento* was not a result of direct review of this court's decision. The Supreme Court denied a petition for review of this court's *City of Sacramento* decision. After the Board of Control had adopted parameters and guidelines for reimbursement under this court's decision, the Legislature failed to appropriate the funds necessary for such reimbursement. The litigation which resulted in the Supreme Court's *City of Sacramento* decision was commenced as an action to enforce the result on remand from this court's *City of Sacramento* decision. (See 50 Cal.3d at p. 60.)

[***31] IV. SPECIAL EDUCATION

The issues in this case cannot be resolved by consideration of a particular federal act in isolation. Rather, reference must be made to the historical and legal setting of which the particular act is a part. Our consideration begins in the early 1970's.

In considering the 1975 amendments to the Education of the Handicapped Act, Congress referred to a series of "landmark court cases" emanating from 36 jurisdictions which had established the right to an equal educational opportunity for handicapped children. (See Smith v. Robinson (1984) 468 U.S. 992, 1010 [82 L.Ed.2d 746, 763, 104 S.Ct. 3457].) Two federal district court cases, Pennsylvania Ass'n, Ret'd Child. v. Commonwealth of Pa. (E.D.Pa. 1972) 343 F.Supp. 279 (see also Pennsylvania Ass'n, Retard. Child. v. Commonwealth of Pa. (E.D.Pa. 1971) 334 F.Supp. 1257), and Mills v. Board of Education of District of Columbia (D.D.C. 1972) 348 F.Supp. 866, were the most prominent of these judicial decisions. (See Hendrick Hudson Dist. Bd. of Ed. v. Rowley (1982) 458 U.S. 176, 180, fn. 2 [73 L.Ed.2d 690, 695, 102 S.Ct. 3034].) [***32]

In the Pennsylvania case, an association and the parents of certain retarded children brought a class action against the commonwealth and local school districts in the commonwealth, challenging the exclusion of retarded children from programs of education and training in the public schools. (Pennsylvania Ass'n, Ret'd Child. v. Commonwealth of Pa., *supra*, 343 F.Supp. at p. 282.) The matter was assigned to a three-judge panel which heard evidence on the plaintiffs' due process and equal protection claims. (*Id.* at p. 285.) The parties [**559] then agreed to resolve the litigation by means of a consent [*1583] judgment. (*Ibid.*) The consent agreement required the defendants to locate and evaluate all children in need of special education services, to reevaluate placement decisions periodically, and to accord due process hearings to parents who are dissatisfied with

placement decisions. (*Id.* at pp. 303-306.) It required the defendants to provide "a free public program of education and training appropriate to the child's capacity." (*Id.* at p. 285, italics deleted.)

In view of the consent agreement the district court was not required to resolve the plaintiffs' equal [***33] protection and due process contentions. Rather, it was sufficient for the court to find that the suit was not collusive and that the plaintiffs' claims were colorable. The court found: "Far from an indication of collusion, however, the Commonwealth's willingness to settle this dispute reflects an intelligent response to overwhelming evidence against [its] position." (Pennsylvania Ass'n, Ret'd Child. v. Commonwealth of Pa., *supra*, 343 F.Supp. at p. 291.) The court said that it was convinced the due process and equal protection claims were colorable. (*Id.* at pp. 295-296.)

In the *Mills* case, an action was brought on behalf of a number of school-age children with exceptional needs who were excluded from the Washington, D.C., public school system. (Mills v. Board of Education of District of Columbia, *supra*, 348 F.Supp. at p. 868.) The district court concluded that equal protection entitled the children to a public-supported education appropriate to their needs and that due process required a hearing with respect to classification decisions. (*Id.* at pp. 874-875.) The court said: "If sufficient funds are not available to finance [***34] all of the services and programs that are needed and desirable in the system then the available funds must be expended equitably in such manner that no child is entirely excluded from a publicly supported education consistent with his needs and ability to benefit therefrom. The inadequacies of the District of Columbia Public School System whether occasioned by insufficient funding or administrative inefficiency, certainly cannot be permitted to bear more heavily on the 'exceptional' or handicapped child than on the normal child." (*Id.* at p. 876.)

In the usual course of events, the development of

principles of equal protection and due process as applied to special education, which had just commenced in the early 1970's with the authorities represented by the *Pennsylvania* and *Mills* cases, would have been fully expounded through appellate processes. However, the necessity of judicial development was truncated by congressional action. In the Rehabilitation Act of 1973, section 504, Congress provided: "No otherwise qualified handicapped individual in the United States, as defined in section 706(7) [now 706(8)] of this title, [*1584] shall, solely by reason of his handicap, [***35] be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance" (29 U.S.C. § 794, Pub.L. No. 93- 112, tit. V, § 504 (Sept. 26, 1973) 87 Stat. 394.)⁹ Since federal assistance to education is pervasive (see, e.g., Ed. Code, § 12000- 12405, 49540 et seq., 92140 et seq.), section 504 was applicable to virtually all public educational programs in this and other states.

[***36] The Department of Health, Education and Welfare (HEW) promulgated regulations to ensure compliance with section 504 [**560] by educational agencies.¹⁰ The regulations required

⁹In section 119 of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Act of 1978, the application of section 504 was extended to federal executive agencies and the United States Postal Service. (Pub.L. No. 95-602, tit. I, § 119 (Nov. 6, 1978) 92 Stat. 2982.) The section is now subdivided and includes subdivision (b), which provides that the section applies to all of the operations of a state or local governmental agency, including local educational agencies, if the agency is extended federal funding for any part of its operations. (29 U.S.C. § 794.) This latter amendment was in response to judicial decisions which had limited the application of section 504 to the particular activity for which federal funding is received. (See *Consolidated Rail Corporation v. Darrone* (1984) 465 U.S. 624, 635-636 [79 L.Ed.2d 568, 577-578, 104 S.Ct. 1248].)

¹⁰HEW was later dissolved and its responsibilities are now shared by the federal Department of Education and the Department of Health and Human Services. The promulgation of regulations to enforce section 504 had a somewhat checkered history. Initially HEW determined that Congress did not intend to require it to promulgate regulations. The Senate Public Welfare Committee then declared that regulations were intended. By executive order and by judicial decree in *Cherry v. Mathews* (D.D.C. 1976) 419 F.Supp. 922, HEW was

local educational agencies to locate and evaluate handicapped children in order to provide appropriate educational opportunities and to provide administrative hearing procedures in order to resolve disputes. The federal courts concluded that section 504 was essentially a codification of the equal protection rights of citizens with disabilities. (See *Halderman v. Pennhurst State School & Hospital* (E.D.Pa. 1978) 446 F.Supp. 1295, 1323.) Courts also held that section 504 embraced a private cause of action to enforce its requirements. (*Sherry v. New York State Ed. Dept.* (W.D.N.Y. 1979) 479 F.Supp. 1328, 1334; *Doe v. Marshall* (S.D.Tex. 1978) 459 F.Supp. 1190, 1192.) It was further held that section 504 imposed upon school districts and other public educational agencies "the duty of analyzing individually the needs of each handicapped student and devising a program which will enable each individual handicapped student to receive [***37] an appropriate, free public education. The failure to perform this analysis and structure a program suited to the needs of each handicapped child, constitutes discrimination against that child and a failure to provide an appropriate, free [*1585] public education for the handicapped child." (*Doe v. Marshall, supra*, 459 F.Supp. at p. 1191. See also *David H. v. Spring Branch Independent School Dist.* (S.D.Tex. 1983) 569 F.Supp. 1324, 1334; *Halderman v. Pennhurst State School & Hospital, supra*, 446 F.Supp. at p. 1323.)

[***38] CA(5)[7] (5) Throughout these proceedings Riverside, relying upon the decision in *Southeastern Community College v. Davis, supra*, 442 U.S. 397 [60 L.Ed.2d 980], has contended that section 504 cannot be considered a federal mandate because it does not obligate local school districts to take any action to accommodate the needs of handicapped children so long as they are not

required to promulgate regulations. The ensuing regulations were embodied in title 45 Code of Federal Regulations part 84, and are now located in title 34 Code of Federal Regulations part 104. (See *Southeastern Community College v. Davis* (1979) 442 U.S. 397, 404, fn. 4 [60 L.Ed.2d 980, 987, 99 S.Ct. 2361]; *N. M. Ass'n for Retarded Citizens v. State of N. M.* (10th Cir. 1982) 678 F.2d 847, 852.)

excluded from school. That assertion is not correct.

In the *Southeastern Community College* case a prospective student with a serious hearing disability sought to be admitted to a postsecondary educational program to be trained as a registered nurse. As a result of her disability the student could not have completed the academic requirements of the program and could not have attended patients without full-time personal supervision. She sought to require the school to waive the academic requirements, including an essential clinical program, which she could not complete and to otherwise provide full-time personal supervision. That demand, the Supreme Court held, was beyond the scope of section 504, which did not require the school to modify its program affirmatively [***39] and substantially. (442 U.S. at pp. 409-410 [60 L.Ed.2d at pp. 990-991].)

The *Southeastern Community College* decision is inapposite. States typically do not guarantee their citizens that they will be admitted to, and allowed to complete, specialized postsecondary educational programs. State educational institutions often impose stringent admittance and completion requirements for such programs in higher education. In the *Southeastern Community College* case the Supreme Court simply held that an institution of higher education need not lower or effect substantial modifications of its standards in order to accommodate a handicapped person. (442 U.S. at p. 413 [60 L.Ed.2d at pp. 992-993].) The court did not hold that a primary or secondary [**561] educational agency need do nothing to accommodate the needs of handicapped children. (See *Alexander v. Choate* (1985) 469 U.S. 287, 301 [83 L.Ed.2d 661, 672, 105 S.Ct. 712].)

HN2 [↑] States typically do purport to guarantee all of their children the opportunity for a basic [***40] education. In fact, in this state basic education is regarded as a fundamental right. (*Serrano v. Priest, supra*, 18 Cal.3d at pp. 765-766.) All basic educational programs are essentially affirmative action activities in the sense that

educational agencies are required to evaluate and accommodate [*1586] the educational needs of the children in their districts. Section 504 would not appear to permit local agencies to accommodate the educational needs of some children while ignoring the needs of others due to their handicapped condition. (Compare *Lau v. Nichols* (1974) 414 U.S. 563 [39 L.Ed.2d 1, 94 S.Ct. 786], which required the San Francisco Unified School District to take affirmative steps to accommodate the needs of non-English speaking students under section 601 of the Civil Rights Act of 1964.)

Riverside's view of section 504 is inconsistent with congressional intent in enacting it. The congressional record makes it clear that section 504 was perceived to be necessary not to combat affirmative animus but to cure society's benign neglect of the handicapped. [***41] The record is replete with references to discrimination in the form of the denial of special educational assistance to handicapped children. In *Alexander v. Choate, supra*, 469 U.S. at pages 295 to 297 [83 L.Ed.2d at pages 668- 669], the Supreme Court took note of these comments in concluding that a violation of section 504 need not be proven by evidence of purposeful or intentional discrimination. With respect to the *Southeastern Community College v. Davis, supra*, 442 U.S. 397 case, the high court said: "The balance struck in *Davis* requires that an otherwise qualified handicapped individual must be provided with meaningful access to the benefit that the grantee offers. The benefit itself, of course, cannot be defined in a way that effectively denies otherwise qualified handicapped individuals the meaningful access to which they are entitled; to assure meaningful access, reasonable accommodations in the grantee's program or benefit may have to be made. ..." (*Alexander v. Choate, supra*, 469 U.S. at p. 301 [83 L.Ed.2d at p. 672], [***42] fn. omitted.)

Federal appellate courts have rejected the argument that the *Southeastern Community College* case means that pursuant to section 504 local educational agencies need do nothing affirmative to

accommodate the needs of handicapped children. (*N. M. Ass'n for Retarded Citizens v. State of N. M.*, *supra*, 678 F.2d at pp. 852-853; *Tatro v. State of Texas* (5th Cir. 1980) 625 F.2d 557, 564 [63 A.L.R. Fed. 844].)¹¹ We are satisfied that section 504 does impose an obligation upon local school districts to accommodate the needs of handicapped children. However, as was the case with constitutional principles, full judicial development of section 504 as it relates to special education in elementary and secondary school districts was truncated by congressional action.

[***43] [*1587] In 1974 Congress became dissatisfied with the progress under earlier efforts to stimulate the states to accommodate the educational needs of handicapped children. (*Hendrick Hudson Dist. Bd. of Ed. v. Rowley*, *supra*, 458 U.S. at p. 180 [73 L.Ed.2d at p. 695].) These earlier efforts had included a 1966 amendment to the Elementary and Secondary Education Act of 1965, and the 1970 version of the Education of the Handicapped Act. (*Ibid.*) The prior acts had been grant programs that did not contain specific guidelines for a state's use of grant funds. (*Ibid.*) In 1974 Congress greatly increased federal funding for education of the handicapped and simultaneously required recipient [**562] states to adopt a goal of providing full educational opportunities to all handicapped children. ([73 L.Ed.2d at pp. 695-696].) The following year Congress amended the Education of the Handicapped Act by enacting the Education for All Handicapped Children Act of 1975. ([73 L.Ed.2d at p. 696].)

HN3[↑] Since the 1975 amendment, the Education [***44] of the Handicapped Act has required recipient states to demonstrate a policy

¹¹ Following a remand and another decision by the Court of Appeals, the *Tatro* litigation, *supra*, eventually wound up in the Supreme Court. (*Irving Independent School Dist. v. Tatro* (1984) 468 U.S. 883 [82 L.Ed.2d 664, 104 S.Ct. 3371].) However, by that time the Education of the Handicapped Act had replaced section 504 as the means for vindicating the education rights of handicapped children and the litigation was resolved, favorably for the child, under that act.

that assures all handicapped children the right to a free appropriate education. (20 U.S.C. § 1412(1).) **CA(6)**[↑] (6) The act is not merely a funding statute; rather, it establishes an enforceable substantive right to a free appropriate public education in recipient states. (*Smith v. Robinson*, *supra*, 468 U.S. at p. 1010 [82 L.Ed.2d at p. 764].) To accomplish this purpose the act incorporates the major substantive and procedural requirements of the "right to education" cases which were so prominent in the congressional consideration of the measure. (*Hendrick Hudson Dist. Bd. of Ed. v. Rowley*, *supra*, 458 U.S. at p. 194 [73 L.Ed.2d at p. 704].) The substantive requirements of the act have been interpreted in a manner which is "strikingly similar" to the requirements of section 504 of the Rehabilitation Act of 1973. (*Smith v. Robinson*, *supra*, 468 U.S. at pp. 1016-1017 [82 L.Ed.2d at p. 768].) The Supreme [***45] Court has noted that Congress intended the act to establish "a basic floor of opportunity that would bring into compliance all school districts with the constitutional right to equal protection with respect to handicapped children." (*Hendrick Hudson Dist. Bd. of Ed. v. Rowley*, *supra*, 458 U.S. at p. 200 [73 L.Ed.2d at p. 708] citing the House of Representatives Report.)¹²

It is demonstrably manifest that in the view of Congress the substantive requirements of the 1975 amendment to the Education of the Handicapped Act were commensurate with the [***46] constitutional obligations of state and local [**1588] educational agencies. Congress found that "State and local educational agencies have a responsibility to provide education for all handicapped children, but present financial resources are inadequate to meet the special educational needs of handicapped children;" and "it

¹² Consistent with its "basic floor of opportunity" purpose, the act does not require local agencies to maximize the potential of each handicapped child commensurate with the opportunity provided nonhandicapped children. Rather, the act requires that handicapped children be accorded meaningful access to a free public education, which means access that is sufficient to confer some educational benefit. (*Ibid.*)

is in the national interest that the Federal Government assist State and local efforts to provide programs to meet the educational needs of handicapped children in order to assure equal protection of the law." (20 U.S.C. former § 1400(b)(8) & (9).)¹³

[***47] It is also apparent that Congress intended the act to achieve nationwide application: "It is the purpose of this chapter to assure that all handicapped children have available to them, within the time periods specified in section 1412(2)(B) of this title, a free appropriate public education which emphasizes special education and related services designed to meet their unique needs, to assure that the rights of handicapped children and their parents or guardians are protected, to assist States and localities to provide for the education of all handicapped children, and to assess and assure the effectiveness of efforts to educate handicapped children." (20 U.S.C. former § 1400(c).)

[**563] In order to gain state and local acceptance of its substantive provisions, the Education of the Handicapped Act employs a "cooperative federalism" scheme, which has also been referred to as the "carrot and stick" approach. (See City of Sacramento v. State of California, supra, 50 Cal.3d at pp. 73-74; City of Sacramento v. State of California, supra, 156 Cal.App.3d at p. 195.) [***48] As an incentive Congress made substantial federal financial assistance available to states and local educational agencies that would agree to adhere to the substantive and procedural

terms of the act. (20 U.S.C. § 1411, 1412.) For example, the administrative record indicates that for fiscal year 1979- 1980, the base year for Santa Barbara's claim, California received \$ 71.2 million in federal assistance, and during fiscal year 1980-1981, the base year for Riverside's claim, California received \$ 79.7 million. We cannot say that such assistance on an ongoing basis is trivial or insubstantial.

Contrary to Riverside's argument, HN4[↑] federal financial assistance was not the only incentive for a state to comply with the Education of the Handicapped Act. CA(7)[↑] (7) Congress intended the act to serve as a means by which state and [*1589] local educational agencies could fulfill their obligations under the equal protection and due process provisions of the Constitution and under section 504 of the Rehabilitation Act of 1973. Accordingly, where it is applicable the act supersedes claims under the Civil Rights Act (42 U.S.C. § 1983) [***49] and section 504 of the Rehabilitation Act of 1973, and the administrative remedies provided by the act constitute the exclusive remedy of handicapped children and their parents or other representatives. (Smith v. Robinson, supra, 468 U.S. at pp. 1009, 1013, 1019 [82 L.Ed.2d at pp. 763, 766, 769].)¹⁴

HN5[↑] As a result of the exclusive nature of the Education of the Handicapped [***50] Act, dissatisfied parties in recipient states must exhaust their administrative remedies under the act before resorting to judicial intervention. (Smith v. Robinson, supra, 468 U.S. at p. 1011 [82 L.Ed.2d at p. 764].) This gives local agencies the first opportunity and the primary authority to determine appropriate placement and to resolve disputes.

¹³ That Congress intended to enforce the Fourteenth Amendment to the United States Constitution in enacting the Education of the Handicapped Act has since been made clear. In Dellmuth v. Muth (1989) 491 U.S. 223 at pages 231232 [105 L.Ed.2d 181, 189-191, 109 S.Ct. 2397], and the court noted that Congress has the power under section 5 of the Fourteenth Amendment to abrogate a state's Eleventh Amendment immunity from suit in federal court, but concluded that the Education of the Handicapped Act did not clearly evince such a congressional intent. In 1990 Congress responded by expressly abrogating state sovereign immunity under the act. (20 U.S.C. § 1403.)

¹⁴ In Smith v. Robinson, supra, the court concluded that since the Education of the Handicapped Act did not include a provision for attorney fees, a successful complainant was not entitled to an award of such fees even though such fees would have been available in litigation under section 504 of the Rehabilitation Act of 1973 or section 1983 of the Civil Rights Act. Congress reacted by adding a provision for attorney fees to the Education of the Handicapped Act. (20 U.S.C. § 1415(e)(4)(B).)

(*Ibid.*) If a party is dissatisfied with the final result of the administrative process then he or she is entitled to seek judicial review in a state or federal court. (20 U.S.C. § 1415(e)(2).) In such a proceeding the court independently reviews the evidence but its role is restricted to that of review of the local decision and the court is not free to substitute its view of sound educational policy for that of the local authority. (*Hendrick Hudson Dist. Bd. of Ed. v. Rowley, supra*, 458 U.S. at pp. 206-207 [73 L.Ed.2d at p. 712].) And since the act provides the exclusive remedy for addressing a handicapped child's right to an appropriate education, where the act applies a party [***51] cannot pursue a cause of action for constitutional violations, either directly or under the Civil Rights Act (42 U.S.C. § 1983), nor can a party proceed under section 504 of the Rehabilitation Act of 1973. (*Smith v. Robinson, supra*, 468 U.S. at pp. 1013, 1020 [82 L.Ed.2d at pp. 766, 770].)

Congress's intention to give the Education of the Handicapped Act nationwide application was successful. By the time of the decision in *Hendrick Hudson Dist. Bd. of Ed. v. Rowley, supra*, all states except New Mexico had become recipients under the act. (458 U.S. at pp. 183-184 [73 L.Ed.2d at p. 698].) It is important at this point in our discussion to consider the experience of New Mexico, both because the Board of Control relied upon that state's failure to adopt the Education [**564] of the Handicapped Act as proof that the act is not federally mandated, and because it illustrates the consequences of a failure to adopt the act. [*1590]

In *N. M. Ass'n for Retarded Citizens v. State of N. M.* (D.N.M. 1980) 495 F.Supp. 391, [***52] a class action was brought against New Mexico and its local school districts based upon the alleged failure to provide a free appropriate public education to handicapped children. The plaintiffs' causes of action asserting constitutional violations were severed and stayed pending resolution of the federal statutory causes of action. (*Id.* at p. 393.) The district court concluded that the plaintiffs could not proceed with claims under the Education of the

Handicapped Act because the state had not adopted that act and, without more, that was a governmental decision within the state's power. (*Id.* at p. 394.)¹⁵ The court then considered the cause of action under section 504 and found that both the state and its local school districts were in violation of that section by failing to provide a free appropriate education to handicapped children within their territories. (495 F.Supp. at pp. 398-399.)

[***53] After the district court entered an injunctive order designed to compel compliance with section 504, the matter was appealed. (*N. M. Ass'n for Retarded Citizens v. State of N. M., supra*, 678 F.2d 847.) The court of appeals rejected the defendants' arguments that the plaintiffs were required to exhaust state administrative remedies before bringing their action and that the district court should have applied the doctrine of primary jurisdiction to defer ruling until the Office of Civil Rights could complete its investigation into the charges. (*Id.* at pp. 850-851.) The court also rejected the defendants' arguments that section 504 does not require them to take action to accommodate the needs of handicapped children and that proof of disparate treatment is essential to a violation of section 504. (678 F.2d at p. 854.) The court found sufficient evidence in the record to establish discrimination against handicapped children within the meaning of section 504. (678 F.2d at p. 854.) However, the reviewing court concluded that the district court had applied an erroneous standard in reaching its decision, [***54] and the matter was remanded for further proceedings. (*Id.* at p. 855.)

On July 19, 1984, during the proceedings before the Board of Control, a representative of the Department of Education testified that New Mexico has since implemented a program of special education under the Education of the Handicapped

¹⁵ The plaintiffs alleged that the failure of the state to apply for federal funds under the Education of the Handicapped Act was itself an act of discrimination. The district court did not express a view on that question, leaving it for resolution in connection with the constitutional causes of action. (*Ibid.*)

Act. We have no doubt that after the litigation we have just recounted New Mexico saw the handwriting on the wall and realized that it could either establish a program of special education with federal financial assistance under the Education of the Handicapped Act, or be compelled through litigation to accommodate the educational needs of handicapped [*1591] children without federal assistance and at the risk of losing other forms of federal financial aid. In any event, with the capitulation of New Mexico the Education of the Handicapped Act achieved the nationwide application intended by Congress. (20 U.S.C. § 1400(c).)

California's experience with special education in the time period leading up to the adoption of the Education of the Handicapped Act is examined as a case study in Kirp et al., *Legal Reform of Special Education: Empirical* [*55] *Studies and Procedural Proposals* (1974) 62 Cal.L.Rev. 40, at pages 96 through 115. As this study reflects, during this period the state and local school districts were struggling to create a program to accommodate adequately the educational needs of the handicapped. (*Id.* at pp. 97-110.) Individuals and organized groups, such as the California Association for the Retarded and the California Association for Neurologically Handicapped Children, were exerting pressure through political and other means at every level of the educational system. (*Ibid.*) Litigation was becoming so prevalent [*565] that the authors noted: "Fear of litigation over classification practices, prompted by the increasing number of lawsuits, is pervasive in California." (*Id.* at p. 106, fn. 295.)¹⁶

¹⁶Lawsuits primarily fell into three types: (1) Challenges to the adequacy or even lack of available programs and services to accommodate handicapped children. (*Id.* at p. 97, fns. 255, 257.) (2) Challenges to classification practices in general, such as an overtendency to classify minority or disadvantaged children as "retarded." (*Id.* at p. 98, fns. 259, 260.) (3) Challenges to individual classification decisions. (*Id.* at p. 106.) In the absence of administrative procedures for resolving classification disputes, dissatisfied parents were relegated to self-help remedies, such as pestering school authorities, or litigation. (*Ibid.*)

[**56] In the early 1970's the state Department of Education began working with local school officials and university experts to design a "California Master Plan for Special Education." (Kirp et al., *Legal Reform of Special Education: Empirical Studies and Procedural Proposals*, *supra*, 62 Cal.L.Rev. at p. 111.) In 1974 the Legislature enacted legislation to give the Superintendent of Public Instruction the authority to implement and administer a pilot program pursuant to a master plan adopted by State Board of Education in order to determine whether services under such a plan would better meet the needs of children with exceptional needs. (Stats. 1974, ch. 1532, § 1, p. 3441, enacting Ed. Code, § 7001.) In 1977 the Legislature acted to further implement the master plan. (Stats. 1977, ch. 1247, especially § 10, pp. 4236-4237, enacting Ed. Code, § 56301.) In 1980 the Legislature enacted urgency legislation revising our special education laws with the express intent of complying with the 1975 amendments to the Education of the Handicapped Act. (Stats. 1980, ch. 797, especially § 9, pp. 2411-2412, enacting Ed. Code, § 56000.)

As this history demonstrates, in determining whether to [*57] adopt the requirements of the Education of the Handicapped Act as amended in 1975, our [*1592] Legislature was faced with the following circumstances: (1) In the *Serrano* litigation, our Supreme Court had declared basic education to be a fundamental right and, without even considering special education in the equation, had found our educational system to be violative of equal protection principles. (2) Judicial decisions from other jurisdictions had established that handicapped children have an equal protection right to a free public education appropriate to their needs and due process rights with regard to placement decisions. (3) Congress had enacted section 504 of the Rehabilitation Act of 1973 to codify the equal protection rights of handicapped children in any school system that receives federal financial assistance and to threaten the state and local districts with the loss of all federal funds for failure to accommodate the needs of such children. (4)

Parents and organized groups representing handicapped children were becoming increasingly litigious in their efforts to secure an appropriate education for handicapped children. (5) In enacting the 1975 amendments to [***58] the Education of the Handicapped Act, Congress did not intend to require state and local educational agencies to do anything more than the Constitution already required of them. The act was intended to provide a means by which educational agencies could fulfill their constitutional responsibilities and to provide substantial federal financial assistance for states that would agree to do so.

CA(8a)[↑] (8a) Under these circumstances we have no doubt that enactment of the 1975 amendments to the Education of the Handicapped Act constituted a federal mandate under the criteria set forth in *City of Sacramento v. State of California, supra*, 50 Cal.3d at page 76. The remaining question is whether the state's participation in the federal program was a matter of "true choice" or was "truly voluntary." The alternatives were to participate in the federal program and obtain federal financial assistance and the procedural protections accorded by the act, or to decline to participate and face a barrage of litigation with no real defense and ultimately be compelled to accommodate the educational needs of handicapped children in any event. We conclude [***59] that so far [**566] as the state is concerned the Education of the Handicapped Act constitutes a federal mandate.

V. SUBVENTION FOR SPECIAL EDUCATION

Our conclusion that the Education of the Handicapped Act is a federal mandate with respect to the state marks the starting point rather than the end of the consideration which will be required to resolve the Santa Barbara and Riverside test claims. In *City of Sacramento v. State of California, supra*, 50 Cal.3d at pages 66 through 70, the California Supreme Court concluded that the costs at issue in that case (unemployment insurance premiums) were not subject to state subvention because they were incidental to a law of general [*1593]

application rather than a new governmental program or increased level of service under an existing program. The court addressed the federal mandate issue solely with respect to the question whether the costs were exempt from the local government's taxing and spending limitations. (*Id.* at pp. 70-71.) It observed that prior authorities had assumed that if a cost was federally mandated it could not be a state mandated cost subject to subvention, and [***60] said: "We here express no view on the question whether 'federal' and 'state' mandates are mutually exclusive for purposes of state subvention, but leave that issue for another day. ..." (*Id.* at p. 71, fn. 16.) The test claims of Santa Barbara and Riverside present that question which we address here for the guidance of the Commission on remand.

CA(9)[↑] (9) The constitutional subvention provision and the statutory provisions which preceded it do not expressly say that the state is not required to provide a subvention for costs imposed by a federal mandate. Rather, that conclusion follows from the plain language of the subvention provisions **HN6[↑]** themselves. The constitutional provision requires state subvention when "the Legislature or any State agency mandates a new program or higher level of service" on local agencies. (Cal. Const., art. XIII B, § 6.) Likewise, the earlier statutory provisions required subvention for new programs or higher levels of service mandated by legislative act or executive regulation. (See Rev. & Tax. Code, former § 2164.3 [Stats. 1972, ch. 1406, § 14.7, pp. 2962- 2963], 2231 [Stats. 1973, ch. 358, § 3, pp. 783-784], 2207 [Stat. 1975, ch. 486, § 1.8, pp. 997-998], 2207.5 [***61] [Stats. 1977, ch. 1135, § 5, pp. 3646-3647].) When the federal government imposes costs on local agencies those costs are not mandated by the state and thus would not require a state subvention. Instead, such costs are exempt from local agencies' taxing and spending limitations. This should be true even though the state has adopted an implementing statute or regulation pursuant to the federal mandate so long as the state had no "true choice" in the manner of implementation of the federal

mandate. (See *City of Sacramento v. State of California, supra*, 50 Cal.3d at p. 76.)

This reasoning would not hold true where the manner of implementation of the federal program was left to the true discretion of the state. A central purpose of the principle of state subvention is to prevent the state from shifting the cost of government from itself to local agencies. (*City of Sacramento v. State of California, supra*, 50 Cal.3d at p. 68.) Nothing in the statutory or constitutional subvention provisions would suggest that the state is free to shift state costs to local agencies [***62] without subvention merely because those costs were imposed upon the state by the federal government. In our view the determination whether certain costs were imposed upon a local agency by a federal mandate must focus upon the local agency which [*1594] is ultimately forced to bear the costs and how those costs came to be imposed upon that agency. If the state freely chose to impose the costs upon the local agency as a means of implementing a federal program then the costs are the result of a reimbursable state mandate regardless whether the costs were imposed [**567] upon the state by the federal government.

The Education of the Handicapped Act is a comprehensive measure designed to provide all handicapped children with basic educational opportunities. While the act includes certain substantive and procedural requirements which must be included in a state's plan for implementation of the act, it leaves primary responsibility for implementation to the state. (20 U.S.C. § 1412, 1413.) CA(8b)[↑] (8b) In short, even though the state had no real choice in deciding whether to comply with the federal act, the act did not necessarily require the state to impose all of [***63] the costs of implementation upon local school districts. To the extent the state implemented the act by freely choosing to impose new programs or higher levels of service upon local school districts, the costs of such programs or higher levels of service are state mandated and subject to subvention.

We can illustrate this point with a hypothetical situation. Subvention principles are intended to prevent the state from shifting the cost of state governmental services to local agencies and thus subvention is required where the state imposes the cost of such services upon local agencies even if the state continues to perform the services. (*Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal.3d at pp. 835-836.) The Education of the Handicapped Act requires the state to provide an impartial, state-level review of the administrative decisions of local or intermediate educational agencies. (20 U.S.C. § 1415(c), (d).) Obviously, the state could not shift the actual performance of these new administrative reviews to local districts, but it could attempt to shift the costs to local districts [***64] by requiring local districts to pay the expenses of reviews in which they are involved. An attempt to do so would trigger subvention requirements. In such a hypothetical case, the state could not avoid its subvention responsibility by pleading "federal mandate" because the federal statute does not require the state to impose the costs of such hearings upon local agencies. Thus, as far as the local agency is concerned, the burden is imposed by a state rather than a federal mandate.

In the administrative proceedings the Board of Control did not address the "federal mandate" question under the appropriate standard and with proper focus on local school districts. In its initial determination the board concluded that the Education of the Handicapped Act constituted a federal mandate and that the state-imposed costs on local school districts in excess of the federally imposed costs. However, the board did not consider the [*1595] extent of the state-mandated costs because it concluded that any appropriation by the state satisfied its obligation. On Riverside's petition for a writ of administrative mandate the superior court remanded to the Board of Control to consider whether [***65] the state appropriation was sufficient to reimburse local school districts fully for the state-mandated costs. On remand the board clearly applied the now-discredited criteria set forth in this court's decision in *City of*

Sacramento v. State of California, supra, 156 Cal.App.3d 182, and concluded that the Education of the Handicapped Act is not a federal mandate at any level of government. Under these circumstances we agree with the trial court that the matter must be remanded to the Commission for consideration in light of the criteria set forth in the Supreme Court's *City of Sacramento* decision. We add that on remand the Commission must focus upon the costs incurred by local school districts and whether those costs were imposed *on local districts* by federal mandate or by the state's voluntary choice in its implementation of the federal program.

VI. RIVERSIDE'S OBJECTIONS

In light of this discussion we may now consider Riverside's objections to the trial court's decision to remand the matter to the Commission for reconsideration.

Riverside asserts that the California Supreme Court opinion in *City of Sacramento* is not [***66] on point because the court did not address the federal mandate question with respect to state subvention principles. Riverside implies that the definition of a federal mandate may be different [**568] with respect to state subvention than with respect to taxing and spending limitations. HN7[☞] CA(10)[☞] (10) As a general rule and unless the context clearly requires otherwise, we must assume that the meaning of a term or phrase is consistent throughout the entire act or constitutional article of which it is a part. (*Lungren v. Davis* (1991) 234 Cal.App.3d 806, 823 [285 Cal.Rptr. 777].) CA(11)[☞] (11) Subvention principles are part of a more comprehensive political scheme. The basic purpose of the scheme as a whole was to limit the taxing and spending powers of government. The taxing and spending powers of local agencies were to be "frozen" at existing levels with adjustments only for inflation and population growth. Since local agencies are subject to having costs imposed upon them by other governmental entities, the scheme provides relief in that event. If the costs are imposed by the federal government or the courts, then the costs are not included in the local

government's [***67] taxing and spending limitations. If the costs are imposed by the state then the state must provide a subvention to reimburse the local agency. Nothing in this scheme suggests that the concept of a federal mandate should have different meanings depending upon whether one is considering subvention or taxing and spending limitations. Accordingly, we reject the claim that the criteria set forth in [*1596] the Supreme Court's *City of Sacramento* decision do not apply when subvention is the issue.

CA(12)[☞] (12) Riverside asserts that the trial court erred in concluding that the Board of Control did not consider the issues under the appropriate criteria and that the board did in fact consider the factors set forth in the Supreme Court's *City of Sacramento* decision. From our discussion above it is clear that we must reject these assertions. In its decision the board relied upon the "cooperative federalism" nature of the Education of the Handicapped Act without any consideration whether the act left the state any actual choice in the matter. In support of its conclusion the board relied upon the New Mexico litigation which we have also discussed. However, as we have pointed out, under [***68] the criteria set forth in the Supreme Court's *City of Sacramento* decision, the New Mexico litigation does not support the board's decision but in fact strongly supports a contrary result. We are satisfied that the trial court correctly concluded that the board did not apply the appropriate criteria in reaching its decision.

Riverside asserts that the Supreme Court's *City of Sacramento* decision elucidated and enforced prior law and thus no question of retroactivity arises. (See *Donaldson v. Superior Court* (1983) 35 Cal.3d 24, 37 [196 Cal.Rptr. 704, 672 P.2d 110].) CA(13)[☞] (13) We agree that in *City of Sacramento* the Supreme Court elucidated and enforced existing law. Under such circumstances the rule of retrospective operation controls. (See also *Wellenkamp v. Bank of America* (1978) 21 Cal.3d 943, 953- 954 [148 Cal.Rptr. 379, 582 P.2d 970]; *County of Los Angeles v. Faus* (1957) 48

Cal.2d 672, 680-681 [312 P.2d 680].) Pursuant to that rule the trial court correctly applied the *City of Sacramento* decision to the [***69] litigation pending before it. As we have seen, that decision supports the trial court's determination to remand the matter to the Commission for reconsideration.

Davis, J., and Scotland, J., concurred. The petition of plaintiff and respondent for review by the Supreme Court was denied April 1, 1993. Lucas, C.J., Kennard, J., and Arabian, J., were of the opinion that the petition should be granted.

End of Document

Riverside asserts that if further consideration under the criteria of the Supreme Court's *City of Sacramento* decision is necessary then the trial court should have, and this court must, engage in such consideration to reach a final conclusion on the question. To a limited extent we agree. In our previous discussion we have concluded that under the criteria set forth in *City of Sacramento*, the Education of the Handicapped Act constitutes a federal mandate as far as the state is concerned. We are satisfied that is the only conclusion which may be drawn and we so hold as a matter of law. However, that conclusion does not resolve the question whether new special education costs were imposed upon local school districts by federal mandate or by state choice in the implementation of the federal program. The issues were not addressed by the parties or the Board of Control in this light. The [*1597] Commission on State Mandates is the entity with the responsibility for considering the issues in [**569] the first instance [***70] and which has the expertise to do so. We agree with the trial court that it is appropriate to remand the matter to the Commission for reconsideration in light of the appropriate criteria which we have set forth in this appeal.

In view of the result we have reached we need not and do not consider whether it would be appropriate otherwise to fashion some judicial remedy to avoid the rule, based upon the separation of powers doctrine, that a court cannot compel the State Controller to make a disbursement in the absence of an appropriation. (See *Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at pp. 538- 541.)

DISPOSITION

The judgment is affirmed.

Howard Jarvis Taxpayers Ass'n v. City of Salinas

Case Summary

Procedural Posture

Plaintiff taxpayers filed a complaint under Cal. Code Civ. Proc. § 863 to determine the validity of a

storm drainage fee imposed by defendant city. The Monterey County Superior Court (California) ruled that the fee did not violate Cal. Const. art. XIID, § 6. The taxpayers appealed.

Overview

The city adopted ordinances and a resolution imposing a storm water management utility fee that was imposed on the owners of every developed parcel of land within the city. The storm drainage fee was to be used not just to provide drainage service to property owners, but to monitor and control pollutants that might enter the storm water before it was discharged into natural bodies of water. The appellate court found that: (1) Cal. Const. art. XIID, § 6, required the city to subject the proposed storm drainage fee to a vote by the property owners or the voting residents of the affected area because the fee was not exempt as a water service; and (2) the trial court therefore erred in ruling that Salinas, Cal., Ordinance 2350, 2351, and Salinas, Cal., Resolution 17019 were valid exercises of authority by the city council.

Outcome

The judgment of the superior court was reversed.

A "property-related service" is a public service having a direct relationship to property ownership. Cal. Const. art. XIID, § 2(h).

Tax Law > State & Local Taxes > Real
Property Taxes > General Overview

HN5 State & Local Taxes, Real Property Taxes

Salinas, Cal., Resolution 17019 plainly establishes a property-related fee for a property-related service, the management of storm water runoff from the "impervious" areas of each parcel in the city. The resolution expressly states that each owner and occupier of a developed lot or parcel of real property within the city, is served by the city's storm drainage facilities and burdens the system to a greater extent than if the property were undeveloped. Those owners and occupiers of developed property should therefore pay for the improvement, operation and maintenance of such facilities. Accordingly, the resolution makes the fee applicable to each and every developed parcel of land within the city.

The exception in Cal. Const. art. XIII D, § 6(c), applies to fees for sewer, water, and refuse collection services.

Governments > Legislation > Interpretation

HN9 [↓] **Legislation, Interpretation**

The popular, nontechnical sense of sewer service, particularly when placed next to "water" and "refuse collection" services, suggests the service familiar to most households and businesses, the sanitary sewerage system.

Governments > Legislation > Interpretation

Tax Law > State & Local Taxes > Real
Property Taxes > General Overview

HN10 [↓] **Legislation, Interpretation**

Exceptions to a general rule of an enactment must be strictly construed, thereby giving "sewer services" its narrower, more common meaning applicable to sanitary sewerage.

Governments > Legislation > Interpretation

HN11 [↓] **Legislation, Interpretation**

Cal. Gov't Code § 53750 is enacted to explain some of the terms used in Cal. Const. art. XIIC, XIII D, and defines "water" as "any system of public improvements intended to provide for the production, storage, supply, treatment, or distribution of water." The average voter would envision "water service" as the supply of water for personal, household, and commercial use, not a system or program that monitors storm water for pollutants, carries it away, and discharges it into the nearby creeks, river, and ocean.

Headnotes/Syllabus

Summary

**CALIFORNIA OFFICIAL REPORTS
SUMMARY**

A taxpayers association filed an action against a city alleging that a storm drainage fee, which was imposed by the city for the management of storm water runoff from the impervious areas of each parcel in the city, was a property-related fee that required voter approval under Prop. 218 (Cal. Const., art. XIII D, § 6, subd. (c)). The trial court entered judgment for the city, finding that the fee was not property related and that it was exempt from the voter-approval requirement because it was related to sewer and water services. (Superior Court of Monterey County, No. M45873, Richard M. Silver, Judge.)

The Court of Appeal reversed. The court held that the fee was property related and subject to the voter approval requirement. The resolution made the fee applicable to each and every developed parcel of land within the city. It was not a charge directly based on or measured by use so as to be exempt from the voter requirement. A proportional reduction clause did not alter the nature of the fee as property-related. (Opinion by Elia, J., with Premo, Acting P. J., and Mihara, J., concurring.)

Drains and Sewers § 3 > Fees and
Assessments > Storm Drain Fee > Application of
Voter Approval Requirement for Property-related
Fees: Property Taxes § 7.8 > Special Taxes.

--A storm water management fee resolution established a property-related fee for a property-

related service, the management of storm water runoff from the impervious areas of each parcel in the city, and thus required voter approval under Prop. 218 (Cal. Const., art. XIII D, § 6, subd. (c)). The resolution made the fee applicable to each and every developed parcel of land within the city. It was not a charge directly based on or measured by use, comparable to the metered use of water or the operation of a business, so as to be exempt from the voter requirement. A proportional reduction clause did not alter the nature of the fee as property related. The fee did not come within the exception related to sewer and water services. Giving the constitutional provision the required liberal construction, and applying the principle that exceptions to a general rule of an enactment must be strictly construed, "sewer services" must be given its narrower, more common meaning applicable to sanitary sewerage, thus excluding storm drainage. Also, the average voter would envision "water service" as the supply of water for personal, household, and commercial use, not a system or program that monitors storm water for pollutants and discharges it.

Constitutional Law § 12 > Construction > Ordinary Language > Amendments.

--Courts are obligated to construe constitutional amendments in accordance with the natural and ordinary meaning of the language used by the framers in a manner that effectuates their purpose in adopting the law.

Counsel: Timothy J. Morgan; Jonathan M. Coupal and Timothy A. Bittle for Plaintiffs and Appellants.

James C. Sanchez, City Attorney; Richards, Watson & Gershon, Mitchell E. Abbott and Patrick K. Bobko for Defendants and Respondents.

Judges: Opinion by Elia, J., with Premo, Acting P.

J., and Mihara, J., concurring.

Opinion by: Elia

Opinion

[*1352] [**229] **ELIA, J.**

In this "reverse validation" action, plaintiff taxpayers challenged a storm drainage fee imposed by the City of Salinas. Plaintiffs contended that the fee was a "property-related" fee requiring voter approval, pursuant to California Constitution, article XIII D, section 6, subdivision (c), which was added by the passage of Proposition 218. The trial court ruled that the fee did not violate this provision because (1) it was not a property-related fee [*1353] and (2) it met the exemption [***2] for fees for sewer and water services. We disagree with the trial court's conclusion and therefore reverse the order.

BACKGROUND

In an effort to comply with the 1987 amendments to the federal Clean Water Act (*33 U.S.C. § 1251 et seq.*; *40 C.F.R. § 122.26(a) et seq. (2001)*), the Salinas City Council took measures to reduce or eliminate pollutants contained in storm water, which was channeled in a drainage system separate from the sanitary and industrial waste systems. On June 1, 1999, the city council enacted two ordinances to fund and maintain the compliance program. These measures, ordinance Nos. 2350 and 2351, added former chapters 29 and 29A, respectively, to the Salinas City Code. Former section 29A-3 allowed the city council to adopt a resolution imposing a "Storm Water Management Utility fee" to finance the improvement of storm and surface water management facilities. The fee would be imposed on "users of the storm water drainage system."

On July 20, 1999, the city council adopted resolution No. 17019, which established rates for the storm and surface water management system.

The resolution specifically states: "There is hereby imposed on each [***3] and every developed parcel of land within the City, and the owners and occupiers thereof, jointly and severally, a storm drainage fee." The fee was to be paid annually to the City "by the owner or occupier of each and every developed parcel in the City who shall be presumed to be the primary utility rate payer" The amount of the fee was to be calculated according to the degree to which the property contributed runoff to the City's drainage facilities. That contribution, in turn, would be measured by the amount of "impervious area" ¹ on that parcel.

[***4] [**230] Undeveloped parcels--those that had not been altered from their natural state--were not subject to the storm drainage fee. In addition, developed parcels that maintained their own storm water management facilities or only partially contributed storm or surface water to the City's storm drainage facilities were required to pay in proportion to the amount they did contribute runoff or used the City's treatment services.

[*1354] On September 15, 1999, plaintiffs filed a complaint under *Code of Civil Procedure section 863* to determine the validity of the fee. ² Plaintiffs alleged that this was a property-related fee that violated article XIII D, section 6, subdivision (c), of the California Constitution because it had not been approved by a majority vote of the affected property owners or a two-thirds vote of the residents in the affected area. The trial court, however, found this provision to be inapplicable on two grounds: (1) the fee was not "property related"

¹ "Impervious Area," according to resolution No. 17019, is "any part of any developed parcel of land that has been modified by the action of persons to reduce the land's natural ability to absorb and hold rainfall. This includes any hard surface area which either prevents or retards the entry of water into the soil mantle as it entered under natural conditions pre-existent to development, and/or a hard surface area which causes water to run off the surface in greater quantities or at an increased rate of flow from the flow present under natural conditions pre-existent to development."

² Plaintiffs are the Howard Jarvis Taxpayers Association, the Monterey Peninsula Taxpayers Association, and two resident property owners.

and (2) it was exempt from the voter-approval requirement because it was "related to" sewer and water services.

[***5] DISCUSSION

Article XIII D was added to the California Constitution in the November 1996 election with the passage of Proposition 218, the Right to Vote on Taxes Act. Section 6 of article XIII D ³ HN1 [↑] requires notice of a proposed property-related fee or charge and a public hearing. If a majority of the affected owners submit written protests, the fee may not be imposed. (§ 6, subd. (a)(2).) The provision at issue is section 6, subdivision (c) (hereafter section 6(c)), HN2 [↑] which states, in relevant part: "Except for fees or charges for sewer, water, and refuse collection services, no property-related fee or charge shall be imposed or increased unless and until that fee or charge is submitted and approved by a majority vote of the property owners of the property subject to the fee or charge or, at the option of the agency, by a two-thirds vote of the electorate residing in the affected area."

HN3 [↑] Section 2 [***6] defines a "fee" under this article as a levy imposed "upon a parcel or upon a person as an incident of property ownership, including a user fee or charge for a property-related service." (§ 2, subd. (e).) HN4 [↑] A "property-related service" is "a public service having a direct relationship to property ownership." (§ 2, subd. (h).) CA(1a) [↑] (1a) The City maintains that the storm drainage fee is not a property-related fee, but a "user fee" which the property owner can avoid simply by maintaining a storm water management facility on the property. Because it is possible to own property without being subject to the fee, the City argues this is not a fee imposed "as an incident of property ownership" or "for a property-related service" within the meaning of section 2.

We cannot agree with the City's position. Resolution No. 17019 HN5 [↑] plainly established

³ All further unspecified section references are to article XIII D of the California Constitution.

a property-related fee for a property-related service, the management of storm water runoff from the "impervious" areas of each parcel in the [*1355] City. The resolution [**231] expressly stated that "each owner and occupier of a developed lot or parcel of real property within the City, is served by the City's storm drainage facilities" and burdens the [***7] system to a greater extent than if the property were undeveloped. Those owners and occupiers of developed property "should therefore pay for the improvement, operation and maintenance of such facilities." Accordingly, the resolution makes the fee applicable to "*each and every developed parcel* of land within the City." (Italics added.) This is not a charge directly based on or measured by use, comparable to the metered use of water or the operation of a business, as the City suggests. (See *Apartment Assn. of Los Angeles County, Inc. v. City of Los Angeles* (2001) 24 Cal. 4th 830, 838 [102 Cal. Rptr. 2d 719, 14 P.3d 930] [art. XIII D inapplicable to inspection fee imposed on private landlords; *Howard Jarvis Taxpayers Assn. v. City of Los Angeles* (2000) 85 Cal. App. 4th 79 [101 Cal. Rptr. 2d 905] [water usage rates are not within the scope of art. XIII D].)

The "Proportional Reduction" clause on which the City relies does not alter the nature of the fee as property related. ⁴ A property owner's operation of a private storm drain system reduces the amount owed to the City to the extent that runoff into the City's system is reduced. The fee [***8] nonetheless is a fee for a public service having a direct relationship to the ownership of developed property. The City's characterization of the proportional reduction as a simple "opt-out" arrangement is misleading, as it suggests the property owner can avoid the fee altogether by declining the service. Furthermore, the reduction is not proportional to the amount of services requested or used by the occupant, but on the physical properties of the parcel. Thus, a parcel with a large "impervious area" (driveway, patio,

roof) would be charged more than one consisting of mostly rain-absorbing soil. Single-family residences are assumed to contain, on average, a certain amount of impervious area and are charged \$ 18.66 based on that assumption.

Proposition 218 HN6[↑] specifically stated that "[t]he provisions of this act shall be liberally construed to effectuate its purposes of limiting local [***9] government revenue and enhancing taxpayer consent." (Prop. 218, § 5; reprinted at Historical Notes, 2A West's Ann. Cal.Const. (2002 supp.) foll. art. XIII C, p. 38 [hereafter Historical Notes].) CA(2)[↑] (2) HN7[↑] We are obligated to construe constitutional amendments in accordance with the natural and ordinary meaning of the language used by the framers--in this case, the voters of California--in a manner that effectuates their purpose in adopting the law. (*Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal. 3d 208, 244-245 [149 Cal. Rptr. 239, 583 P.2d 1281]; *Arden Carmichael, Inc. v. County of Sacramento* (2000) 93 Cal. App. 4th 507, 514-515 [113 Cal. Rptr. 2d 248]; *Board of Supervisors v. Lonergan* (1980) 27 Cal. 3d 855, 863 [167 P.3d 1356] Cal. Rptr. 820, 616 P.2d 802.) CA(1b)[↑] (1b) To interpret the storm drainage fee as a use-based charge would contravene one of the stated objectives of Proposition 218 by "frustrat[ing] the purposes of voter approval for tax increases." (Prop. 218, § 2.) We must conclude, therefore, that the storm drainage fee "burden[s] landowners as landowners," and is therefore subject [***10] to the voter-approval requirements of article XIII D unless an exception applies. (*Apartment Assn. of Los Angeles County, Inc. v. City of Los Angeles*, *supra*, 24 Cal. 4th at p. 842.)

[**232] **EXCEPTION FOR "SEWER" OR "WATER" SERVICE**

As an alternative ground for its decision, the trial court found that the storm drainage fee was "clearly a fee related to 'sewer' and 'water' services." HN8[↑] The exception in section 6(c) applies to fees

⁴According to the public works director, proportional reductions were not anticipated to apply to a large number of people.

"for sewer, water, and refuse collection services." Thus, the question we must next address is whether the storm drainage fee was a charge *for* sewer service or water service.

The parties diverge in their views as to whether the reach of California Constitution, article XIII D, section 6(c) extends to a storm drainage system as well as a sanitary or industrial waste sewer system. The City urges that we rely on the "commonly accepted" meaning of "sewer," noting the broad dictionary definition of this word.⁵ [***11] The City also points to Public Utilities Code section 230.5 and the Salinas City Code, which describe storm drains as a type of sewer.⁶

Plaintiffs "do not disagree that storm water is carried off in storm sewers," but they argue that we must look beyond mere definitions of "sewer" to examine the legal meaning in context. Plaintiffs note that the storm water management system here is distinct from the sanitary sewer system and the industrial waste management system. Plaintiffs' position echoes that of the [*1357] Attorney General, who observed that several California [***12] statutes differentiate between

⁵ Webster's Third New International Dictionary, for example, defines "sewer" as "1: a ditch or surface drain 2: an artificial usu. subterranean conduit to carry off water and waste matter (as surface water from rainfall, household waste from sinks or baths, or waste water from industrial works)." (Webster's 3d New Internat. Dict. (1993) p. 2081.) The American Heritage Dictionary also denotes the function of "carrying off sewage or rainwater." (American Heritage College Dict. (3d ed. 1997) p. 1248.) On the other hand, the Random House Dictionary of the English Language (2d ed. 1987) page 1754, does not mention storm or rainwater in defining "sewer" as "an artificial conduit, usually underground, for carrying off waste water and refuse, as in a town or city."

⁶ Public Utilities Code section 230.5 defines "Sewer system" to encompass all property connected with "sewage collection, treatment, or disposition for sanitary or drainage purposes, including . . . all drains, conduits, and outlets for surface or storm waters, and any and all other works, property or structures necessary or convenient for the collection or disposal of sewage, industrial waste, or surface or storm waters." Salinas City Code section 36-2, subdivision (31) defines "storm drain" as "a sewer which carries storm and surface waters and drainage, but which excludes sewage and industrial wastes other than runoff water."

management of storm drainage and sewerage systems.⁷ (81 Ops. Cal. Atty. Gen. 104, 106 (1998).) Relying extensively on the Attorney General's opinion, plaintiffs urge application of a different rule of construction than the plain-meaning rule; they invoke the maxim that "if a statute on a particular subject omits a particular provision, inclusion of that provision in another related statute indicates an intent [that] the provision is not applicable to the statute from which it was omitted." (In re Marquis D. (1995) 38 Cal. App. 4th 1813, 1827 [46 Cal. Rptr. 2d 198].) Thus, while section 5, which addresses assessment procedures, refers to exceptions specifically [**233] for "*sewers, water, flood control, [and] drainage systems*" (italics added), the exceptions listed in section 6(c) pertain only to "sewer, water, and refuse collection services." Consequently, in plaintiffs' view, the voters must have intended to exclude drainage systems from the list of exceptions to the voter-approval requirement.

[***13] The statutory construction principles invoked by both parties do not assist us. The maxim proffered by plaintiffs, "although useful at times, is no more than a rule of reasonable inference" and cannot control over the lawmakers' intent. (California Fed. Savings & Loan Assn. v. City of Los Angeles (1995) 11 Cal. 4th 342, 350 [45 Cal. Rptr. 2d 279, 902 P.2d 297]; Murillo v. Fleetwood Enterprises, Inc. (1998) 17 Cal. 4th 985, 991 [73 Cal. Rptr. 2d 682, 953 P.2d 858].) On the other hand, invoking the plain-meaning rule only begs the question of whether the term "sewer services" was intended to encompass the more specific

⁷ For example, Government Code section 63010 specifies "storm sewers" in delimiting the scope of "[d]rainage," while separately identifying the facilities and equipment used for "[s]ewage collection and treatment." (Gov. Code, § 63010, subd. (g)(3), (10).) Government Code section 53750, part of the Proposition 218 Omnibus Implementation Act, explains that for purposes of articles XIII C and article XIII D "[d]rainage system" means "any system of public improvements that is intended to provide for erosion control, landslide abatement, or for other types of water drainage." Health and Safety Code section 5471 sets forth government power to collect fees for "services and facilities . . . in connection with its water, sanitation, storm drainage, or sewerage system."

sewerage with which most voters would be expected to be familiar, or all types of systems that use sewers, including storm drainage and industrial waste. HN9[↑] The popular, nontechnical sense of sewer service, particularly when placed next to "water" and "refuse collection" services, suggests the service familiar to most households and businesses, the sanitary sewerage system.

We conclude that the term "sewer services" is ambiguous in the context of both section 6(c) and Proposition 218 as a whole. We must keep in mind, however, the voters' [***14] intent that the constitutional provision be construed liberally to curb the rise in "excessive" taxes, assessments, and fees exacted [*1358] by local governments without taxpayer consent. (Prop. 218, §§ 2, 5; reprinted at Historical Notes, *supra*, p. 38.) Accordingly, we are compelled to resort to the principle that HN10[↑] exceptions to a general rule of an enactment must be strictly construed, thereby giving "sewer services" its narrower, more common meaning applicable to sanitary sewerage.⁸ (Cf. Estate of Banerjee (1978) 21 Cal. 3d 527, 540 [147 Cal. Rptr. 157, 580 P.2d 657]; City of Lafayette v. East Bay Mun. Utility Dist. (1993) 16 Cal. App. 4th 1005 [20 Cal. Rptr. 2d 658].)

The City itself treats storm drainage differently [***15] from its other sewer systems. The stated purpose of ordinance No. 2350 was to comply with federal law by reducing the amount of pollutants discharged into the storm water, and by preventing the discharge of "non-storm water" into the storm drainage system, which channels storm water into state waterways. According to John Fair, the public works director, the City's storm drainage fee was to be used not just to provide drainage service to property owners, but to monitor and control pollutants that might enter the storm water before it is discharged into natural bodies of water.⁹ [***16] The Salinas City Code contains

⁸ Sanitary sewerage carries "putrescible waste" from residences and businesses and discharges it into the sanitary sewer line for treatment by the Monterey Regional Water Pollution Control Agency. (Salinas City Code, § 36-2, subd. (26).)

requirements [***234] addressed specifically to the management of storm water runoff.¹⁰ (See, e.g., Salinas City Code, §§ 31-802.2, 29-15.)

For similar reasons we cannot subscribe to the City's suggestion that the storm drainage fee is "for . . . water services." Government Code section 53750, HN11[↑] enacted to explain some of the terms used in articles XIII C and XIII D, defines "[w]ater" as "any system of public improvements intended to provide for the production, storage, supply, treatment, or distribution of water." (Gov. Code, § 53750, subd. (m).) The average voter would envision "water service" as the supply of water for personal, household, and commercial use, not a system or program that monitors storm water for pollutants, carries it away, and discharges it into the nearby creeks, river, and ocean.

We conclude that article XIII D required the City to subject the proposed storm drainage fee to a vote by the property owners or the voting residents of [***1359] the affected area. The trial court therefore [***17] erred in ruling that ordinance Nos. 2350 and 2351 and Resolution No. 17019 were valid exercises of authority by the city council.

DISPOSITION

The judgment is reversed. Costs on appeal are awarded to plaintiffs.

⁹ Resolution No. 17019 defined "Storm Drainage Facilities" as "the storm and surface water sewer drainage systems comprised [*sic*] of storm water control facilities and any other natural features [that] store, control, treat and/or convey surface and storm water. The Storm Drainage Facilities shall include all natural and man-made elements used to convey storm water from the first point of impact with the surface of the earth to a suitable receiving body of water or location internal or external to the boundaries of the City. . . ." The "storm drainage system" was defined to include pipes, culverts, streets and gutters, "storm water sewers," ditches, streams, and ponds. (See also Salinas City Code, former § 29-3, subd. (l) [defining "storm drainage system"].)

¹⁰ Storm water under ordinance No. 2350 includes "stormwater runoff, snowmelt runoff, and surface runoff and drainage." (Salinas City Code, former § 29-3, subd. (dd).)

Premo, Acting P. J., and Mihara, J., concurred.

A petition for a rehearing was denied July 2, 2002, and respondents' petition for review by the Supreme Court was denied August 28, 2002.

Case Summary

Overview

HOLDINGS: [1]-In a case in which plaintiffs

challenged a city's imposition of a 1 percent surcharge on an electric utility's gross receipts from the sale of electricity within the city, the Supreme Court held that to constitute a valid franchise fee under Proposition 218, the amount of the franchise fee must bear a reasonable relationship to the value of the property interests transferred; [2]-Liberally construed, the first amended complaint and the stipulated facts adequately alleged the basis for a claim that the surcharge bore no reasonable relationship to the value of the franchise, and was therefore a tax requiring voter approval under Proposition 218; accordingly, the trial court erred in granting judgment on the pleadings to the city; [3]-However, the facts on which plaintiffs relied in seeking summary adjudication did not establish their claim that the surcharge was a tax.

Outcome

Judgment of court of appeal affirmed in part and reversed in part; case remanded with directions.

HN2[↓] Local Governments, Finance

State voters have imposed various limitations upon the authority of state and local governments to impose taxes and fees. Proposition 13, which was adopted in 1978, set the assessed value of real property as the full cash value on the owner's 1975-1976 tax bill, limited increases in the assessed value to 2 percent per year unless there was a change in ownership, and limited the rate of taxation on real property to 1 percent of its assessed value. Cal. Const., art. XIII A, §§ 1, 2. In addition, to prevent tax savings related to real property from being offset by increases in state and local taxes, Proposition 13 required approval by two-thirds of the members of the legislature in order to increase state taxes, and required approval by two-thirds of the local electors of a city, county, or special district in order for such a local entity to impose special taxes. Cal. Const., art. XIII A, §§ 3, 4.

Governments > Local Governments > Finance

HN3[↓] Local Governments, Finance

The term "special taxes" in Cal. Const., art. XIII A, § 4, means taxes which are levied for a specific purpose. In addition, a "special tax" does not include any fee which does not exceed the reasonable cost of providing the service or regulatory activity for which the fee is charged and which is not levied for general revenue purposes. Gov. Code, § 50076.

Governments > Local Governments > Finance

HN4[↓] Local Governments, Finance

Proposition 62, which added a new article to the California Government Code, Gov. Code, §§ 53720-53730, requires that all new local taxes be approved by a vote of the local electorate.

Governments > Local Governments > Charters

Governments > Local Governments > Finance

HN5[↓] Local Governments, Charters

Proposition 218 amended the California Constitution to add voter approval requirements for general and special taxes, thereby binding charter jurisdictions. Cal. Const., art. XIII C, §§ 1, 2.

Evidence > Burdens of Proof > Allocation

Governments > Local Governments > Finance

Tax Law > State & Local Taxes > Real
Property Taxes > Assessment & Valuation

HN6[↓] Burdens of Proof, Allocation

Proposition 13 was not intended to limit traditional benefit assessments. It requires an agency proposing an assessment on property to determine the proportionate special benefit to be derived by each parcel subject to the assessment; to support the assessment with an engineer's report; to give written notice to each parcel owner of the amount of the proposed assessment and the basis of the calculation; and to provide each owner with a ballot to vote in favor of or against the proposed assessment. It also requires the agency to hold a public hearing, and bars imposition of the assessment if a majority of parcel owners within the assessment area submit ballots in opposition to the assessment, with each ballot weighted based on the proposed financial obligation of the affected parcel.

3 Cal. 5th 248, *248; 397 P.3d 210, **210; 219 Cal. Rptr. 3d 859, ***859; 2017 Cal. LEXIS 4769, ****1

In the event legal action is brought contesting an assessment, the agency has the burden to establish that the burdened properties receive a special benefit and the assessment is proportional to the benefits conferred. Cal. Const., art. XIII D, §§ 2, subd. (b).

Constitutional Law > State Constitutional Operation

Evidence > Burdens of Proof > Allocation

Governments > Local Governments > Finance

Tax Law > State & Local Taxes > Real Property Taxes > Assessment & Valuation

HN7[↓] Constitutional Law, State Constitutional Operation

Proposition 26 amended the California Constitution to provide that for purposes of article XIII C, which addresses voter approval of local taxes, "tax" means any levy, charge, or exaction of any kind imposed by a local government, Cal. Const., art. XIII C, § 1, subd. (e), except (1) a charge imposed for a specific benefit or privilege received only by those charged, which does not exceed its reasonable cost, (2) a charge for a specific government service or product provided directly to the payor and not provided to those not charged, which does not exceed its reasonable cost, (3) charges for reasonable regulatory costs related to the issuance of licenses, permits, investigations, inspections, and audits, and the enforcement of agricultural marketing orders, (4) charges for access to or use, purchase, rental, or lease of local government property, (5) fines for violations of law, (6) charges imposed as a condition of developing property, and (7) property-related assessments and fees as allowed under article XIII D. The local government bears the burden of establishing the exceptions. Cal. Const., art. XIII C, § 1, subd. (e).

Governments > Local Governments > Finance

Tax Law > State & Local Taxes > Real Property Taxes > Assessment & Valuation

HN8[↓] Local Governments, Finance

If an assessment for improvements provides a special benefit to the assessed properties, then the assessed property owners should pay for the benefit they receive. But if the assessment exceeds the actual cost of the improvement, the exaction is a tax and not an assessment. With respect to costs, Proposition 13's goal of providing effective property tax relief is promoted rather than subverted by shifting costs to those who generate the costs. However, if the charges exceed the reasonable cost of the activity on which they are based, the charges are levied for unrelated revenue purposes, and are therefore taxes.

Governments > Local Governments > Finance

HN9[↓] Local Governments, Finance

Restricting allowable fees to the reasonable cost or value of the activity with which the charges are associated serves Proposition 13's purpose of limiting taxes. If a state or local governmental agency were allowed to impose charges in excess of the special benefit received by the payor or the cost associated with the payor's activities, the imposition of fees would become a vehicle for generating revenue independent of the purpose of the fees. Therefore, to the extent charges exceed the rationale underlying the charges, they are taxes.

Governments > Public Improvements > Bridges & Roads

Governments > Local Governments > Finance

HN10[↓] Public Improvements, Bridges & Roads

A franchise to use public streets or rights-of-way is a form of property, and a franchise fee is the purchase price of the franchise. Historically, franchise fees have not been considered taxes. Nothing in Proposition 218 reflects an intent to change the historical characterization of franchise fees, or to limit the authority of government to sell or lease its property and spend the compensation received for whatever purposes it chooses. Cal. Const., arts. XIII A, § 3, subd. (b)(4), XIII C. This understanding that restrictions on taxation do not encompass amounts paid in exchange for property interests is confirmed by Proposition 26, the purpose of which was to reinforce the voter approval requirements set forth in Propositions 13 and 218. Although Proposition 26 strengthened restrictions on taxation by expansively defining "tax" as any levy, charge, or exaction of any kind imposed by a local government, Cal. Const., art. XIII C, § 1, subd. (e), it provided an exception for a charge imposed for entrance to or use of local government property, or the purchase, rental, or lease of local government property. Art. XIII C, § 1, subd. (e)(4).

Governments > Public Improvements > Bridges & Roads

Governments > Local Governments > Finance

HN11[↓] Public Improvements, Bridges & Roads

The Broughton Act's provision that a franchise fee be based on the receipts from the use, operation, or possession of the franchise results in a complicated calculation of franchise fees. Usually, some portion of a utility's rights-of-way are on private property or property outside the jurisdiction of the city or county granting the franchise, and the utility's gross receipts attributable to a particular franchise must be reduced in proportion to the utility's rights-of-way that are not within the franchise agreement. In addition, because gross receipts arise from all of a utility's operative property, such as equipment and

warehouses, the portion of gross receipts attributable to property other than the franchise must be excluded from the calculation of the franchise fee. Finally, if a utility also provides service under a constitutional franchise - for example, where it provides artificial light under a constitutional franchise in the same area in which it provides electricity under a franchise agreement entered pursuant to the Broughton Act - the franchise fee applies only to the gross receipts from the provision of services under the nonconstitutional franchise.

Energy & Utilities Law > Regulators > Public Utility Commissions > Authorities & Powers

Energy & Utilities Law > Utility Companies > Rates

HN12[↓] Public Utility Commissions, Authorities & Powers

The California Public Utilities Commission sets the rates of a publicly regulated utility to permit the utility to recover its costs and expenses in providing its service, and to receive a fair return on the value of the property it uses in providing its service. Among a utility's costs and expenses are government fees and taxes.

Energy & Utilities Law > Regulators > Public Utility Commissions > Authorities & Powers

Energy & Utilities Law > Utility Companies > Rates

HN13[↓] Public Utility Commissions, Authorities & Powers

The California Public Utilities Commission has established a procedure by which utilities may obtain approval to impose disproportionate charges on ratepayers within the jurisdiction that imposed the charges. When a local government imposes

taxes or fees which in the aggregate significantly exceed the average aggregate of taxes or fees imposed by the other local governmental entities within the public utility's service territory, a utility may file an advice letter seeking approval to charge local government fee surcharges. Such surcharges shall be included as a separate item or items to bills rendered to applicable customers. Each surcharge shall be identified as being derived from the local governmental entity responsible for it.

HN15[↓] Local Governments, Finance

The provisions of Proposition 218 shall be liberally construed to effectuate its purposes of limiting local government revenue and enhancing taxpayer consent.

Governments > Public Improvements > Bridges & Roads

Governments > Local Governments > Finance

HN16[↓] Public Improvements, Bridges & Roads

Sums paid for the right to use a jurisdiction's rights-of-way are fees rather than taxes. But to constitute compensation for the value received, the fees must reflect a reasonable estimate of the value of the franchise.

Governments > Local Governments > Finance

HN17[↓] Local Governments, Finance

In general, taxes are imposed for revenue purposes, rather than in return for a specific benefit conferred or privilege granted. In determining whether a charge is a tax or a fee, a court looks to whether the primary purpose of a charge was to generate revenue. In contrast, a fee paid for an interest in government property is compensation for the use or purchase of a government asset rather than compensation for a cost. Consequently, the revenue generated by the fee is available for whatever purposes the government chooses rather than tied to a public cost. The aspect of the transaction that distinguishes the charge from a tax is the receipt of value in exchange for the payment.

Governments > Local Governments > Finance

HN18[↓] Local Governments, Finance

A franchise fee must be based on the value of the franchise conveyed in order to come within the rationale for its imposition without approval of the voters. Its value may be based on bona fide negotiations concerning the property's value, as well as other indicia of worth. Consistent with the principles that govern other fees, to constitute a valid franchise fee under Proposition 218, the amount of the franchise fee must bear a reasonable relationship to the value of the property interests transferred.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil
 Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Judgments > Pretrial
 Judgments > Judgment on Pleadings

HN19[↓] Standards of Review, De Novo Review

A motion for judgment on the pleadings presents the question of whether the plaintiff's complaint states facts sufficient to constitute a cause of action against the defendant. The trial court generally considers only the allegations of the complaint, but may also consider matters that are subject to judicial notice. Moreover, the allegations must be liberally construed with a view to attaining substantial justice among the parties. The court's primary task is to determine whether the facts alleged provide the basis for a cause of action against defendants under any theory. An appellate court independently reviews a trial court's order on such a motion.

Headnotes/Summary

Summary

[*248] CALIFORNIA OFFICIAL REPORTS
 SUMMARY

Plaintiffs filed a class action complaint challenging a city's imposition of a 1 percent surcharge on an electric utility's gross receipts from the sale of electricity within the city. The utility transferred the revenues from the surcharge to the city. The city contended this separate charge was the fee paid by the utility for the privilege of using city property in connection with the delivery of electricity. The superior court granted the city's motion for judgment on the pleadings, concluding that the surcharge was not a tax and therefore was not subject to the voter approval requirements of Prop. 218. (Superior Court of Santa Barbara County, No. 1383959, Thomas Pearce Anderle, Judge.) The Court of Appeal, Second Dist., Div. Six, No.

B253474, reversed the trial court's judgment, holding that the surcharge was a tax, and therefore required approval under Prop. 218.

The Supreme Court affirmed the judgment of the Court of Appeal to the extent it reversed the trial court's grant of the city's motion for judgment on the pleadings, reversed the judgment to the extent the Court of Appeal directed the trial court to grant plaintiffs' motion for summary adjudication, and remanded the case with directions. The court held that to constitute a valid franchise fee under Prop. 218, the amount of the franchise fee must bear a reasonable relationship to the value of the property interests transferred. Liberally construed, the first amended complaint and the stipulated facts adequately alleged the basis for a claim that the surcharge bore no reasonable relationship to the value of the franchise, and was therefore a tax requiring voter approval under Prop. 218. Accordingly, the trial court erred in granting judgment on the pleadings to the city. However, the facts on which plaintiffs relied in seeking summary adjudication did not establish their claim that the surcharge was a tax. (Opinion by Cantil-Sakauye, C. J., with Werdegar, Corrigan, Liu, Cuéllar, and Krueger, JJ., concurring. Dissenting opinion by Chin, J. (see p. 274).)

CALIFORNIA OFFICIAL REPORTS
 HEADNOTES

CA(1)[↓] (1)

**Municipalities § 96—Franchise Fee—Tax—
 Reasonable Relationship—Value of Franchise.**

A charge imposed in exchange for franchise rights is a valid fee rather than a tax only if the amount of the charge is reasonably related to the value of the franchise.

CA(2)[↓] (2)

Taxation § 1—Constitutional Limitations—Voter Approval—Special Taxes.

State voters have imposed various limitations upon the authority of state and local governments to impose taxes and fees. Prop. 13, which was adopted in 1978, set the assessed value of real property as the full cash value on the owner's 1975–1976 tax bill, limited increases in the assessed value to 2 percent per year unless there was a change in ownership, and limited the rate of taxation on real property to 1 percent of its assessed value (Cal. Const., art. XIII A, §§ 1, 2). In addition, to prevent tax savings related to real property from being offset by increases in state and local taxes, Prop. 13 required approval by two-thirds of the members of the Legislature in order to increase state taxes, and required approval by two-thirds of the local electors of a city, county, or special district in order for such a local entity to impose special taxes (Cal. Const., art. XIII A, §§ 3, 4).

CA(3)[↓] (3)

Municipalities § 34—Fiscal Affairs—Special Taxes—Reasonable Cost.

The term “special taxes” in Cal. Const., art. XIII A, § 4, means taxes which are levied for a specific purpose. In addition, a “special tax” does not include any fee which does not exceed the reasonable cost of providing the service or regulatory activity for which the fee is charged and which is not levied for general revenue purposes (Gov. Code, § 50076).

CA(4)[↓] (4)

Municipalities § 34—Fiscal Affairs—New Taxes—Voter Approval.

Prop. 62 requires that all new local taxes be approved by a vote of the local electorate.

CA(5)[↓] (5)

Municipalities § 34—Fiscal Affairs—General and Special Taxes—Voter Approval—Charter Jurisdictions.

Prop. 218 amended the California Constitution to add voter approval requirements for general and special taxes, thereby binding charter jurisdictions (Cal. Const., art. XIII C, §§ 1, 2).

CA(6)[↓] (6)

Taxation § 1—Assessment on Property—Special Benefit.

Prop. 13 was not intended to limit traditional benefit assessments. It requires an agency proposing an assessment on property to determine the proportionate special benefit to be derived by each parcel subject to the [*250] assessment; to support the assessment with an engineer's report; to give written notice to each parcel owner of the amount of the proposed assessment and the basis of the calculation; and to provide each owner with a ballot to vote in favor of or against the proposed assessment. It also requires the agency to hold a public hearing, and bars imposition of the assessment if a majority of parcel owners within the assessment area submit ballots in opposition to the assessment, with each ballot weighted based on the proposed financial obligation of the affected parcel. In the event legal action is brought contesting an assessment, the agency has the burden to establish that the burdened properties receive a special benefit and the assessment is proportional to the benefits conferred (Cal. Const., art. XIII D, §§ 2, subd. (b), 4).

CA(7)[↓] (7)

Municipalities § 34—Fiscal Affairs—Local Taxes—Voter Approval—Specific Benefit—Reasonable Cost.

Prop. 26 amended the California Constitution to

provide that for purposes of article XIII C, which addresses voter approval of local taxes, “tax” means any levy, charge, or exaction of any kind imposed by a local government (Cal. Const., art. XIII C, § 1, subd. (e)), except (1) a charge imposed for a specific benefit or privilege received only by those charged, which does not exceed its reasonable cost; (2) a charge for a specific government service or product provided directly to the payor and not provided to those not charged, which does not exceed its reasonable cost; (3) charges for reasonable regulatory costs related to the issuance of licenses, permits, investigations, inspections, and audits, and the enforcement of agricultural marketing orders; (4) charges for access to or use, purchase, rental, or lease of local government property; (5) fines for violations of law; (6) charges imposed as a condition of developing property; and (7) property-related assessments and fees as allowed under article XIII D. The local government bears the burden of establishing the exceptions (Cal. Const., art. XIII C, § 1, subd. (e)).

CA(8)[↓] (8)

Taxation § 1—Assessment on Property—Special Benefit—Reasonable Cost.

If an assessment for improvements provides a special benefit to the assessed properties, then the assessed property owners should pay for the benefit they receive. But if the assessment exceeds the actual cost of the improvement, the exaction is a tax and not an assessment. With respect to costs, Prop. 13's goal of providing effective property tax relief is promoted rather than subverted by shifting costs to those who generate the costs. However, if the charges exceed the reasonable cost of the activity on which they are based, the charges are levied for unrelated revenue purposes, and are therefore taxes.

CA(9)[↓] (9)

Taxation § 1—Special Benefit—Reasonable Cost—Payor's Activities.

Restricting allowable fees to the reasonable cost or value of the activity [***251**] with which the charges are associated serves Prop. 13's purpose of limiting taxes. If a state or local governmental agency were allowed to impose charges in excess of the special benefit received by the payor or the cost associated with the payor's activities, the imposition of fees would become a vehicle for generating revenue independent of the purpose of the fees. Therefore, to the extent charges exceed the rationale underlying the charges, they are taxes.

CA(10)[↓] (10)

Municipalities § 96—Franchise Fee—Use of Rights-of-way.

A franchise to use public streets or rights-of-way is a form of property, and a franchise fee is the purchase price of the franchise. Historically, franchise fees have not been considered taxes. Nothing in Prop. 218 reflects an intent to change the historical characterization of franchise fees, or to limit the authority of government to sell or lease its property and spend the compensation received for whatever purposes it chooses (Cal. Const., arts. XIII A, § 3, subd. (b)(4), XIII C). This understanding that restrictions on taxation do not encompass amounts paid in exchange for property interests is confirmed by Prop. 26, the purpose of which was to reinforce the voter approval requirements set forth in Props. 13 and 218. Although Prop. 26 strengthened restrictions on taxation by expansively defining “tax” as any levy, charge, or exaction of any kind imposed by a local government (Cal. Const., art. XIII C, § 1, subd. (e)), it provided an exception for a charge imposed for entrance to or use of local government property, or the purchase, rental, or lease of local government property (Cal. Const., art. XIII C, § 1, subd. (e)(4)).

CA(11)[↓] (11)

Municipalities § 96—Franchise Fee—Calculation—Gross Receipts.

The Broughton Act's (Pub. Util. Code, § 6001 et seq.) provision that a franchise fee be based on the receipts from the use, operation, or possession of the franchise results in a complicated calculation of franchise fees. Usually, some portion of a utility's rights-of-way are on private property or property outside the jurisdiction of the city or county granting the franchise, and the utility's gross receipts attributable to a particular franchise must be reduced in proportion to the utility's rights-of-way that are not within the franchise agreement. In addition, because gross receipts arise from all of a utility's operative property, such as equipment and warehouses, the portion of gross receipts attributable to property other than the franchise must be excluded from the calculation of the franchise fee. Finally, if a utility also provides service under a constitutional franchise—for example, where it provides artificial light under a constitutional franchise in the same area in which it provides electricity under a franchise agreement entered pursuant to the Broughton Act—the franchise fee applies only to the gross receipts from the provision of services under the nonconstitutional franchise.

[*252] CA(12)[⚡] (12)

Public Utilities § 9—Public Utilities Commission—Rates—Costs and Expenses.

The Public Utilities Commission sets the rates of a publicly regulated utility to permit the utility to recover its costs and expenses in providing its service, and to receive a fair return on the value of the property it uses in providing its service. Among a utility's costs and expenses are government fees and taxes.

CA(13)[⚡] (13)

Public Utilities § 9—Public Utilities Commission—Rates—Surcharge.

The Public Utilities Commission has established a

procedure by which utilities may obtain approval to impose disproportionate charges on ratepayers within the jurisdiction that imposed the charges. When a local government imposes taxes or fees which in the aggregate significantly exceed the average aggregate of taxes or fees imposed by the other local governmental entities within the public utility's service territory, a utility may file an advice letter seeking approval to charge local government fee surcharges. Such surcharges must be included as a separate item or items to bills rendered to applicable customers. Each surcharge must be identified as being derived from the local governmental entity responsible for it.

CA(14)[⚡] (14)

Municipalities § 34—Fiscal Affairs—Taxes—Proposition 218—Liberal Construction.

The provisions of Prop. 218 must be liberally construed to effectuate its purposes of limiting local government revenue and enhancing taxpayer consent.

CA(15)[⚡] (15)

Municipalities § 96—Franchise Fee—Use of Rights-of-way—Value of Franchise.

Sums paid for the right to use a jurisdiction's rights-of-way are fees rather than taxes. But to constitute compensation for the value received, the fees must reflect a reasonable estimate of the value of the franchise.

CA(16)[⚡] (16)

Municipalities § 34—Fiscal Affairs—Taxes—Revenue Purposes—Fee.

In general, taxes are imposed for revenue purposes, rather than in return for a specific benefit conferred or privilege granted. In determining whether a charge is a tax or a fee, a court looks to whether the

primary purpose of a charge was to generate revenue. In contrast, a fee paid for an interest in government property is compensation for the use or purchase of a government asset rather than compensation for a cost. Consequently, the revenue generated by the fee is available for whatever purposes the government chooses rather than tied to a public cost. The aspect of the transaction that distinguishes the charge from a tax is the receipt of value in exchange for the payment.

[*253] CA(17)[📄] (17)

Municipalities § 96—Franchise Fee—Tax—Voter Approval—Reasonable Relationship—Value of Franchise.

A franchise fee must be based on the value of the franchise conveyed in order to come within the rationale for its imposition without approval of the voters. Its value may be based on bona fide negotiations concerning the property's value, as well as other indicia of worth. Consistent with the principles that govern other fees, to constitute a valid franchise fee under Prop. 218, the amount of the franchise fee must bear a reasonable relationship to the value of the property interests transferred.

CA(18)[📄] (18)

Municipalities § 34—Fiscal Affairs—Tax—Surcharge—Sale of Electricity—Reasonable Relationship—Value of Franchise—Voter Approval.

In a case in which plaintiffs challenged a city's imposition of a 1 percent surcharge on an electric utility's gross receipts from the sale of electricity within the city, the first amended complaint and the stipulated facts adequately alleged the basis for a claim that the surcharge bore no reasonable relationship to the value of the franchise, and was therefore a tax requiring voter approval under Prop. 218. Accordingly, the trial court erred in granting

judgment on the pleadings to the city.

Opinion by: Cantil-Sakauye

Opinion

[*254]

[212] [***862] CANTIL-SAKAUYE, C. J.**—Pursuant to an agreement between Southern California Edison (SCE) and defendant City of Santa Barbara (the City), SCE includes on its electricity [****2] bills to customers within the City a separate charge equal to 1 percent of SCE's gross receipts from the sale of electricity within the City, and transfers the revenues to the City. The City contends this separate charge, together with

another charge equal to 1 percent of SCE's gross receipts that SCE includes in its electricity rates, is the fee paid by SCE for the privilege of using City property in connection with the delivery of electricity. Plaintiffs Rolland [**213] Jacks and Rove Enterprises, Inc., contend the 1 percent charge that is separately stated on electricity bills is not compensation for the privilege of using City property, but is instead a tax imposed without voter approval, in violation of Proposition 218 (Gen. Elec. (Nov. 5, 1996)). (Cal. Const., art. XIII C, § 2, added by Prop. 218.)

As we explain below, the right to use public streets or rights-of-way is a property interest, and Proposition 218 does not limit the authority of government to sell or lease its property and spend the compensation it receives for whatever purposes it chooses. Therefore, charges that constitute compensation for the use of government property are not subject to Proposition 218's voter approval requirements. To constitute compensation for a property [****3] interest, however, the amount of the charge must bear a reasonable relationship to the value of the property interest; to the extent the charge exceeds any reasonable value of the interest, it is a tax and therefore requires voter approval.

The litigation below did not address whether the charges bear a reasonable relationship to the value of the property interests. Therefore, we affirm the judgment of the Court of Appeal to the extent it reversed the trial court's grant of the City's motion for judgment on the pleadings, but we reverse the Court of Appeal's order that the trial court grant summary adjudication to plaintiffs.

[***863] I. FACTS

The parties stipulated to the following facts in the trial court. Beginning in 1959, the City and SCE entered into a series of franchise agreements granting SCE the privilege to construct and use equipment along, over, and under the City's streets

to distribute electricity.¹ At issue in this case is an agreement [*255] the City and SCE began negotiating in 1994, when their 1984 agreement was about to expire. The 1984 agreement required SCE to pay to the City a fee equal to 1 percent of the gross annual receipts from SCE's sale of electricity within the City in [****4] exchange for the franchise granted by the City. During the course of extended negotiations regarding a new agreement, the City and SCE extended the terms of the 1984 agreement five times, from September 1995 to December 1999.

In the negotiations for a long-term agreement, the City pursued a fee equal to 2 percent of SCE's gross annual receipts from the sale of electricity within the City. At some point in the negotiations, SCE proposed that it would remit to the City as a franchise fee 2 percent of its gross receipts if the Public Utilities Commission (PUC) consented to SCE's inclusion of the additional 1 percent as a surcharge on its bills to customers. Based on SCE's proposal, the City and SCE tentatively agreed to a 30-year agreement that included the provisions for payment of 2 percent of gross receipts. Following notice and a hearing, the City Council of Santa Barbara adopted the agreement as City Ordinance No. 5135 on December 7, 1999, with a term beginning on January 1, 2000 (the 1999 agreement). The ordinance was not submitted to the voters for their approval.

The 1999 agreement divides its 30-year period into two terms. The first two years [****5] were the "initial term," during which SCE was required to pay the City an "initial term fee" equal to 1 percent of its gross receipts from the sale of electricity

¹ A franchise is a privilege granted by the government to a particular individual or entity rather than to all as a common right. A utility franchise is a privilege to use public streets or rights-of-way in connection with the utility's provision of services to residents within the governmental entity's jurisdiction. (*Spring Valley W. W. v. Schottler* (1882) 62 Cal. 69, 106–108; *Santa Barbara County Taxpayer Assn. v. Board of Supervisors* (1989) 209 Cal.App.3d 940, 949 [257 Cal.Rptr. 615] (*Santa Barbara County Taxpayer Assn.*); 12 McQuillin, *The Law of Municipal Corporations* (3d ed. 2017) § 34.2, p. 15.)

within the City. The subsequent 28 years are the “extension term,” during which SCE is to pay the additional 1 percent charge on its gross receipts, denominated the “recovery portion,” for a total “extension term fee” of 2 percent of SCE's gross receipts from the sale of electricity within the City. At issue in this case is the recovery portion, which we, like the parties, refer to as the surcharge.

[**214] The 1999 agreement required SCE to apply to the PUC by April 1, 2001, for approval to include the surcharge on its bills to ratepayers within the City, and to use its best efforts to obtain PUC approval by April 1, 2002. Approval was to be sought in accordance with the PUC's “Re Guidelines for the Equitable Treatment of Revenue-Producing Mechanisms Imposed by Local Government Entities on Public Utilities.” (*Investigation on the Commission's Own Motion To Establish Guidelines for the Equitable Treatment of Revenue-producing Mechanisms Imposed by Local Government Entities on Public Utilities* (1989) 32 Cal.P.U.C.2d 60, 63 [****6] (*PUC Investigation*)). The 1999 agreement further provided that, in [***864] the event the PUC did not give its approval by the end of the initial term, either party could terminate the agreement. Thereafter, [*256] the City agreed to delay the time within which SCE was required to seek approval from the PUC, but SCE eventually obtained PUC approval, and began billing its customers within the City for the full extension term fee in November 2005.

The 1999 agreement provided that half of the revenues generated by the surcharge were to be allocated to the City's general fund and half to a City undergrounding projects fund. In November 2009, however, the City Council decided to reallocate the revenues from the surcharge, directing that all of the funds be placed in the City's general fund without any limitation on the use of these funds.

In 2011, plaintiffs filed a class action complaint challenging the surcharge. In their first amended complaint, they alleged the surcharge was an illegal

tax under Proposition 218, which requires voter approval for all local taxes. (Cal. Const., art. XIII C.) Plaintiffs sought refunds of the charges collected, as well as declaratory relief and injunctive relief requiring the City to discontinue collection [****7] of the surcharge.

On cross-motions for summary adjudication and the City's motion for summary judgment, the trial court ruled that a franchise fee is not a tax under Proposition 218. Its ruling was based largely on *Santa Barbara County Taxpayer Assn., supra*, 209 Cal.App.3d 940, which held that franchise fees are not “proceeds of taxes” for purposes of calculating limits on state and local appropriations under article XIII B of the California Constitution. Notwithstanding this ruling, the trial court denied the motions, based on its view that Proposition 26, which was approved by the voters in the 2010 general election, retroactively altered the definition of a tax under Proposition 218 to encompass franchise fees. Therefore, the court concluded, the City had failed to establish that the surcharge did not violate Proposition 218 during the period *after* Proposition 26 was adopted in 2010.

Thereafter, the City moved for judgment on the pleadings, contending that Proposition 26 does not apply retroactively to the surcharge. The trial court agreed, citing *Brooktrails Township Community Services Dist. v. Board of Supervisors of Mendocino County* (2013) 218 Cal.App.4th 195 [159 Cal. Rptr. 3d 424], which held that Proposition 26 does not apply retroactively. Based on its earlier conclusion that the surcharge, as a franchise fee, was not a tax under Proposition 218 (see *Santa Barbara County Taxpayer Assn., supra*, 209 Cal.App.3d 940), and its additional conclusion that a franchise fee, as negotiated compensation, need [****8] not be based on the government's costs, the trial court ruled that the surcharge was not subject to the voter approval requirements of Proposition 218. Therefore, it granted the City's motion for judgment on the pleadings.

[*257]

The Court of Appeal reversed the judgment. It looked to our opinion in *Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866 [64 Cal. Rptr. 2d 447, 937 P.2d 1350] (*Sinclair Paint*), which considered whether a charge imposed by the state on those engaged in the stream of commerce of lead-containing products was a tax or a fee under Proposition 13 (Primary Elec., June 6, 1978), an earlier voter initiative that requires voter approval of various taxes. (Cal. Const., art. XIII A.) Noting that our analysis in *Sinclair Paint* focused on whether the primary [***865] purpose of the charge was to raise revenue or to regulate those charged, the Court of Appeal considered whether the primary purpose of the surcharge is to raise revenue or to compensate the City for allowing SCE to use its streets [**215] and rights-of-way. Based on its conclusion that the surcharge's "primary purpose is for the City to raise revenue from electricity users for general spending purposes rather than for SCE to obtain the right-of-way to provide electricity," the Court of Appeal held that the surcharge is a tax, and therefore requires voter approval under [****9] Proposition 218. (Cal. Const., art. XIII C, § 2, subd. (b).)

We granted review to address whether the surcharge is a tax subject to Proposition 218's voter approval requirement, or a fee that may be imposed by the City without voter consent.

II. DISCUSSION

CA(1)[↑] (1) Over the past four decades, California voters have repeatedly expanded voter approval requirements for the imposition of taxes and assessments. These voter initiatives have not, however, required voter approval of certain charges related to a special benefit received by the payor or certain costs associated with an activity of the payor. Whether the surcharge required voter approval hinges on whether it is a valid charge under the principles that exclude certain charges from voter approval requirements. Our evaluation of this issue begins with a review of four voter

initiatives that require voter approval of taxes, and the legal principles underlying the exclusion of certain charges from the initiatives' requirements. We then describe the historical characteristics of franchise fees, the Legislature's history of regulating the calculation of franchise fees, and the PUC's requirements concerning the imposition of franchise fees that exceed the average charges imposed by other [****10] local governments in the utility's service area. Finally, we analyze whether the surcharge is a valid franchise fee or a tax, and we hold that **HN1[↑]** a charge imposed in exchange for franchise rights is a valid fee rather than a tax only if the amount of the charge is reasonably related to the value of the franchise.

[*258]

A. Restrictions on Taxes and Other Charges

1. Voter Initiatives

CA(2)[↑] (2) Beginning in 1978, **HN2[↑]** state voters have imposed various limitations upon the authority of state and local governments to impose taxes and fees. Proposition 13, which was adopted that year, set the assessed value of real property as the "full cash value" on the owner's 1975–1976 tax bill, limited increases in the assessed value to 2 percent per year unless there was a change in ownership, and limited the rate of taxation on real property to 1 percent of its assessed value. (Cal. Const., art. XIII A, §§ 1, 2.) In addition, to prevent tax savings related to real property from being offset by increases in state and local taxes, Proposition 13 required approval by two-thirds of the members of the Legislature in order to increase state taxes, and required approval by two-thirds of the local electors of a city, county, or special district in order for such [****11] a local entity to impose special taxes. (Cal. Const., art. XIII A, §§ 3, 4; *Sinclair Paint, supra*, 15 Cal.4th at p. 872; *Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal.3d 208, 231 [149 Cal. Rptr. 239, 583 P.2d 1281] (*Amador Valley*).)

CA(3)[↑] (3) Proposition 13 did not define "special taxes," but this court addressed the

initiative's [***866] restrictions on such taxes in two early cases. In *Los Angeles County Transportation Com. v. Richmond* (1982) 31 Cal.3d 197 [182 Cal. Rptr. 324, 643 P.2d 941], we held that the requirement that “special districts” obtain two-thirds voter approval for special taxes applied only to those special districts empowered to levy property taxes. (*Id.* at p. 207.) In *City and County of San Francisco v. Farrell* (1982) 32 Cal.3d 47 [184 Cal. Rptr. 713, 648 P.2d 935] (*Farrell*), “we construe[d] **HN3**[↑] the term ‘special taxes’ in section 4 [of article XIII A of the Constitution] to mean taxes which are levied for a specific purpose.” (*Id.* at p. 57.) In addition, the Legislature provided that “‘special tax’ shall not include any fee which does not exceed the reasonable cost of providing the service or regulatory activity for which the fee is charged and which is not levied for general revenue purposes.” (Gov. Code, § 50076.)

CA(4)[↑] (4) Thereafter, in 1986, the voters approved **HN4**[↑] Proposition 62, which “added a new article to the Government Code (§§ 53720–53730) requiring [**216] that all new local taxes be approved by a vote of the local electorate.” (*Santa Clara County Local Transportation Authority v. Guardino* (1995) 11 Cal.4th 220, 231 [45 Cal. Rptr. 2d 207, 902 P.2d 225], fn. omitted.) The initiative embraced the definition of special taxes set forth in *Farrell, supra*, 32 Cal.3d 47 (Gov. Code, § 53721; see *Guardino*, at p. 232), but applied its voter approval requirements to any district rather than only to special districts, and defined “district” [****12] broadly. (Gov. Code, § 53720, subd. (b) [“‘district’ means an agency of the state, formed ... for the local performance of governmental [*259] or proprietary functions within limited boundaries”].) By the time Proposition 62 was proposed, courts as well as the Legislature had recognized that various fees were not taxes for purposes of Proposition 13 (see *Beaumont Investors v. Beaumont-Cherry Valley Water Dist.* (1985) 165 Cal.App.3d 227 [211 Cal. Rptr. 567]; *Mills v. County of Trinity* (1980) 108 Cal.App.3d 656 [166 Cal. Rptr. 674]), but Proposition 62 was silent with respect to the

imposition of fees.

CA(5)[↑] (5) Next, in 1996, state voters approved Proposition 218, known as the “Right to Vote on Taxes Act.” (*Apartment Assn. of Los Angeles County, Inc. v. City of Los Angeles* (2001) 24 Cal.4th 830, 835 [102 Cal. Rptr. 2d 719, 14 P.3d 930] (*Apartment Assn.*)) Proposition 218 addressed two principal concerns. First, it was not clear whether Proposition 62, which enacted statutory provisions, bound charter jurisdictions.² (*Howard Jarvis Taxpayers Assn. v. City of San Diego* (2004) 120 Cal.App.4th 374, 390–391 [15 Cal. Rptr. 3d 457].) Therefore, **HN5**[↑] Proposition 218 amended the Constitution to add voter approval requirements for general and special taxes, thereby binding charter jurisdictions. (Cal. Const., art. XIII C, §§ 1, 2.)

CA(6)[↑] (6) Second, **HN6**[↑] Proposition 13 was “not intended to limit ‘traditional’ benefit assessments.” (*Knox v. City of Orland* (1992) 4 Cal.4th 132, 141 [14 Cal. Rptr. 2d 159, 841 P.2d 144] (*Knox*) [upholding property-based assessments for public landscaping and lighting improvements].) Proposition 218 [***867] was adopted in part to address *Knox*'s holding. (*Greene v. Marin County Flood Control & Water Conservation Dist.* (2010) 49 Cal.4th 277, 284 [109 Cal. Rptr. 3d 620, 231 P.3d 350].) It requires an agency proposing an assessment on property to determine the proportionate special [****13] benefit to be derived by each parcel subject to the assessment; to support the assessment with an engineer's report; to give written notice to each parcel owner of the amount of the proposed assessment and the basis of the calculation; and to provide each owner with a ballot to vote in favor of or against the proposed assessment. It also requires

²“For its own government, a county or city may adopt a charter by majority vote of its electors voting on the question.” (Cal. Const., art. XI, § 3, subd. (a).) County charters “supersede ... all laws inconsistent therewith” (*ibid.*), and city charters supersede all inconsistent laws “with respect to municipal affairs.” (*Id.*, § 5, subd. (a); see *Johnson v. Bradley* (1992) 4 Cal.4th 389, 394–400 [14 Cal. Rptr. 2d 470, 841 P.2d 990].)

the agency to hold a public hearing, and bars imposition of the assessment if a majority of parcel owners within the assessment area submit ballots in opposition to the assessment, with each ballot weighted based on the proposed financial obligation of the affected parcel. In the event legal action is brought contesting an assessment, the agency has the burden to establish that the burdened properties receive a [*260] special benefit and the assessment is proportional to the benefits conferred. (Cal. Const., art. XIII D, §§ 2, subd. (b), 4; see *Apartment Assn., supra*, 24 Cal.4th 830.)³

[**217] CA(7)[↑] (7) Most recently, in 2010, after the charge at issue in this case was adopted, state voters approved Proposition 26. HN7[↑] That measure amended the Constitution to provide that for purposes of article XIII C, which addresses voter approval of local taxes, “ ‘tax’ means any levy, charge, or exaction of any kind imposed by a local government” (Cal. Const., art. XIII C, § 1, subd. (e)), *except* [****14] (1) a charge imposed for a specific benefit or privilege received only by those charged, which does not exceed its reasonable cost; (2) a charge for a specific government service or product provided directly to the payor and not provided to those not charged, which does not exceed its reasonable cost; (3) charges for reasonable regulatory costs related to the issuance of licenses, permits, investigations, inspections, and audits, and the enforcement of agricultural marketing orders; (4) charges for access to or use, purchase, rental, or lease of local government

³ Proposition 218 also imposed restrictions on the imposition of fees and charges for property-related services, such as sewer and water services, but provided that “fees for the provision of electrical or gas service shall not be deemed charges or fees imposed as an incident of property ownership.” (Cal. Const., art. XIII D, § 3, subd. (b); *id.*, § 6; see *Silicon Valley Taxpayers’ Assn., Inc. v. Santa Clara County Open Space Authority* (2008) 44 Cal.4th 431, 443 [79 Cal. Rptr. 3d 312, 187 P.3d 37].) Based on its conclusion that the charges imposed by the 1999 agreement are compensation for the franchise rights conveyed to SCE, the trial court further concluded the charges are for the provision of electrical service, and therefore are not imposed as an incident of property ownership. Plaintiffs do not contend on appeal that the surcharge is a property-related fee.

property; (5) fines for violations of law; (6) charges imposed as a condition of developing property; and (7) property-related assessments and fees as allowed under article XIII D. The local government bears the burden of establishing the exceptions. (Cal. Const., art. XIII C, § 1, subd. (e).)⁴

2. Characteristics of Valid Fees

As noted above, following the enactment of Proposition 13, the Legislature and courts viewed various fees as outside the [***868] scope of the initiative. (Gov. Code, § 50076; *Evans v. City of San Jose* (1992) 3 Cal.App.4th 728, 736–737 [4 Cal. Rptr. 2d 601] (*Evans*), and cases cited therein.) In *Sinclair Paint, supra*, 15 Cal.4th 866, we summarized three categories of charges that are fees rather than taxes, and therefore are not subject to the voter approval requirements of Proposition [****15] 13. First, special assessments may be imposed “in amounts reasonably reflecting the value of the benefits conferred by improvements.” (*Sinclair Paint*, at p. 874.) Second, development fees, which are [*261] charged for building permits and other privileges, are not considered taxes “if the amount of the fees bears a reasonable relation to the development’s probable costs to the community and benefits to the developer.” (*Id.* at p. 875.) Third, regulatory fees are imposed under the police power to pay for the reasonable cost of regulatory activities. (*Id.* at pp. 875–876.)

CA(8)[↑] (8) The commonality among these categories of charges is the relationship between the charge imposed and a benefit or cost related to the payor. With respect to charges for benefits received, we explained in *Knox, supra*, 4 Cal.4th 132, that HN8[↑] “if an assessment for ... improvements provides a special benefit to the assessed properties, then the assessed property owners should pay for the benefit they receive.”

⁴ Plaintiffs and the City both view Proposition 26 as confirming their view of the law before Proposition 26 was enacted, but no party contends that it applies to the charges in this case, which were imposed prior to the enactment of Proposition 26.

(*Id.* at p. 142; see *Evans, supra*, 3 Cal.App.4th at p. 738 [when a “discrete group is specially benefitted ... [, t]he public should not be required to finance an expenditure through taxation which benefits only a small segment of the population”].) But “if the assessment exceeds the actual cost of the improvement, the exaction is a [****16] tax and not an assessment.” (*Knox*, at p. 142, fn. 15.) With respect to costs, we explained in *Sinclair Paint, supra*, 15 Cal.4th 866, 879, that Proposition 13's goal of providing effective property tax relief is promoted rather than subverted by shifting costs to those who generate the costs. (See *San Diego Gas & Electric Co. v. San Diego County Air Pollution Control Dist.* (1988) 203 Cal.App.3d 1132, 1148 [250 Cal. Rptr. 420].) However, if the charges exceed the reasonable cost of the activity on which they are based, the charges are levied for unrelated revenue purposes, and are therefore taxes. (*Sinclair Paint*, at pp. 874, 881.)

CA(9)[↑] (9) In sum, **HN9[↑]** restricting allowable fees to the reasonable cost or value of the activity with which the charges are associated serves [**218] Proposition 13's purpose of limiting taxes. (See *Amador Valley, supra*, 22 Cal.3d at p. 231 [Prop. 13's restrictions on real property taxes “could be withdrawn or depleted by additional or increased state or local levies of other than property taxes”].) If a state or local governmental agency were allowed to impose charges in excess of the special benefit received by the payor or the cost associated with the payor's activities, the imposition of fees would become a vehicle for generating revenue independent of the purpose of the fees. Therefore, to the extent charges exceed the rationale underlying the charges, they are taxes.

Although *Sinclair Paint, supra*, 15 Cal.4th 866, focused on restrictions imposed by Proposition 13, its analysis [****17] of the characteristics of fees that may be imposed without voter approval remains sound. According [***869] to Proposition 218's findings and declarations, “Proposition 13 was intended to provide effective tax relief and to

require voter approval of tax increases. However, local governments have subjected taxpayers to *excessive* tax, assessment, fee [*262] and charge increases that ... frustrate the purposes of voter approval for tax increases” (Prop. 218, § 2, reprinted at 1 Stats. 1996, p. A-295, italics added.) As relevant here, this finding reflects a concern with excessive fees, not fees in general. In addition, although Proposition 218 imposed additional restrictions on the imposition of assessments, that initiative did not impose additional restrictions on other fees. (Cal. Const., arts. XIII C, §§ 1, 2, XIII D, § 4.) Finally, *Sinclair Paint's* understanding of fees as charges reasonably related to specific costs or benefits is reflected in Proposition 26, which exempted from its expansive definition of tax (1) charges imposed for a specific benefit or privilege which do not exceed its reasonable cost, (2) charges for a specific government service or product provided which do not exceed [****18] its reasonable cost, and (3) charges for reasonable regulatory costs related to specified regulatory activities.⁵ (Cal. Const., art. XIII C, § 1, subd. (e).)

To determine how franchise fees fit within these principles, we next consider the nature of franchise fees. We also describe the regulatory framework related to their calculation and imposition.

B. Franchise Fees

1. Nature of Franchise Fees

HN10[↑] **CA(10)[↑]** (10) A franchise to use public streets or rights-of-way is a form of property (*Stockton Gas etc. Co. v. San Joaquin Co.* (1905) 148 Cal. 313, 319 [83 P. 54]), and a franchise fee is the purchase price of the franchise. (*City & Co. of S. F. v. Market St. Ry. Co.* (1937) 9 Cal.2d 743, 749 [73 P.2d 234].) Historically, franchise fees have not been considered taxes. (See *County of Tulare v. City of Dinuba* (1922) 188 Cal. 664, 670 [206 P.

⁵ Proposition 26's description of valid charges based on regulatory costs does not mirror our discussion of such costs in *Sinclair Paint, supra*, 15 Cal.4th 866. (See Cal. Const., art. XIII C, § 1, subd. (e)(3).) We express no opinion on the breadth of the regulatory costs that Proposition 26 allows to be imposed without voter approval.

983] [franchise fee based on gross receipts of utility is not a tax]; *City & Co. of S. F. v. Market St. Ry. Co.*, *supra*, 9 Cal.2d at p. 749 [payments for franchises are not taxes]; *Santa Barbara County Taxpayer Assn.*, *supra*, 209 Cal.App.3d 940, 949–950 [franchise fees are not proceeds of taxes].) Nothing in Proposition 218 reflects an intent to change the historical characterization of franchise fees, or to limit the authority of government to sell or lease its property and spend the compensation received for whatever purposes it chooses. (See Cal. Const., arts. XIII A, § 3, subd. (b)(4), XIII C.)

This understanding that restrictions on taxation do not encompass amounts paid in exchange for property interests is confirmed by Proposition 26, the [*263] purpose of which was to *reinforce* the voter approval requirements set forth in [****19] Propositions 13 and 218. (Prop. 26, § 1, subd. (f), Historical Notes, reprinted at 2B West's Ann. Cal. Const., *supra*, foll. art. XIII A, § 3, p. 297 [“to ensure the effectiveness of these constitutional limitations, [Proposition 26] defines a “tax” ... so that neither the Legislature nor local governments can circumvent these restrictions on [**219] increasing taxes by simply defining new or expanded taxes as “fees””].) Although Proposition 26 [***870] strengthened restrictions on taxation by expansively defining “tax” as “any levy, charge, or exaction of any kind imposed by a local government” (Cal. Const., art. XIII C, § 1, subd. (e)), it provided an exception for “[a] charge imposed for entrance to or use of local government property, or the purchase, rental, or lease of local government property” (*id.*, subd. (e)(4)).⁶

2. Laws Governing the Calculation of Franchise Fees

The Legislature has taken several approaches to the issue of the amount of compensation to be paid to local jurisdictions in exchange for rights-of-way

over the jurisdictions' land relating to the provision of services such as electricity. As described more fully below, it initially barred the imposition of franchise fees due to perceived abuses by local governments. Thereafter, it authorized local agencies to grant franchises, [****20] and established two formulas with which to calculate franchise fees. These formulas do not bind charter jurisdictions, such as the City, but they provide helpful background to the PUC's regulation of charges imposed on ratepayers.

The California Constitution as adopted in 1879 provided that “[i]n any city where there are no public works owned and controlled by the municipality for the supplying the same with water or artificial light, any individual, or any company duly incorporated for such purpose ... , shall ... have the privilege of using the public streets and thoroughfares thereof, and of laying down pipes and conduits therein, and connections therewith, so far as may be necessary for introducing into and supplying such city and its inhabitants either with gaslight or other illuminating light, or with fresh water for domestic and all other purposes, upon the condition that the municipal government shall have the right to regulate the charges thereof.” (Cal. Const., former art. XI, § 19.) The provision was intended to prevent a municipality from creating a monopoly within its jurisdiction by imposing burdens on parties who wanted to compete with an existing private utility. Although [****21] cities could not impose franchise fees on these “constitutional franchises,” they were authorized to tax a franchise on the basis that a franchise constitutes real property within the city. (*Stockton Gas etc. Co. v. San Joaquin [*264] Co.*, *supra*, 148 Cal. at pp. 315–321; *City of Santa Cruz v. Pacific Gas & Electric Co.* (2000) 82 Cal.App.4th 1167 [1171, 99 Cal. Rptr. 2d 198].) In 1911, this constitutional provision was replaced with a provision that authorized the private establishment of public works for providing services such as light, water, and power “upon such conditions and under such regulations as the municipality may prescribe under its organic law.” (Sen. Const. Amend. No.

⁶We are concerned only with the validity of the surcharge under Proposition 218. Proposition 26's exception from its definition of “tax” with respect to local government property is not before us. (See Cal. Const., art. XIII C, § 1, subd. (e)(4).)

49, Stats. 1911 (1911 Reg. Sess.) res. ch. 67, p. 2180.) The constitutional amendment did not impair rights under existing constitutional franchises. (*Russell v. Sebastian* (1914) 233 U.S. 195, 210 [58 L.Ed. 912, 34 S.Ct. 517].)

In the meantime, in 1905, the Legislature enacted the Broughton Act (Pub. Util. Code, § 6001 et seq.), which authorized cities and counties to enter franchise agreements for the provision of electricity and various other services not encompassed by the constitutional restrictions [***871] on franchise fees. (Stats. 1905, ch. 578, p. 777; *County of Alameda v. Pacific Gas & Electric Co.* (1997) 51 Cal.App.4th 1691, 1694–1695 [60 Cal. Rptr. 2d 187] (*County of Alameda*)). The legislation provided that when an application for a franchise was received by a city or county, the governing body was to advertise for bids and award the franchise to the highest bidder. The successful bidder was [****22] required to pay, in addition to the amount bid, 2 percent of the gross annual receipts from the “use, operation or possession” of the franchise after the first five years of the term of the franchise agreement had passed. (Stats. 1905, ch. 578, §§ 2–3, pp. 777–778.)

HN11 [↑] **CA(11)** [↑] (11) The Broughton Act's provision that the fee be based on the receipts from the use, operation or possession of the franchise results in a complicated calculation of franchise [**220] fees. Usually, some portion of a utility's rights-of-way are on private property or property outside the jurisdiction of the city or county granting the franchise, and the utility's gross receipts attributable to a particular franchise must be reduced in proportion to the utility's rights-of-way that are not within the franchise agreement. (*County of Tulare v. City of Dinuba, supra*, 188 Cal. at pp. 673–676.) In addition, because gross receipts arise from all of a utility's operative property, such as equipment and warehouses, the portion of gross receipts attributable to property other than the franchise must be excluded from the calculation of the franchise fee. (*County of L. A. v. Southern etc. Gas Co.* (1954) 42 Cal.2d 129, 133–

134 [266 P.2d 27].) Finally, if a utility also provides service under a constitutional franchise—for example, where it provides artificial light under a constitutional franchise [****23] in the same area in which it provides electricity under a franchise agreement entered pursuant to the Broughton Act—the franchise fee applies only to the gross receipts from the provision of services under the nonconstitutional franchise. (*Oakland v. Great Western Power Co.* (1921) 186 Cal. 570, 578–583 [200 P. 395].)

[*265]

In 1937, apparently due in part to the complexity involved in calculating franchise fees under the Broughton Act, the Legislature enacted an alternative scheme by which cities could grant franchises for the transmission of electricity and gas. (Stats. 1937, ch. 650, p. 1781; see Pub. Util. Code, § 6201 et seq. (1937 Act);⁷ *County of Alameda, supra*, 51 Cal.App.4th at pp. 1695–1696.) Instead of a bidding process, the 1937 Act requires only a public hearing before the local government that will decide whether to grant an application for a franchise, at which objections to the granting of the franchise may be made. (Pub. Util. Code, §§ 6232–6234.) In addition, although the 1937 Act reiterates the Broughton Act formula for calculating franchise fees, it also provides an alternative formula: “this payment shall be not less than 1 percent of the applicant's gross annual receipts derived from the sale within the limits of the municipality of the utility service for which the franchise is awarded.” (Pub. Util. Code, § 6231, subd. (c).)⁸ According to a review of that year's

⁷In 1971, the Legislature amended the 1937 Act to provide that “municipality includes counties.” (Pub. Util. Code, § 6201.5.) In addition, the act has been extended to franchises for the transmission of oil and oil products, and the transmission of water. (Pub. Util. Code, § 6202.)

⁸The 1937 Act includes a second alternative formula if the franchise is “complementary to a franchise derived under” the California Constitution. In that circumstance, the alternative payment is “one-half of 1 percent of the applicant's gross annual receipts from the sale of electricity within the limits of the municipality under both the electric franchises.” (Pub. Util. Code, § 6231, subd. (c).)

legislation, the new franchise [****24] [***872] system was “expected to bring more adequate returns to cities, while lessening disputes concerning amounts to be paid.” (David, *The Work of the 1937 California Legislature: Municipal Matters* (1937–1938) 11 S.Cal. L.Rev. 97, 107.)

As noted above, these statutory provisions do not bind jurisdictions governed by a charter, such as the City, but charter jurisdictions are free to follow the procedures set forth in the 1937 Act. (Pub. Util. Code, § 6205.)⁹ However, the 1937 Act's provisions “relating to the payment of a percentage of gross receipts shall not be construed as a declaration of legislative judgment as to the proper compensation to be paid a chartered municipality for the right to exercise franchise privileges therein.” (Pub. Util. Code, § 6205.) We explain below that although a charter jurisdiction's franchise fees are not limited by these statutory formulas, the PUC has concluded that it is not fair or reasonable to allow a utility to recoup from all of its utility customers charges imposed by a jurisdiction whose charges exceed the average amount of charges imposed by other local governments. Therefore, the PUC has established a procedure by which a utility may [**221] obtain approval [*266] to impose a surcharge on the bills of only those customers within the particular [****25] jurisdiction that imposes higher-than-average charges.

3. PUC Scrutiny of Utility Charges

HN12[↑] **CA(12)**[↑] (12) The PUC sets the rates of a publicly regulated utility to permit the utility to recover its costs and expenses in providing its service, and to receive a fair return on the value of the property it uses in providing its service.

⁹ The trial court ruled that as a charter jurisdiction, the City is not subject to general laws concerning franchises. (See *Southern Pacific Pipe Lines, Inc. v. City of Long Beach* (1988) 204 Cal.App.3d 660, 667–670 [251 Cal. Rptr. 411] [except where the nature of the utility services reflects a matter of statewide concern, the granting of franchises is a municipal affair].) Plaintiffs do not challenge that conclusion.

(*Southern Cal. Gas Co. v. Public Utilities Com.* (1979) 23 Cal.3d 470, 474–476 [153 Cal. Rptr. 10, 591 P.2d 34].) Among a utility's costs and expenses are government fees and taxes. Historically, “fees and taxes imposed upon the utility itself by the various governmental entities within the utility's service territory ... tended to average out, with the total derived from each taxing jurisdiction tending to be approximately equal. Therefore, rather than impose a special billing procedure upon utilities to account for the small differences historically involved, the [PUC] ... permitted a utility to simply average them and allowed them to be ‘buried’ in the rate structure applicable to the entire system.” (*PUC Investigation, supra*, 32 Cal.P.U.C.2d at p. 63.) As voters restricted the taxing authority of local governments, however, some local jurisdictions increased the charges they imposed in connection with the provision of utility services. “As the number and increasing amounts of these local revenue-producing mechanisms [****26] began to multiply, the [PUC] became concerned that averaging these costs among all ratepayers would create inequities among ratepayers.” (*Ibid.*)

CA(13)[↑] (13) In response to this concern, **HN13**[↑] the PUC established a procedure by which utilities may obtain approval to impose disproportionate charges on ratepayers within the jurisdiction that imposed the charges. [***873] (*PUC Investigation, supra*, 32 Cal.P.U.C.2d at pp. 62, 69.) When a local government imposes taxes or fees “which in the aggregate significantly exceed the average aggregate of taxes or fees imposed by the other local governmental entities within the public utility's service territory,” a utility may file an advice letter seeking approval to charge “local government fee surcharges.” (*Id.* at p. 73.) Such surcharges “shall be included as a separate item or items to bills rendered to applicable customers. Each surcharge shall be identified as being derived from the local governmental entity responsible for it.” (*Ibid.*)

The purpose of the PUC's procedure concerning local government fee surcharges is to ensure that

utility rates are just, reasonable, and nondiscriminatory. (*PUC Investigation, supra*, 32 Cal.P.U.C.2d at p. 69; see Pub. Util. Code, §§ 451 [all public utility charges shall be just and reasonable], 453 [no public utility shall discriminate], 728 [if PUC [****27] finds rates are unreasonable or discriminatory, it shall order just and reasonable rates].) “Basic rates ... are those designed to recoup a utility’s costs incurred to serve all its customers.” [*267] (*PUC Investigation, supra*, 32 Cal.P.U.C.2d at p. 69.) If disproportionate taxes and fees are incorporated into all customers’ basic rates, “some of these ratepayers would be subsidizing others but are not themselves benefiting from such increased taxes or fees.” (*Ibid.*)

The PUC’s decision does not concern the validity of any charges imposed by local government. The PUC explained that it “[did] not dispute or seek to dispute the authority or right of any local governmental entity to impose or levy any form of tax or fee upon utility customers or the utility itself, which that local entity, as a matter of general or judicial decision, has jurisdiction to impose, levy, or increase. Any issue relating to such local authority is a matter for the Superior Court, not this Commission.” (*PUC Investigation, supra*, 32 Cal.P.U.C.2d at p. 69.)

C. Validity of the Surcharge

1. Relationship Between Franchise Rights and Franchise Fees

CA(14)[↑] (14) Plaintiffs contend the surcharge is a tax rather than a fee under Proposition 218, and therefore requires voter approval. **HN14[↑]** Whether a charge is a tax or a fee [****28] “is a question of law for the appellate courts to decide on independent review of the facts.” (*Sinclair Paint, supra*, 15 Cal.4th at p. 874.) In resolving this issue, **HN15[↑]** the provisions of Proposition 218 “shall be liberally construed to effectuate [**222] its purposes of limiting local government revenue and enhancing taxpayer consent.” (Prop. 218, § 5, reprinted at 1 Stats. 1996, p. A-299; see *Silicon*

Valley Taxpayers’ Assn., Inc. v. Santa Clara County Open Space Authority, supra, 44 Cal.4th at pp. 446, 448 [express purpose of Prop. 218 was to limit methods of exacting revenue from taxpayers; its provisions are to be liberally construed].)

CA(15)[↑] (15) As explained earlier, a franchise is a form of property, and a franchise fee is the price paid for the franchise. Moreover, historically, franchise fees have not been considered taxes, and nothing in Proposition 218 reflects an intention to treat amounts paid in exchange for property interests as taxes. Finally, like the receipt by a discrete group of a special benefit from the government, the receipt of an [***874] interest in public property justifies the imposition of a charge on the recipient to compensate the public for the value received. Therefore, **HN16[↑]** sums paid for the right to use a jurisdiction’s rights-of-way are fees rather than taxes. But as explained below, to constitute compensation for the value [****29] received, the fees must reflect a reasonable estimate of the value of the franchise.

Each of the categories of valid fees we recognized in *Sinclair Paint, supra*, 15 Cal.4th 866, was restricted to an amount that had a reasonable relationship [*268] to the benefit or cost on which it was based. We observed that special assessments were allowed “in amounts reasonably reflecting the value of the benefits conferred” (*id.* at p. 874), development fees were allowed “if the amount of the fees bears a reasonable relation to the development’s probable costs to the community and benefits to the developer” (*id.* at p. 875), and regulatory fees were allowed where the fees reflected bear a “reasonable relationship to the social or economic ‘burdens’ that [the payor’s] operations generated” (*id.* at p. 876; see *Pennell v. City of San Jose* (1986) 42 Cal.3d 365, 375 [228 Cal. Rptr. 726, 721 P.2d 1111]). To the extent fees exceed a reasonable amount in relation to the benefits or costs underlying their imposition, they are taxes. (*Sinclair Paint, supra*, at p. 881; *Knox, supra*, 4 Cal.4th at p. 142, fn. 15.)

CA(16)[↑] (16) In the course of our analysis, we observed that, **HN17[↑]** “[i]n general, taxes are imposed for revenue purposes, rather than in return for a specific benefit conferred or privilege granted,” and we looked to whether the primary purpose of a charge was to generate revenue. (*Sinclair Paint, supra*, 15 Cal.4th at p. 874; see *id.* at pp. 879–880.) The issue of whether the funds generated by the types of fees [****30] considered in *Sinclair Paint* were used primarily for revenue purposes was relevant because the fees were related to an expenditure by the government or a cost borne by the public. More particularly, in connection with special assessments, the government seeks to recoup the costs of the program that results in a special benefit to particular properties, and in connection with development fees and regulatory fees, the government seeks to offset costs borne by the government or the public as a result of the payee's activities.

In contrast, a fee paid for an interest in government property is compensation for the use or purchase of a government *asset* rather than compensation for a cost. Consequently, the revenue generated by the fee is available for whatever purposes the government chooses rather than tied to a public cost. The aspect of the transaction that distinguishes the charge from a tax is the receipt of value in exchange for the payment. (See *Sinclair Paint*, 15 Cal.4th at p. 874 [contrasting taxes from charges imposed in return for a special benefit or privilege]; 9 Witkin, Summary of Cal. Law (10th ed. 2005) Taxation, § 1, p. 25 [“in taxation, ... no compensation is given to the taxpayer except by way of governmental [****31] protection and other general benefits”].)

Plaintiffs observe, however, that SCE customers pay the surcharge, but SCE receives the franchise rights; therefore, they contend, the ratepayers do not receive any value in exchange for their [***875] payment of the [**223] charge. As noted above, publicly regulated utilities are allowed to recover their costs and expenses by passing them

on to their ratepayers. Among the charges included in the rates charged to customers within the City is the initial 1 percent of [*269] gross receipts paid in exchange for franchise rights, yet plaintiffs do not contend that this initial 1 percent is a tax because ratepayers do not receive the franchise rights. The fact that the surcharge is placed on customers' bills pursuant to the franchise agreement rather than a unilateral decision by SCE does not alter the substance of the surcharge; like the initial 1 percent charge, it is a payment made in exchange for a property interest that is needed to provide electricity to City residents.¹⁰ Because a publicly regulated utility is a conduit through which government charges are ultimately imposed on ratepayers, we would be placing form over substance if we precluded the City from establishing [****32] that the surcharge bears a reasonable relationship to the value of the property interest it conveyed to SCE because the City expressed in its ordinance what was implicit—that once the PUC gave its approval, SCE would place the surcharge on the bills of customers within the City.

Although *Sinclair Paint's* consideration of the purposes to which revenues will be put is not relevant in the context of transfers of public property interests, its broader focus on the relationship between a charge and the rationale underlying the charge provides guidance in evaluating whether the surcharge is a tax. Just as the amount of fees imposed to compensate for the expense of providing government services or the cost to the public associated with a payer's activities must bear a reasonable relationship to the costs and benefits that justify their imposition, fees imposed in exchange for a property interest must bear a reasonable relationship to the value received

¹⁰ As explained above, the division of the charge into two parts, with one included in the rates paid by customers and the other separately stated on the bill, was driven by the PUC's effort to ensure that a local government's higher-than-average charges are not unfairly imposed on ratepayers outside of the local government's jurisdiction; this division of the charges is unrelated to the character or validity of the charges.

from the government. To the extent a franchise fee exceeds any reasonable value of the franchise, the excessive portion of the fee does not come within the rationale that justifies the imposition of fees without voter approval. Therefore, the [****33] excessive portion is a tax. If this were not the rule, franchise fees would become a vehicle for generating revenue independent of the purpose of the fees. In light of the PUC's investigation of local governments' attempts to produce revenue through charges imposed on public utilities, this concern is more than merely speculative. (See PUC Investigation, supra, 32 Cal.P.U.C.2d 60.)

We recognize that determining the value of a franchise may present difficulties. Unlike the cost of providing a government improvement or program, which may be calculated based on the expense of the personnel and materials used to perform the service or regulation, the value of property may vary greatly, depending on market forces and negotiations. Where a utility has an incentive to negotiate a lower fee, the negotiated fee may reflect the [*270] value of the franchise rights, just as the negotiated rent paid by the lessor of a publicly owned building reflects its market value, despite the fact that a different lessor might have negotiated a different rental rate. In the absence of bona fide negotiations, [***876] however, or in addition to such negotiations, an agency may look to other indicia of value to establish a reasonable value of franchise rights.¹¹

CA(17)[↑] (17) In [****34] sum, HN18[↑] a franchise fee must be based on the value of the franchise conveyed in order to come within the rationale for its imposition without approval of the voters. Its value may be based on bona fide negotiations concerning the property's value, as well as other indicia of worth. Consistent with the principles that govern other fees, we hold that to constitute a valid franchise fee under Proposition

218, the amount of the franchise fee must bear a reasonable relationship to the value of the property interests transferred. [**224] (See Sinclair Paint, supra, 15 Cal.4th at pp. 874–876.)

2. *The City's Alternative Theories To Support the Surcharge*

We find the City's remaining arguments in defense of the surcharge to be without merit.

The City contends that the surcharge is not a tax imposed on ratepayers because it is a burden SCE voluntarily assumed. The terms of the 1999 agreement belie the contention that SCE assumed a burden to pay the surcharge. The 1999 agreement states that SCE “shall collect” the surcharge from all SCE customers within the City, and the collection shall be based on electricity consumption. Arguably, these provisions are ambiguous as to whether the mandatory language imposes a duty to collect the surcharge, or imposes a [****35] duty, *if* it collects the surcharge, to apply it to all customers within the City based on consumption. However, the next paragraph of the 1999 agreement refers to “[t]he conditions precedent to *the obligation of [SCE] under this Section 5 to levy, collect, and deliver to City the [surcharge].*” In addition, the parties stipulated that “[t]he SCE assessments, collections and remittance of the [surcharge] were required by Santa Barbara Ordinance 5135.” Finally, as noted above, public utilities are allowed to pass along to their customers expenses the utilities incur in producing their services, and SCE could terminate the 1999 agreement if the PUC did not agree to the inclusion of the surcharge on customers' bills. Thus, it does not appear that SCE assumed any burden to pay the surcharge from its assets.

We also reject the City's contention that imposition of the surcharge on customers is the result of a decision by SCE and the PUC. As discussed [*271] above, the purpose of the PUC's involvement in the process was to ensure that higher-than-average fees were not imposed on customers who reside outside the City. The fact that

¹¹ The parties' briefs do not consider the means by which franchise rights might be valued. We leave this issue to be addressed by expert opinion and subsequent case law.

the 1999 agreement required SCE to seek the approval of the PUC to include the charge on [****36] customers' bills, and allowed either party to terminate the agreement if the PUC's approval was not obtained, reflects that SCE was not willing to assume the burden of paying the surcharge, and that both parties to the agreement understood that the charge would be collected from ratepayers. These conclusions are confirmed by the parties' negotiations, which reflect that SCE was willing only to collect the charge from its customers and remit the revenue to the City. Finally, the City stipulated that the parties reached their [***877] agreement on the condition that the surcharge would become payable only if SCE obtained the PUC's consent to include the surcharge as a customer surcharge. In sum, the City and SCE agreed that SCE would impose the surcharge on customers and remit the revenues to the City.

In a similar vein, the City contends we should look to a revenue measure's legal incidence—who is required to pay the revenues—rather than its economic incidence—who bears the economic burden of the measure. The City's contention is based on its view that SCE bears the legal incidence of the charges and, therefore, the charges are not a tax on the ratepayers. In support of its theory, the City [****37] cites case law holding that nonresidents do not have taxpayer standing under Code of Civil Procedure section 526a to challenge a jurisdiction's actions based on their payment of taxes within the jurisdiction. (See Cornelius v. Los Angeles County etc. Authority (1996) 49 Cal.App.4th 1761, 1777–1778 [57 Cal. Rptr. 2d 618] [plaintiff who did not live in Los Angeles County was denied taxpayer standing to challenge a county affirmative action program based in part on payment of sales and gasoline taxes in Los Angeles County]; Torres v. City of Yorba Linda (1993) 13 Cal.App.4th 1035, 1048 [17 Cal. Rptr. 2d 400] [plaintiffs who did not live within a city were denied taxpayer standing to challenge a redevelopment plan based on the payment of sales taxes in the city].) These cases would support an argument that individuals who

live outside the City do not have taxpayer standing to challenge the surcharge, but they do not provide guidance concerning what constitutes a tax under various voter initiatives restricting taxation.

In any event, all that the City ultimately contends in this regard is that the [**225] economic incidence of a charge does not determine whether it is a tax. We agree. Valid fees do not become taxes simply because their cost is passed on to the ratepayers. As our discussion above reflects, the determination of whether a charge that is nominally a franchise fee constitutes a tax depends on whether it is [****38] reasonably related to the value of the franchise rights.

[*272]

Finally, the City asserts that the negotiated value of the franchise is entitled to deference because the City's adoption of the 1999 agreement was a legislative act and because charter jurisdictions have broad discretion to enter franchise agreements. (See Gov. Code, § 50335 [the legislative body of a local agency may grant utility easements “upon such terms and conditions as the parties thereto may agree”].) The record does not adequately disclose the negotiations that occurred with respect to the value of the franchise, and we are therefore unable to evaluate what deference, if any, might be due.

III. THE JUDGMENT OF THE COURT OF APPEAL

As noted above, the Court of Appeal concluded that the surcharge's primary purpose was to raise revenue for general spending purposes rather than to compensate the City for the rights-of-way. Therefore, it held, the surcharge is a tax, and requires voter approval under Proposition 218. Based on these conclusions, it reversed the trial court's grant of the City's motion for judgment on the pleadings, and “directed the trial court to grant [plaintiffs'] motion for summary adjudication because the City imposed the [****39] 1% surcharge without complying with Proposition

218.” As explained below, we agree that the judgment on the pleadings must be reversed, [***878] but we conclude that plaintiffs did not establish a right to summary adjudication.

HN19[↑] A motion for judgment on the pleadings presents the question of whether “the plaintiff’s complaint state[s] facts sufficient to constitute a cause of action against the defendant.” (*Smiley v. Citibank* (1995) 11 Cal.4th 138, 145 [44 Cal. Rptr. 2d 441, 900 P.2d 690].) The trial court generally considers only the allegations of the complaint, but may also consider matters that are subject to judicial notice. (*Id.* at p. 146.) “Moreover, the allegations must be liberally construed with a view to attaining substantial justice among the parties.’ [Citation.] ‘Our primary task is to determine whether the facts alleged provide the basis for a cause of action against defendants under any theory.’” (*Alliance Mortgage Co. v. Rothwell* (1995) 10 Cal.4th 1226, 1232 [44 Cal. Rptr. 2d 352, 900 P.2d 601].) “An appellate court independently reviews a trial court’s order on such a motion.” (*Smiley, supra*, at p. 146.)

CA(18)[↑] (18) The first amended complaint alleges that the surcharge is not a franchise fee, but is instead a tax that requires voter approval under Proposition 218. In addition, with the parties’ consent, the trial court took judicial notice of the written stipulation of facts submitted in connection [****40] with the motions for summary adjudication and summary judgment, and a second stipulation of facts submitted in connection with the City’s motion for judgment on the pleadings. As described above, the stipulated facts reflect that the City and SCE agreed to double the amount to be paid for the privilege of using the rights-of-way and to pass these charges on to the [*273] ratepayers, but they do not address the relationship, if any, between the surcharge and the value of the franchise. Liberally construed, the first amended complaint and the stipulated facts adequately allege the basis for a claim that the surcharge bears no reasonable relationship to the value of the franchise, and is therefore a tax

requiring voter approval under Proposition 218. Accordingly, the trial court erred in granting judgment on the pleadings to the City.

Next we consider the Court of Appeal’s direction to the trial court to grant plaintiffs’ motion for summary adjudication. A plaintiff moving for summary adjudication with respect to a claim must establish each element of the claim. The burden then shifts to the defendant to demonstrate a triable issue of fact exists as to the claim. (*Code Civ. Proc.*, § 437c, subd. (p)(1).) Like a ruling on a motion [****41] for judgment on the pleadings, a ruling on a motion for summary adjudication is reviewed de novo. (*Kendall v. Walker* (2009) [**226] 181 Cal.App.4th 584, 591 [104 Cal. Rptr. 3d 262].)

Plaintiffs sought summary adjudication of the allegation that the surcharge is a tax. (*Code Civ. Proc.*, § 437c, subd. (f).) They asserted that the tests set forth in *Sinclair Paint, supra*, 15 Cal.4th 866, remain good law, but like the Court of Appeal, they drew from *Sinclair Paint* the principle that if the primary purpose of a charge is to raise revenue, the charge is a tax. Plaintiffs also challenged the surcharge on the ground that it was not based on a determination that there was a reasonable relationship between the charge and any costs borne by the City. In response, the City noted that *Sinclair Paint, supra*, 15 Cal.4th 866, [***879] addressed the distinction between regulatory fees and taxes. The City relied instead on *Santa Barbara County Taxpayer Assn., supra*, 209 Cal.App.3d 940, which held that franchise fees are not “proceeds of taxes” for purposes of calculating limits on state and local appropriations under article XIII B of the California Constitution. The trial court concluded that “[b]ecause the measure of compensation [for a franchise] is a matter of contractual negotiation, the amount of the franchise fee need not be based on costs.”

Although plaintiffs’ allegations and the stipulated facts adequately allege the basis for a contention that the surcharge bears no reasonable relationship

to the value [****42] of the franchise, plaintiffs' motion for summary adjudication did not *establish* this contention. As explained in our discussion of franchise fees, cities are free to sell or lease their property, and the fact that a franchise fee is collected for the purpose of generating revenue does not establish that the compensation paid for the property interests is a tax. In addition, in contrast to fees imposed for the purpose of recouping the costs of government services or programs, which are limited to the reasonable costs of the services or programs, franchise fees are not based on the costs incurred in affording a [*274] utility access to rights-of-way. Therefore, the facts on which plaintiffs relied in seeking summary adjudication did not establish their claim that the surcharge is a tax.

IV. DISPOSITION

We affirm the judgment of the Court of Appeal to the extent it reversed the trial court's judgment, and we reverse the judgment to the extent it directed the trial court to grant plaintiffs' motion for summary adjudication. The case is remanded to the Court of Appeal with directions to remand the matter to the trial court for further proceedings consistent with this opinion.

Cantil-Sakauye, C. J., [****43] Werdegar, J., Corrigan, J., Liu, J., Cuéllar, J., and Kruger, J., concurred.

Dissent by: Chin

Dissent

CHIN, J., Dissenting.—Since 1970, the City of Santa Barbara (the City) has imposed “a tax” on those using electricity in the City. Since 1977, the amount of the tax has been “six percent (6%) of the charges made for” energy use. (Santa Barbara Mun. Code, § 4.24.030.) In 1999, the City, in order to raise revenues for general governmental purposes, passed an ordinance—City Ordinance No. 5135

(the Ordinance)—separately requiring those receiving electricity within the City from Southern California Edison (SCE) to pay *an additional* 1 percent of the amount of their electrical bill. I conclude that this additional charge constitutes a tax that the City imposed in violation of the voter approval requirements of article XIII C of the California Constitution, as adopted by the voters at the November 5, 1996 General Election through passage of Proposition 218 (Proposition 218). The City's arguments to the contrary are unpersuasive.

The majority agrees that most of the City's arguments fail, but it largely agrees [***880] with the City that the charge is a “valid franchise fee ... rather than a tax.” (Maj. [**227] opn., *ante*, at p. 257.) Putting its own gloss on the City's argument—a gloss the City expressly [****44] rejects—the majority concludes that the charge is a valid franchise fee to the extent it “bear[s] a reasonable relationship to,” as alternatively phrased, “the value of the property interests transferred” (maj. opn., *ante*, at p. 270), “the value of the franchise conveyed” (*ibid.*), or “the value of the franchise rights” (*id.* at p. 271).

There is a fundamental problem with this approach: The electricity users upon whom the City imposes the charge, and who actually pay it, do not receive the franchise, any franchise rights, or any property interests. The Ordinance grants those valuable rights and interests *only to SCE*, the electricity supplier. Because the Ordinance requires SCE's customers to pay for rights and interests the City has granted to SCE, the charge does not [*275] constitute a “franchise fee” for purposes of the rule that “franchise fees [are not] considered taxes.” (Maj. opn., *ante*, at p. 262.) In reality, it is just an increase in the City's user tax, which the City *calls* a franchise fee. It thus constitutes *precisely* what the voters adopted article XIII C of the California Constitution to preclude: a “tax increase[] disguised via euphemistic relabeling as ‘fees,’ ‘charges,’ or ‘assessments.’” (*Apartment Assn. of Los Angeles County, Inc. v. City of Los Angeles* (2001) 24 Cal.4th 830, 839 [102 Cal. Rptr. 2d 719, 14 P.3d

930].) Consistent with our *duty*, as established [****45] by the voters themselves, to “liberally construe[]” article XIII C of the California Constitution “to effectuate [the] purpose[] of limiting local government revenue and enhancing taxpayer consent” (Prop. 218, § 5, reprinted at 1 Stats. 1996, p. A-299), I conclude that the charge is invalid because the City imposed it on SCE’s customers without voter approval.

The majority cites no support for its conclusion that a charge imposed on and paid by someone who is granted nothing in return is not a tax as to that person so long as *someone else* receives franchise rights for the payment. Indeed, as I explain below, the majority’s analysis is inconsistent with our case law. And the line the majority draws between a valid franchise fee and a tax—whether the amount of the charge to a utility’s customers bears a reasonable relationship to the value the entity receives—is problematic in many ways and renders long-standing statutory provisions regarding utility franchises vulnerable to constitutional challenge. For all of these reasons, I dissent.

I. FACTUAL AND LEGAL BACKGROUND

In 1887, SCE’s predecessor, the Santa Barbara Electric Company, began supplying electricity in the City. In 1959, the City, pursuant to an agreement with SCE, adopted Ordinance [****46] No. 2728 granting SCE a 25-year franchise to use public property to transmit and distribute electricity. The ordinance required SCE to pay the City 2 percent of its “gross annual receipts ... arising from the use, operation or possession of [the] franchise,” with a minimum payment of one-half percent of SCE’s “gross annual receipts derived ... from the sale of electricity within the [City’s] limits ... under both” the franchise being granted by the ordinance and SCE’s separate and preexisting “constitutional franchise.” The ordinance specified that the City was granting the franchise “under and in accordance with the provisions of [***881] [the] Franchise Act of

1937.”¹

In 1985, after the 1959 franchise expired, the City, pursuant to another agreement with SCE, adopted Ordinance No. 4312 granting SCE a 10-year [*276] franchise to use public property to transmit and distribute electricity. “[A]s compensation,” the ordinance required SCE to pay to the City 2 percent of its “annual gross receipts ... arising from the use, operation or possession of th[e] franchise,” with a minimum payment of 1 percent of SCE’s “annual gross receipts derived ... from the sale of electricity within the limits of [the] [****47] City under both” the franchise being granted by the ordinance and SCE’s separate and preexisting “constitutional franchise.” [**228] The 1985 ordinance also required SCE to “collect for [the] City any utility users tax imposed by [the] City.” This provision reflected the City’s imposition in 1970 of “a tax” on “every person in” the City using electricity in the City. (Santa Barbara Ord. No. 3436.) The amount of the tax was initially three percent “of the charges made for” use of electricity. (*Ibid.*) In 1977, the City doubled the tax to 6 percent. (Santa Barbara Ord. No. 3927, amending Santa Barbara Mun. Code, § 4.24.030; see Santa Barbara Ord. No. 4289 (1984), amending Santa Barbara Mun. Code, tit. 4.)

The year after the City doubled its electricity users tax, California voters passed Proposition 13. As the majority notes, Proposition 13 amended our Constitution to limit increases in the assessed value of real property to 2 percent per year (absent a change in ownership) and to limit the rate of taxation on real property to 1 percent of its assessed value. (Maj. opn., *ante*, at p. 258.) In order to prevent these tax savings from being offset by increases in state and local taxes, Proposition 13 also amended [****48] our Constitution to require approval by two-thirds of the local electors of a

¹ Charter cities are not required to apply the Franchise Act of 1937 (the 1937 Act) (Pub. Util. Code, § 6201 et seq.), but may voluntarily follow its provisions. (Pub. Util. Code, § 6205; all further unlabeled statutory references are to the Public Utilities Code.)

city, county, or special district in order for such a local entity to impose or raise special taxes. (Maj. opn., *ante*, at p. 258.) Since the voters enacted these limits on the City's taxing powers, the City has not *formally* increased the percentage of its electricity users tax.

However, in 1999, the City informally and effectively increased this tax by passing the Ordinance, which codified a new franchise agreement with SCE and required users of electricity within the City to pay an additional 1 percent of their electrical bill. According to the parties' stipulated facts, this charge began as a proposal from "City staff," "[d]uring the negotiations for the new franchise agreement," to "increase[] [the] annual 'franchise fee'" from 1 percent of SCE's gross receipts for electricity sold within the City—the amount under the expiring agreement—to 2 percent. "City staff" proposed the increase in order "to raise additional revenues for the City for general City governmental purposes." "After a period of negotiations," SCE said it would agree "to remit to the City a two percent ... franchise fee provided that the City [****49] agreed that the increase in the franchise fee would be payable to the City only if the California Public Utilities Commission ... consented to SCE's request that it be allowed to include the additional 1% amount as a customer surcharge on the bills of SCE to its customers in the City." City [***882] staff and SCE [*277] reached agreement "[o]n that basis" and the City Council later adopted the tentative agreement as Ordinance No. 5135 (Dec. 7, 1999).

The Ordinance granted SCE a franchise to use public property to construct and operate an electric transmission system. It provided for an "Initial Term" of three years—January 1, 2000, through December 31, 2002—and set the payment for that term at 1 percent of SCE's "Gross Annual Receipts." (Ord., §§ 3.A, 5.) The Ordinance also provided for an "Extension Term" beginning 60 days after the Public Utilities Commission (PUC) approved an "Extension Term Fee" and ending

December 31, 2029. (Ord., § 3.B.) The total Extension Term Fee was 2 percent of SCE's Gross Annual Receipts, and comprised two elements: (1) the 1 percent Initial Term Fee; and (2) a 1 percent "Recovery Portion." (Ord., § 5.B.) Like the City's electricity users tax, the Recovery Portion [****50] was to be collected from "all electric utility customers served by [SCE] within the boundaries of the City" and was "based on consumption or use of electricity." (*Ibid.*) SCE's "obligation" was "to levy" the Recovery Portion on its customers, "collect" this payment from its customers, and "deliver" the collected amount "to [the] City." (Ord., § 5.C.) In other words, according to the parties' stipulated facts, the Ordinance "obligate[d]" all persons in the City receiving electricity from SCE "to pay" the Recovery Portion, and "require[d] [SCE] to collect" the Recovery Portion "from" its City customers "and remit [it] to" the City. The Ordinance made PUC approval of the Extension Term Fee a "condition[] precedent to" SCE's "obligation ... to levy, collect, and deliver to [the] City the Recovery Portion." ² [**229] If that approval was not obtained by the end of the Initial Term—December 31, 2002—the franchise would "continue on a year to year basis at the Initial Term Fee"—1 percent of gross revenues—until terminated by either party upon written notice.

In April 2001, the City and [****51] SCE agreed to delay for up to two years the filing with the PUC of a request for approval of the Extension Term Fee. In December 2004, almost three years later, the City directed SCE to submit the request. During that period, the only compensation SCE paid the

² A utility may, "at its discretion," request permission from the PUC to set forth separate charges on certain of their customers' bills when a local governmental entity imposes upon the utility "[f]ranchise, general business license, or special taxes and/or fees ... [that] in the aggregate significantly exceed the average aggregate of taxes or fees imposed by the other local governmental entities within the public utility's service territory." (*Re Guidelines for the Equitable Treatment of Revenue-Producing Mechanisms Imposed by Local Government Entities on Public Utilities* (1989) 32 Cal.P.U.C.2d 60, 73.)

City for the franchise was the Initial Term Fee. SCE eventually submitted the request on March 30, 2005, asking for approval “to bill and collect from its customers within the City ... a 1.0% electric franchise surcharge to be remitted to the City by SCE as a pass-through fee, pursuant to SCE's new franchise agreement with the City.” The request explained that the new franchise [*278] agreement “expressly provides for the additional amount to be surcharged to SCE's customers within the City,” and requires PUC approval “in order for SCE to bill and collect the additional franchise surcharge for the City.” The request also explained that, upon the PUC's approval, SCE would “bill and collect the surcharge revenues and pass through the revenues directly to the City.” [***883] On April 20, 2005, the PUC granted SCE's request.

In November 2005, SCE began billing the Recovery Portion to, and collecting it from, customers in the City, and remitting [****52] those revenues in their entirety to the City. At first, the City apportioned the revenues in accordance with the Ordinance, i.e., half to the City's general fund and half to a City undergrounding projects fund. In November 2009, the City directed that all revenues from the Recovery Portion be placed in its general fund without any limitation on use.

II. DISCUSSION

Plaintiffs Rolland Jacks and Rove Enterprises, Inc., claim that the City, by imposing the Recovery Portion through adoption of the Ordinance, violated article XIII C of the California Constitution. As here relevant, article XIII C provides that “local government[s]” may not “impose ... any general tax ... until that tax is submitted to the electorate and approved by a majority vote” (Cal. Const., art. XIII C, § 2, subd. (b)), and may not “impose ... any special tax ... until that tax is submitted to the electorate and approved by a two-thirds vote” (*id.*, § 2, subd. (d)). Plaintiffs argue that the Recovery Portion is a tax within the meaning of these provisions and that the City violated article XIII C

by imposing it without voter approval.

In opposition to this argument, the City focuses heavily on the word “impose” in California Constitution, article XIII C's provisions, asserting that the Recovery Portion was not “imposed” *by the City* on anyone. According [****53] to the City, the Recovery Portion is, as to SCE, a “voluntary” payment to which SCE, a “sophisticated, commercial entit[y] with substantial market power,” “willingly agreed” in order “to obtain use of valuable public rights of way in its for-profit business.” As to SCE's customers, SCE and/or the PUC “imposed” the Recovery Portion, and the City “played no part in” the decisions of those entities.

The majority correctly rejects these arguments, explaining that the terms of the agreement and the Ordinance require that the Recovery Portion “be collected from” SCE's customers and impose on SCE only an obligation “to collect the charge from its customers and remit the revenue to the City.” (Maj. opn., *ante*, at p. 271.) Indeed, the City's arguments necessarily fail in light of its stipulation that “[p]ursuant to City Ordinance [No.] 5135, all [*279] persons in the City receiving electricity from SCE *are obligated to pay* the 1% Recovery Portion.” (Italics added.)

In a related argument, the City asserts that the Recovery Portion is not “imposed” [**230] on SCE's customers because its “legal incidence”—i.e., the “legal duty to pay it”—“is on SCE.” According to the City, that SCE's customers in fact “ultimately bear[]” the Recovery [****54] Portion's “economic burden” is irrelevant because, under the law, “whether a charge is a tax is determined by its legal incidence.”

The City is correct to focus on the Recovery Portion's legal incidence, but its argument fails because, under the Ordinance, both the legal incidence and the economic burden of the Recovery Portion fall on SCE's customers, not on SCE. The rule in California is that where the government *mandates* payment of a charge by one party, and imposes a duty on some other party to collect the

payment and remit it to the government, the legal incidence of the charge falls, not on the party [***884] collecting the payment—who acts merely as the government's collection agent or conduit—but on the party from whom the payment is, by law, collected. (*Western States Bankcard Assn. v. City and County of San Francisco* (1977) 19 Cal.3d 208, 217 [137 Cal. Rptr. 183, 561 P.2d 273] (*Western States*) [tax ordinances lacked “mandatory pass-on provisions” that would “shift the legal incidence of the tax”]; *Bunker Hill Associates v. City of Los Angeles* (1982) 137 Cal.App.3d 79, 87 [186 Cal. Rptr. 719] [“the legal incidence of a tax does not necessarily fall on the party who acts as conduit by forwarding collected taxes to the state,” and charge imposed on tenants, that lessors were legally required to collect and transmit to the government, was not a tax on lessors]; *Occidental Life Ins. Co. v. State Bd. of Equalization* (1982) 135 Cal.App.3d 845, 850 [185 Cal. Rptr. 779] (*Occidental Life*) [whether “pass [****55] on” of charge is “mandatory” is “legally significant” in determining who bears the charge's “legal incidence”].) Consistent with this rule, in *City of Modesto v. Modesto Irrigation Dist.* (1973) 34 Cal.App.3d 504, 506 [110 Cal. Rptr. 111], the court held that a monthly charge imposed by the City of Modesto for use of water, gas, electricity, and telephone service, “paid by the service user (the consumer), but ... collected by the service supplier,” was “a tax against the utility user, not the utility supplier.”

Under these principles, the legal incidence of the Recovery Portion falls on SCE's customers, not, as the City asserts, on SCE. As noted above, the City has stipulated that SCE's customers “are obligated to pay” the Recovery Portion “[p]ursuant to City Ordinance [No.] 5135,” and that SCE's duty under the Ordinance is “to collect” the Recovery Portion “from all SCE electricity users in the City and remit those funds to the City.” The terms of the Ordinance and the representations in SCE's application for PUC approval, [*280] as set forth above, fully support this stipulation. On this record, it is clear that the Ordinance mandates payment of

the Recovery Portion by SCE's customers and makes SCE the City's collection agent and conduit regarding this payment. Accordingly, the legal incidence [****56] of the Recovery Portion is on SCE's customers.

The City's final argument is that the Recovery Portion is a “franchise fee”—i.e., “a bargained-for price for use of the City's rights of way in SCE's search for profits”—and that under California case law, a franchise fee “is not a tax.” The majority essentially agrees with the City. “Historically,” the majority begins, “franchise fees have not been considered” by California courts to be “taxes,” and “[n]othing in Proposition 218 reflects an intent to change” this rule. (Maj. opn., *ante*, at p. 262.) Putting its own gloss on the City's argument, the majority then concludes that the Recovery Portion is a “franchise fee” and not a tax insofar as its amount “is reasonably related to the value of the franchise.” (Maj. opn., *ante*, at p. 257.) “To the extent [it] exceeds any reasonable value of the franchise,” it “is a tax” rather than a “franchise fee,” because “the excessive portion ... does not come within the rationale that justifies the imposition of fees without voter approval.” (*Id.* at p. 269.)

Whether a charge constitutes a “tax” for purposes of the Constitution “is a question of law for the appellate courts to decide on independent review of the facts.” [****57] (*Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 874 [64 Cal. Rptr. 2d 447, 937 P.2d 1350].) [***885] In answering this question, we [**231] should not, as the majority appears to do, rely on the circumstance that the charge is “nominally a franchise fee.” (Maj. opn., *ante*, at p. 271.) In determining whether a charge is a tax, courts “are not bound by what the parties may have called the liability” (*Bank of America v. State Bd. of Equal.* (1962) 209 Cal.App.2d 780, 801 [26 Cal. Rptr. 348] (*Bank of America*)), and are “not to be guided by labels” (*Beamer v. Franchise Tax Board* (1977) 19 Cal.3d 467, 475 [138 Cal. Rptr. 199, 563 P.2d 238]) or “bare legislative assertion” (*Flynn v. San Francisco*

(1941) 18 Cal.2d 210, 215 [115 P.2d 3]). Instead, their “task is to determine the[] true nature” of the charge (*Beamer v. Franchise Tax Board, supra*, at p. 475), based on “its incidents” and “the natural and legal effect of the language employed in” the enactment (*Ainsworth v. Bryant* (1949) 34 Cal.2d 465, 473 [211 P.2d 564]). This general principle is especially applicable here for two reasons: (1) Proposition 218's “main concern” was “perhaps” the “euphemistic relabeling” of taxes “as ‘fees,’ ‘charges,’ or ‘assessments’” (*Apartment Assn. of Los Angeles County, Inc. v. City of Los Angeles, supra*, 24 Cal.4th at p. 839), and (2) Proposition 218 expressly required courts to “liberally construe[]” article XIII C “to effectuate its purposes of limiting local government revenue and enhancing taxpayer consent” (Prop. 218, § 5, reprinted at 1 Stats. 1996, p. A-299).

[*281]

Given the City's argument, the question here is whether the Recovery Portion, in light of its incidents, constitutes the type of charge we have declared [****58] to be a franchise fee instead of a tax. One of our earliest decisions to discuss this type of charge is *County of Tulare v. City of Dimuba* (1922) 188 Cal. 664 [206 P. 983] (*Tulare*). There, we held that the annual payment imposed by the Broughton Act (§ 6001 et seq.) on the successful bidder for a franchise to provide electricity—2 percent of gross annual receipts from the use, operation or possession of the franchise—is “neither a tax nor a license.” (*Tulare*, at p. 670.) Instead, it is a “charge” that “the holder of the franchise undertakes to pay as part of the consideration for the privilege of using the avenues and highways occupied by the public utility [¶] It is purely a matter of contract. . . . [I]t is a matter of option with the applicant whether he will accept the franchise on those terms. His obligation to pay is not imposed by law but by his acceptance of the franchise.” (*Ibid.*)

Tulare makes clear that the Recovery Portion, irrespective of its relationship to the value of the franchise SCE received, is not a franchise fee for

purposes of the rule that a franchise fee is not a tax. As explained above, the Recovery Portion is not a charge that “the holder of the franchise”—SCE—“undert[ook] to pay.” (*Tulare, supra*, 188 Cal. at p. 670.) Indeed, as the majority correctly states, the terms [****59] of the Ordinance “belie” this characterization, establishing instead that SCE did not “assume[] a burden to pay” the Recovery Portion. (Maj. opn., *ante*, at p. 270.) And the City's factual stipulation that the Ordinance “obligated” SCE's customers “to pay” the Recovery Portion conclusively establishes that *their* “obligation to pay” the Recovery Portion was, in fact, “imposed by law,” not by *their* “acceptance of the franchise.” (*Tulare*, at p. 670.) Indeed, SCE's customers did not receive a franchise, which, as the majority explains, “is a privilege granted by the [***886] government to a particular individual or entity rather than to all as a common right.” (Maj. opn., *ante*, at p. 254, fn. 1.) The Ordinance granted them no legal right to make any use of the City's property or to conduct a franchise for supplying electricity. In short, the Recovery Portion simply lacks the incidents of a franchise fee for purposes of the rule that franchise fees are not taxes. “To call it a fee” rather than a tax is simply “a transparent evasion.” (*Fatjo v. Pfister* (1897) 117 Cal. 83, 85 [48 P. 1012].)

Although the majority recognizes the principles underlying the rule that franchise fees are not taxes, it fails to apply them. The majority observes that “a franchise fee is the [****60] purchase price of the franchise” (maj. opn., *ante*, at p. 262), but it does not explain how the Recovery Portion, which the City has imposed on [**232] someone *other than the purchaser* of the franchise, meets this test. The majority explains that “sums paid for the right to use a jurisdiction's rights-of-way are fees rather than taxes” because “the receipt of an interest in public property justifies the imposition of a charge *on the recipient* to compensate the public for the value received.” (*Id.* at p. 267, italics added.) [*282] But the Recovery Portion is not imposed “on the recipient” of the interest in public property. (*Ibid.*) The majority explains that

“restrictions on taxation do not encompass amounts *paid in exchange for* property interests” (*id.* at p. 262, italics added), and that what “distinguishes” a valid charge “from a tax is the receipt of value *in exchange for the payment*” (*id.* at p. 268, italics added). But SCE's customers do not receive any property interest or value “in exchange for” paying the Recovery Portion. (*Ibid.*) In short, the Recovery Portion lacks the “historical characteristics of franchise fees” that the majority identifies from our decisions. (*Id.* at p. 257.) It therefore [****61] does not, to use the majority's own words, “come within the rationale that justifies” (*id.* at p. 269) the rule that franchise fees are not taxes.

According to the majority, in determining whether the Recovery Portion is a franchise fee rather than a tax, it is irrelevant that SCE's customers “pay the surcharge” while “SCE receives the franchise rights,” that SCE's customers “do not receive any value in exchange for their payment,” and that the City is requiring SCE's customers “to compensate the City for *the utility's* use of public property.” (See maj. opn., *ante*, at pp. 268–269, italics added.) The stated basis for this view is that “publicly regulated utilities are allowed to recover their costs and expenses by passing them on to their ratepayers,” and are therefore merely “conduit[s] through which government charges are ultimately imposed on ratepayers.” (*Ibid.*) Given this circumstance, the majority reasons, it makes no difference that the Recovery Portion is an obligation the City imposes directly on SCE's customers, instead of a contractual obligation of SCE that SCE “unilateral[ly]” decides to pass on to its customers. (*Id.* at p. 269.) The City, the majority asserts, should not be “precluded” from showing that the Recovery Portion [****62] bears a reasonable relationship to the value of the property interest it conveyed to SCE merely because the Ordinance *expressly mandates* what would have been “implicit” had SCE agreed to pay the Recovery Portion itself—“that once the PUC gave its approval, [***887] SCE would place the surcharge on the bills of customers within the City.” (*Ibid.*)

For a number of reasons, I disagree. First, the majority's view is inconsistent with our case law, which, as explained above, establishes that a franchise fee—as distinguished from a tax—is a “charge [that] *the holder of the franchise undertakes to pay*,” i.e., an “obligation to pay” that is “purely a matter of contract” and that is “imposed” on the payor “not ... by law but by *his* acceptance of the franchise.” (*Tulare, supra*, 188 Cal. at p. 670, italics added.) As also explained above, the Recovery Portion is *not* a charge that “the holder of the franchise undert[ook] to pay,” and it *is* imposed by the City on SCE's customers “by law” instead of by *their* “acceptance of [any] franchise.” (*Ibid.*) The majority cites no authority for its conclusion that a [*283] charge imposed by law on one person to pay for *someone else's* right to use public property in a business is a franchise fee rather than a tax. [****63] ³

[**233] Second, the majority fails to explain why SCE's purported unfettered ability to pass on to customers charges it contractually agrees to pay means that whether the charge is a tax *on its customers* depends on the value of the franchise *to SCE*. Had SCE contractually agreed to pay the Recovery Portion itself, it could *not* assert that the charge was a tax to the extent it exceeds the value of the franchise rights. As we have explained, because a municipality's power to permit utilities to

³According to the majority, by adding a definition of “tax” to California Constitution, article XIII C and excepting from that definition “[a] charge imposed for entrance to or use of local government property, or the purchase, rental, or lease of local government property,” Proposition 26, approved by voters at the November 2, 2010 General Election, “confirmed” that “restrictions on taxation do not encompass amounts paid in exchange for property interests.” (Maj. opn., *ante*, at p. 263.) As the majority elsewhere acknowledges, Proposition 26 is not at issue here because “no party contends that it applies to the charges in this case.” (Maj. opn., *ante*, at p. 260, fn. 4.) Moreover, nothing in Proposition 26 indicates that a charge imposed on one party for *someone else's* use of government property comes within the exception the majority quotes. To the extent the majority's analysis suggests otherwise, it is dictum. Nor does anything in Proposition 26 support the majority's rule that payments for the privilege to use public property *are* taxes to the extent they exceed “the value of the franchise conveyed.” (Maj. opn., *ante*, at p. 270.)

use public property “on such terms as are satisfactory to it” includes the power to “require the payment of such compensation as seems proper,” courts do not “question whether or not the amount charged is a reasonable charge.” (*Sunset Tel. and Tel. Co. v. Pasadena* (1911) 161 Cal. 265, 285 [118 P. 796] (*Sunset*.) And if, as the majority asserts, the utility in this scenario is merely “a conduit through which government charges are ultimately imposed on ratepayers” (maj. opn., *ante*, at p. 269), then there is no logical reason why the value of the benefit *to the utility* would be the proper measure of whether the charge is a tax *as to the utility's customers*. Nor is there any logical reason for making this the test where, as here, a municipality imposes [****64] the charge directly on those customers.

Indeed, the majority's conclusion in this regard is inconsistent with its own discussion of the very case law on which it principally relies. As the majority explains, our prior decisions identify “categories of charges” that constitute valid “fees rather [***888] than taxes” for purposes of applying Proposition 13. (Maj. opn., *ante*, at p. 260.) “The commonality among these categories,” the majority states, “is the relationship between the charge imposed and a benefit ... *to the payor*.” (*Id.* at p. 261, italics added.) For example, the majority observes, “we [have] explained ... that ‘if an assessment for ... improvements provides a special benefit to the assessed properties, then the assessed property owners should pay for the benefit *they receive*.’” (*Ibid.*, italics added.) Under these cases, the majority states, a purported fee is a tax for [*284] purposes of Proposition 13 to the extent it exceeds “the special benefit received *by the payor*.” (Maj. opn., *ante*, at p. 261, italics added.)

A closer look at our assessment decisions reveals that a nexus between the benefit conferred and the person *paying the charge* is a prerequisite to concluding that the charge is not a tax. As we explained [****65] over 100 years ago, “the compensating benefit to the property owner” on whom the government imposes a charge for an

improvement “is the warrant, and the sole warrant, for” finding that the charge is a valid assessment rather than a tax. (*Spring Street Co. v. City of Los Angeles* (1915) 170 Cal. 24, 30 [148 P. 217].) Thus, “if we are not able to say that the owner for the specific charge imposed is compensated by the increased value of the property, then most manifestly we have a special tax.” (*Ibid.*) In other words, an assessment levied upon property owners “without regard to the benefit actually accruing *to them* by means of the improvement, is a tax.” (*Creighton v. Manson* (1865) 27 Cal. 613, 627, italics added.) The majority purports to reaffirm and follow these decisions insofar as they set forth “the characteristics of fees that may be imposed without voter approval” (maj. opn., *ante*, at p. 261), but it then eliminates the *principal* characteristic it itself identifies: “the relationship between the charge imposed and a benefit ... *to the payor*” (*ibid.*, italics added).⁴

The charge the majority here says is a valid fee differs in another significant respect [**234] from the charges we have previously held to be permissible fees instead of taxes: the [****66] measure of what is permissible. As the majority observes, as to all of the charges for benefits we have dealt with in prior cases, we have held that they are “taxes” to the extent they “exceed the reasonable *cost* of the activity on which they are based.” (Maj. opn., *ante*, at p. 261, italics added.) This is true even of property assessments; although a given property may be assessed based on the proportionate share of the benefit it receives from a government improvement, the assessment is a valid fee rather than a tax only to the extent it does not exceed the proportionate *cost* of the improvement

⁴ The majority's analysis is likewise out of step with decisions from other jurisdictions holding that, to constitute a valid fee instead of a tax, a charge must be “based on a special benefit conferred *on the person paying the fee*.” (*Home Builders Assn. v. West Des Moines* (Iowa 2002) 644 N.W.2d 339, 347, italics added; see *American Council of Life Insurers v. DC Health* (D.C. Cir. 2016) 815 F.3d 17, 19 [whether charge is a fee or a tax depends on whether there is a “match between the sum paid and the ... benefit provided, *as seen from the payers' perspective*” (italics added)].)

to the government. (*Knox v. City of Orland* (1992) 4 Cal.4th 132, 142, fn. 15 [14 Cal. Rptr. 2d 159, 841 P.2d 144].) In other words, “an assessment [***889] is not measured by the precise amount of special benefits enjoyed by the assessed property,” but “reflects costs allocated according to relative benefit received.” (*Town of Tiburon v. Bonander* (2009) 180 [*285] Cal.App.4th 1057, 1081 [103 Cal. Rptr. 3d 485].) Thus, “an assessment exceeding the cost of the improvement, so as to furnish revenue to the city” constitutes a tax. (*City of Los Angeles v. Offner* (1961) 55 Cal.2d 103, 109 [10 Cal. Rptr. 470, 358 P.2d 926].) Consistent with these common law principles, Proposition 218 amended the state Constitution to provide that “[n]o assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.” (Cal. Const., art. XIII D, § 4, subd. (a).) Thus, [****67] were a city, in order to raise revenue for general purposes, to impose a charge to recover the amount by which the benefit conferred by a government improvement exceeds the cost, the charge would be a tax.

The majority here affords different treatment to the general revenue-raising measure at issue. It holds that cost is irrelevant, and that a charge labeled a “franchise fee” becomes a tax as to a utility's customers only to the extent the charge exceeds “the value” to the utility of “the property interests transferred” (maj. opn., *ante*, at p. 270), “the value of the franchise conveyed” (*ibid.*), or “the value of the franchise rights” (*id.* at pp. 270–271). Contrary to the majority's analysis, our prior decisions clearly do *not* provide support for the line the majority draws between a valid fee and a tax, or for its conclusion that the method the City used here to raise money for general purposes is, uniquely, not a tax. And because there is no existing authority for the majority's newly minted approach, the majority is incorrect that focusing on the fact the Recovery Portion is directly imposed by the City on SCE's customers “preclude[s]” the City from doing something it otherwise could, i.e., proving the charge [****68] is a fee rather than a tax by

“establishing that [it] bears a reasonable relationship to the value of the property interest it conveyed to SCE.” (*Id.* at p. 269.)

Third, there is no factual or legal basis for the majority's assumption that a utility, through price increases, *necessarily* can and will pass on to its customers charges it is legally required to pay. With respect to the sales tax, we have observed that a retailer “may choose simply to absorb the sales tax” imposed by statute instead of passing it on to its customers. (*Loeffler v. Target Corp.* (2014) 58 Cal.4th 1081, 1103 [171 Cal. Rptr. 3d 189, 324 P.3d 50].) A utility could make a similar business decision with respect to higher payments it has become contractually obligated to pay in exchange for its right to operate; it could, for reasons related to the marketplace, simply decline to pass the increase on to its customers.

Moreover, in order to pass charges on to customers through a price increase, a utility would have to apply for and obtain approval from the PUC. Under our Constitution, the PUC has both the power and the duty to “fix rates” for California public utilities (Cal. Const., art. XII, § 6), such that the [*286] charges they demand for service are “just and reasonable” (§ 451; see *Southern California Edison Co. v. Peevey* (2003) 31 Cal.4th 781, 792 [3 Cal. Rptr. 3d 703, 74 P.3d 795]). This constitutional power, we have observed, [****69] includes the “power to prevent a utility from passing on to the ratepayers unreasonable costs for materials and services.” (*Pac. Tel. & Tel. Co. v. Public Utilities Com.* (1950) 34 Cal.2d 822, 826 [215 P.2d 441] (*Pac. Tel.*)) [***890] We have also [**235] observed that where “the safeguards provided by arms-length bargaining are absent,” the PUC, in exercising its constitutional power, has “been vigilant to protect the rate-payers from excessive rates reflecting excessive payments.” (*Ibid.*)

In one especially relevant example of its exercise of this power, the PUC disallowed, for purposes of a requested rate increase, contractual payments a utility made to its controlling parent company for

various services. (*Pac. Tel., supra*, 34 Cal.2d at p. 825.) The contract between the two entities specified that the amount of the payment was 1 percent of the utility's gross receipts. (*Ibid.*) In disallowing these payments as a basis for a rate increase, the PUC reasoned that the utility “exercise[d] no real, untrammled and independent judgment in its negotiations” with its parent company and that “arms-length bargaining” between the two entities was “not, in fact, engaged in, although ... in some instances” they had “made [an attempt] to simulate the same.” (Dec. No. 42529 (1949) 48 Cal.P.U.C. 461, 470.) The PUC further reasoned that the formula for the amount [****70] of the payments—a “percentage of gross revenues”—was “a false measuring rod”: it was “totally unrealistic and [bore] no rational relationship to the reasonable cost of services rendered, reflect[ed] no causal or proximate connection or relationship between payments made thereunder and reasonable value of the services rendered and [was] neither supported by law, logic nor elementary common sense.” (*Id.* at p. 472.) The utility's “payment of these excessive amounts,” the PUC concluded, did not support the utility's request for a rate increase. (*Ibid.*)

Nothing would preclude the PUC from finding, for similar reasons, that it would not be just and reasonable for a utility, having agreed to pay a city double what it had paid for many years as compensation for using public property, to raise its rates in order to recoup from customers the doubled cost to which it agreed. Nor would anything preclude the PUC from finding that where the utility's duty to pay the increase was expressly made contingent on the utility's ability to recoup the expense from its customers, the increase was not “based on bona fide negotiations.” (Maj. opn., *ante*, at p. 270.) Indeed, the majority rightly questions whether “the negotiations” [****71] here, which placed responsibility for paying the Recovery Portion on SCE's ratepayers and imposed no financial responsibility for that charge on SCE, reasonably reflect “the value” of what SCE received from the City. (*Id.* at p. 271.) And where

the payment is set as a percentage of a utility's gross annual receipts, the PUC could also find that the formula is “a false measuring rod,” i.e., it “bears [*287] no rational relationship to” the value of what the utility is receiving. (Dec. No. 42529, *supra*, 48 Cal.P.U.C. at p. 472.) In short, had SCE agreed to pay the Recovery Portion and then applied for a rate increase to pass on the charge to its customers, the PUC could have “disallow[ed] expenditures that it [found] unreasonable, thus insuring that any excessive costs [would] be met from [SCE's] profits. The effect of the payments on rates and services [would have been] no greater than in any other case where the [PUC] and management disagree on the reasonableness of an expenditure, and the management concludes that it is good business judgment to make such payments from its profits despite the fact that it cannot recoup them from its rate payers.” (*Pac. Tel., supra*, 34 Cal.2d at p. 832.) [***891] The majority ignores this precedent in assuming that [****72] a utility, through rate increases, necessarily can pass on to its customers any and all charges it has agreed to pay.

Indeed, the facts in the record indicate that SCE and the City did not share the majority's assumption. As the majority explains, the record shows “that SCE was not willing to assume the burden of paying” the additional 1 percent the City demanded, and “was willing only to collect the charge from its customers and remit the revenue to the City.” (Maj. opn., *ante*, at p. 271.) It is for this reason that the agreement and the Ordinance provided that “the charge would be collected from ratepayers” and “would become payable only if SCE obtained the PUC's consent to include the surcharge as a customer surcharge.” (Maj. opn., *ante*, at p. 271.) Moreover, as explained [***236] above, although the agreement required SCE to *obtain* PUC approval by December 31, 2002, SCE and the City agreed not even to *apply* for PUC approval until over two years later, in March 2005. According to a letter from the City to SCE, the delay was “[b]ased” in part “upon the tremendous uncertainty associated with the end of the [California] deregulation transition period ... and the volatility and

uncertainty of rates.” Were it true, as the [****73] majority assumes, that SCE necessarily could have passed on the Recovery Portion to its customers, there would have been no reason for SCE to have refused legal responsibility for the proposed charge, for SCE and the City to have made the Recovery Portion contingent on “the PUC’s consent to include the surcharge as a customer surcharge” (maj. opn., *ante*, at p. 271), or for SCE and the City to have delayed submission of the application for PUC approval. In other words, as plaintiffs assert, the facts in the record indicate that, unlike the majority, SCE and the City did not consider the PUC to be “a mere rubber stamp of financial burdens” SCE and the City “might try to impose upon utility users.”

Fourth, the majority’s approach, in addition to being inconsistent with our case law, is fundamentally inconsistent with Proposition 218’s purpose. The majority, partially quoting the first two sentences of Proposition 218’s findings and declarations, suggests that the voters were “concern[ed] with excessive fees, not fees in general.” (Maj. opn., *ante*, at p. 262.) But the [*288] majority ignores the very next sentence of the findings and declarations: “This measure protects taxpayers by limiting the methods by [****74] which local governments exact revenue from taxpayers without their consent.” (Prop. 218, § 2, reprinted at 1 Stats. 1996, p. A-295.) Proposition 218 expressly provided that article XIII C “shall be liberally construed to effectuate” this goal, i.e., “limiting local government revenue and enhancing taxpayer consent.” (Prop. 218, § 5, reprinted at 1 Stats. 1996, p. A-299.) The majority also ignores the ballot arguments in favor of Proposition 218, which (1) warned that “politicians [had] created a loophole in the law that allows them to raise taxes without voter approval by calling taxes ‘assessments’ and ‘fees,’” and (2) stated that “Proposition 218 guarantees your right to vote on local tax increases—even when they are called something else, like ‘assessments’ or ‘fees’ and imposed on homeowners.” (Ballot Pamp., Gen. Elec. (Nov. 5, 1996) argument in favor of Prop. 218, p. 76.) The

record here shows that the City imposed the Recovery Portion on SCE’s customers in order to raise revenue for [***892] general governmental purposes. The charge clearly constitutes one of the “revenue-producing mechanisms” that, as the majority explains, local governments [****75] adopted because “voters restricted [their] taxing authority.” (Maj. opn., *ante*, at p. 266.) By holding that the City may raise revenue from SCE’s consumers by calling the charge a franchise fee, even though those paying the fee receive no franchise, the majority sanctions this obvious evasion of Proposition 218 and allows the City to use the utility as a middleman for what is a tax disguised as a fee, in derogation of Proposition 218’s express purpose and liberal construction clause.

Fifth, the majority’s concern about the *possible* treatment of charges passed on to ratepayers by a utility’s “unilateral decision” does not justify its refusal to recognize the significance under our case law of the fact that SCE’s customers do not receive franchise rights in exchange for paying the Recovery Portion, and its focus instead on the value of those rights to an entity that is not paying for them. (Maj. opn., *ante*, at p. 269.) Initially, the facts of this case do not present that scenario, and holding here that the Recovery Portion is a tax rather than a franchise fee because SCE’s customers receive no franchise rights in return for their payment would not preclude ratepayers from arguing *in a [****76] future case* that we should *expand California Constitution, article XIII C*’s reach to franchise charges that a utility, having contractually agreed to pay, unilaterally decides to pass on to its customers. The majority’s concern about this scenario does not justify its *contraction* of article XIII C so as to make it inapplicable where it clearly does and should apply: direct [**237] government imposition of a charge on those who receive nothing in return.

In any event, the majority’s analysis is contrary to decades of California case law establishing that, for purposes of determining whether a charge is a tax

or a fee as to the payor, charges passed on to the payor by the unilateral [*289] and discretionary decision of some third party are, in fact, different from charges legally imposed on the payor by the government. (E.g. *Western States, supra*, 19 Cal.3d at pp. 217–218; *Western L. Co. v. State Bd. of Equalization* (1938) 11 Cal.2d 156, 162–164 [78 P.2d 731] (*Western L.*.) The majority simply ignores these cases in reasoning that the two types of charges must be treated the same. (Maj. opn., *ante*, at p. 269.)

Indeed, the effect of the majority's approach is to allow claims that this long-standing and unbroken line of precedent precludes. Under that precedent, a charge that is not imposed by the government on the payor—either directly or by inclusion of a [****77] mandatory pass-on provision—and that is passed on to the payor by the unilateral and discretionary decision of some third party, is not a tax, even if it is “implicit” (maj. opn., *ante*, at p. 269) that the third party on whom the charge is imposed will pass it on to the payor. Notably, in *Howard Jarvis Taxpayers Assn. v. City of Fresno* (2005) 127 Cal.App.4th 914, 927 [26 Cal. Rptr. 3d 153], the court applied this principle to hold that a charge the City of Fresno had imposed on a utility, and that the utility had passed on to its customers, was not “a tax on utilities consumers” within the meaning of California Constitution article XIII C. The court explained that “[a]n exaction imposed on any particular ratepayer in an amount established in the discretion of the utility ... is not an exercise of the city's taxing power.” (*Howard Jarvis, at p. 927.*) [***893] Applying this principle, it held that the charge at issue was “not a tax upon consumers of utilities” because the legislation establishing it placed “the ‘levy’ directly upon the utility” and did “not require[]” the utility “to recover the ... fee from ratepayers in any particular manner.” (*Ibid.*)⁵

⁵ See *Western States, supra*, 19 Cal.3d at page 217 (charge imposed on nonprofit corporation providing services to banks, that was “recoup[ed]” from banks “by raising” fees, was not a tax on the banks because local ordinance imposing the charge did not “requir[e]” that it “be passed on” to customers); *Western L., supra*,

Courts applying the federal Constitution's prohibition on state taxation of the federal government have used the same analysis specifically with respect to so-called utility [****78] franchise fees. In *U.S. v. City of Leavenworth, Kan.* (D.Kan. 1977) 443 F.Supp. 274, 280–281, a city ordinance provided that an electrical [*290] utility would pay, as a franchise fee, “three percent (3%) of its gross revenue from the sale of electric energy to all customers within city limits, and the utility in turn billed its customers ‘a three percent franchise fee.’ The United States, as a purchaser of electricity from the utility, argued that the fee it had been charged constituted ‘an impermissible tax upon the federal government.’ (*Id.* at p. 281.) The court rejected the argument because the ordinance imposed “[l]egal liability for payment of the exaction” on the utility and ‘contain[ed] no provisions for collection directly from’ the utility's customers and ‘no requirement that [the utility] pass on to’ its customers ‘all or any part of the financial burden of the franchise fee.’” (*Id.* at p. 282.)

Following this decision, in *U.S. v. State of Md.* (D.Md. 1979) 471 F.Supp. 1030, 1032, another federal court rejected the claim of [**238] the United States, again as a purchaser of electricity, that an environmental surcharge the State of Maryland had imposed was a constitutionally invalid tax on the federal government. Although agreeing that the surcharge was a tax—i.e., “an ‘enforced contribution to provide for the support of [the] government’” (*id.* at p. 1036)—the

¹¹ Cal.2d at page 163 (state sales tax is not a tax on consumers even though retailers pass it on to consumers, because tax statute laid “the tax solely on the retailer”); *Occidental Life, supra*, 135 Cal.App.3d at page 849 (sales tax on retailer is a tax on purchasers from whom retailer recoups the charge only if it “must,” “by its terms,” “be passed on to the purchaser”); *Rio Grande Oil Co. v. Los Angeles* (1935) 6 Cal.App.2d 200, 201 [44 P.2d 451] (charge on sale of gasoline is a tax as to the seller, but not as to the consumer, even though statute allows sellers to add the charge to the sale process and “in effect collect the tax from the consumer”); see also *Bank of America, supra*, 209 Cal.App.2d at pages 792–793 (bank's statutory liability for use tax on checks it sold to customers, which by statute was imposed upon the purchaser rather than the seller, was not a tax on the bank).

court [****79] denied relief because the surcharge was not a tax *on the federal government* (*id.* at pp. 1037–1041). By statute, the court first reasoned, the surcharge was “directly imposed on the electric companies” and was their “direct obligation.” (*Id.* at p. 1038.) As to whether the surcharge was a tax on customers of the electric companies, the determinative factor, the court explained, was whether the law “required [the companies] to pass [the charge] on to their customers for payment.” (*Ibid.*, italics added.) The surcharge was not a tax on the federal government, the court then held, because the utilities, although “[authorized] ... to pass [it] on to their customers” (*id.* at p. 1039), were “not required” by law to do so (*id.* at p. 1038.) Notably, in reaching this conclusion, the [***894] court both followed the Kansas franchise fee decision discussed above and distinguished a Minnesota decision holding that “a franchise fee imposed” upon a gas company by a city *was* an unconstitutional tax “as applied to purchases of natural gas by an agency of the United States ... because the city *required* the utility to add the franchise tax to its rates.” (*Id.* at p. 1040, italics added.)

This long-standing and consistent precedent from both California and elsewhere no doubt explains why, as the majority [****80] notes, “plaintiffs do not contend” in this case that the Initial Term Fee “is a tax” that was imposed in violation of the state Constitution. (Maj. opn., *ante*, at p. 269.) However, under the majority's holding that charges passed on by utilities are the same, for tax purposes, as charges imposed directly on ratepayers, plaintiffs now can, and surely will, make this argument. Indeed, the majority expressly states that the differences between the Initial Term Fee and the Recovery [*291] Portion are “unrelated to the character or validity” of these charges. (Maj. opn., *ante*, at p. 269, fn. 10.) Thus, plaintiffs may now allege that even the Initial Term Fee is a tax because it is passed on to them through SCE's rates and it exceeds the value of the franchise rights SCE

received.⁶

In the same way, the majority's holding renders both the Broughton Act and the 1937 Act vulnerable to constitutional challenge. Notwithstanding our holding almost 100 years ago that the fees utilities must pay under the Broughton Act are *not* taxes under the state Constitution (*Tulare, supra*, 188 Cal. at p. 670), under the majority's holding, both these payments and similar payments required by the 1937 Act are invalid taxes to the extent [****81] they are passed on by utilities to customers through rates and they exceed the value of the franchise rights conveyed. Notably, nothing suggests that these statutorily established charges reflect the value of a franchise. Moreover, the majority's holding that the Constitution *requires* courts to determine the value of a franchise would seem to render the 1937 Act unconstitutional insofar as it provides that “[n]o franchise granted under this chapter shall ever be given any value before any court ... in any proceeding of any character in excess of the cost to the grantee of the necessary publication and any other sum paid by it to the municipality therefor at the time of acquisition.” (§ 6263.)

Finally, as a practical matter, the majority's approach is problematic in a number of ways. The majority mentions one: the inherent “difficulties” in “determining the value of a franchise.” (Maj. opn., *ante*, at p. 269.) The majority references several factors it says may bear on value: “market forces” and [**239] “bona fide negotiations.” (*Id.* at pp. 269–270.) It suggests there may be “other indicia of value” (*id.* at p. 270), but it declines to offer any

⁶According to the majority, the Ordinance's treatment of the Recovery Portion “was driven by the PUC's effort to ensure that a local government's higher-than-average charges are not unfairly imposed on ratepayers outside of the local government's jurisdiction.” (Maj. opn., *ante*, at p. 269, fn. 10.) As far as the record discloses, this is true only in the sense that the separate billing procedure the PUC permits, but does not require, utilities to employ enabled the City to *use SCE* to collect the additional 1 percent—which is a disguised tax—only from the City's taxpayers, and not from those who do not pay taxes to the City.

guidance as to what those other indicia might be, instead “leav[ing] th[e] issue to be ad [***895] dressed [****82] by expert opinion and subsequent case law” (*id.* at p. 270, fn. 11). But as we noted over 100 years ago, “[t]here are few subjects on which witnesses are more likely to differ than that of the value of property, and few are more difficult of satisfactory determination.” (*O’Hara v. Wattson* (1916) 172 Cal. 525, 528 [157 P. 608].) We also long ago recognized that “the value of franchises may be as various as the objects for which they exist, and the methods by which they are employed, and may change with every moment of time.” (*San Jose Gas Co. v. January* (1881) 57 Cal. 614, 616.) There are also uncertainties [*292] regarding the other side of the majority’s equation, i.e., the amount of the payment. As we have recognized, a utility’s annual receipts are “a most indefinite,” “elusive,” and “uncertain quantity” that is “dependent upon many conditions.” (*Thompson v. Board of Supervisors* (1896) 111 Cal. 553, 558 [44 P. 230].) Moreover, the total compensation the Ordinance requires for granting the franchise is 2 percent of SCE’s “Gross Annual Receipts.” Given the majority’s view that all costs are necessarily passed along to customers, this entire 2 percent—not just the one percent Recovery Portion—will have to be considered in determining the amount of the charge and whether it bears a “reasonable relationship” to “value.” (Maj. opn., *ante*, at p. 254.) And even were it possible to determine [****83] with any certainty the value of the franchise and the amount of the charge, the majority fails to explain what constitutes a “reasonable relationship” between these amounts. (*Ibid.*) Presumably, exact correspondence is unnecessary, but what is necessary, the majority does not say. As we have explained, “the question whether a contract” that impacts a utility’s rates and services “is reasonable is one on which, except in clear cases, there is bound to be conflicting evidence and considerable leeway for conflicting opinions.” (*Pac. Tel., supra*, 34 Cal.2d at p. 828.)

Perhaps to justify its failure to offer any real

guidance on this admittedly “difficult[]” issue (maj. opn., *ante*, at p. 269), the majority notes that “[t]he parties’ briefs do not consider the means by which franchise rights might be valued.” (*Id.* at p. 270, fn. 11.) But there is a simple explanation for this silence: Neither party has suggested that the value of the franchise should even be a consideration in determining whether the Recovery Portion is a tax or a fee. On the contrary, upon the court’s inquiry at oral argument, the City expressly disclaimed this approach. It asserted that, as to fees voluntarily negotiated for the use of government property, courts should not be concerned [****84] about whether the fee is reasonably related to the benefits, and should not second-guess what a utility is willing to pay for its use of public property. Nor, the City argued, are courts well positioned to second-guess the economic decisions of other branches of government. The City also noted, like the majority, the inherent difficulties of making this kind of determination, asking rhetorically, “what’s the fair and rational rate of a parking meter,” or “to rent a duck boat on the lake at the county fairgrounds,” or “to rent a meeting room at the community center?” Bringing the question back to the facts of this case, the City rightly asked, “What are the limits of [a municipality’s] ability to monetize its rights of way?” Instead, the City urges us to follow “well settled” law by focusing on the “legal incidence” of the Recovery Portion, “i.e., who has a legal duty to pay it.” This test, the City asserts, is “logical” [****896] and “predictable,” is “within the competence of courts to distinguish fees from taxes,” and “better serves the needs of courts and the society they serve.”

[*293]

I agree with the City. Indeed, regarding the City’s comment about monetizing its rights of way, we have explained, [****85] as noted above, that a municipality’s power to permit utilities to use public property “on such terms as are satisfactory to it” includes the power to “require the payment of such compensation as seems proper,” and that courts therefore do not “question whether or not the amount charged is a reasonable charge.” (*Sunset*,

supra, 161 Cal. at p. 285.) It is for these reasons, among others, [**240] that I focus my analysis, as our precedent directs, on the legal incidence of the Recovery Portion, and do not endorse a vague, unprecedented, unworkable, and standardless test that requires courts to determine the extent to which a charge “bear[s] a reasonable relationship to the value of the property interests transferred” (maj. opn., *ante*, at p. 270), “the value of the franchise conveyed” (*ibid.*), or “the value of the franchise rights” (*id.* at p. 271).

There are myriad other ways in which the majority's approach—determining whether the amount of the charge bears a reasonable relationship to the value of the franchise conveyed—is problematic. It essentially requires courts to determine the adequacy of consideration, in contravention of the well-established “general contract principle that courts should *not* inquire into the adequacy of consideration.” [****86] (*Foley v. Interactive Data Corp.* (1988) 47 Cal.3d 654, 679 [254 Cal. Rptr. 211, 765 P.2d 373], italics added; see *Whelan v. Swain* (1901) 132 Cal. 389, 391 [64 P. 560] [“The law does not weigh the *quantum* of the consideration”].) The majority's approach also essentially transfers responsibility for determining the reasonableness of a utility's rates from the PUC to the courts, thus usurping the PUC's *constitutional* power and duty to “fix [utility] rates” (Cal. Const., art. XII, § 6) and supplanting the PUC's far superior ability, relative to courts, to review the reasonableness of rates (*Hansen v. City of San Buenaventura* (1986) 42 Cal.3d 1172, 1183 [233 Cal. Rptr. 22, 729 P.2d 186] [“judicial review of rates is not comparable to regulation by the P.U.C.”]; *County of Inyo v. Public Utilities Com.* (1980) 26 Cal.3d 154, 159–160 [161 Cal. Rptr. 172, 604 P.2d 566] [“PUC maintains an expert, independent staff to investigate rate requests” and “renders an independent decision on each record that it examines,” whereas courts “must limit ... review to the rates established by the involved utility and must depend upon the expert testimony presented by the parties”]; *Sale v. Railroad Commission* (1940) 15 Cal.2d 612, 617–

618 [104 P.2d 38]).

Given these difficulties and the lack of authority for the majority's approach, I disagree with the majority's conclusion that the Recovery Portion is not a tax unless it exceeds the reasonable value of the franchise. Instead, based on long-standing precedent, the purpose of Proposition 218 to limit local government revenue and enhance taxpayer consent, and the command [*294] that we liberally [****87] construe California Constitution, article XIII C to effectuate this purpose, I conclude that the Recovery Portion is a tax that the City may not impose without voter approval. I therefore dissent.

Appellants' petition for a rehearing was denied August 16, 2019. Corrigan, J., did not participate therein. Chin, J., was of the opinion that the petition should be granted.

FRANCES KINLAW et al., Plaintiffs and Appellants, v. THE STATE OF CALIFORNIA et al., Defendants and Respondents

Prior History: [****1] Superior Court of Alameda County, No. 632120-4, Henry Ramsey, Jr., and Demetrios P. Agretelis, Judges.

Disposition: The judgment of the Court of Appeal is reversed.

Core Terms

funds, reimbursement, local agency, school district, costs, state mandate, local government, healthcare, medically indigent, merits, taxpayers, mandates, programs, effective, Finance, new program, obligations, financial responsibility, spending limit, expenditures, subvention, Italics, appropriations limit, appropriations, state-mandated, declaratory, budget, state and county, transferring, injunction

Case Summary

Procedural Posture

Defendant State of California and the Director of the Department of Health Services, challenged an order of the court of appeal (California), which ruled that plaintiffs, medically indigent adults and taxpayers, had standing to seek enforcement of Cal. Const. art., XIII B, § 6. The court of appeal held that their class action seeking declaratory and injunctive relief was not barred by the availability of administrative remedies.

Overview

Plaintiffs, medically indigent adults and taxpayers, filed a class-action suit against defendants, State of California and the Director of the Department of Health Services. Plaintiffs sought enforcement of Cal. Const. art. XIII B, § 6, which imposed on defendant state an obligation to reimburse local agencies for the cost of most programs and services they were required to provide pursuant to a state mandate. Plaintiffs requested restoration of Medi-Cal, from which they were removed under 1982 Stats. ch. 328, or reimbursement to the county for the cost of providing health care to them. The trial court granted summary judgment to defendants. On appeal, the court of appeal held that plaintiffs had standing and that the action was not barred by the availability of administrative remedies. Defendants appealed. The court reversed and concluded that plaintiffs lacked standing. The legislature adopted a comprehensive legislative scheme with the express intent of providing the exclusive remedy for a claimed violation of art. XIII, § 6. The administrative remedy created was adequate to fully implement art. XIII, § 6. Plaintiffs had no right to any reimbursement for health care services.

Outcome

The court reversed and ruled that plaintiffs, medically indigent adults and taxpayers, lacked standing. The legislature established administrative procedures for local agencies and school districts directly affected by a state mandate to seek reimbursement for the cost of programs and services. The legislature's comprehensive scheme

was the exclusive means by which the state's obligations were to be determined and enforced.

HN11[↓] Administrative Law, Judicial Review

A local agency filing a test claim need not first expend sums to comply with the alleged state mandate, but may base its claim on estimated costs. Cal. Gov't Code § 17555. The Commission on State Mandates (Commission) must determine both whether a state mandate exists and, if so, the

amount to be reimbursed to local agencies and school districts, adopting parameters and guidelines for reimbursement of any claims relating to that statute or executive order. Cal. Gov't Code § 17557. Procedures for determining whether local agencies have achieved statutorily authorized cost savings and for offsetting these savings against reimbursements are also provided. Cal. Gov't Code § 17620 et seq. Finally, judicial review of the Commission decision is available through petition for writ of mandate filed pursuant to Cal. Civ. Proc. Code § 1094.5. Cal. Gov't Code § 17559.

Administrative Law > Agency
Rulemaking > State Proceedings

HN12[↓] **Agency Rulemaking, State Proceedings**

The parameters and guidelines adopted by the Commission on State Mandates must be submitted to the controller, who is to pay subsequent claims arising out of the mandate. Cal. Gov't Code § 17558. Executive orders mandating costs are to be accompanied by an appropriations bill to cover the costs if the costs are not included in the budget bill, and in subsequent years the costs must be included in the budget bill. Cal. Gov't Code § 17561(a) and (b). Regular review of the costs is to be made by the legislative analyst, who must report to the legislature and recommend whether the mandate should be continued. Cal. Gov't Code § 17562.

Administrative Law > Agency
Rulemaking > State Proceedings

HN13[↓] **Agency Rulemaking, State Proceedings**

The Commission on State Mandates is also required to make semiannual reports to the legislature of the number of mandates found and the estimated reimbursement cost to the state. Cal. Gov't Code § 17600. The legislature must then

adopt a local government claims bill. If that bill does not include funding for a state mandate, an affected local agency or school district may seek a declaration from the superior court for the County of Sacramento that the mandate is unenforceable, and an injunction against enforcement. Cal. Gov't Code § 17612. Additional procedures, enacted in 1985, create a system of state-mandate apportionments to fund reimbursement. Cal. Gov't Code § 17615 et seq.

The remedy for the failure to fund a program is a declaration that the mandate is unenforceable. That relief is available only after the Commission on State Mandates has determined that a mandate exists and the legislature has failed to include the cost in a local government claims bill, and only on petition by the county. Cal. Gov't Code § 17612.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

Medically indigent adults and taxpayers brought an action pursuant to Code Civ. Proc., § 526a, against the state, alleging that it had violated Cal. Const., art. XIII B, § 6 (reimbursement of local governments for state-mandated new programs), by shifting its financial responsibility for the funding of health care for the poor onto the county without providing the necessary funding, and that as a result

the state had evaded its constitutionally mandated spending limits. The trial court granted summary judgment for the State after concluding plaintiffs lacked standing to prosecute the action. (Superior Court of Alameda County, No. 632120-4, Henry Ramsey, Jr., and Demetrios P. Agretelis, Judges.) The Court of Appeal, First Dist., Div. Two, Nos. A041426 and A043500, reversed.

The Supreme Court reversed the judgment of the Court of Appeal, holding the administrative procedures established by the Legislature (Gov. Code, § 17500 et seq.), which are available only to local agencies and school districts directly affected by a state mandate, were the exclusive means by which the state's obligations under Cal. Const., art. XIII B, § 6, were to be determined and enforced. Accordingly, the court held plaintiffs lacked standing to prosecute the action. (Opinion by Baxter, J., with Lucas, C. J., Panelli, Kennard, and Arabian, JJ., concurring. Separate dissenting opinion by Broussard, J., with Mosk, J., concurring.)

Headnotes

CA(1) [📄] (1)

State of California § 7—Actions—State-mandated Costs—Reimbursement—Exclusive Statutory Remedy.

-- Gov. Code, § 17500 et seq., creates an administrative forum for resolution of state mandate claims arising under Cal. Const., art. XIII B, § 6, and establishes procedures which exist for the express purpose of avoiding multiple proceedings, judicial and administrative, addressing the same claim that a reimbursable state mandate has been created. The statutory scheme also designates the Sacramento County Superior Court as the venue for judicial actions to declare unfunded mandates invalid. In view of the comprehensive nature of the legislative scheme, and from the expressed intent, the Legislature has created what is clearly intended to be a

comprehensive and exclusive procedure by which to implement and enforce Cal. Const., art. XIII B, § 6.

CA(2) [↓] (2)

State of California § 7—Actions—State-mandated Costs—Reimbursement—Private Action to Enforce—Standing.

--In an action by medically indigent adults and taxpayers seeking to enforce Cal. Const., art. XIII B, § 6, for declaratory and injunctive relief requiring the state to reimburse the county for the cost of providing health care services to medically indigent adults who, prior to 1983, had been included in the state Medi-Cal program, the Court of Appeal erred in holding that the existence of an administrative remedy (Gov. Code, § 17500 et seq.) by which affected local agencies could enforce their constitutional right under art. XIII B, § 6 to reimbursement for the cost of state mandates did not bar the action. Because the right involved was given by the Constitution to local agencies and school districts, not individuals either as taxpayers or recipients of government benefits and services, the administrative remedy was adequate to fully implement the constitutional provision. The Legislature has the authority to establish procedures for the implementation of local agency rights under art. XIII B, § 6; unless the exercise of a constitutional right is unduly restricted, a court must limit enforcement to the procedures established by the Legislature. Plaintiffs' interest, although pressing, was indirect and did not differ from the interest of the public at large in the financial plight of local government. Relief by way of reinstatement to Medi-Cal pending further action by the state was not a remedy available under the statute, and thus was not one which a court may award.

Opinion by: BAXTER

Opinion

[*328] [**1309] [***67] Plaintiffs, medically indigent adults and taxpayers, seek to enforce section 6 of [****2] article XIII B (hereafter, section 6) of the California Constitution through an action for declaratory and injunctive relief. They invoked the jurisdiction of the superior court as taxpayers pursuant to Code of Civil Procedure section 526a and as persons affected by the alleged failure of the state to comply with section 6. The superior court granted summary judgment for defendants State of California and Director of the Department of Health Services, after concluding that plaintiffs lacked standing to prosecute the action. On appeal, the Court of Appeal held that plaintiffs have standing and that the action is not barred by the availability of administrative remedies.

[1310] [***68]** We reverse. The administrative procedures established by the Legislature, which are available only to local agencies and school districts directly affected by a state mandate, are the exclusive means by which the state's obligations under section 6 are to be determined and enforced. Plaintiffs therefore lack standing.

I

State Mandates

HN1[↑] Section 6, adopted on November 6, 1979, as part of an initiative measure imposing spending limits on state and local government, also imposes on the state an obligation **[****3]** to reimburse local agencies for the cost of most programs and services which they must provide pursuant to a state mandate if the local agencies were not under a preexisting duty to fund the activity. It provides:

[*329] "**HN2[↑]** Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates:

"(a) Legislative mandates requested by the local agency affected;

"(b) Legislation defining a new crime or changing an existing definition of a crime; or

"(c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975."

A complementary provision, section 3 of article XIII B, provides for a shift from the state to the local agency of a portion of the spending or "appropriation" limit of the state when responsibility for funding an activity is shifted to a local agency:

"The appropriations limit for any **[****4]** fiscal year . . . shall be adjusted as follows: [para.] (a) In the event that the financial responsibility of providing services is transferred, in whole or in part, . . . from one entity of government to another, then for the year in which such transfer becomes effective the appropriations limit of the transferee entity shall be increased by such reasonable amount as the said entities shall mutually agree and the appropriations limit of the transferor entity shall be decreased by the same amount."

II

Plaintiffs' Action

The underlying issue in this action is whether the state is obligated to reimburse the County of Alameda, and shift to Alameda County a concomitant portion of the state's spending limit, for the cost of providing health care services to medically indigent adults who prior to 1983 had been included in the state Medi-Cal program. Assembly Bill No. 799 (1981-1982 Reg. Sess.) (AB 799) (**HN3[↑]** Stats. 1982, ch. 328, p. 1568) removed medically indigent adults from Medi-Cal effective January 1, 1983. At the time section 6 was adopted, the state was funding Medi-Cal coverage for these persons without requiring any county financial contribution.

Plaintiffs initiated this action in **[****5]** the Alameda County Superior Court. They sought relief on their own behalf and on behalf of a class of similarly **[*330]** situated medically indigent adult residents of Alameda County. The only named defendants were the State of California, the Director of the Department of Health Services, and the County of Alameda.

In the complaint for declaratory and injunctive relief, plaintiffs sought an injunction compelling the state to restore Medi-Cal eligibility to medically indigent adults or to reimburse the County of Alameda for the cost of providing health care to those persons. They also prayed for a declaration that the transfer of responsibility from the state-

financed Medi-Cal program to the counties without adequate reimbursement violated the California Constitution.¹

[****6] [**1311] [***69] At the time plaintiffs initiated their action neither Alameda County, nor any other county or local agency, had filed a reimbursement claim with the Commission on State Mandates (Commission).²

Whether viewed as an action seeking restoration of Medi-Cal benefits, one to compel state reimbursement of county costs, or one for declaratory relief, therefore, the action required a determination that the enactment of AB 799 created a state [****7] mandate within the contemplation of section 6. Only upon resolution of that issue favorably to plaintiffs would the state have an obligation to reimburse the county for its increased expense and shift a portion of its appropriation limit, or to reinstate Medi-Cal benefits for plaintiffs and the class they seek to represent.

The gravamen of the action is, therefore, enforcement of section 6.³

¹ The complaint also sought a declaration that the county was obliged to provide health care services to indigents that were equivalent to those available to nonindigents. This issue is not before us. The County of Alameda aligned itself with plaintiffs in the superior court and did not oppose plaintiffs' effort to enforce section 6.

² On November 23, 1987, the County of Los Angeles filed a test claim with the Commission. San Bernardino County joined as a test claimant. The Commission ruled against the counties, concluding that no state mandate had been created. The Los Angeles County Superior Court subsequently granted the counties' petition for writ of mandate (Code Civ. Proc., § 1094.5), reversing the Commission, on April 27, 1989. (No. C-731033.) An appeal from that judgment is presently pending in the Court of Appeal. (*County of Los Angeles v. State of California*, No. B049625.)

³ Plaintiffs argue that they seek only a declaration that AB 799 created a state mandate and an injunction against the shift of costs until the state decides what action to take. This is inconsistent with the prayer of their complaint which sought an injunction requiring defendants to restore Medi-Cal eligibility to all medically indigent adults until the state paid the cost of full health services for them. It is also unavailing.

HN4[↑] An injunction against enforcement of a state mandate is available only after the Legislature fails to include funding in a local

[****8] [*331] III

Enforcement of Article XIII B, Section 6

In 1984, almost five years after the adoption of article XIII B, HN5[↑] the Legislature enacted comprehensive administrative procedures for resolution of claims arising out of section 6. (§ 17500.) The Legislature did so because the absence of a uniform procedure had resulted in inconsistent rulings on the existence of state mandates, unnecessary litigation, reimbursement delays, and, apparently, resultant uncertainties in accommodating reimbursement requirements in the budgetary process. The necessity for the legislation was explained in section 17500:

"The Legislature finds and declares that the existing system for reimbursing local agencies and school districts for the costs of state-mandated local programs has not provided for the effective determination of the state's responsibilities under Section 6 of Article XIII B of the California Constitution. The Legislature finds and declares that the failure of the existing process to adequately and consistently resolve the complex legal questions involved in the determination of state-mandated costs has led to an increasing reliance by local agencies and school districts on the judiciary [****9] and, therefore, in order to relieve unnecessary congestion of the judicial system, *it is necessary to create a mechanism which is capable of rendering sound quasi-judicial decisions and providing an effective means of resolving disputes over the existence of state-mandated local programs.*" (Italics added.)

In part 7 of division 4 of title 2 of the Government Code, "State-Mandated Costs," which commences with section 17500, HN6[↑] the Legislature

government claims bill following a determination by the Commission that a state mandate exists. (Gov. Code, § 17612.) Whether plaintiffs seek declaratory relief and/or an injunction, therefore, they are seeking to enforce section 6.

All further statutory references are to the Government Code unless otherwise indicated.

created the Commission (§ 17525), to adjudicate disputes over the existence of a state mandated program (§§ 17551, 17557) and to adopt procedures for submission and adjudication of reimbursement claims (§ 17553). The five-member Commission includes the Controller, the Treasurer, the Director of Finance, the Director of the Office of Planning and [**1312] [***70] Research, and a public member experienced in public finance. (§ 17525.)

The legislation establishes a test-claim procedure to expeditiously resolve disputes affecting multiple agencies (§ 17554),⁴ establishes the method of [*332] payment of claims (§§ 17558, 17561), and creates reporting procedures which enable the Legislature to budget adequate funds to meet the expense of state [****10] mandates (§§ 17562, 17600, 17612, subd. (a).)

HN7[↑] Pursuant to procedures which the Commission was authorized to establish (§ 17553), local agencies⁵ and school districts⁶ are to file claims for reimbursement of state-mandated costs with the Commission (§§ 17551, 17560), and reimbursement is to be provided [****11] only through this statutory procedure. (§§ 17550, 17552.)

HN10[↑] The first reimbursement claim filed

⁴ The test claim by the County of Los Angeles was filed prior to that proposed by Alameda County. The Alameda County claim was rejected for that reason. (See § 17521.) Los Angeles County permitted San Bernardino County to join in its claim which the Commission accepted as a test claim intended to resolve the issues the majority elects to address instead in this proceeding. Los Angeles County declined a request from Alameda County that it be included in the test claim because the two counties' systems of documentation were so similar that joining Alameda County would not be of any benefit. Alameda County and these plaintiffs were, of course, free to participate in the Commission hearing on the test claim. (§ 17555.)

⁵ "**HN8**[↑] 'Local agency' means any city, county, special district, authority, or other political subdivision of the state." (§ 17518.)

⁶ "**HN9**[↑] 'School district' means any school district, community college district, or county superintendent of schools." (§ 17519.)

which alleges that a state mandate has been created under a statute or executive order is treated as a "test claim." (§ 17521.) A public hearing must be held promptly on any test claim. At the hearing on a test claim or on any other reimbursement claim, evidence may be presented not only by the claimant, but also by the Department of Finance and any other department or agency potentially affected by the claim. (§ 17553.) Any interested organization or individual may participate in the hearing. (§ 17555.)

HN11[↑] A local agency filing a test claim need not first expend sums to comply with the alleged state mandate, but may base its claim on estimated costs. (§ 17555.) The Commission [****12] must determine both whether a state mandate exists and, if so, the amount to be reimbursed to local agencies and school districts, adopting "parameters and guidelines" for reimbursement of any claims relating to that statute or executive order. (§ 17557.) Procedures for determining whether local agencies have achieved statutorily authorized cost savings and for offsetting these savings against reimbursements are also provided. (§ 17620 et seq.) Finally, judicial review of the Commission decision is available through petition for writ of mandate filed pursuant to Code of Civil Procedure section 1094.5. (§ 17559.)

The legislative scheme is not limited to establishing the claims procedure, however. It also contemplates reporting to the Legislature and to departments and agencies of the state which have responsibilities related to funding state mandates, budget planning, and payment. **HN12**[↑] The parameters and guidelines adopted by the Commission must be submitted to the Controller, who is to pay subsequent claims arising out of the mandate. (§ 17558.) Executive orders mandating costs are to be accompanied by an appropriations [*333] bill to cover the costs if the costs are not included [****13] in the budget bill, and in subsequent years the costs must be included in the budget bill. (§ 17561, subds. (a) & (b).) Regular review of the costs is to be made by the Legislative

Analyst, who must report to the Legislature and recommend whether the mandate should be continued. (§ 17562.) HN13[↑] The Commission is also required to make semiannual reports to the Legislature of the number of mandates found and the estimated reimbursement cost to the state. (§ 17600.) The Legislature must then adopt a "local government claims bill." If that bill does not include funding for a state mandate, an affected local agency or school district may seek a declaration from the superior court for the County of Sacramento that the mandate is unenforceable, [**1313] [***71] and an injunction against enforcement. (§ 17612.)

Additional procedures, enacted in 1985, create a system of state-mandate apportionments to fund reimbursement. (§ 17615 et seq.)

CA(1)[↑] (1) It is apparent from the comprehensive nature of this legislative scheme, and from the Legislature's expressed intent, that the exclusive remedy for a claimed violation of section 6 lies in these procedures. The statutes create an administrative forum [****14] for resolution of state mandate claims, and establishes procedures which exist for the express purpose of avoiding multiple proceedings, judicial and administrative, addressing the same claim that a reimbursable state mandate has been created. The statutory scheme also designates the Sacramento County Superior Court as the venue for judicial actions to declare unfunded mandates invalid (§ 17612).

The legislative intent is clearly stated in section 17500: "It is the intent of the Legislature in enacting this part to provide for the implementation of Section 6 of Article XIII B of the California Constitution and to consolidate the procedures for reimbursement of statutes specified in the Revenue and Taxation Code with those identified in the Constitution. . . ." And section 17550 states: "Reimbursement of local agencies and school districts for costs mandated by the state shall be provided pursuant to this chapter."

Finally, HN14[↑] section 17552 provides: "This chapter shall provide *the sole and exclusive procedure* by which a local agency or school district may claim reimbursement for costs mandated by the state as required by Section 6 of Article XIII B of the California Constitution." [****15] (Italics added.)

In short, the Legislature has created what is clearly intended to be a comprehensive and exclusive procedure by which to implement and enforce section 6.

[*334] IV

Exclusivity

CA(2)[↑] (2) Plaintiffs argued, and the Court of Appeal agreed, that the existence of an administrative remedy by which affected local agencies could enforce their right under section 6 to reimbursement for the cost of state mandates did not bar this action because the administrative remedy is available only to local agencies and school districts.

The Court of Appeal recognized that the decision of the County of Alameda, which had not filed a claim for reimbursement at the time the complaint was filed, was a discretionary decision which plaintiffs could not challenge. (*Dunn v. Long Beach L. & W. Co.* (1896) 114 Cal. 605, 609, 610-611 [46 P. 607]; *Silver v. Watson* (1972) 26 Cal.App.3d 905, 909 [103 Cal.Rptr. 576]; *Whitson v. City of Long Beach* (1962) 200 Cal.App.2d 486, 506 [19 Cal.Rptr. 668]; *Elliott v. Superior Court* (1960) 180 Cal.App.2d 894, 897 [5 Cal.Rptr. 116].) [****16] The court concluded, however, that public policy and practical necessity required that plaintiffs have a remedy for enforcement of section 6 independent of the statutory procedure.

The right involved, however, is a right given by the Constitution to local agencies, not individuals either as taxpayers or recipients of government benefits and services. Section 6 provides that the "state shall provide a subvention of funds to

reimburse . . . local governments . . ." (Italics added.) The administrative remedy created by the Legislature is adequate to fully implement section 6. That Alameda County did not file a reimbursement claim does not establish that the enforcement remedy is inadequate. Any of the 58 counties was free to file a claim, and other counties did so. The test claim is now before the Court of Appeal. The administrative procedure has operated as intended.

The Legislature has the authority to establish procedures for the implementation of local agency rights under section 6. **HN15** [↑] Unless the exercise of a constitutional right is unduly restricted, the court must limit enforcement to the procedures established by the Legislature. (*People v. [**1314] [***72] Western Air Lines, Inc.* (1954) 42 Cal.2d 621, 637 [268 P.2d 723]; [****17] *Chesney v. Byram* (1940) 15 Cal.2d 460, 463 [101 P.2d 1106]; *County of Contra Costa v. State of California* (1986) 177 Cal.App.3d 62, 75 [222 Cal.Rptr. 750].)

Plaintiffs' argument that they must be permitted to enforce section 6 as individuals because their right to adequate health care services has been compromised by the failure of the state to reimburse the county for the cost [*335] of services to medically indigent adults is unpersuasive. Plaintiffs' interest, although pressing, is indirect and does not differ from the interest of the public at large in the financial plight of local government. Although the basis for the claim that the state must reimburse the county for its costs of providing the care that was formerly available to plaintiffs under Medi-Cal is that AB 799 created a state mandate, plaintiffs have no right to have any reimbursement expended for health care services of any kind. Nothing in article XIII B or other provision of law controls the county's expenditure of the funds plaintiffs claim must be paid to the county. To the contrary, **HN16** [↑] section 17563 gives the [****18] local agency complete discretion in the expenditure of funds received pursuant to section 6, providing: "**HN17** [

↑] Any funds received by a local agency or school district pursuant to the provisions of this chapter may be used for any public purpose."

The relief plaintiffs seek in their prayer for state reimbursement of county expenses is, in the end, a reallocation of general revenues between the state and the county. Neither public policy nor practical necessity compels creation of a judicial remedy by which individuals may enforce the right of the county to such revenues. The Legislature has established a procedure by which the county may claim any revenues to which it believes it is entitled under section 6. That test-claim statute expressly provides that not only the claimant, but also "any other interested organization or individual may participate" in the hearing before the Commission (§ 17555) at which the right to reimbursement of the costs of such mandate is to be determined. Procedures for receiving any claims must "provide for presentation of evidence by the claimant, the Department of Finance and any other affected department or agency, *and any other interested person.*" [****19] (§ 17553. Italics added.) Neither the county nor an interested individual is without an opportunity to be heard on these questions. These procedures are both adequate and exclusive.⁷

The alternative relief plaintiffs seek -- reinstatement [****20] to Medi-Cal pending further action by the state -- is not a remedy available under the statute, and thus is not one which this court may award. **HN18** [↑] The remedy for the failure to fund a program is a

⁷ Plaintiffs' argument, that the Legislature's failure to make provision for individual enforcement of section 6 before the Commission demonstrates an intent to permit legal actions, is not persuasive. The legislative statement of intent to relegate all mandate disputes to the Commission is clear. A more likely explanation of the failure to provide for test cases to be initiated by individuals lies in recognition that (1) because section 6 creates rights only in governmental entities, individuals lack sufficient beneficial interest in either the receipt or expenditure of reimbursement funds to accord them standing; and (2) the number of local agencies having a direct interest in obtaining reimbursement is large enough to ensure that citizen interests will be adequately represented.

declaration that the mandate is unenforceable. That relief is available only after the Commission has determined that a mandate exists [*336] and the Legislature has failed to include the cost in a local government claims bill, and only on petition by the county. (§ 17612.)⁸

Moreover, the judicial remedy approved by the Court of Appeal permits resolution of the issues raised in a state mandate claim without the participation of those [****21] officers and individuals the Legislature deems necessary to a full and fair exposition and resolution of the issues. Neither the Controller nor the Director of Finance [**1315] [***73] was named a defendant in this action. The Treasurer and the Director of the Office of Planning and Research did not participate. All of these officers would have been involved in determining the question as members of the Commission, as would the public member of the Commission. The judicial procedures were not equivalent to the public hearing required on test claims before the Commission by section 17555. Therefore, other affected departments, organizations, and individuals had no opportunity to be heard.⁹

[****22] Finally, since a determination that a state mandate has been created in a judicial proceeding rather than one before the Commission does not trigger the procedures for creating parameters and guidelines for payment of claims, or for inclusion of estimated costs in the state budget, there is no source of funds available for compliance with the judicial decision other than the appropriations for

⁸ Plaintiffs are not without a remedy if the county fails to provide adequate health care, however. They may enforce the obligation imposed on the county by Welfare and Institutions Code sections 17000 and 17001, and by judicial action. (See, e.g., Mooney v. Pickett (1971) 4 Cal.3d 669 [94 Cal.Rptr. 279, 483 P.2d 1231].)

⁹ For this reason, it would be inappropriate to address the merits of plaintiff's claim in this proceeding. (Cf. Dix v. Superior Court (1991) 53 Cal.3d 442 [279 Cal.Rptr. 834, 807 P.2d 1063].) Unlike the dissent, we do not assume that in representing the state in this proceeding, the Attorney General necessarily represented the interests and views of these officials.

the Department of Health Services. Payment from those funds can only be at the expense of another program which the department is obligated to fund. No public policy supports, let alone requires, this result.

The superior court acted properly in dismissing this action.

The judgment of the Court of Appeal is reversed.

Dissent by: BROUSSARD

Dissent

ROUSSARD, J.

I dissent. For nine years the Legislature has defied the mandate of article XIII B of the California Constitution (hereafter article XIII B). Having transferred responsibility for the care of medically indigent adults (MIA's) to county governments, the Legislature has failed to provide the counties with sufficient money to meet this responsibility, yet the [*337] Legislature computes its own appropriations limit as if it fully funded the program. [****23] The majority, however, declines to remedy this violation because, it says, the persons most directly harmed by the violation -- the medically indigent who are denied adequate health care -- have no standing to raise the matter. I disagree, and will demonstrate that (1) plaintiffs have standing as citizens to seek a declaratory judgment to determine whether the state is complying with its constitutional duty under article XIII B; (2) the creation of an administrative remedy whereby counties and local districts can enforce article XIII B does not deprive the citizenry of its own independent right to enforce that provision; and (3) even if plaintiffs lacked standing, our recent decision in Dix v. Superior Court (1991) 53 Cal.3d 442 [279 Cal.Rptr. 834, 807 P.2d 1063] permits us to reach and resolve any significant issue decided by the Court of Appeal and fully briefed and argued here. I conclude that we should reach the merits of

the appeal.

On the merits, I conclude that the state has not complied with its constitutional obligation under article XIII B. To prevent the state from avoiding the spending limits imposed [****24] by article XIII B, section 6 of that article prohibits the state from transferring previously state-financed programs to local governments without providing sufficient funds to meet those burdens. In 1982, however, the state excluded the medically indigent from its Medi-Cal program, thus shifting the responsibility for such care to the counties. Subvention funds provided by the state were inadequate to reimburse the counties for this responsibility, and became less adequate every year. At the same time, the state continued to compute its spending limit as if it fully financed the entire program. The result is exactly what article XIII B was intended to prevent: the state enjoys a falsely inflated spending limit; the county is compelled to assume a burden it cannot afford; and the medically indigent receive inadequate health care.

I. Facts and Procedural History

Plaintiffs -- citizens, taxpayers, and persons in need of medical care -- allege that [**1316] [***74] the state has shifted its financial responsibility for the funding of health care for MIA's to the counties without providing the necessary funding and without any agreement transferring appropriation limits, and that [****25] as a result the state is violating article XIII B. Plaintiffs further allege they and the class they claim to represent cannot, consequently, obtain adequate health care from the County of Alameda, which lacks the state funding to provide it. The county, although nominally a defendant, aligned [*338] itself with plaintiffs. It admits the inadequacy of its program to provide medical care for MIA's but blames the absence of state subvention funds.¹

At hearings below, plaintiffs presented uncontradicted evidence [****26] regarding the enormous impact of these statutory changes upon the finances and population of Alameda County. That county now spends about \$ 40 million annually on health care for MIA's, of which the state reimburses about half. Thus, since article XIII B became effective, Alameda County's obligation for the health care of MIA's has risen from zero to more than \$ 20 million per year. The county has inadequate funds to discharge its new obligation for the health care of MIA's; as a result, according to the Court of Appeal, uncontested evidence from medical experts presented below shows that, "The delivery of health care to the indigent in Alameda County is in a state of shambles; the crisis cannot be overstated" "Because of inadequate state funding, some Alameda County residents are dying, and many others are suffering serious diseases and disabilities, because they cannot obtain adequate access to the medical care they need" "The system is clogged to the breaking point. . . . All community clinics . . . are turning away patients." "The funding received by the county from the state for MIAs does not approach the actual cost of providing health care to the MIAs. [****27] As a consequence, inadequate resources available to county health services jeopardize the lives and health of thousands of people"

The trial court acknowledged that plaintiffs had shown irreparable injury, but denied their request for a preliminary injunction on the ground that they could not prevail in the action. It then granted the state's motion for summary judgment. Plaintiffs appealed from both decisions of the trial court.

The Court of Appeal consolidated the two appeals and reversed the rulings below. It concluded that plaintiffs had standing to bring this action to

Code sections 17000 and 17001, and by judicial action." (Maj. opn., ante, p. 336, fn. 8)

¹ The majority states that "Plaintiffs are not without a remedy if the county fails to provide adequate health care They may enforce the obligation imposed on the county by Welfare and Institutions

The majority fails to note that plaintiffs have already tried this remedy, and met with the response that, owing to the state's inadequate subvention funds, the county cannot afford to provide adequate health care.

enforce the constitutional spending limit of article XIII B, and that the action is not barred by the existence of administrative remedies available to counties. It then held that the shift of a portion of the cost of medical indigent care by the state to Alameda County constituted a state-mandated new program under the provisions of article XIII B, which triggered that article's provisions requiring a subvention of funds by the state to reimburse Alameda [*339] County for the costs of such program it was required to assume. The judgments denying a preliminary injunction and granting summary judgment [****28] for defendants were reversed. We granted review.

II. Standing

A. Plaintiffs have standing to bring an action for declaratory relief to determine whether the state is complying with article XIII B.

Plaintiffs first claim standing as taxpayers under Code of Civil Procedure section 526a, which provides that: "An action to obtain a judgment, restraining and preventing any illegal expenditure of, waste of, or injury to, the estate, funds, or other property of a county . . . , may be maintained [*1317] [***75] against any officer thereof, or any agent, or other person, acting in its behalf, either by a citizen resident therein, or by a corporation, who is assessed for and is liable to pay, or, within one year before the commencement of the action, has paid, a tax therein. . . ." As in Common Cause v. Board of Supervisors (1989) 49 Cal.3d 432, 439 [261 Cal.Rptr. 574, 777 P.2d 610], however, it is "unnecessary to reach the question whether plaintiffs have standing to seek an injunction under Code of Civil Procedure section 526a, because there is an independent basis for permitting them to proceed." Plaintiffs here [****29] seek a declaratory judgment that the transfer of responsibility for MIA's from the state to the counties without adequate reimbursement violates article XIII B. A declaratory judgment that the state has breached its duty is essentially equivalent to an action in mandate to compel the state to perform its duty. (See California Assn. of

Psychology Providers v. Rank (1990) 51 Cal.3d 1, 9 [270 Cal.Rptr. 796, 793 P.2d 2], which said that a declaratory judgment establishing that the state has a duty to act provides relief equivalent to mandamus, and makes issuance of the writ unnecessary.) Plaintiffs further seek a mandatory injunction requiring that the state pay the health costs of MIA's under the Medi-Cal program until the state meets its obligations under article XIII B. The majority similarly characterize plaintiffs' action as one comparable to mandamus brought to enforce section 6 of article XIII B.

We should therefore look for guidance to cases that discuss the standing of a party seeking a writ of mandate to compel a public official to perform his or her duty.² Such an action may be brought by any person "beneficially [****30] interested" in the issuance of the writ. (Code Civ. Proc., § 1086.) In Carsten [*340] v. Psychology Examining Com. (1980) 27 Cal.3d 793, 796 [166 Cal.Rptr. 844, 614 P.2d 276], we explained that the "requirement that a petitioner be 'beneficially interested' has been generally interpreted to mean that one may obtain the writ only if the person has some special interest to be served or some particular right to be preserved or protected over and above the interest held in common with the public at large." We

²It is of no importance that plaintiffs did not request issuance of a writ of mandate. In Taschner v. City Council (1973) 31 Cal.App.3d 48, 56 [107 Cal.Rptr. 214] (overruled on other grounds in Associated Home Builders etc., Inc. v. City of Livermore (1976) 18 Cal.3d 582, 596 [135 Cal.Rptr. 41, 557 P.2d 473, 92 A.L.R.3d 1038]), the court said that "[a]s against a general demurrer, a complaint for declaratory relief may be treated as a petition for mandate [citations], and where a complaint for declaratory relief alleges facts sufficient to entitle plaintiff to mandate, it is error to sustain a general demurrer without leave to amend."

In the present case, the trial court ruled on a motion for summary judgment, but based that ruling not on the evidentiary record (which supported plaintiffs' showing of irreparable injury) but on the issues as framed by the pleadings. This is essentially equivalent to a ruling on demurrer, and a judgment denying standing could not be sustained on the narrow ground that plaintiffs asked for the wrong form of relief without giving them an opportunity to correct the defect. (See Residents of Beverly Glen, Inc. v. City of Los Angeles (1973) 34 Cal.App.3d 117, 127-128 [109 Cal.Rptr. 724].)

quoted from Professor Davis, who said, "One who is in fact adversely affected by governmental action should have standing to challenge that action if it is judicially reviewable." (Pp. 796-797, quoting 3 Davis, *Administrative Law Treatise* (1st ed. 1958) p. 291.) Cases applying this standard include *Stocks v. City of Irvine* (1981) 114 Cal.App.3d 520 [170 Cal.Rptr. 724], which held that low-income residents of Los Angeles had standing to challenge exclusionary zoning laws of suburban communities which prevented the plaintiffs from moving there; *Taschner v. City Council, supra*, 31 Cal.App.3d 48, [****31] which held that a property owner has standing to challenge an ordinance which may limit development of the owner's property; and *Felt v. Waughop* (1924) 193 Cal. 498 [225 P. 862], which held that a city voter has standing to compel the city clerk to certify a correct list of candidates for municipal office. Other cases illustrate the limitation on standing: *Carsten v. Psychology Examining Com., supra*, 27 Cal.3d 793, held that a member of the committee who was neither seeking a license nor in danger of losing one had no standing to challenge [**1318] [***76] a change in the method of computing the passing score on the licensing examination; *Parker v. Bowron* (1953) 40 Cal.2d 344 [254 P.2d 6] held that a union official who was neither a city employee nor a city resident had no standing to compel a city to follow a prevailing wage ordinance; and *Dunbar v. Governing Board* (1969) 275 Cal.App.2d 14 [79 Cal.Rptr. 662] held that a member of a student organization had standing [****32] to challenge a college district's rule barring a speaker from campus, but persons who merely planned to hear him speak did not.

[****33] No one questions that plaintiffs are affected by the lack of funds to provide care for MIA's. Plaintiffs, except for plaintiff Rabinowitz, are not merely citizens and taxpayers; they are medically indigent persons living in Alameda County who have been and will be deprived of proper medical care if funding of MIA programs is inadequate. Like the other plaintiffs here, [*341] plaintiff Kinlaw, a 60-year-old woman with

diabetes and hypertension, has no health insurance. Plaintiff Spier has a chronic back condition; inadequate funding has prevented him from obtaining necessary diagnostic procedures and physiotherapy. Plaintiff Tsosie requires medication for allergies and arthritis, and claims that because of inadequate funding she cannot obtain proper treatment. Plaintiff King, an epileptic, says she was unable to obtain medication from county clinics, suffered seizures, and had to go to a hospital. Plaintiff "Doe" asserts that when he tried to obtain treatment for AIDS-related symptoms, he had to wait four to five hours for an appointment and each time was seen by a different doctor. All of these are people personally dependent upon the quality of care of Alameda County's [****34] MIA program; most have experienced inadequate care because the program was underfunded, and all can anticipate future deficiencies in care if the state continues its refusal to fund the program fully.

The majority, however, argues that the county has no duty to use additional subvention funds for the care of MIA's because under *Government Code section 17563* "[a]ny funds received by a local agency . . . pursuant to the provisions of this chapter may be used for any public purpose." Since the county may use the funds for other purposes, it concludes that MIA's have no special interest in the subvention.³

This argument would be sound if the county were already meeting its obligations to MIA's under *Welfare [****35] and Institutions Code section 17000*. If that were the case, the county could use the subvention funds as it chose, and plaintiffs would have no more interest in the matter than any other county resident or taxpayer. But such is not the case at bar. Plaintiffs here allege that the county is not complying with its duty, mandated by *Welfare and Institutions Code section 17000*, to

³ The majority's argument assumes that the state will comply with a judgment for plaintiffs by providing increased subvention funds. If the state were instead to comply by restoring Medi-Cal coverage for MIA's, or some other method of taking responsibility for their health needs, plaintiffs would benefit directly.

provide health care for the medically indigent; the county admits its failure but pleads lack of funds. Once the county receives adequate funds, it must perform its statutory duty under section 17000 of the Welfare and Institutions Code. If it refused, an action in mandamus would lie to compel performance. (See Mooney v. Pickett (1971) 4 Cal.3d 669 [94 Cal.Rptr. 279, 483 P.2d 1231].) In fact, the county has made clear throughout this litigation that it would use the subvention funds to provide care for MIA's. The majority's conclusion that plaintiffs lack a special, beneficial interest in the state's compliance with article XIII B ignores the practical realities of health care funding.

Moreover, we have recognized an exception to the rule [****36] that a plaintiff must be beneficially interested. "Where the question is one of public right [*342] and the object of the mandamus is to procure the enforcement of a public duty, the relator need not show that he has any legal or special interest in the result, since it is sufficient that he is interested as a citizen in having the laws executed and the duty in question [**1319] [***77] enforced." (Bd. of Soc. Welfare v. County of L. A. (1945) 27 Cal.2d 98, 100-101 [162 P.2d 627].) We explained in Green v. Obledo (1981) 29 Cal.3d 126, 144 [172 Cal.Rptr. 206, 624 P.2d 256], that this "exception promotes the policy of guaranteeing citizens the opportunity to ensure that no governmental body impairs or defeats the purpose of legislation establishing a public right. . . . It has often been invoked by California courts. [Citations.]"

Green v. Obledo presents a close analogy to the present case. Plaintiffs there filed suit to challenge whether a state welfare regulation limiting deductibility of work-related expenses in determining eligibility for aid to families [****37] with dependent children (AFDC) assistance complied with federal requirements. Defendants claimed that plaintiffs were personally affected only by a portion of the regulation, and had no standing to challenge the balance of the regulation. We replied that "[t]here can be no question that the

proper calculation of AFDC benefits is a matter of public right [citation], and plaintiffs herein are certainly citizens seeking to procure the enforcement of a public duty. [Citation.] It follows that plaintiffs have standing to seek a writ of mandate commanding defendants to cease enforcing [the regulation] in its entirety." (29 Cal.3d at p. 145.)

We again invoked the exception to the requirement for a beneficial interest in Common Cause v. Board of Supervisors, supra, 49 Cal.3d 432. Plaintiffs in that case sought to compel the county to deputize employees to register voters. We quoted Green v. Obledo, supra, 29 Cal.3d 126, 144, and concluded that "[t]he question in this case involves a public right to voter [****38] outreach programs, and plaintiffs have standing as citizens to seek its vindication." (49 Cal.3d at p. 439.) We should reach the same conclusion here.

B. Government Code sections 17500- 17630 do not create an exclusive remedy which bars citizen-plaintiffs from enforcing article XIII B.

Four years after the enactment of article XIII B, the Legislature enacted Government Code sections 17500 through 17630 to implement article XIII B, section 6. These statutes create a quasi-judicial body called the Commission on State Mandates, consisting of the state Controller, state Treasurer, state Director of Finance, state Director of the Office of Planning and Research, and one public member. The commission has authority to "hear and decide upon [any] claim" by a local government that it "is entitled to be reimbursed by the state" for costs under article XIII B. (Gov. Code, § 17551, [*343] subd. (a).) Its decisions are subject to review by an action for administrative mandamus in the superior court. (See Gov. Code, § 17559.)

The majority maintains that a proceeding before the Commission on State Mandates is the exclusive means [****39] for enforcement of article XIII B, and since that remedy is expressly limited to claims

by local agencies or school districts (Gov. Code, § 17552), plaintiffs lack standing to enforce the constitutional provision. ⁴ I disagree, for two reasons.

[****40] [**1320] [***78] First, Government Code section 17552 expressly addressed the question of exclusivity of remedy, and provided that "[t]his chapter shall provide the sole and exclusive procedure by which *a local agency or school district* may claim reimbursement for costs mandated by the state as required by Section 6 of Article XIII B of the California Constitution." (Italics added.) The Legislature was aware that local agencies and school districts were not the only parties concerned with state mandates, for in Government Code section 17555 it provided that "any other interested organization or individual may participate" in the commission hearing. Under these circumstances the Legislature's choice of words -- "the sole and exclusive procedure by which a local agency or school district may claim reimbursement" -- limits the procedural rights of

⁴ The majority emphasizes the statement of purpose of Government Code section 17500: "The Legislature finds and declares that the existing system for reimbursing local agencies and school districts for the costs of state-mandated local programs has not provided for the effective determination of the state's responsibilities under section 6 of article XIII B of the California Constitution. The Legislature finds and declares that the failure of the existing process to adequately and consistently resolve the complex legal questions involved in the determination of state-mandated costs has led to an increasing reliance by local agencies and school districts on the judiciary, and, therefore, in order to relieve unnecessary congestion of the judicial system, it is necessary to create a mechanism which is capable of rendering sound quasi-judicial decisions and providing an effective means of resolving disputes over the existence of state-mandated local programs."

The "existing system" to which Government Code section 17500 referred was the Property Tax Relief Act of 1972 (Rev. & Tax. Code, §§ 2201- 2327), which authorized local agencies and school boards to request reimbursement from the state Controller. Apparently dissatisfied with this remedy, the agencies and boards were bypassing the Controller and bringing actions directly in the courts. (See, e.g., County of Contra Costa v. State of California (1986) 177 Cal.App.3d 62 [222 Cal.Rptr. 750].) The legislative declaration refers to this phenomena. It does not discuss suits by individuals.

those claimants only, and does not affect rights of other persons. *Expressio unius est exclusio alterius* -- "the expression of certain things in a statute necessarily involves exclusion of other things not expressed." (Henderson v. Mann Theatres Corp. (1976) 65 Cal.App.3d 397, 403 [135 Cal.Rptr. 266].) [****41]

The case is similar in this respect to Common Cause v. Board of Supervisors, *supra*, 49 Cal.3d 432. Here defendants contend that the counties' right of action under Government Code sections 17551- 17552 impliedly excludes [*344] any citizen's remedy; in Common Cause defendants claimed the Attorney General's right of action under Elections Code section 304 impliedly excluded any citizen's remedy. We replied that "the plain language of section 304 contains no limitation on the right of private citizens to sue to enforce the section. To infer such a limitation would contradict our long-standing approval of citizen actions to require governmental officials to follow the law, expressed in our expansive interpretation of taxpayer standing [citations], and our recognition of a 'public interest' exception to the requirement that a petitioner for writ of mandate have a personal beneficial interest in the proceedings [citations]." (49 Cal.3d at p. 440, fn. omitted.) Likewise in this case the plain language of Government Code sections 17551- 17552 contain no limitation [****42] on the right of private citizens, and to infer such a right would contradict our long-standing approval of citizen actions to enforce public duties.

The United States Supreme Court reached a similar conclusion in Rosado v. Wyman (1970) 397 U.S. 397 [25 L.Ed.2d 442, 90 S.Ct. 1207]. In that case New York welfare recipients sought a ruling that New York had violated federal law by failing to make cost-of-living adjustments to welfare grants. The state replied that the statute giving the Department of Health, Education and Welfare authority to cut off federal funds to noncomplying states constituted an exclusive remedy. The court rejected the contention, saying that "[w]e are most

reluctant to assume Congress has closed the avenue of effective judicial review to those individuals most directly affected by the administration of its program." (P. 420 [25 L.Ed.2d at p. 460].) The principle is clear: the persons actually harmed by illegal state action, not only some administrator who has no personal stake in the matter, should have standing to challenge that action.

[****43] Second, article XIII B was enacted to protect taxpayers, not governments. Section 1 and 2 of article XIII B establish strict limits on state and local expenditures, and require the refund of all taxes collected in excess of those limits. Section 6 of article XIII B prevents the state from evading those limits and burdening county taxpayers by transferring financial responsibility for a program to a county, yet counting the cost of that program toward the limit on state expenditures.

These provisions demonstrate a profound distrust of government and a disdain for excessive government spending. An exclusive remedy under which only governments can enforce article XIII B, and the taxpayer-citizen can appear only if a government [**1321] [***79] has first instituted proceedings, is inconsistent with the ethos that led to article XIII B. The drafters of article XIII B and the voters who enacted it would not accept that the state Legislature -- the principal body regulated by the article -- could establish a procedure [*345] under which the only way the article can be enforced is for local governmental bodies to initiate proceedings before a commission composed largely of state [****44] financial officials.

One obvious reason is that in the never-ending attempts of state and local government to obtain a larger proportionate share of available tax revenues, the state has the power to coerce local governments into forgoing their rights to enforce article XIII B. An example is the Brown-Presley Trial Court Funding Act (Gov. Code, § 77000 et seq.), which provides that the county's acceptance of funds for court financing may, in the discretion of the Governor, be deemed a waiver of the counties'

rights to proceed before the commission on all claims for reimbursement for state-mandated local programs which existed and were not filed prior to passage of the trial funding legislation.⁵ The ability of state government by financial threat or inducement to persuade counties to waive their right of action before the commission renders the counties' right of action inadequate to protect the public interest in the enforcement of article XIII B.

[****45] The facts of the present litigation also demonstrate the inadequacy of the commission remedy. The state began transferring financial responsibility for MIA's to the counties in 1982. Six years later no county had brought a proceeding before the commission. After the present suit was filed, two counties filed claims for 70 percent reimbursement. Now, nine years after the 1982 legislation, the counties' claims are pending before the Court of Appeal. After that court acts, and we decide whether to review its decision, the matter

⁵"(a) The initial decision by a county to opt into the system pursuant to Section 77300 shall constitute a waiver of all claims for reimbursement for state-mandated local programs not theretofore approved by the State Board of Control, the Commission on State Mandates, or the courts to the extent the Governor, in his discretion, determines that waiver to be appropriate; provided, that a decision by a county to opt into the system pursuant to Section 77300 beginning with the second half of the 1988-89 fiscal year shall not constitute a waiver of a claim for reimbursement based on a statute chaptered on or before the date the act which added this chapter is chaptered, which is filed in acceptable form on or before the date the act which added this chapter is chaptered. A county may petition the Governor to exempt any such claim from this waiver requirement; and the Governor, in his discretion, may grant the exemption in whole or in part. The waiver shall not apply to or otherwise affect any claims accruing after initial notification. Renewal, renegotiation, or subsequent notification to continue in the program shall not constitute a waiver. [para.] (b) The initial decision by a county to opt into the system pursuant to Section 77300 shall constitute a waiver of any claim, cause of action, or action whenever filed, with respect to the Trial Court Funding Act of 1985, Chapter 1607 of the Statutes of 1985, or Chapter 1211 of the Statutes of 1987." (Gov. Code, § 77203.5, italics added.)

"As used in this chapter, 'state-mandated local program' means any and all reimbursements owed or owing by operation of either Section 6 of Article XIII B of the California Constitution, or Section 17561 of the Government Code, or both." (Gov. Code, § 77005, italics added.)

may still have to go back to the commission for hearings to [*346] determine the amount of the mandate -- which is itself an appealable order. When an issue involves the life and health of thousands, a procedure which permits this kind of delay is not an adequate remedy.

In sum, effective, efficient enforcement of article XIII B requires that standing to enforce that measure be given to those harmed by its violation -- in this case, the medically indigent -- and not be vested exclusively in local officials who have no personal interest at stake and are subject to financial and political pressure to overlook violations.

*C. Even if plaintiffs lack standing [****46] this court should nevertheless address and resolve the merits of the appeal.*

Although ordinarily a court will not decide the merits of a controversy if the plaintiffs lack standing (see *McKinny v. Board of Trustees* (1982) 31 Cal.3d 79, 90 [181 Cal.Rptr. 549, 642 P.2d 460]), we recognized [**1322] [****80] an exception to this rule in our recent decision in *Dix v. Superior Court, supra*, 53 Cal.3d 442 (hereafter *Dix*). In *Dix*, the victim of a crime sought to challenge the trial court's decision to recall a sentence under Penal Code section 1170. We held that only the prosecutor, not the victim of the crime, had standing to raise that issue. We nevertheless went on to consider and decide questions raised by the victim concerning the trial court's authority to recall a sentence under Penal Code section 1170, subdivision (d). We explained that the sentencing issues "are significant. The case is fully briefed and all parties apparently seek a decision on the merits. Under such circumstances, we deem it appropriate to address [the victim's] sentencing [****47] arguments for the guidance of the lower courts. Our discretion to do so under analogous circumstances is well settled. [Citing cases explaining when an appellate court can decide an issue despite mootness.]" (53 Cal.3d at p. 454.) In footnote we added that "Under article VI,

section 12, subdivision (b) of the California Constitution . . . , we have jurisdiction to 'review the *decision of a Court of Appeal* in any cause.' (Italics added.) Here the Court of Appeal's decision addressed two issues -- standing and merits. Nothing in article VI, section 12(b) suggests that, having rejected the Court of Appeal's conclusion on the preliminary issue of standing, we are foreclosed from 'review[ing]' the second subject addressed and resolved in its decision." (Pp. 454-455, fn. 8.)

I see no grounds on which to distinguish *Dix*. The present case is also one in which the Court of Appeal decision addressed both standing and merits. It is fully briefed. Plaintiffs and the county seek a decision on the merits. While the state does not seek a decision on the merits in this proceeding, its appeal of the superior court decision in the [****48] mandamus proceeding brought by the County of Los Angeles (see maj. opn., *ante*, p. 330, fn. 2) shows that it is not opposed to an appellate decision on the merits.

[*347] The majority, however, notes that various state officials -- the Controller, the Director of Finance, the Treasurer, and the Director of the Office of Planning and Research -- did not participate in this litigation. Then in a footnote, the majority suggests that this is the reason they do not follow the *Dix* decision. (Maj. opn., *ante*, p. 336, fn. 9.) In my view, this explanation is insufficient. The present action is one for declaratory relief against the state. It is not necessary that plaintiffs also sue particular state officials. (The state has never claimed that such officials were necessary parties.) I do not believe we should refuse to reach the merits of this appeal because of the nonparticipation of persons who, if they sought to participate, would be here merely as amici curiae.⁶

⁶It is true that these officials would participate in a proceeding before the Commission on State Mandates, but they would do so as members of an administrative tribunal. On appellate review of a commission decision, its members, like the members of the Public Utilities Commission or the Workers' Compensation Appeals Board, are not respondents and do not appear to present their individual views and positions. For example, in *Lucia Mar Unified School*

[****49] The case before us raises no issues of departmental policy. It presents solely an issue of law which this court is competent to decide on the briefs and arguments presented. That issue is one of great significance, far more significant than any raised in *Dix*. Judges rarely recall sentencing under Penal Code section 1170, subdivision (d); when they do, it generally affects only the individual defendant. In contrast, the legal issue here involves immense sums of money and affect budgetary planning for both the state and counties. State and county governments need to know, as soon as possible, what their [**1323] [***81] rights and obligations are; legislators considering proposals to deal with the current state and county budget crisis need to know how to frame legislation so it does not violate article XIII B. The practical impact of a decision on the people of this state is also of great importance. The failure of the state to provide full subvention funds and the difficulty of the county in filling the gap translate into inadequate staffing and facilities for treatment of thousands of persons. Until the constitutional issues are resolved the legal uncertainties may [****50] inhibit both levels of government from taking the steps needed to address this problem. A delay of several years until the Los Angeles case is resolved could result in pain, hardship, or even death for many people. I conclude that, whether or not plaintiffs have standing, this court should address and resolve the merits of the appeal.

D. Conclusion as to standing.

As I have just explained, it is not necessary for plaintiffs to have standing for us to be able to decide the merits of the appeal. Nevertheless, I conclude [*348] that plaintiffs have standing both as persons "beneficially interested" under Code of Civil Procedure section 1086 and under the

Dist. v. Honig (1988) 44 Cal.3d 830 [244 Cal.Rptr. 677, 750 P.2d 318], in which we reviewed a commission ruling relating to subvention payments for education of handicapped children, the named respondents were the state Superintendent of Public Instruction, the Department of Education, and the Commission on State Mandates. The individual members of the commission were not respondents and did not participate.

doctrine of *Green v. Obledo, supra*, 29 Cal.3d 126, to bring an action to determine whether the state has violated its duties under article XIII B. The remedy given local agencies and school districts by Government Code sections 17500- 17630 is, as Government Code section 17552 states, the exclusive remedy by which those bodies can challenge the state's refusal to provide subvention funds, but the statute does not limit the remedies available to individual citizens. [****51]

III. Merits of the Appeal

A. State funding of care for MIA's.

Welfare and Institutions Code section 17000 requires every county to "relieve and support" all indigent or incapacitated residents, except to the extent that such persons are supported or relieved by other sources.⁷ From 1971 until 1982, and thus at the time article XIII B became effective, counties were not required to pay for the provision of health services to MIA's, whose health needs were met through the state-funded Medi-Cal program. Since the medical needs of MIA's were fully met through other sources, the counties had no duty under Welfare and Institutions Code section 17000 to meet those needs. While the counties did make general contributions to the Medi-Cal program (which covered persons other than MIA's) from 1971 until 1978, at the time article XIII B became effective in 1980 the counties were not required to make any financial contributions to Medi-Cal. It is therefore undisputed that the counties were not required to provide financially for the health needs of MIA's when article XIII B became effective. The state funded all such needs of MIA's.

[****52] In 1982, the Legislature passed Assembly Bill No. 799 (1981-1982 Reg. Sess.;

⁷ Welfare and Institutions Code section 17000 provides that "[e]very county . . . shall relieve and support all incompetent, poor, indigent persons, and those incapacitated by age, disease, or accident, lawfully resident therein, when such persons are not supported and relieved by their relatives or friends, by their own means, or by state hospitals or other state or private institutions."

Stats. 1982, ch. 328, pp. 1568-1609) (hereafter AB No. 799), which removed MIA's from the state-funded Medi-Cal program as of January 1, 1983, and thereby transferred to the counties, through the County Medical Services Plan which AB No. 799 created, the financial responsibility to provide health services to approximately 270,000 MIA's. AB No. 799 required that the counties provide health care for MIA's, yet appropriated only 70 percent of what the state would have spent on MIA's had those persons remained a state responsibility under the Medi-Cal program.

Since 1983, the state has only partially defrayed the costs to the counties of providing health care to MIA's. Such state funding to counties was [*349] initially relatively constant, generally more than \$ 400 million per year. By 1990, however, state [***82] funding [**1324] had decreased to less than \$ 250 million. The state, however, has always included the full amount of its former obligation to provide for MIA's under the Medi-Cal program in the year preceding July 1, 1980, as part of its article XIII B "appropriations limit," i.e., as part [****53] of the base amount of appropriations on which subsequent annual adjustments for cost-of-living and population changes would be calculated. About \$ 1 billion has been added to the state's adjusted spending limit for population growth and inflation *solely* because of the state's inclusion of all MIA expenditures in the appropriation limit established for its base year, 1979-1980. The state has not made proportional increases in the sums provided to counties to pay for the MIA services funded by the counties since January 1, 1983.

B. *The function of article XIII B.*

Our recent decision in *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 486-487 [280 Cal.Rptr. 92, 808 P.2d 235] (hereafter *County of Fresno*), explained the function of article XIII B and its relationship to article XIII A, enacted one year earlier:

"At the June 6, 1978, Primary Election, article XIII A was added to the Constitution through the

adoption of Proposition 13, an initiative measure aimed at controlling ad valorem property taxes and the imposition of new 'special taxes.' (*Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal.3d 208, 231-232 [149 Cal.Rptr. 239, 583 P.2d 1281].) [****54] The constitutional provision imposes a limit on the power of state and local governments to adopt and levy taxes. (*City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 59, fn. 1 [266 Cal.Rptr. 139, 785 P.2d 522] (*City of Sacramento*).)

"At the November 6, 1979, Special Statewide Election, article XIII B was added to the Constitution through the adoption of Proposition 4, another initiative measure. That measure places limitations on the ability of both state and local governments to appropriate funds for expenditures.

"Articles XIII A and XIII B work in tandem, together restricting California governments' power both to levy and to spend [taxes] for public purposes.' (*City of Sacramento, supra*, 50 Cal.3d at p. 59, fn. 1.)

"Article XIII B of the Constitution was intended . . . to provide 'permanent protection for taxpayers from excessive taxation' and 'a reasonable way to provide discipline in tax spending at state and local levels.' (See *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 446 [170 Cal.Rptr. 232], [****55] quoting and following Ballot Pamp., Proposed Stats. and Amends. to Cal. Const. with arguments to voters, Special Statewide Elec. (Nov. 6, 1979), argument [*350] in favor of Prop. 4, p. 18.) To this end, it establishes an 'appropriations limit' for both state and local governments (Cal. Const., art. XIII B, § 8, subd. (h)) and allows no 'appropriations subject to limitation' in excess thereof (*id.*, § 2). [8] (See *County of Placer v. Corin, supra*, 113 Cal.App.3d

⁸ Article XIII B, section 1 provides: "The total annual appropriations subject to limitation of the state and of each local government shall not exceed the appropriations limit of such entity of government for the prior year adjusted for changes in the cost of living and population except as otherwise provided in this Article."

at p. 446.) It defines the relevant 'appropriations subject to limitation' as 'any authorization to expend during a fiscal year the proceeds of taxes . . . ' (Cal. Const., art. XIII B, § 8, subd. (b).)" (*County of Fresno, supra*, 53 Cal.3d at p. 486.)

[****56] Under section 3 of article XIII B the state may transfer financial responsibility for a program to a county if the state and county mutually agree that the appropriation limit of the state will be decreased and that of the county increased by the same amount. ⁹ [**1325]

[***83] Absent such an agreement, however, section 6 of article XIII B generally precludes the state from avoiding the spending limits it must observe by shifting to local governments programs and their attendant financial burdens which were a state responsibility prior to the effective date of article XIII B. It does so by requiring that "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the cost of such program or increased level of service" ¹⁰

[****57] "Section 6 was included in article XIII B in recognition that article XIII A of the Constitution severely restricted the taxing powers of local governments. (See *County of Los Angeles [v. State*

⁹Section 3 of article XIII B reads in relevant part: "The appropriations limit for any fiscal year . . . shall be adjusted as follows:

"(a) In the event that the financial responsibility of providing services is transferred, in whole or in part . . . from one entity of government to another, then for the year in which such transfer becomes effective the appropriation limit of the transferee entity shall be increased by such reasonable amount as the said entities shall mutually agree and the appropriations limit of the transferor entity shall be decreased by the same amount. . . ."

¹⁰Section 6 of article XIII B further provides that the "Legislature may, but need not, provide such subvention of funds for the following mandates: (a) Legislative mandates requested by the local agency affected; (b) Legislation defining a new crime or changing an existing definition of a crime; or (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975." None of these exceptions apply in the present case.

of California (1987)] 43 Cal.3d 46, 61 [233 Cal.Rptr. 38, 729 P.2d 202].) The provision was intended to preclude the state from shifting financial responsibility for carrying out governmental functions onto local entities that were ill equipped to handle the task. (*Ibid.*; see *Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal.3d 830, 836, fn. 6.) Specifically, it was designed to protect the tax [*351] revenues of local governments from state mandates that would require expenditure of such revenues." (*County of Fresno, supra*, 53 Cal.3d at p. 487.)

C. Applicability of article XIII B to health care for MIA's.

The state argues that care of the indigent, including medical care, has long been a county responsibility. It claims that although the state undertook to fund this responsibility from [****58] 1979 through 1982, it was merely temporarily (as it turned out) helping the counties meet their responsibilities, and that the subsequent reduction in state funding did not impose any "new program" or "higher level of service" on the counties within the meaning of section 6 of article XIII B. Plaintiffs respond that the critical question is not the traditional roles of the county and state, but who had the fiscal responsibility on November 6, 1979, when article XIII B took effect. The purpose of article XIII B supports the plaintiffs' position.

As we have noted, article XIII A of the Constitution (Proposition 13) and article XIII B are complementary measures. The former radically reduced county revenues, which led the state to assume responsibility for programs previously financed by the counties. Article XIII B, enacted one year later, froze both state and county appropriations at the level of the 1978-1979 budgets -- a year when the budgets included state financing for the prior county programs, but not county financing for these programs. Article XIII B further limited the state's authority to transfer obligations to the counties. Reading the two together, it seems clear [****59] that article XIII

B was intended to limit the power of the Legislature to retransfer to the counties those obligations which the state had assumed in the wake of Proposition 13.

Under article XIII B, both state and county appropriations limits are set on the basis of a calculation that begins with the budgets in effect when article XIII B was enacted. If the state could transfer to the county a program for which the state at that time had full financial responsibility, the county could be forced to assume additional financial obligations without the right to appropriate additional moneys. The state, at the same time, would get credit toward its appropriations limit for expenditures it did not pay. County taxpayers [****1326**] [*****84**] would be forced to accept new taxes or see the county forced to cut existing programs further; state taxpayers would discover that the state, by counting expenditures it did not pay, had acquired an actual revenue surplus while avoiding its obligation to refund revenues in excess of the appropriations limit. Such consequences are inconsistent with the purpose of article XIII B.

Our decisions interpreting article XIII B demonstrate that the state's [******60**] subvention requirement under section 6 is not vitiated simply because the [***352**] "program" existed before the effective date of article XIII B. The alternate phrase of section 6 of article XIII B, "higher level of service[,]" . . . must be read in conjunction with the predecessor phrase 'new program' to give it meaning. Thus read, it is apparent that *the subvention requirement for increased or higher level of service is directed to state mandated increases in the services provided by local agencies in existing 'programs.'*" (County of Los Angeles v. State of California (1987) 43 Cal.3d 46, 56 [233 Cal.Rptr. 38, 729 P.2d 202], italics added.)

Lucia Mar Unified School Dist. v. Honig, supra, 44 Cal.3d 830, presents a close analogy to the present case. The state Department of Education operated schools for severely handicapped students,

but prior to 1979 *school districts were required by statute to contribute* to education of those students from the district at the state schools. In 1979, in response to the restrictions on school district revenues [******61**] imposed by Proposition 13, the statutes requiring such district contributions were repealed and the state assumed full responsibility for funding. The state funding responsibility continued until June 28, 1981, when Education Code section 59300 (hereafter section 59300), requiring school districts to share in these costs, became effective.

The plaintiff districts filed a test claim before the commission, contending they were entitled to state reimbursement under section 6 of article XIII B. The commission found the plaintiffs were not entitled to state reimbursement, on the rationale that the increase in costs to the districts compelled by section 59300 imposed no new program or higher level of services. The trial and intermediate appellate courts affirmed on the ground that section 59300 called for only an "adjustment of costs" of educating the severely handicapped, and that "*a shift in the funding of an existing program is not a new program or a higher level of service*" within the meaning of article XIII B. (Lucia Mar Unified School Dist. v. Honig, supra, 44 Cal.3d at p. 834, italics added.)

We reversed, [******62**] rejecting the state's theories that the funding shift to the county of the subject program's costs does not constitute a new program. "[There can be no] doubt that although the schools for the handicapped have been operated by the state for many years, the program was new insofar as plaintiffs are concerned, since *at the time section 59300 became effective* they were not required to contribute to the education of students from their districts at such schools. [para.] . . . To hold, under the circumstances of this case, that a shift in funding of an existing program from the state to a local entity is not a new program as to the local agency would, we think, violate the intent underlying section 6 of article XIII B. That article imposed spending limits on state and local

governments, and it followed by one year the adoption by initiative of article XIII A, which severely limited the taxing [*353] power of local governments. . . . [para.] The intent of the section would plainly be violated if the state could, while retaining administrative control [¹¹] of programs it has supported with state [***85] tax money, [**1327] simply shift the cost of the programs to local government [****63] on the theory that the shift does not violate section 6 of article XIII B because the programs are not 'new.' Whether the shifting of costs is accomplished by compelling local governments to pay the cost of entirely new programs created by the state, *or by compelling them to accept financial responsibility in whole or in part for a program which was funded entirely by the state before the advent of article XIII B, the result seems equally violative of the fundamental purpose underlying section 6 of that article.*" (*Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal.3d at pp. 835-836, fn. omitted, italics added.)

[****64] The state seeks to distinguish *Lucia Mar* on the ground that the education of handicapped children in state schools had never been the responsibility of the local school district, but overlooks that the local district had previously been required to contribute to the cost. Indeed the similarities between *Lucia Mar* and the present case are striking. In *Lucia Mar*, prior to 1979 the state and county shared the cost of educating handicapped children in state schools; in the present case from 1971-1979 the state and county shared the cost of caring for MIA's under the Medi-Cal program. In 1979, following enactment of Proposition 13, the state took full responsibility for both programs. Then in 1981 (for handicapped

children) and 1982 (for MIA's), the state sought to shift some of the burden back to the counties. To distinguish these cases on the ground that care for MIA's is a county program but education of handicapped children a state program is to rely on arbitrary labels in place of financial realities.

The state presents a similar argument when it points to the following emphasized language from *Lucia Mar Unified School Dist. v. Honig, supra*, 44 Cal.3d 830: [****65] "[B]ecause section 59300 shifts partial financial responsibility for the support of students in the state-operated schools from the state to school districts -- *an obligation the school districts did not have at the time article XIII B was adopted* -- it calls for plaintiffs to support a 'new program' within the meaning of section 6." (P. 836, fn. omitted, italics added.) It urges *Lucia Mar* reached its result *only* because the "program" requiring school district funding in that case *was not required by statute* at the effective date of [*354] article XIII B. The state then argues that the case at bench is distinguishable because it contends Alameda County had a continuing obligation *required by statute* antedating that effective date, which had only been "temporarily" ¹² suspended when article XIII B became effective. I fail to see the distinction between a case -- *Lucia Mar* -- in which no existing statute as of 1979 imposed an obligation on the local government and one -- this case -- in which the statute existing in 1979 imposed no obligation on local government.

[****66] The state's argument misses the salient point. As I have explained, the application of section 6 of article XIII B does not depend upon when the program was created, but upon who had the burden of funding it when article XIII B went into effect. Our conclusion in *Lucia Mar* that the educational program there in issue was a "new" program as to the school districts was not based on the presence or absence of any antecedent statutory

¹¹ The state notes that, in contrast to the program at issue in *Lucia Mar*, it has not retained administrative control over aid to MIA's. But the quoted language from *Lucia Mar*, while appropriate to the facts of that case, was not intended to establish a rule limiting article XIII B, section 6, to instances in which the state retains administrative control over the program that it requires the counties to fund. The constitutional language admits of no such limitation, and its recognition would permit the Legislature to evade the constitutional requirement.

¹² The state's repeated emphasis on the "temporary" nature of its funding is a form of post hoc reasoning. At the time article XIII B was enacted, the voters did not know which programs would be temporary and which permanent.

obligation therefor. *Lucia Mar* determined that whether the program was new *as to the districts* depended on *when* they were compelled to assume the obligation to partially fund an existing program which they had not funded at the time article XIII B became effective.

The state further relies on two decisions, *Madera Community Hospital v. County of Madera* (1984) 155 Cal.App.3d 136 [201 Cal.Rptr. 768] and *Cooke v. Superior Court* (1989) 213 Cal.App.3d 401 [261 Cal.Rptr. 706], which hold that the county has a statutory obligation to provide medical care for indigents, but that it need not provide precisely [**1328] [***86] the same level of [****67] services as the state provided under Medi-Cal. ¹³ Both are correct, but irrelevant to this case. ¹⁴ The county's obligation to MIA's is defined by Welfare and Institutions Code section 17000, not by the former Medi-Cal program. ¹⁵ If the [*355] state, in transferring an obligation to the counties, permits them to provide less services than the state provided, the state need only pay for the lower level

¹³ It must, however, provide a *comparable* level of services. (See *Board of Supervisors v. Superior Court* (1989) 207 Cal.App.3d 552, 564 [254 Cal.Rptr. 905].)

¹⁴ Certain language in *Madera Community Hospital v. County of Madera*, *supra*, 155 Cal.App.3d 136, however, is questionable. That opinion states that the "Legislature intended that County bear an obligation to its poor and indigent residents, *to be satisfied from county funds*, notwithstanding federal or state programs which exist concurrently with County's obligation and alleviate, to a greater or lesser extent, County's burden." (P. 151.) Welfare and Institutions Code section 17000 by its terms, however, requires the county to provide support to residents only "when such persons are not supported and relieved by their relatives or friends, by their own means, or by state hospitals or other state or private institutions." Consequently, to the extent that the state or federal governments provide care for MIA's, the county's obligation to do so is reduced pro tanto.

¹⁵ The county's right to subvention funds under article XIII B arises because its duty to care for MIA's is a state-mandated responsibility; if the county had no duty, it would have no right to funds. No claim is made here that the funding of medical services for the indigent shifted to Alameda County is not a program "mandated" by the state; i.e., that Alameda County has any option other than to pay these costs. (*Lucia Mar Unified School Dist. v. Honig*, *supra*, 44 Cal.3d at pp. 836-837.)

of services. But it cannot escape its responsibility entirely, leaving the counties with a state-mandated obligation and no money to pay for it.

[****68] The state's arguments are also undercut by the fact that it continues to use the approximately \$ 1 billion in spending authority, generated by its previous total funding of the health care program in question, as a portion of its initial *base spending limit* calculated pursuant to sections 1 and 3 of article XIII B. In short, the state may maintain here that care for MIA's is a county obligation, but when it computes its appropriation limit it treats the entire cost of such care as a state program.

IV. Conclusion

This is a time when both state and county governments face great financial difficulties. The counties, however, labor under a disability not imposed on the state, for article XIII A of the Constitution severely restricts their ability to raise additional revenue. It is, therefore, particularly important to enforce the provisions of article XIII B which prevent the state from imposing additional obligations upon the counties without providing the means to comply with these obligations.

The present majority opinion disserves the public interest. It denies standing to enforce article XIII B both to those persons whom it was designed to protect -- the citizens and taxpayers [****69] -- and to those harmed by its violation -- the medically indigent adults. And by its reliance on technical grounds to avoid coming to grips with the merits of plaintiffs' appeal, it permits the state to continue to violate article XIII B and postpones the day when the medically indigent will receive adequate health care.

End of Document

Long Beach Unified Sch. Dist. v. State of California

Court of Appeal of California, Second Appellate District, Division Five

November 15, 1990

No. B033742

Reporter

225 Cal. App. 3d 155 *; 275 Cal. Rptr. 449 **; 1990 Cal. App. LEXIS 1198 ***

LONG BEACH UNIFIED SCHOOL DISTRICT,
Plaintiff and Appellant, v. THE STATE OF
CALIFORNIA et al., Defendants and Appellants;
MARK H. BLOODGOOD, as Auditor-Controller,
etc., et al., Defendants and Respondents

Subsequent History: [***1] Appellants' petitions for review by the Supreme Court were denied February 28, 1991. Lucas, C. J., did not participate therein.

Prior History: Superior Court of Los Angeles County, No. C606020, Robert I. Weil, Judge.

Disposition: We conclude that because the doctrines of collateral estoppel and waiver are inapplicable to the facts of this case, the trial court should have allowed State to challenge the decisions of the Board. However, we also determine, as a question of law, that the Executive Order requires local school boards to provide a higher level of service than is required constitutionally or by case law and that the Executive Order is a reimbursable state mandate pursuant to article XIII B, section 6 of the California Constitution. Former Revenue and Tax Code section 2234 does not provide reimbursement of the subject claim. Based on uncontradicted evidence, we modify the decision of the trial court by striking as sources of reimbursement the Special Fund for Economic Uncertainties "or similarly designated accounts." We also modify the judgment to include charging orders against certain funds appropriated through subsequent budget acts. We affirm the decision of the trial court that the Fines [***2] and Forfeitures Funds are not "reasonably available" to satisfy the Claim.

Finally, we remand the matter to the trial court to determine whether at the time of its order, unexpended, unencumbered funds sufficient to satisfy the judgment remained in the approved budget line item account numbers. The trial court is also directed to determine this same issue with respect to the charging order. The judgment is affirmed as modified. Each party is to bear its own costs on appeal.

Core Terms

Case Summary

Procedural Posture

Appellant state challenged an order from the Superior Court of Los Angeles County (California) stating that it was required to reimburse cross-appellant school district for mandated expenditures to integrate the schools, and cross-appellant challenged that part of the order stating that certain funds were not available for this reimbursement.

Overview

The California Department of Education issued an executive order mandating expenditures to integrate

the schools, and when the legislature deleted the requested funding from its budget, cross-appellant school district filed a petition to compel reimbursement after the Board of Control approved the claim. The trial court stated that appellant state was required to make these reimbursements and designated specific funds as reasonably available for the payments, but also ruled that certain funds were not available for these payments. On appeal, the court affirmed the decision as modified, holding that the doctrines of collateral estoppel and waiver were inapplicable and that the trial court should have allowed appellant to challenge the initial decisions of Board of Control in this matter. However, the court concluded that as a matter of law the executive order was a reimbursable state mandate pursuant to Cal. Const. art. XIII B, § 6, not pursuant to former Cal. Rev. & Tax. Code § 2234. The court modified the decision by striking certain funds as sources of reimbursement and affirmed that portion of the order stating that certain funds were not available for the payments.

Outcome

The court affirmed the order stating that appellant state was required to reimburse cross-appellant school district for mandated expenditures to integrate the schools because the executive order was a reimbursable state mandate under the California constitution and modified the designated funds for payment. The case was remanded to determine if unexpended, unencumbered funds existed in the approved budget line item account numbers.

HN2 [↓] **Decisions, Collateral Estoppel**

Finality for the purposes of administrative collateral estoppel may be understood as a two-step process: (1) the decision must be final with respect to action by the administrative agency (Cal. Civ. Proc. Code § 1094.5(a)); and (2) the decision must have conclusive effect. A decision attains the requisite administrative finality when the agency has exhausted its jurisdiction and possesses no further power to reconsider or rehear the claim. Next, the decision must have conclusive effect. In other

words, the decision must be free from direct attack. A direct attack on an administrative decision may be made by appeal to the superior court for review by petition for administrative mandamus. Cal. Civ. Proc. Code § 1094.5. A decision will not be given collateral estoppel effect if such appeal has been taken or if the time for such appeal has not lapsed.

Civil Procedure > Appeals > Standards of Review

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Waiver & Preservation of Defenses

HN3 [↓] **Appeals, Standards of Review**

A waiver occurs when there is an existing right, actual or constructive knowledge of its existence, and either an actual intention to relinquish it, or conduct so inconsistent with an intent to enforce the right as to induce a reasonable belief that it has been waived.) Ordinarily, the issue of waiver is a question of fact which is binding on the appellate court if the determination is supported by substantial evidence. However, the question is one of law when the evidence is not in conflict and is susceptible of only one reasonable inference.

A statute should be construed with reference to the whole system of law of which it is a part in order to ascertain the intent of the legislature. The legislative history of a statute may be considered in ascertaining legislative design.

Constitutional Law > Separation of Powers

Governments > Courts > Authority to Adjudicate

HN8 [↓] **Constitutional Law, Separation of Powers**

A trial court cannot compel the legislature either to appropriate funds or to pay funds not yet

appropriated. Cal. Const. art. III, § 3; art. XVI, § 7. However, no violation of the separation of powers doctrine occurs when a trial court orders appropriate expenditures from already existing funds. The test is whether such funds are reasonably available for the expenditures in question. Funds are "reasonably available" for reimbursement when the purposes for which those funds were appropriated are generally related to the nature of costs incurred. There is no requirement that the appropriations specifically refer to the particular expenditure or must past administrative practice sanction coverage from a particular fund.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A school district filed a claim with the state Board of Control asserting that its expenditures related to its efforts to alleviate racial and ethnic segregation in its schools had been mandated by the state through an executive order (in the form of regulations issued by the state Department of Education) and were reimbursable pursuant to former Rev. & Tax. Code, § 2234, and Cal. Const., art. XIII B, § 6. The board approved the claim, but the Legislature deleted the requested funding from an appropriations bill and enacted a "finding" that the executive order did not impose a statemandated local program. The district then filed a petition to compel reimbursement pursuant to Code Civ. Proc., § 1085, and a complaint for declaratory relief. The trial court ruled that the doctrines of administrative collateral estoppel and waiver prevented the state from challenging the board's decisions. The court's judgment in favor of the district identified certain funds previously appropriated by the Legislature as "reasonably available" for reimbursement of the claimed expenditures. (Superior Court of Los Angeles County, No. C606020, Robert I. Weil, Judge.)

The Court of Appeal modified the trial court's decision by striking as sources of reimbursement the Special Fund for Economic Uncertainties "or similarly designated accounts," and by including charging orders against certain funds appropriated through subsequent budget acts. The court affirmed the judgment as so modified and remanded to the trial court to determine whether at the time of its order, there were, in the funds from which reimbursement could properly be paid, unexpended, unencumbered funds sufficient to satisfy the judgment. The court held that since the doctrines of collateral estoppel and waiver were inapplicable to the facts of the case, the trial court should have allowed the state to challenge the board's decisions. However, the court also held that the executive order required local school boards to provide a higher level of service than is required constitutionally or by case law and that the order was a reimbursable state mandate pursuant to Cal. Const., art. XIII B, § 6. The court further held that former Rev. & Tax. Code, § 2234, did not provide reimbursement of the subject claim. (Opinion by Lucas, P. J., with Ashby and Boren, JJ., concurring.)

Judgments § 88—Collateral Estoppel—Finality of Judgment—Administrative Order—Where Appeal Still Possible.

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the doctrine of administrative collateral estoppel was inapplicable and did not prevent the state from litigating whether the state Board of Control properly considered the subject claim and whether the claim was reimbursable. The board had approved the claim but the Legislature had deleted the requested

funding from an appropriations bill. The board's decisions were administratively final, for collateral estoppel purposes, since no party requested reconsideration within the applicable 10-day period, and no statute or regulation provided for further consideration of the matter by the board. However, a decision will not be given collateral estoppel effect if an appeal has been taken or if the time for such appeal has not lapsed. The applicable statute of limitations for review of the board's decisions was three years, and the school district's action was filed before this period lapsed.

CA(2)[↓] (2)

Judgments § 88—Collateral Estoppel—Finality of Judgment.

--Collateral estoppel precludes a party from relitigating in a subsequent action matters previously litigated and determined. The traditional elements of collateral estoppel include the requirement that the prior judgment be "final."

CA(3a)[↓] (3a) CA(3b)[↓] (3b)

Administrative Law § 81—Judicial Review and Relief—Finality of Administrative Action—For Collateral Estoppel Purposes.

--Finality for the purposes of administrative collateral estoppel may be understood as a two-step process: the decision must be final with respect to action by the administrative agency, and the decision must have conclusive effect. A decision attains the requisite administrative finality when the agency has exhausted its jurisdiction and possesses no further power to reconsider or rehear the claim. To have conclusive effect, the decision must be free from direct attack.

CA(4)[↓] (4)

Limitation of Actions § 30—Commencement of Period.

--A statute of limitations commences to run at the point where a cause of action accrues and a suit may be maintained thereon.

CA(5a)[↓] (5a) CA(5b)[↓] (5b) CA(5c)[↓] (5c)

Estoppel and Waiver § 23—Waiver—State's Right to Contest Board of Control's Findings as to State-mandated Costs.

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the doctrine of waiver did not preclude the state from contesting the state Board of Control's previous findings that the subject claim was reimbursable (the Legislature subsequently deleted the requested funding from an appropriations bill). The statute of limitations applicable to an appeal by the state from the board's decisions had not run at the time the state raised its affirmative defenses in the district's action, and this assertion of defenses was inconsistent with an intent on the state's part to waive its right to contest the board's decisions.

CA(6)[↓] (6)

Estoppel and Waiver § 19—Waiver—Requisites.

--A waiver occurs when there is an existing right, actual or constructive knowledge of its existence, and either an actual intention to relinquish it, or conduct so inconsistent with an intent to enforce the right as to induce a reasonable belief that it has been waived. Ordinarily the issue of waiver is a question of fact that is binding on the appellate court if the determination is supported by substantial evidence. However, the question is one of law when the evidence is not in conflict and is susceptible of only one reasonable inference.

CA(7)[↓] (7)

**Estoppel and Waiver § 6—Equitable Estoppel—
Challenge to State Board of Control's Findings as
to State-mandated Costs—Absence of Confidential
Relationship.**

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the state was not equitably estopped from challenging the state Board of Control's decisions finding that the subject claim was reimbursable as a state-mandated cost (the Legislature subsequently deleted the requested funding from an appropriations bill). In the absence of a confidential relationship, the doctrine of equitable estoppel is inapplicable where there is a mistake of law. There was no confidential relationship, and since the statute of limitations did not bar the state from litigating the mandate and reimbursability issues, the doctrine was inapplicable.

CA(8)[⚡] (8)

**Appellate Review § 145—Function of Appellate
Court—Questions of Law.**

--On appeal by the state in an action by a school district to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the appellate court's conclusion that the trial court erred in failing to consider the merits of the state's challenge to the state Board of Control's decisions that the subject claims were reimbursable as state-mandated costs did not require that the matter be remanded to the trial court for a full hearing, since the question of whether a cost is state-mandated is one of law.

CA(9a)[⚡] (9a) CA(9b)[⚡] (9b) CA(9c)[⚡] (9c)

**Schools § 4—School Districts; Financing; Funds—
Reimbursement of State-mandated Costs—
Desegregation Expenditures.**

--A school district was entitled to reimbursement pursuant to Cal. Const., art. XIII B, § 6 (reimbursement of local governments for state-mandated costs or increased levels of service), for expenditures related to its efforts to alleviate racial and ethnic segregation in its schools, since an executive order (in the form of regulations issued by the state Department of Education) required a higher level of service and constituted a state mandate. The requirements of the order went beyond constitutional and case law requirements in that they required specific actions to alleviate segregation. Although under Cal. Const., art. XIII B, § 6, subd. (c), the state has discretion whether to reimburse pre-1975 mandates that are either statutes or executive orders implementing statutes, it cannot be inferred from this exception that reimbursability is otherwise dependent on the form of the mandate. Further, the district's claim was not defeated by Gov. Code, §§ 17561 and 17514, limiting reimbursement to certain costs incurred after July 1, 1980, the effective date of Cal. Const., art. XIII B, since the limitations contained in those sections are confined to the exception contained in Cal. Const., art. XIII B, § 6, subd. (c).

CA(10)[⚡] (10)

**State of California § 11—Fiscal Matters—
Reimbursement to Local Governments for State-
mandated Costs.**

--The subvention requirement of Cal. Const., art. XIII B, § 6 (reimbursement of local governments for state-mandated costs or increased levels of service), is directed to state-mandated increases in the services provided by local agencies in existing "programs." The drafters and electorate had in mind the commonly understood meaning of the term--programs that carry out the governmental function of providing services to the public, or laws that, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state.

[See 9 **Witkin**, Summary of Cal. Law (9th ed. 1989) Taxation, § 123.]

CA(11)[↓] (11)

Constitutional Law § 13—Construction of Constitutions—Language of Enactments.

--In construing a constitutional provision enacted by the voters, a court must determine the intent of the voters by first looking to the language itself, which should be construed in accordance with the natural and ordinary meaning of its words.

CA(12)[↓] (12)

State of California § 11—Fiscal Matters—Reimbursement to Local Governments for State-mandate Costs—Executive Order as Mandate.

--In Cal. Const., art. XIII B, § 6 (reimbursement of local governments for state-mandated costs or increased levels of service), "mandates" means "orders" or "commands," concepts broad enough to include executive orders as well as statutes. The concern that prompted the inclusion of § 6 in art. XIII B was the perceived attempt by the state to enact legislation or adopt administrative orders creating programs to be administered by local agencies, thereby transferring to those agencies the fiscal responsibility for providing services that the state believed should be extended to the public. It is clear that the primary concern of the voters was the increased financial burdens being shifted to local government, not the form in which those burdens appeared.

CA(13)[↓] (13)

Administrative Law § 88—Judicial Review and Relief—Exhaustion of Administrative Remedies—Claim by School District for Reimbursement of State-mandated Costs.

--A school district did not fail to exhaust its

administrative remedies in seeking reimbursement for expenditures related to its efforts to alleviate racial and ethnic segregation, based on its claim that the expenditures were mandated by a state executive order, where the state Board of Control approved the district's reimbursement claim, even though the state Commission on State Mandates subsequently succeeded to the functions of the board and the district never made a claim to the commission. The board's decisions in favor of the district became administratively final before the commission was in place, and there was no evidence that the commission did not consider these decisions by the board to be final. Although the commission was given jurisdiction over all claims that had not been included in a local government claims bill enacted before January 1, 1985, the subject claim was included in such a bill (which was signed into law only after the recommended appropriation was deleted). Under the statutory scheme, the district pursued the only relief that a disappointed claimant at such a juncture could pursue--an action in declaratory relief to declare an executive order void or unenforceable and to enjoin its enforcement. There was no requirement to seek further administrative review.

CA(14)[↓] (14)

Courts § 20—Subject Matter Jurisdiction—When Issue May Be Raised.

--Lack of subject matter jurisdiction may be raised at any time.

CA(15a)[↓] (15a) CA(15b)[↓] (15b)

Schools § 4—School Districts; Financing; Funds—Reimbursement of State-mandated Costs—Desegregation Expenditures—Applicability of Statute Requiring Reimbursement of Subsequently Mandated Costs.

--A school district was not entitled to

reimbursement on the basis of former Rev. & Tax. Code, § 2234 (reimbursement of school district for costs it is incurring that are subsequently mandated by a state), for expenditures related to its efforts to alleviate racial and ethnic segregation in its schools, since the executive order (in the form of regulations issued by the state Department of Education) that required the district to take specific actions to alleviate segregation fell outside the purview of § 2234. The "subsequently mandated" provision of § 2234 originally was contained in sections that set forth specific date limitations, and the Legislature likewise intended to limit claims made pursuant to § 2234. The use of the language "subsequently mandated" merely describes an additional circumstance in which the state will reimburse costs. Since the executive order fell outside the January 1, 1978, limits set by Rev. & Tax. Code, § 2207.5, Rev. & Tax. Code, § 2234, did not provide reimbursement to the district.

CA(16)[⚡] (16)

Statutes § 39—Construction—Giving Effect to Statute—Conformation of Parts.

--A statute should be construed with reference to the whole system of law of which it is a part in order to ascertain the intent of the Legislature. The legislative history of the statute may be considered in ascertaining legislative design.

CA(17a)[⚡] (17a) CA(17b)[⚡] (17b) CA(17c)[⚡] (17c)

Constitutional Law § 40—Distribution of Governmental Powers—Judicial Power—Appropriation of Funds—Reimbursement of State-mandated Costs.

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the trial court's award of reimbursement to the district, on the ground that the

district's expenditures were mandated by an executive order, from appropriated funds and specified budgets and accounts did not constitute an invasion of the province of the Legislature or a judicial usurpation of the republican form of government guaranteed by U.S. Const., art. IV, § 4, except insofar as it designated the Special Fund for Economic Uncertainties as a source for reimbursement. The specified line item accounts for the Department of Education, the Commission on State Mandates, and the Reserve for Contingencies and Emergencies provided funds for a broad range of activities similar to those specified in the executive order and thus were reasonably available for reimbursement. However, remand to the trial court was necessary to determine whether these sources contained sufficient unexhausted funds to cover the award.

CA(18)[⚡] (18)

Constitutional Law § 40—Distribution of Governmental Powers—Judicial Power—Appropriation of Funds.

--A court cannot compel the Legislature either to appropriate funds or to pay funds not yet appropriated. However, no violation of the separation of powers doctrine occurs when a court orders appropriate expenditures from already existing funds. The test is whether such funds are reasonably available for the expenditures in question. Funds are "reasonably available" for reimbursement of local government expenditures when the purposes for which those funds were appropriated are generally related to the nature of costs incurred. There is no requirement that the appropriation specifically refer to the particular expenditure, nor must past administrative practice sanction coverage from a particular fund.

CA(19)[⚡] (19)

Appellate Review § 162—Modification—To Add Charge Order.

--An appellate court is empowered to add a directive that a trial court order be modified to include charging orders against funds appropriated by subsequent budgets acts.

CA(20)[↓] (20)

Schools § 4—School Districts; Financing; Funds— Reimbursement of State-mandated Costs— Desegregation Expenditures—Effect of Legislative Finding That Costs Not State-mandated.

--A school district was entitled to reimbursement pursuant to Cal. Const., art. XIII B, § 6 (reimbursement of local governments for state-mandated costs or increased levels of service), for expenditures related to its efforts to alleviate racial and ethnic segregation in its schools, notwithstanding that after the state Board of Control approved the district's reimbursement claim, the Legislature enacted a "finding" that the executive order requiring the district to undertake desegregation activities did not impose a state-mandated local program. Unsupported legislative disclaimers are insufficient to defeat reimbursement. The district had a constitutional right to reimbursement, and the Legislature could not limit that right.

CA(21)[↓] (21)

Schools § 4—School Districts; Financing; Funds— Reimbursement of State-mandated Costs— Desegregation Expenditures—Department of Education Budget as Source.

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the trial court, after finding that the executive order requiring the district to undertake desegregation activities was a reimbursable state mandate, did not err in ordering reimbursement to take place in part from the state Department of Education budget. Logic dictated

that department funding be the initial and primary source for reimbursement: given the fact that the executive order was issued by the department, the evidence overwhelmingly supported the trial court's finding of a general relationship between the department budget items and the reimbursable expenditures.

CA(22)[↓] (22)

Interest § 8—Rate—Reimbursement of School District's State-mandated Costs.

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the trial court, after finding that the executive order requiring the district to undertake desegregation activities was a reimbursable state mandate, did not err in awarding the district interest at the legal rate (Cal. Const., art. XV, § 1, par. (2)), rather than at the rate of 6 percent per annum pursuant to Gov. Code, § 926.10. Gov. Code, § 926.10, is part of the California Tort Claims Act (Gov. Code, § 900 et seq.), which provides a statutory scheme for the filing of claims against public entities for alleged injuries. It makes no provision for claims for reimbursement for state-mandated expenditures.

CA(23)[↓] (23)

Schools § 4—School Districts; Financing; Funds— Reimbursement of State-mandated Costs— Desegregation Expenditures—County Fines and Forfeitures Funds as Source.

--In an action by a school district against the state to compel the state to reimburse the district for expenditures related to its efforts to alleviate racial and ethnic segregation, the trial court, after finding that the executive order requiring the district to undertake desegregation activities was a reimbursable state mandate, did not err in determining that moneys in the Fines and Forfeiture

Funds in the custody and possession of the county auditor-controller for transfer to the state treasury were not reasonably available for reimbursement purposes. There was no evidence in the record showing the use of those funds once they were transmitted to the state, nor was there any evidence indicating that those funds were then reasonably available to satisfy the district's claim. It could not be concluded as a matter of law that a general relationship existed between the funds and the nature of the costs incurred pursuant to the executive order. Further, there was no ground on which the funds could be made available to the district while in the possession of the auditor-controller.

Opinion

[*163] [**454] Introduction

Long Beach Unified School District (LBUSD) filed a claim with the Board of Control of the State of California [***3] (Board), asserting that certain expenditures related to its efforts to alleviate racial and ethnic segregation in its schools had been mandated by the state through regulations (Executive Order) issued by the Department of

Education (DOE) and were [*164] reimbursable pursuant to former Revenue and Taxation Code section 2234 and article XIII B, section 6 of the California Constitution. The Board eventually approved the claim and reported to the Legislature its recommendation that funds be appropriated to cover the statewide estimated costs of compliance with the Executive Order. When the Legislature deleted the requested funding from an appropriations bill, LBUSD filed a petition to compel reimbursement (Code Civ. Proc., § 1085) and complaint for declaratory relief. The trial court held that the doctrines of administrative collateral estoppel and waiver prevented the state from challenging the decisions of the Board, and it gave judgment to LBUSD. It also ruled that certain funds previously appropriated by the Legislature were "reasonably available" for reimbursement of the claimed expenditures, subject to audit by the state Controller.

We conclude that the doctrines of collateral [***4] estoppel and waiver are inapplicable to the facts of this case. However, we determine as a question of law that the Executive Order requires local school boards to provide a higher level of service than is required either constitutionally or by case law and that the Executive Order is a reimbursable state mandate pursuant to article XIII B, section 6 of the California Constitution. We also decide that former Revenue and Taxation Code section 2234 does not provide for reimbursement of the claim.

Based on uncontradicted evidence, we modify the decision of the trial court regarding which budget line item account numbers provide "reasonably available" funds to reimburse LBUSD for appropriate expenditures under the claim. We further modify the decision to include charging orders against funds appropriated by subsequent budget acts. Finally, we remand the matter to the trial court to determine whether at the time of its order unexpended, unencumbered funds sufficient to satisfy the judgment remained in the approved budget line item account numbers. The trial court must resolve this same issue with respect to the

charging order.

[**455] Background and Procedural History

The California Property [***5] Tax Relief Act of 1972 (Stats. 1972, ch. 1406, § 1, p. 2931) limited the power of local governmental entities to levy property taxes. It also mandated that when the state requires such entities to provide a new program or higher level of service, the state must reimburse those costs. Over time, amendments to the California Constitution and numerous legislative changes impacted both the right and procedure for obtaining reimbursement.

[*165] Sometime prior to September 8, 1977, LBUSD, at its option, voluntarily began to incur substantial costs to alleviate the racial and ethnic segregation of students within its jurisdiction.

On or about the above date, DOE adopted certain regulations which added sections 90 through 101 to title 5 of the California Administrative Code, effective September 16, 1977. We refer to these regulations as the Executive Order.

The Executive Order and related guidelines for implementation required in part that school districts which identified one or more schools as either having or being in danger of having segregation of its minority students "shall, no later than January 1, 1979, and each four years thereafter, develop and adopt a reasonably feasible [***6] plan for the alleviation and prevention of racial and ethnic segregation of minority students in the district."

On or about June 4, 1982, LBUSD submitted a "test claim" (Claim)¹ to the Board for reimbursement of \$ 9,050,714 -- the total costs which LBUSD claimed it had incurred during fiscal years 1977-1978 through 1981-1982 for activities required by the Executive Order and guidelines. LBUSD cited

¹ Former Revenue and Taxation Code section 2218 defines "test claim" as "the first claim filed with the State Board of Control alleging that a particular statute or executive order imposes a mandated cost on such local agency or school district." (Stats. 1980, ch. 1256, § 7, p. 4249.)

former Revenue and Taxation Code section 2234 as authority for the requested reimbursement, asserting that the costs had been "subsequently mandated" by the state.²

[***7] The Board denied the Claim on the grounds that it had no jurisdiction to accept a claim filed under section 2234. LBUSD petitioned superior court for review of the Board decision. (Code Civ. Proc., § 1094.5.) That court concluded the Board had jurisdiction to accept a section 2234 claim and ordered it to hear the matter on its merits. The Board did not appeal this decision.

On February 16, 1984, the Board conducted a hearing to consider the Claim. LBUSD presented written and oral argument that the Claim was reimbursable pursuant to section 2234 and, in addition, under article XIII B, section 6 of the California Constitution. DOE and the State Department [*166] of Finance (Finance) participated in the hearing.³ [***8] The Board concluded that the Executive Order constituted a state mandate. On April 26, 1984, the Board adopted parameters and guidelines proposed by

² All statutory references are to the Revenue and Taxation Code unless otherwise stated.

Former section 2234 provided: "If a local agency or a school district, at its option, has been incurring costs which are subsequently mandated by the state, the state shall reimburse the local agency or school district for such costs incurred after the operative date of such mandate." (Stats. 1980, ch. 1256, § 11, pp. 4251-4252.)

³ The DOE recommended that the Claim be denied on the grounds that the requirements of the Executive Order were constitutionally mandated and court ordered and because the Executive Order was effective prior to January 1, 1978 (issues discussed *post*). However, counsel for the DOE expressed dismay that school districts which had voluntarily instituted desegregation programs had been having problems receiving funding from the Legislature, while schools which had been forced to do so had been receiving "substantial amounts of money."

A spokesman from Finance recalled there had been some doubt whether the Board had jurisdiction to hear a 2234 claim. He stated that, assuming the Board did have jurisdiction, the Executive Order contained at least one state mandate, which possibly consisted of administrative kinds of tasks related to the identification of "problem areas and the like."

LBUSD for reimbursement of the expenditures. No state entity either sought reconsideration of the Board decisions, **[**456]** available pursuant to former section 633.6 of the California Administrative Code, ⁴ or petitioned for judicial review. ⁵

In December 1984, pursuant to former section 2255, the Board reported to the Legislature the number of mandates it had found and the estimated statewide costs of each mandate. **[***9]** With respect to the Executive Order mandate, the Board adopted an estimate by Finance that reimbursement of school districts, including LBUSD, for costs expended in compliance with the Executive Order would total \$ 95 million for fiscal years 1977-1978 through 1984-1985. The Board recommended that the Legislature appropriate that amount.

Effective January 1, 1985, the Commission on State Mandates (Commission) succeeded to the functions of the Board. (Gov. Code, §§ 17525, 17630.)

On March 4, 1985, Assembly Bill No. 1301 was introduced. It included an appropriation of \$ 95 million to the state controller "for payment of claims of school districts seeking reimbursable state-mandated costs incurred pursuant to [the Executive Order] . . ." On June 27, the Assembly amended the bill by deleting this \$ 95 million appropriation and adding a **[*167]** "finding" that the Executive Order did not impose a state-

⁴Former section 633.6 of the California Administrative Code (now renamed California Code of Regulations) provided in relevant part: "(b) Request for Reconsideration. [para.] (1) A request for reconsideration of a Board determination on a specific test claim . . . shall be filed, in writing, with the Board of Control, no later than ten (10) days after any determination regarding the claim by the Board . . ." (Title 2, Cal. Admin. Code)

⁵Former section 2253.5 provided: "A claimant or the state may commence a proceeding in accordance with the provisions of Section 1094.5 of the Code of Civil Procedure to set aside a decision of the Board of Control on the grounds that the board's decision is not supported by substantial evidence. The court may order the board to hold another hearing regarding such claim and may direct the board on what basis the claim is to receive a rehearing." (Stats. 1978, ch. 794, § 8, p. 2551.)

mandated local program. ⁶ On September 28, 1985, the Governor approved the bill as amended.

[*10]** On June 26, 1986, LBUSD petitioned for writ of mandate (Code Civ. Proc., § 1085) and filed a complaint for declaratory relief against defendants State of California; Commission; Finance; DOE; holders of the offices of State Controller and State Treasurer and holder of the office of Auditor-Controller of the County of Los Angeles, and their successors in interest. LBUSD requested issuance of a writ of mandate commanding the respondents to comply with section 2234 (fn. 2, *ante*) ⁷ **[***11]** and, in an amended petition, its successor, Government Code section 17565, and with California Constitution, article XIII B, section 6. ⁸ It further requested respondents to reimburse LBUSD \$ 24,164,593 for fiscal years 1977-1978 through 1982-1983, \$ 3,850,276 for fiscal years 1983-1984 and 1984-1985, and accrued interest, for activities mandated by the Executive Order.

The trial court let stand the conclusion of the Board that the Executive Order constituted a reimbursable state mandate and ruled in favor of LBUSD. No party requested a statement of decision.

The judgment stated that the Executive Order

⁶Former Section 2255 provided in part: "(b) If the Legislature deletes from a local government claims bill funding for a mandate imposed either by legislation or by a regulation . . . , it may take one of the following courses of action: (1) Include a finding that the legislation or regulation does not contain a mandate . . ." (Stats. 1982, ch. 1638, § 7, p. 6662.)

⁷The language of Government Code section 17565 is nearly identical to that of section 2234 (fn. 2, *ante*), and provides: "If a local agency or a school district, at its option, has been incurring costs which are subsequently mandated by the state, the state shall reimburse the local agency or school district for those costs incurred after the operative date of the mandate." (Stats. 1986, ch. 879, § 10, p. 3043.)

⁸Article XIII B, section 6 provides in pertinent part: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service"

constituted a reimbursable state mandate which state entities could not challenge because of the doctrines of administrative collateral estoppel and waiver. It provided that certain previously appropriated [**457] funds were "reasonably available" to reimburse LBUSD for its claimed expenditures, applicable interest, and court costs. The judgment also stated that funds denominated the "Fines and Forfeitures Funds," under the custody of the Auditor-Controller of the County of Los Angeles, were not reasonably available. The judgment further decreed [***12] that the State Controller retained the right to audit the claims and records of LBUSD to verify the amount of the reimbursement award sum.

[*168] State respondents (State) and DOE separately filed timely notices of appeal, and LBUSD cross-appealed.⁹

Discussion

State asserts that neither the doctrine of collateral estoppel nor the doctrine of waiver is applicable to this case, the costs incurred by LBUSD are not reimbursable, and the remedy authorized by the trial court is inconsistent with California law and invades the province of the Legislature, a violation of article IV, section 4 of the United States Constitution.

The [***13] thrust of the DOE appeal is that its budget is not an appropriate source of funding for the reimbursement.

LBUSD has argued in its cross-appeal that an additional source of funding, the "Fines and Forfeiture Funds," should be made available for reimbursement of its costs and, in supplementary briefing, requests this court to order a modification of the judgment to include as "reasonably available

funding" specific line item accounts from the 1988-1989 and 1989-1990 state budgets.

I. State Not Barred From Challenging Decisions of the Board

A. Administrative Collateral Estoppel

CA(1a)[↑] (1a) State first contends that the doctrine of administrative collateral estoppel is not applicable to the facts of this case and does not prevent State from litigating whether the Board properly considered the subject claim and whether the claim is reimbursable.

CA(2)[↑] (2) HN1[↑] Collateral estoppel precludes a party from relitigating in a subsequent action matters previously litigated and determined. (*Teitelbaum Furs, Inc. v. Dominion Ins. Co., Ltd.* (1962) 58 Cal.2d 601, 604 [25 Cal.Rptr. 559, 375 P.2d 439].) The traditional elements of collateral estoppel include the requirement [***14] that the prior judgment be "final." (*Ibid.*)

CA(3a)[↑] (3a) HN2[↑] Finality for the purposes of administrative collateral estoppel may be understood as a two-step process: (1) the decision must be final with [*169] respect to action by the administrative agency (see *Code Civ. Proc.*, § 1094.5, subd. (a)); and (2) the decision must have conclusive effect (*Sandoval v. Superior Court* (1983) 140 Cal.App.3d 932, 936-937 [190 Cal.Rptr. 29]).

A decision attains the requisite administrative finality when the agency has exhausted its jurisdiction and possesses "no further power to reconsider or rehear the claim. [Fn. omitted]" (*Chas. L. Harney, Inc. v. State of California* (1963) 217 Cal.App.2d 77, 98 [31 Cal.Rptr. 524].)

⁹ Although an "Amended Notice to Prepare Clerk's Transcript" filed by DOE on April 11, 1988, requests the clerk of the superior court to incorporate in the record its notice of appeal filed April 1, 1988, this latter document does not appear in the record before us, and the original apparently is lost within the court system. Respondent LBUSD received a copy of the notice on April 4, 1988.

CA(1b)^[↑] **(1b)** In the case at bar, former section 633.6 of the Administrative Code provided a 10-day period during which any party could request reconsideration of any Board determination (fn. 4, *ante*). The Board decided on February 16, 1984, that the Executive Order constituted a state mandate, and on April 26, 1984, it adopted parameters and guidelines for the reimbursement of the claimed expenditures. No party requested [***15] reconsideration, no statute or regulation provided for further consideration of the matter by the Board (see, e.g., *Olive Proration etc. Com. v. Agri. etc. Com.* (1941) 17 Cal.2d 204, 209 [109 P.2d 918]), and the decisions became administratively final on February [**458] 27, 1984, and May 7, 1984, respectively¹⁰ (*Ziganto v. Taylor* (1961) 198 Cal.App.2d 603, 607 [18 Cal.Rptr. 229]).

CA(3b)^[↑] **(3b)** Next, the decision must have conclusive effect. (*Sandoval v. Superior Court, supra*, 140 Cal.App.3d 932, 936-937.) In other words, the decision must be free from direct attack. (*People v. Sims* (1982) 32 Cal.3d 468, 486 [186 Cal.Rptr. 77, 651 P.2d 321].) A direct attack on an administrative decision may be made by appeal to the superior court for review [***16] by petition for administrative mandamus. (*Code Civ. Proc.*, § 1094.5.)

CA(1c)^[↑] **(1c)** A decision will not be given collateral estoppel effect if such appeal has been taken or if the time for such appeal has not lapsed. (*Sandoval v. Superior Court, supra*, 140 Cal.App.3d at pp. 936-937; *Producers Dairy Delivery Co. v. Sentry Ins. Co.* (1986) 41 Cal.3d 903, 911 [226 Cal.Rptr. 558, 718 P.2d 920].) The

¹⁰ We take judicial notice pursuant to *Evidence Code* section 452, subdivision (h), that February 26, 1984, and May 6, 1984, fall on Sundays.

applicable statute of limitations for such review in the case at bar is three years. (*Carmel Valley Fire Protection Dist. v. State of California* (1987) 190 Cal.App.3d 521, 534 [234 Cal.Rptr. 795]; *Green v. Obledo* (1981) 29 Cal.3d 126, 141, fn. 10 [172 Cal.Rptr. 206, 624 P.2d 256].)

CA(4)^[↑] **(4)** A statute of limitations commences to run at the point where a cause of action accrues and a suit may be maintained thereon. (*Dillon v. Board of Pension Comm'rs.* (1941) 18 Cal.2d 427, 430 [116 P.2d 37, 136 A.L.R. 800].)

CA(1d)^[↑] **(1d)** In the instant case, State's causes of action accrued when the Board made the two decisions [***17] adverse to State on February 16 and April 26, 1984, [*170] as discussed. State did not request reconsideration, and the decisions became administratively final on February 27 and May 7, 1984.¹¹ [***18] For purposes of discussion, we will assume the applicable three-year statute of limitations period for the two Board decisions commenced on February 28 and May 8, 1984, and ended on February 28 and May 8, 1987.¹² LBUSD filed its petition for ordinary mandamus (*Code Civ. Proc.*, § 1085) and complaint for declaratory relief on June 26, 1986. At that point, the limitations periods had not run against State and the Board decisions lacked the necessary finality to satisfy that requirement of the doctrine of

¹¹ We do not address the contention of LBUSD that State failed to exhaust its administrative remedies (*Abelleira v. District Court of Appeal* (1941) 17 Cal.2d 280, 292 [109 P.2d 942, 132 A.L.R. 715]; *Morton v. Superior Court* (1970) 9 Cal.App.3d 977, 982 [88 Cal.Rptr. 533]) and therefore State cannot assert its affirmative defenses in response to the petition and complaint of the school district. Traditionally, the doctrine has been raised as a bar only with respect to the party seeking judicial relief, not against the responding party (*ibid.*); we have found no case holding otherwise.

¹² If State had sought reconsideration and its request been denied, or if its request had been granted but the matter again decided in favor of LBUSD, the Board decision would have been final 10 days after the Board action, and at that point the statute would have commenced to run against State.

administrative collateral estoppel.¹³

[***19] [**459] *B. Waiver*

CA(5a)[↑] (5a) State also asserts that the doctrine of waiver is not applicable.

CA(6)[↑] (6) HN3[↑] A waiver occurs when there is "an existing right; actual or constructive knowledge of its existence; and either an actual intention to relinquish it, or conduct so inconsistent with an intent to enforce the right as to induce [*171] a reasonable belief that it has been waived. [Citations.]" (*Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at p. 534.) Ordinarily, the issue of waiver is a question of fact which is binding on the appellate court if the determination is supported by substantial evidence. (*Napa Association of Public Employees v. County of Napa* (1979) 98 Cal.App.3d 263, 268 [159

Cal.Rptr. 522].) However, the question is one of law when the evidence is not in conflict and is susceptible of only one reasonable inference. (*Glendale Fed. Sav. & Loan Assn. v. Marina View Heights Dev. Co.* (1977) 66 Cal.App.3d 101, 151-152 [135 Cal.Rptr. 802].)

CA(5b)[↑] (5b) In the instant case, the right to contest the findings of the Board is at issue, and there is no dispute that [***20] the state was aware of the existence of this right. As discussed, the statute of limitations had not run when State raised its affirmative defenses, and during this time State could have filed a separate petition for administrative mandamus.

CA(7)[↑] (7) (See fn. 14.)

CA(5c)[↑] (5c) State's assertion of its affirmative defenses during this period is inconsistent with an intent to waive its right to contest the Board decisions, and therefore the doctrine of waiver is not applicable.¹⁴

[***21] *II. Issue of State Mandate*

CA(8)[↑] (8) Ordinarily, our conclusion that the trial court erred in failing to consider the merits of the State's challenge to the decisions of the Board would require that the matter be remanded to the trial court for a full hearing. However, because the question of whether a cost is state mandated is one of law in the instant case (cf. *Carmel Valley Fire Protection Dist. v. State of California, supra*, 190

¹³ State argues that its statute of limitations did not commence until the legislation was enacted without the appropriation (Sept. 28, 1985), citing *Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at page 548. However, *Carmel Valley* held that the claimant does not exhaust its administrative remedies and cannot come under the court's jurisdiction until the legislative process is complete, which occurred in that case when the legislation was enacted without the subject appropriations. At that point, *Carmel Valley* reasoned, the state had breached its duty to reimburse, and the claimant's right of action in traditional mandamus accrued. (*Ibid.*) However, *Carmel Valley* decided, as do we in the case at bar, that the state's statute of limitations commenced on the date the Board made decisions adverse to its interests. (*Id.* at p. 534.)

In addition, we see no reason to permit State to rely on the fortuitous actions of the Legislature, an independent branch of government, to bail it out of obligations established in the distant past by state agents -- especially given the lengthy three-year statute of limitations. (Compare, e.g., *Gov. Code*, § 11523 [mandatory time limit within which to petition for administrative mandamus can be 30 days after last day on which administrative reconsideration can be ordered]; *Lab. Code*, § 1160.8, and *Jackson & Perkins Co. v. Agricultural Labor Relations Board* (1978) 77 Cal.App.3d 830, 834 [144 Cal.Rptr. 166] [30 days from issuance of board order even if party has filed a motion to reconsider].)

¹⁴ LBUSD contends that State should be equitably estopped from challenging the Board decisions. In the absence of a confidential relationship, the doctrine of equitable estoppel is inapplicable where there is a mistake of law. (*Gilbert v. City of Martinez* (1957) 152 Cal.App.2d 374, 378 [313 P.2d 139]; *People v. Stuyvesant Ins. Co.* (1968) 261 Cal.App.2d 773, 784 [68 Cal.Rptr. 389].) There is no confidential relationship herein, and since we conclude as a matter of law and contrary to the trial court that the statute of limitations does not bar State from litigating the mandate and reimbursability issues, the doctrine is inapplicable.

Cal.App.3d at p. 536), we now decide that the expenditures are reimbursable pursuant to article XIII B, section 6 of the California Constitution and that no relief is available under section 2234.¹⁵

[***22] [*172] *A. Recovery Under Article XIII B, Section 6*

CA(9a)[↑] (9a) On November 6, 1979, California voters passed initiative measure Proposition 4, which added article XIII B to the state Constitution. This measure, a corollary to the previously passed Proposition 13 (art. XIII A, which restricts governmental taxing authority), placed limits on the growth of state and local government appropriations. It also provided reimbursement to local governments for the costs of complying with certain requirements mandated by the state. LBUSD argues that section 6 of this provision is an additional ground for reimbursement.

1. The Executive Order Requires a Higher Level of Service

In relevant part article XIII B, section 6 (Section 6) provides: **HN4[↑]** "Whenever the Legislature or any state agency mandates a new program or higher level of service on any [*460] local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service"

CA(10)[↑] (10) The subvention requirement of Section 6 "is directed to state mandated increases in the services provided by local agencies in existing 'programs.'" (*County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56 [233 Cal.Rptr.

38, 729 P.2d 202].) [***23] "[T]he drafters and the electorate had in mind the commonly understood meanings of the term -- programs that carry out the governmental function of providing services to the public, or laws which, to implement a state policy, impose unique requirements on local governments and do not apply generally to all residents and entities in the state." (*Ibid.*)

CA(9b)[↑] (9b) In the instant case, although numerous private schools exist, education in our society is considered to be a peculiarly governmental function. (Cf. *Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at p. 537.) Further, public education is administered by local agencies to provide service to the public. Thus public education constitutes a "program" within the meaning of Section 6.

State argues that the Executive Order does not mandate a higher level of service -- or a new program -- because school districts in California have a constitutional duty to make an effort to eliminate racial segregation in the public schools. In support of its argument, State cites *Brown v. Board of Education* (1952) 347 U.S. 483, 495 [98 L.Ed. 873, 881, 74 S.Ct. 686, 38 A.L.R.2d 1180]; [***24] *Jackson v. Pasadena City School District* (1963) 59 Cal.2d 876, 881 [31 Cal.Rptr. 606, 382 P.2d 878]; *Crawford v. Board of Education* (1976) 17 Cal.3d 280 [130 Cal.Rptr. 724, 551 P.2d 28] and cases cited therein; and *National Assn. for Advancement of Colored People v. San Bernardino [173] City Unified Sch. Dist.* (1976) 17 Cal.3d 311 [130 Cal.Rptr. 744, 551 P.2d 48]. These cases show that school districts do indeed have a constitutional obligation to alleviate racial segregation, and on this ground the Executive Order does not constitute a "new program." However, although school districts are required to "take steps, insofar as reasonably feasible, to alleviate racial imbalance in schools regardless of its cause[]" (*Crawford, supra*, at p. 305, italics

¹⁵We invited State, DOE, and LBUSD to submit additional briefing on the following issues: "1. Can it be determined as a question of law whether sections 90 through 101 of Title 5 of the California Administrative Code [Executive Order] constitute a state mandate within the meaning of article XIII B, section 6 of the California Constitution? 2. Do the above sections constitute such mandate?" State and LBUSD submitted additional argument; DOE declined the invitation.

omitted, citing *Jackson*), the courts have been wary of requiring specific steps in advance of a demonstrated need for intervention (*Crawford*, at pp. 305-306; *Jackson*, *supra*, at pp. 881-882; *Swann v. Board of Education* (1971) 402 U.S. 1, 18-21 [28 L.Ed.2d 554, 567-570, 91 S.Ct. 1267]). [***25] On the other hand, courts have required specific factors be considered in determining whether a school is segregated (*Keyes v. School District No. 1, Denver, Colo.* (1973) 413 U.S. 189, 202-203 [37 L.Ed.2d 548, 559-560, 93 S.Ct. 2686]; *Jackson*, *supra*, at p. 882).

The phrase "higher level of service" is not defined in article XIII B or in the ballot materials. (*County of Los Angeles v. State of California*, *supra*, 43 Cal.3d 46, 50.) A mere increase in the cost of providing a service which is the result of a requirement mandated by the state is not tantamount to a higher level of service. (*Id.*, at pp. 54-56.) However, a review of the Executive Order and guidelines shows that a higher level of service is mandated because their requirements go beyond constitutional and case law requirements. Where courts have *suggested* that certain steps and approaches may be helpful, the Executive Order and guidelines *require* specific actions. For example, school districts are to conduct mandatory biennial [***26] racial and ethnic surveys, develop a "reasonably feasible" plan every four years to alleviate and prevent segregation, include certain specific elements in each plan, and take mandatory steps to involve the community, including public hearings which have been advertised in a specific manner. While all these steps fit within the "reasonably feasible" description of *Jackson* and *Crawford*, the point is that these steps are no longer merely being suggested as options which the local school district may [**461] wish to consider but are required acts. These requirements constitute a higher level of service. We are supported in our conclusion by the report of the Board to the Legislature regarding its decision that the Claim is reimbursable: "[O]nly those costs that are above and beyond the regular level of service for like pupils in the district are

reimbursable."

2. *The Executive Order Constitutes a State Mandate*

For the sake of clarity we quote Section 6 in full: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to [*174] reimburse such local government for the [***27] costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates: [para.] (a) Legislative mandates requested by the local agency affected; [para.] (b) Legislation defining a new crime or changing an existing definition of a crime; or [para.] (c) *Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975.*" (Italics added.) This amendment became effective July 1, 1980. (Art. XIII B, § 10.) Again, the Executive Order became effective September 16, 1977.

State argues there is no constitutional ground for reimbursement because (a) with reference to the language of exception (c) of Section 6, the Executive Order is neither a statute nor an executive order or regulation implementing a statute; (b) recent legislation limits reimbursement to certain costs incurred after July 1, 1980, the effective date of the constitutional amendment; and (c) LBUSD failed to exhaust administrative procedures for reimbursement of Section 6 claims (Gov. Code, § 17500 et seq.). We conclude that recovery is available [***28] under Section 6.

(a) *Form of Mandate*

State argues the Executive Order is not a state mandate because, with reference to exception (c) of Section 6, it is neither a statute nor an executive order implementing a statute.

CA(11)[↑] (11) HN5[↑] In construing the meaning of Section 6, we must determine the intent of the voters by first looking to the language itself (*County of Los Angeles v. State of California, supra*, 43 Cal.3d 46, 56), which "should be construed in accordance with the natural and ordinary meaning of its words." [Citation.]" (*ITT World Communications, Inc. v. City and County of San Francisco* (1985) 37 Cal.3d 859, 865 [210 Cal.Rptr. 226, 693 P.2d 811].) The main provision of Section 6 states that whenever the Legislature or any state agency "mandates" a new program or higher level of service, the state must provide reimbursement.

CA(12)[↑] (12) We understand the use of "mandates" in the ordinary sense of "orders" or "commands," concepts broad enough to include executive orders as well as statutes. As has been noted, "[t]he concern which prompted the inclusion of section 6 in article XIII B was the perceived [***29] attempt by the state to enact legislation *or adopt administrative orders* creating programs to be administered by local agencies, thereby transferring to those agencies the fiscal responsibility for providing services which the state believed should be extended to the public." (*County of Los Angeles v. State of California, supra*, 43 Cal.3d at p. 56.) It is clear that the primary concern of the voters was the increased financial [*175] burdens being shifted to local government, not the form in which those burdens appeared.

We derive support for our interpretation by reference to the ballot summary presented to the electorate. (Cf. *Amador Valley Joint Union High Sch. Dist. v. State Bd. of Equalization* (1978) 22 Cal.3d 208, 245-246 [149 Cal.Rptr. 239, 583 P.2d 1281].) The legislative analyst determined that the amendment would limit the rate of growth of governmental appropriations, require the return of taxes which exceeded amounts appropriated, and "[r]equire the state to reimburse local governments for the costs of complying with 'state mandates.'" [***462] The term "state mandates" was [***30]

defined as "requirements imposed on local governments by legislation *or executive orders*." (Italics added; Ballot Pamp., Proposed Amend. to Cal. Const. with arguments to voters, Special Statewide Elec. (Nov. 6, 1979) p. 16.)

CA(9c)[↑] (9c) Although exception (c) of Section 6 gives the state discretion whether to reimburse pre-1975 mandates which are either statutes or executive orders implementing statutes, we do not infer from this exception that reimbursability is otherwise dependent on the form of the mandate. We conclude that since the voters provided for mandatory reimbursement except for the three narrowly drawn exceptions found in (a), (b), and (c), there was no intent to exclude recovery for state mandates in the form of executive orders. Further, as State sets forth in its brief, the adoption of the Executive Order was "arguably prompted" by the decision in *Crawford v. Board of Education, supra*, 17 Cal.3d 280, a case decided after the 1975 cutoff date of exception (c). Since case law and statutory law are of equal force, there appears to be no basis on which to exclude executive orders which implement case law or constitutional law [***31] while permitting reimbursement for executive orders implementing statutes. We see no relationship between the proposed distinction and the described purposes of the amendment (*County Los Angeles v. State of California, supra*, 43 Cal.3d at p. 56; *County of Los Angeles v. Department of Industrial Relations* (1989) 214 Cal.App.3d 1538, 1545 [263 Cal.Rptr. 351]).

(b) *Recent Legislative Limits*

State contends that LBUSD cannot claim reimbursement under Section 6 because Government Code sections 17561 (Stats. 1986, ch. 879, § 6, p. 3041) and 17514 (Stats. 1984, ch. 1459, § 1, p. 5114) limit such recovery to mandates created by statutes or executive orders implementing statutes, and only for costs incurred after July 1, 1980.

As discussed above, the voters did not intend to limit reimbursement of costs only to those incurred

pursuant to statutes or executive orders implementing [*176] statutes except as set forth in exception (c) of Section 6. We presume that when the Legislature passed Government Code sections 17561 and 17514 it was aware of Section 6 as a related law and intended to maintain a consistent [***32] body of rules. (*Fuentes v. Workers' Comp. Appeals Bd.* (1976) 16 Cal.3d 1, 7 [128 Cal.Rptr. 673, 547 P.2d 449].) As discussed above, the limitations suggested by State are confined to exception (c).

Further, the state must reimburse costs incurred pursuant to mandates enacted after January 1, 1975, although actual payments for reimbursement were not required to be made prior to July 1, 1980, the effective date of Section 6. (*Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at pp. 547-548; *City of Sacramento v. State of California* (1984) 156 Cal.App.3d 182, 191-194 [203 Cal.Rptr. 258], disapproved on other grounds in *County of Los Angeles v. State of California, supra*, 43 Cal.3d at p. 58, fn. 10.)

(c) Administrative Procedures

The Legislature passed Government Code section 17500 et seq. (Stats. 1984, ch. 1459, § 1, p. 5113), effective January 1, 1985 (Stats. 1984, ch. 1459, § 1, p. 5123), to aid the implementation of Section 6 and to consolidate the procedures for reimbursement [***33] under statutes found in the Revenue and Taxation Code. This legislation created the Commission, which replaced the Board, and instituted a number of procedural changes. (Gov. Code, §§ 17525, 17527, subd. (g), 17550 et seq.) The Legislature intended the new system to provide "the sole and exclusive procedure by which a local agency or school district" could claim reimbursement. (Gov. Code, § 17552.)

CA(13)[↑] (13) State argues that since LBUSD never made its claim before the Commission, it failed to exhaust its administrative [**463] remedies and cannot now receive reimbursement under section 6.

As discussed, the Board decisions favorable to LBUSD became administratively final in 1984. The Commission was not in place until January 1, 1985. There is no evidence in the record that the Commission did not consider these decisions to be final.

State argues the Commission was given jurisdiction over all claims which had not been included in a local government claims bill enacted before January 1, 1985. (Gov. Code, § 17630.) State is correct. However, the subject claim was included in such a bill, but the bill was signed into law after the recommended appropriation had been deleted. Under the statutory [***34] scheme, the only relief offered a disappointed claimant at such juncture is an action in declaratory relief to declare a subject executive order void [*177] (former Rev. & Tax Code, § 2255, subd. (c); Stats. 1982, ch. 1638, § 7, pp. 6662-6663) or unenforceable (Gov. Code, § 17612, subd. (b); Stats. 1984, ch. 1459, § 1, p. 5121) and to enjoin its enforcement. LBUSD pursued this remedy and in addition petitioned for writ of mandate (Code Civ. Proc., § 1085) to compel reimbursement. There is no requirement to seek further administrative review. Indeed, to do so after the Legislature has spoken would appear to be an exercise in futility.

We conclude that Section 6 provides reimbursement to LBUSD because the Executive Order required a higher level of service and because the Executive Order constitutes a state mandate.

B. Section 2234

As set forth in the procedural history of this case, the Board originally declined to consider the Claim as a claim made under section 2234 on the ground that it lacked jurisdiction to do so. LBUSD petitioned for judicial relief, and the trial court held that the Board had jurisdiction and must consider the claim on its merits. The Board did not [***35] appeal that decision. State raised the jurisdiction issue as an affirmative defense to the second

petition for writ of mandate filed by LBUSD and presents it again for our consideration.

CA(14)[↑] (14) Of course, **HN6[↑]** lack of subject matter jurisdiction may be raised at any time. (*Stuck v. Board of Medical Examiners* (1949) 94 Cal.App.2d 751, 755 [211 P.2d 389].)

Former section 2250 provided: "The State Board of Control, pursuant to the provisions of this article, shall hear and decide upon a claim by a local agency or school district that such local agency or school district has not been reimbursed for *all costs mandated by the state as required by Section 2231 or 2234*. [para.] Notwithstanding any other provision of law, this article shall provide the sole and exclusive procedure by which the Board of Control shall hear and decide upon a claim that a local agency or school district has not been reimbursed for *all costs mandated by the state as required by Section 2231 or 2234*." (Italics added; Stats. 1978, ch. 794, § 5, p. 2549.) Given the clear, unambiguous language of the statute, there is no need for construction. (*West Covina Hospital v. Superior Court* (1986) 41 Cal.3d 846, 850 [226 Cal.Rptr. 132, 718 P.2d 119, 60 A.L.R.4th 1257].)

[***36] **CA(15a)[↑]** (15a) We conclude that the Board had jurisdiction to consider a claim filed under former section 2234. However, as discussed below, the 1977 Executive Order falls outside the purview of section 2234.

Former section 2231 provided: "(a) . . . The state shall reimburse each school district only for those 'costs mandated by the state', as defined in [*178] Section 2207.5." (Stats. 1982, ch. 1586, § 3, p. 6264.) In part, former section 2207.5 defines "costs mandated by the state" as increased costs which a school district is required to incur as a result of certain new programs or certain increased program levels or services mandated by an executive order issued *after* January 1, 1978. (Stats. 1980, ch. 1256, § 5, pp. 4248-4249.) As previously stated, the Executive Order in the case at bar was issued September 8, 1977.

Former section 2234, pursuant to which LBUSD initially filed its claim, does not itself contain language indicating a time limitation: "If a local agency or a school district, at its option, has been incurring costs which are subsequently mandated by the state, the state shall reimburse the [***464] local agency or school district for such costs incurred after the operative [***37] date of such mandate." (Stats. 1980, ch. 1256, § 11, p. 4251.)

State asserts that the January 1, 1978, limitation of sections 2231 and 2207.5 applies to section 2234, preventing reimbursement for costs expended pursuant to the September 8, 1977, Executive Order; LBUSD argues section 2234 is self-contained and without time limitation.

CA(16)[↑] (16) It is a fundamental rule of statutory construction that **HN7[↑]** a statute should be construed with reference to the whole system of law of which it is a part in order to ascertain the intent of the Legislature. (*Moore v. Panish* (1982) 32 Cal.3d 535, 541 [186 Cal.Rptr. 475, 652 P.2d 32]; *Pitman v. City of Oakland* (1988) 197 Cal.App.3d 1037, 1042 [243 Cal.Rptr. 306].) The legislative history of a statute may be considered in ascertaining legislative design. (*Walters v. Weed* (1988) 45 Cal.3d 1, 10 [246 Cal.Rptr. 5, 752 P.2d 443].)

The earliest version of section 2234 is found in former section 2164.3, subdivision (f), which provided reimbursement to a city, county, or special district for "a service or program [provided] at its [***38] option which is subsequently mandated by the state" Reimbursement was limited to costs mandated by statutes or executive orders enacted or issued after January 1, 1973. (Stats. 1972, ch. 1406, § 3, pp. 2962-2963.)

In 1973, section 2164.3 was amended to provide reimbursement to school districts for costs mandated by statutes enacted after January 1, 1973 (subd. (a)), *but it expressly excluded school*

districts from reimbursement for costs mandated by executive orders (subd. (d)). (Stats. 1973, ch. 208, § 51, p. 565.) Later that same year, the Legislature repealed section 2164.3 (Stats. 1973, ch. 358, § 2, p. 779) and added section 2231, which took over the pertinent [*179] reimbursement provisions of section 2164.3 virtually unchanged. (Stats. 1973, ch. 358, § 3, pp. 779, 783-784.)

In 1975, the Legislature removed the time limitation language from section 2231 and incorporated it into a new section, 2207. (Stats. 1975, ch. 486, § 1.8, pp. 997-998.) After this change, section 2231 then provided in pertinent part: "(a) The state shall reimburse each local agency for all 'costs mandated by the state', as defined in Section 2207. *The state shall reimburse each school [***39] district only for those 'costs mandated by the state' specified in subdivision (a) of Section 2207*" (Italics added; Stats. 1975, ch. 486, § 7, pp. 999-1000.) Subdivision (a) of section 2207 limited reimbursement solely to costs mandated by statutes enacted after January 1, 1973.

At this same juncture, the Legislature further amended section 2231 by deleting the provision for "subsequently mandated" services or programs and incorporating that provision into a new section, 2234 (Stats. 1975, ch. 486, § 9, p. 1000), the section under which LBUSD would eventually make its claim. The substance of section 2234 (see fn. 2, *ante*) remained unchanged until its repeal in 1986. (Stats. 1977, ch. 1135, § 8.6, p. 3648; Stats. 1980, ch. 1256, § 11, pp. 4251-4252; Stats. 1986, ch. 879, § 25, p. 3045.)

Next, section 2231 was amended to show that with regard to school districts, "costs mandated by the state" were now defined by a new section, 2207.5. (Stats. 1977, ch. 1135, § 7, pp. 3647-3648.) Section 2207.5 limited reimbursement to costs mandated by statutes enacted after January 1, 1973, and executive orders issued after January 1, 1978. (Stats. 1977, ch. 1135, § 5, pp. [***40] 3646-3647.) (No further pertinent amendments to section 2231 occurred; see Stats. 1978, ch. 794, § 1.1, p.

2546; Stats. 1980, ch. 1256, § 8, pp. 4249-4250; Stats. 1982, ch. 734, § 3, p. 2912.) The distinction between statutes and executive orders was preserved when section 2207.5 was amended in 1980 (Stats. 1980, ch. 1256, § 5, pp. 4248-4249) and was in effect at the time of the Board hearing.

CA(15b)[7] (15b) This survey teaches us that with respect to the reimbursement process, the Legislature has treated school districts differently than it has treated other local government entities. The Legislature initially did not give school districts the right to recover costs mandated by executive orders; and when this option was made available, the [**465] effective date differed from that applicable to other entities. The Legislature consistently limited reimbursement of costs by reference to the effective dates of statutes and executive orders and nothing indicates the state intended recovery of costs to be open-ended.

[*180] Because the "subsequently mandated" provision of section 2234 originally was contained in sections which set forth specific date limitations (former sections 2164.3 and 2231), we conclude [***41] the Legislature likewise intended to limit claims made pursuant to section 2234. The use of the language "subsequently mandated" merely describes an additional circumstance in which the state will reimburse costs, provided the claimant meets other requirements. Since the September 1977 Executive Order falls outside the January 1, 1978, limit set by section 2207.5, section 2234 does not provide for reimbursement to LBUSD.

III. The Award

The full text of the award as provided by the judgment is set forth in an appendix to this opinion. In part, the judgment states that there are appropriated funds in budgets for the DOE, the Commission, the Reserve for Contingencies or Emergencies, and the Special Fund for Economic Uncertainties, "or similarly designated accounts" which are "reasonably available" to reimburse

LBUSD for the state mandated costs it has incurred. (Appendix, pars. 3, 2.) The State Controller is commanded to pay the claims plus interest "at the legal rate" from the described appropriations for fiscal years 1984-1985 through 1987-1988 and "subsequently enacted State Budget Acts." (Appendix, par. 7.) The judgment declares that the deletion of funding for reimbursement [***42] of costs incurred in compliance with the Executive Order was invalid and unconstitutional. (Appendix, par. 12.) Finally, the Fines and Forfeiture Funds in the custody of the Auditor-Controller of Los Angeles County are held to be not reasonably available for reimbursement. (Appendix, par. 5.)

A. State Position

CA(17a)[↑] (17a) State contends the trial court's award is contrary to California law, asserting that it constitutes an invasion of the province of the Legislature and therefore a judicial usurpation of the republican form of government guaranteed by the United States Constitution, Article IV, section 4.

CA(18)[↑] (18) **HN8[↑]** A court cannot compel the Legislature either to appropriate funds or to pay funds not yet appropriated. (Cal. Const., art. III, § 3; art. XVI, § 7; Mandel v. Myers (1981) 29 Cal.3d 531, 540 [174 Cal.Rptr. 841, 629 P.2d 935]; Carmel Valley Fire Protection Dist. v. State of California, supra, 190 Cal.App.3d at p. 538.) However, no violation of the separation of powers doctrine occurs when a court orders appropriate expenditures from already existing funds. (Mandel, at p. 540; Carmel Valley, at [***43] pp. 539-540.) The test is whether such funds are "reasonably available for the [*181] expenditures in question . . ." (Mandel, at p. 542; Carmel Valley, at pp. 540-541.) Funds are "reasonably available" for reimbursement when the purposes for which those funds were appropriated are "generally related to

the nature of costs incurred . . ." (Carmel Valley, at p. 541.) There is no requirement that the appropriation specifically refer to the particular expenditure (Mandel at pp. 543-544, Carmel Valley at pp. 540; Committee to Defend Reproductive Rights v. Cory (1982) 132 Cal.App.3d 852, 857-858 [183 Cal.Rptr. 475]), nor must past administrative practice sanction coverage from a particular fund (Carmel Valley, at p. 540.)

CA(17b)[↑] (17b) As previously stated, the trial court found the subject funds were "reasonably available." No party requested a statement of decision, and therefore it is implied that the trial court found all facts necessary to support its judgment. (Michael [**466] U. v. Jamie B. (1985) 39 Cal.3d 787, 792-793 [218 Cal.Rptr. 39, 705 P.2d 362]; Homestead Supplies, Inc. v. Executive Life Ins. Co. (1978) 81 Cal.App.3d 978, 984 [147 Cal.Rptr. 22].) [***44] We now examine the record to ascertain whether substantial evidence supports the decision of the trial court.

The Board having approved reimbursement under the Executive Order, reported to the Legislature that "[t]he categories of reimbursable costs include, but are not limited to: (1) voluntary pupil assignment or reassignment programs, (2) magnet schools or centers, (3) transportation of pupils to alternative schools or programs, (5) [*sic*, no item (4)] racially isolated minority schools, (6) costs of planning, recruiting, administration and/or evaluation, and (7) overhead costs." The guidelines set out comprehensive steps to be taken by school districts in order to be in compliance with the Executive Order.

The peremptory writ of mandate, issued the same date as the judgment, designated funds in specific account numbers and, in addition, a special fund as available for reimbursement. We take judicial notice of the relevant budget enactments and Government Code sections 16418 and 16419 (Evid. Code, §§ 459, subd. (a), 452) and address

these designations seriatim.

The line item account numbers for the DOE for fiscal years 1984-1985 through 1987-1988 set forth in the writ are [***45] as follows: 6100-001-001, 6100-001-178, 6100-015-001, 6100-101-001, 6100-114-001, 6100-115-001, 6100-121-001, 6100-156-001, 6100-171-178, 6100-206-001, 6100-226-001.

An examination of the relevant budget acts Statutes 1985, chapter 111; Statutes 1986, chapter 186; Statutes 1987, chapter 135; and final budgetary changes as published by the Department of Finance for each year, shows [*182] that appropriations in the 11 DOE line item account numbers have supported a very broad range of activities including reimbursement of costs for both mandated and voluntary integration programs, assessment programs, child nutrition, meals for needy pupils, participation in educational commissions, administration costs of various programs, proposal review, teacher recruitment, analysis of cost data, school bus driver instructor training, shipping costs for instructional materials, local assistance for school district transportation aid, summer school programs, local assistance to districts with high concentrations of limited- and non-English-speaking children, adult education, driver training, Urban Impact Aid, and cost of living increases for specific programs. Further evidence regarding the [***46] uses of these funds is found in the deposition testimony of William C. Pieper, Deputy Superintendent for Administration with the State Department of Education, who stated that local school districts were being reimbursed for the costs of desegregation programs from line item account numbers 6100-114-001 and 6100-115-001 in the 1986 State Budget Act.

Comparing the requirements of the Executive Order and guidelines with the broad range of activities supported by the DOE budget, we conclude that the subject funds, although not specifically appropriated for the reimbursement in question, were generally related to the nature of the costs incurred.

With regard to the Commission, the writ sets out three line item account numbers: 8885-001-001; 8885-101-001; and 8885-101-214. A review of the relevant budget acts shows that the first line item provides funding for support of the Commission, and line item number 8885-101-001 provides funding specifically for local assistance "in accordance with the provisions of Section 6 of Article XIII B of the California Constitution . . ." (Stats. 1986, ch. 186.) Line item number 8885-101-214 also provides funds for "local assistance." Since the Commission [***47] was created specifically to effect reimbursements for qualifying claims, we conclude there is a general relationship between the purpose of the appropriations and the requirements of the Executive Order.

Line item 9840-001-001 of the Reserve for Contingencies or Emergencies defines "contingencies" as "proposed expenditures [**467] arising from unexpected conditions or losses for which no appropriation, or insufficient appropriation, has been made by law and which, in the judgment of the Director of Finance, constitute cases of actual necessity." (All relevant budget acts.) In the instant case, previous to the issuance of the Executive Order, LBUSD could not have anticipated the expenditures necessary to bring it into compliance. Further, the Legislature refused to appropriate the necessary funds [*183] to directly reimburse the district for these expenditures. The necessity exists by virtue of the writ and judgment issued by the trial court. Therefore, this line item, and three others which also support the reserve (9840-001-494, 9840-001-988, 9840-011-001) are generally related to the costs.¹⁶

¹⁶ The costs do not come within past or current definitions of "emergency," which are, respectively, as follows. "[P]roposed expenditures arising from unexpected conditions or losses for which no appropriation, or insufficient appropriation, has been made by law and which in the judgment of the Director of Finance require immediate action to avert undesirable consequences or to preserve the public peace, health or safety." (Fiscal years 1984-1985, 1985-1986.) "[E]xpenditure incurred in response to conditions of disaster or extreme peril which threaten the health or safety of persons or property within the state." (Fiscal years 1986-1987 forward.)

[***48] Finally the writ lists as sources of reimbursement the Special Fund for Economic Uncertainties "or similarly designated accounts" An examination of Government Code sections 16418 and 16419 relating to the special fund shows only one use of this reserve: establishment of the Disaster Relief Fund "for purposes of funding disbursements made for response to and recovery from the earthquake, aftershocks, and any other related casualty." No evidence in the record indicates a general relationship between this purpose and the costs incurred by LBUSD. We conclude, therefore, that this source of funding cannot be used for reimbursement. This source is stricken from the judgment.

The description of further sources of funding as "similarly designated accounts" fails to sufficiently identify these sources and we therefore strike this part of the judgment.

In a supplemental brief, LBUSD requests this court to take judicial notice of the Budget Acts of 1988-1989 (Stats. 1988, ch. 313) and 1989-1990 (Stats. 1989, ch. 93) pursuant to the Evidence Code (Evid. Code, §§ 451, subd. (a), 452, subd. (a), 452, subd. (c), 459) and to order that the amounts set forth in the judgment and writ be [***49] satisfied from specific line item accounts in these later budgets and from the Special Fund for Economic Uncertainties.¹⁷

CA(19)[↑] (19) "An appellate court is empowered to add a directive that the trial court order be modified to include charging orders against funds appropriated by subsequent budget acts. [Citation.]" (Carmel Valley, supra, 190 Cal.App.3d

¹⁷LBUSD identifies the line items accounts as follows: DOE -- 6110-001-001, 6110-001-178, 6110-015-001, 6110-101-001, 6110-114-001, 6110-115-001, 6110-121-001, 6110-156-001, 6110-171-178, 6110-226-001, 6110-230-001; Commission -- 8885-001-001, 8885-101-001, 8885-101-214; Reserve for Contingencies or Emergencies -- 9840-001-001, 9840-001-494, 9840-001-988, 9840-011-001.

at p. 557.)

CA(17c)[↑] (17c) We have reviewed the designated budget acts and conclude that the specified line item accounts for DOE, the Commission, [*184] and the Reserve for Contingencies and Emergencies provide funds for a broad range of activities similar to those set out above and therefore [***50] are generally related to the nature of the costs incurred. However, for the reasons previously discussed, we decline to designate the Special Fund for Economic Uncertainties as a source for reimbursement.

While we have concluded that certain line item accounts are generally related to the nature of the costs incurred, there must also be evidence that at the time of the order the enumerated budget items contained sufficient funds to cover the award. (Gov. Code, § 12440; Mandel v. Myers, supra, 29 Cal.3d at p. 543; Carmel Valley, supra, 190 Cal.App.3d at p. 541; cf. Baggett v. Dunn (1886) 69 Cal. 75, 78 [10 P. 125]; Marshall v. Dunn (1886) 69 Cal. 223, 225 [10 P. 399].) The record before [***468] us contains evidence regarding balances at various points in time for some of the line item accounts, but that evidence is primarily in the form of uninterpreted statistical data. We have not found a clear statement which would satisfy this requirement. Furthermore, not every line item was in existence every fiscal year. In addition, those which [***51] entered the budgetary process did not always survive it unscathed. Therefore, we remand the matter to the trial court to determine with regard to the line item account numbers approved above whether funds sufficient to satisfy the award were available at the time of the order. (Cf. County of Sacramento v. Loeb (1984) 160 Cal.App.3d 446, 454-455 [206 Cal.Rptr. 626].) If the trial court determines that the unexhausted funds remaining in the specified appropriations are insufficient, the trial court order can be further amended to reach subsequent appropriated funds. (County of Sacramento at p. 457; Serrano v. Priest (1982) 131 Cal.App.3d 188, 198 [182 Cal.Rptr.

387].)

CA(20)[↑] (20) Having concluded that certain appropriations are generally available to reimburse LBUSD, we turn to an additional issue raised by State: that the "finding" by the Legislature that the Executive Order does not impose a "state-mandated local program" prevents reimbursement.

Unsupported legislative disclaimers are insufficient to defeat reimbursement. (*Carmel Valley, supra*, 190 Cal.App.3d at pp. 541-544.) As discussed, [***52] LBUSD, pursuant to Section 6, has a constitutional right to reimbursement of its costs in providing an increased service mandated by the state. The Legislature cannot limit a constitutional right. (*Hale v. Bohannon* (1952) 38 Cal.2d 458, 471 [241 P.2d 4].)

B. DOE Contentions

DOE is sympathetic to LBUSD's position. On appeal, it takes no stand on the issue whether the Executive Order constitutes a state mandate within [*185] the meaning of Section 6.

CA(21)[↑] (21) The thrust of its appeal is that, if there is a mandate, the DOE budget is an inappropriate source of funding in comparison with other budget line item accounts included in the order.

We conclude to the contrary because logic dictates that DOE funding be the initial and primary source for reimbursement. As discussed, the test set forth in *Mandel* and *Carmel Valley* is whether there is a general relationship between budget items and reimbursable expenditures. Since the Executive Order was issued by DOE, it is not surprising that the evidence overwhelmingly supports the finding of the trial court that this general relationship exists with regard to the DOE budget.

While we also have concluded [***53] that certain line item accounts for entities other than DOE are also appropriate sources of funding, the record does not provide the statistical data necessary to

determine how far the order will reach with regard to these additional sources of support.

DOE also contends that reimbursement for expenditures in fiscal years 1977-1978, 1978-1979, and 1979-1980 cannot be awarded under Section 6 because the amendment was not effective until July 1, 1980. As discussed, this argument has been previously rejected. (*Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at pp. 547-548; *City of Sacramento v. State of California, supra*, 156 Cal.App.3d 182, 191-194, disapproved on other grounds in *County of Los Angeles v. State of California, supra*, 43 Cal.3d 46, 58, fn. 10.)

CA(22)[↑] (22) Finally, DOE contends that interest should have been awarded at the rate of 6 percent per annum pursuant to Government Code section 926.10 rather than at the legal rate provided under article XV, section 1, paragraph (2) of the California Constitution.

Government Code section [***54] 926.10 is part of the California Tort Claims Act (Gov. Code, § 900 et seq.) which provides a statutory scheme for the filing of claims against public entities for alleged injuries; it makes no provision for claims for reimbursement [**469] for state mandated expenditures. In *Carmel Valley* a judgment awarding interest at the legal rate was affirmed. (*Carmel Valley Fire Protection Dist. v. State of California, supra*, 190 Cal.App.3d at p. 553.) We decline the invitation of DOE to apply another rule.

C. Cross Appeal of LBUSD

CA(23)[↑] (23) LBUSD seeks reversal of that part of the judgment holding that monies in the Fines and Forfeitures Funds in the custody and possession of [*186] cross-respondent Auditor-Controller of the County of Los Angeles (County Controller) for transfer to the state treasury are not reasonably available for reimbursement of its state

mandated expenditures.¹⁸

[***55] As previously stated, funds are "reasonably available" when the purposes for which those funds were appropriated are generally related to the nature of the costs incurred. (*Carmel Valley, supra*, 190 Cal.App.3d at pp. 540-541.) LBUSD does not cite, nor have we found, any evidence in the record showing the use of those funds once they are transmitted to the state and that those funds are then "reasonably available" to satisfy the Claim. We cannot conclude as a matter of law that a general relationship exists between those funds and the nature of the costs incurred pursuant to the Executive Order. LBUSD has failed to carry its burden of proof and the trial court correctly decided these funds were not "reasonably available" for reimbursement.

Nor have we concluded that there is any ground on which the funds could be made available to LBUSD while in the possession of the county Auditor-Controller. The instant case differs from *Carmel Valley* wherein we affirmed an order which authorized a county to satisfy its claims against the state by offsetting fines and forfeitures it held which were due the state. The *Carmel Valley, supra*, 190 Cal.App.3d 521, [***56] holding was based on the right of offset as "a long-established principle of equity." (*Id.* at p. 550.) That is a different standard than the standard of "generally related to the nature of costs incurred." In the case at bar there is no set-off relationship between county and LBUSD.

We conclude that because the doctrines of collateral estoppel and waiver are inapplicable to the facts of this case, the trial court should have allowed State to challenge the decisions of the Board. However, we also determine, as a question

of law, that the Executive Order requires local school boards to provide a higher level of service than is required constitutionally or by case law and that the Executive Order is a reimbursable state mandate pursuant to article XIII B, section 6 of the California Constitution. Former Revenue and Tax Code section 2234 does not provide reimbursement of the subject claim.

[*187] Based on uncontradicted evidence, we modify the decision of the trial court by striking as sources of reimbursement the Special Fund for Economic Uncertainties "or similarly designated accounts." We also modify the judgment to include charging orders against [***57] certain funds appropriated through subsequent budget acts.

We affirm the decision of the trial court that the Fines and Forfeitures Funds are not "reasonably available" to satisfy the Claim.

Finally, we remand the matter to the trial court to determine whether at the time of its order, unexpended, unencumbered funds sufficient to satisfy the judgment remained in the approved budget line item account numbers. The trial court is also directed to determine this same issue with respect to the charging order.

The judgment is affirmed as modified. Each party is to bear its own costs on appeal.

[*188] [**470] Appendix

The superior court judgment provides in pertinent part: "It Is Ordered, Adjudged and Decreed That: "1. The requirements contained in Title 5, California Administrative Code, Sections 90-101 constitute a reimbursable State-mandate which cannot be challenged by State Respondents or Respondent DOE because of the doctrines of administrative collateral estoppel and waiver.

"2. There are appropriated funds from specified line items in the 1984, 1985, 1986 and 1987 budgets which are 'reasonably available' to reimburse Petitioner for State-mandated costs it has occurred [*sic*] as [***58] a result of its compliance with the

¹⁸In its first amended petition, LBUSD listed the following code sections as appropriate sources of reimbursement: " Penal Code Sections 1463.02, 1463.03, 1403.5A and 1464; Government Code Sections 13967, 26822.3 and 72056; Health and Safety Code Section 11502; and Vehicle Code Sections 1660.7, 42003, and 41103.5."

requirements of Title 5, California Administrative Code, Sections 90-101.

"3. The funds appropriated by the Legislature for:

"(a) the support of the Department of Education, including, but not limited, to the Department's General Fund;

"(b) the Commission on State Mandates, including, but not limited to the State Mandates Claim Fund; and

"(c) the 'Reserve for Contingencies or Emergencies', 'Special Fund for Economic Uncertainties' or similarly designated accounts, are 'reasonably available' and may properly be and should be encumbered and expended for the reimbursement of State-mandated costs in the amount of \$ 28,014,869.00, plus applicable interest, as incurred by Petitioner and as computed by Petitioner in compliance with Parameters and Guidelines adopted by the State Board of Control.

"4. The law in effect at the time that Petitioner's claim was processed provided for the computation of a specific claim amount for specific fiscal years based on Parameters and Guidelines, or claiming instructions, adopted in April 1984 and a Statewide Cost Estimate adopted on August 23, 1984, both of which are administrative actions of the State Board of Control [***59] which have not been challenged by State Respondents. The computations made pursuant to the Parameters and Guidelines and Statewide Cost Estimate are specific and ascertainable and subject to audit by the State Controller under Government Code section 17558.

"5. The Court decrees that State funds entitled the 'Fines and Forfeitures Funds' under the custody and control of Respondent Bloodgood, are not reasonably available for satisfaction of Petitioner's claim for reimbursement of State-mandated costs.

"6. A peremptory writ of mandamus shall issue under the seal of this Court, commanding State Respondents and Respondent Doe to comply with

Article XIII B, Section 6 of the California Constitution and Government Code Section 17565 and reimburse petitioner for:

"(a) State-mandated costs in the amount of \$ 24,164,593.00, incurred as a result of its compliance with the requirements of Title 5, California Administrative Code, Sections 90-101 during fiscal years 1977-78 through 1982-1983, plus interest at the legal rate from September 28, 1985; and

"(b) State-mandated costs in the amount of \$ 3,850,276.00, incurred as a result of Petitioner's compliance with the requirements of Title 5, California [***60] Administrative Code, Sections 90-101 during fiscal years 1983-84 and 1984-85, plus interest at the legal rate from September 28, 1985.

"7. Said peremptory writ shall command Respondent Gray Davis, State Controller, or his successor-in-interest, to pay the claims of Petitioner, plus interest at the legal rate from [*189] September 28, 1985 from the appropriations in the State Budget Acts for the 1984-85, 1985-86, 1986-87 and 1987-88 fiscal years, and the subsequently enacted State Budget Acts, which include, or will include appropriations for:

"(a) the support of the Department of Education, including, but not limited to the Department's General Fund;

"(b) the Commission on State Mandates, including, but not limited to the State Mandates Claim Fund; and

"(c) the 'Reserve for Contingencies or Emergencies', Special Fund for Economic [**471] Uncertainties' or similarly designated accounts, which are 'reasonably available' to be encumbered and expended for the reimbursement of State-mandated costs incurred by Petitioner and further shall compel Elizabeth Whitney, Acting State Treasurer, or her successor-in-interest, to make

payments on the warrants drawn by Respondent Gray Davis, State Controller [***61] upon their presentation for payment by Petitioner without offset or attempt to offset against other monies due and owing Petitioner until Petitioner is reimbursed for all such costs.

"8. Said Peremptory Writ of Mandate also shall command Respondent Jesse R. Huff, Director of the State Department of Finance, to perform such actions as may be necessary to effect reimbursement required by other portions of this Judgment, including but not limited to, those actions specified in Chapter 135, Statutes of 1987, Section 2.00, pp. 549-553, or with respect to the Special Fund for Economic Uncertainties.

"9. Pending the final disposition of this proceeding, State Respondents and Respondent DOE, and each of them, their successors in office, agents, servants and employees and all persons acting in concert or participation with them, are hereby enjoined or restrained from directly or indirectly expending from the appropriations described in Paragraph No. 7 hereinabove any sums greater than that which would leave in said appropriations at the conclusion of the respective fiscal years an amount less than the reimbursement amounts claimed by Petitioner together with interest at the legal rate through [***62] payment of said reimbursement amount. Said amounts are hereinafter referred to collectively as the 'reimbursement award sum'.

"10. Pending the final disposition of this proceeding State Respondents and Respondent DOE, and each of them, their successors in office, agents, servants and employees, and all persons acting in concert or participation with them, are hereby enjoined and restrained from directly or indirectly causing to revert the reimbursement award sum from the appropriations described in Paragraph No. 7 hereinabove to the general funds of the State of California and from otherwise dissipating the reimbursement award sum in a manner that would make it unavailable to satisfy this Court's judgment.

"11. The State Respondents and Respondent Doe have a continuing obligation to reimburse Petitioner for costs incurred in compliance with the requirements contained in Title 5, California Administrative Code, Section 90-101 in the fiscal years subsequent to its [sic] claims for expenditures in fiscal years 1977-78 through 1984-85 as set forth in the First Amended Petition, as amended, and the accompanying Motion For the Issuance Of A Writ Of Mandate.

"12. The deletion of funding [***63] for reimbursement of State-mandated costs incurred in compliance with Title 5, California Administrative Code, Sections 90-101 from Chapter 1175, Statutes of 1985 was invalid and unconstitutional.

"13. Respondent Gray Davis, State Controller, shall retain the right to audit the claims and records of the Petitioner pursuant to Government Code Section 17561(d) to verify the actual dollar amount of the reimbursement award sum.

"14. The Court reserves and retains jurisdiction to effect any appropriate remedy at law or equity which may be necessary to enforce its judgment or order.

[*190] "15. Petitioner shall recover from State Respondents and Respondent DOE costs in this proceeding in the amount of 1,863.54.

Case Summary

Procedural Posture

Plaintiff, an environmental organization, filed an administrative mandamus action challenging the issuance of a National Pollutant Discharge Elimination System (NPDES) permit by defendant regional water board. The trial court denied the mandamus petition. The California Court of Appeal, Sixth Appellate District, affirmed the trial court's judgment. Plaintiff sought review.

Overview

The NPDES permit authorized a powerplant to draw cooling water from a harbor and slough. The court concluded that the trial court did not err in using an interlocutory remand to resolve perceived deficiencies in the regional water board's best technology available (BTA) finding. In compliance with the trial court's directive, the board engaged in a full reconsideration of the BTA issue, and gave all interested parties, including plaintiff, a noticed opportunity to appear and to present evidence, briefing, and argument pertinent to the BTA determination. The court rejected plaintiff's argument that Code Civ. Proc., § 1094.5, subd. (e), precluded the board from accepting and considering new evidence on remand absent a showing that such evidence could not have been produced at the original administrative proceeding, or was

improperly excluded therefrom. The court further concluded that the board did not err by basing its BTA determination on a finding that the costs of alternative cooling technologies for the powerplant were wholly disproportionate to the anticipated environmental benefits. The board's use of this standard was proper.

Outcome

The judgment of the appellate court was affirmed.

HN1 [⚡] **Discharge Permits, State Water Quality Certifications**

The discharge of a "pollutant" from a "point source" into navigable waters may only occur under the terms and conditions of National Pollutant Discharge Elimination System (NPDES) permit, which must be renewed at least every five years. 33 U.S.C. §§ 1311, 1342(a), (b). In California, NPDES permits, which must comply with all minimum federal clean water requirements, are issued under an EPA-approved state water quality control program administered, pursuant to the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 et seq., by the State Water Board and the nine regional water boards. Wat. Code, §§ 13372, 13377; 33 U.S.C., § 1342(b); 40 C.F.R. §§ 123.21-123.25 (2011); 39 Fed.Reg. 26061 (Jul. 16, 1974); 54 Fed.Reg. 40664-40665 (Oct. 31, 1989).

HN2 [⚡] **Standards of Review, De Novo Standard of Review**

Pursuant to the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 et seq., decisions and orders of a regional water board, including the issuance and renewal of National Pollutant Discharge Elimination System permits, are reviewable by administrative appeal to the State Water Board, and then by petition for administrative mandamus in the superior court. Code Civ. Proc., § 1094.5; Wat. Code, §§ 13320, 13330. In the mandamus proceeding, the superior court is obliged to exercise its independent judgment on the evidence before the administrative agency, i.e., to determine whether the agency's findings are supported by the weight of the evidence. § 1094.5, subd. (c); Wat. Code, § 13330, subd. (d).

Energy & Utilities Law > Electric Power

Industry > Siting of Facilities

HN3 [⚡] **Electric Power Industry, Siting of Facilities**

The Warren-Alquist State Energy Resources Conservation and Development Act, Pub. Resources Code, § 25000 et seq., mandates simplified and expedited processing and review of applications to certify the siting, construction, and modification of thermal powerplants. The Act accords the California Energy Commission the exclusive power to certify all sites and related facilities for thermal powerplants with generating capacities of 50 or more megawatts, whether a new site and related facility or a change or addition to an

existing facility. Pub. Resources Code, § 25500.

Energy & Utilities Law > Electric Power
Industry > Siting of Facilities

HN4 **Electric Power Industry, Siting of Facilities**

When a certification application for the siting, construction, and modification of a thermal powerplant is filed, the California Energy Commission undertakes a lengthy review process that involves multiple staff assessments, communication with other state and federal regulatory agencies, environmental impact analysis, and a series of public hearings. Pub. Resources Code, §§ 25519-25521. With one exception, the Commission may not certify a proposed facility that does not meet all applicable federal, state, regional, and local laws. Wat. Code, § 25525. Accordingly, the issuance of a certificate by the Commission shall be in lieu of any permit, certificate, or similar document required by any state, local or regional agency, or federal agency to the extent permitted by federal law, for such use of the site and related facilities, and shall supersede any applicable statute, ordinance, or regulation of any state, local, or regional agency, or federal agency to the extent permitted by federal law. Wat. Code, § 25500.

HN8[↓] Reviewability, Jurisdiction & Venue

Pub. Resources Code, § 25531, subd. (a), of the Warren-Alquist State Energy Resources Conservation and Development Act, Pub. Resources Code, § 25000 et seq., specifies the extent of the California Supreme Court's exclusive direct review jurisdiction as mandated by the Act. Under § 25531, subd. (a), the decisions of the California Energy Commission on any application for certification of a site and related facility are subject to review by the Supreme Court. Read together with § 25531, subd. (a), § 25531, subd. (c), simply confirms that no other court may review directly a certification decision of the Commission, or may otherwise entertain a case or controversy that attacks such a decision indirectly by raising a matter the Commission determined, or could have determined, for purposes of the certification proceeding. Section 25531 neither states nor implies a legislative intent to interfere with normal mandamus review of the actions of another agency, simply because that agency, exercising functions within its exclusive authority, has independently decided an issue the Commission also must or might have addressed for its own purposes.

Administrative Law > Judicial

Environmental
Law > ... > Enforcement > Discharge
Permits > State Water Quality Certifications

Administrative Law > Judicial
Review > Remedies > Mandamus

HN9[↓] Judicial Review, Reviewability

Under the federal Clean Water Act, any facility that discharges wastewater into a navigable water source must have an unexpired permit, conforming to federal water quality standards, in order to do so. Only the State Water Board or a regional water

board may issue a federally compliant discharge permit; such a decision is entirely outside, and independent of, the California Energy Commission's authority. Under the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 et seq., judicial review of the decisions of these agencies, including those to grant or renew National Pollutant Discharge Elimination System permits, is by mandamus in the superior court.

Administrative Law > Judicial
Review > Reviewability > Jurisdiction &
Venue

Energy & Utilities Law > Electric Power
Industry > Siting of Facilities

Environmental
Law > ... > Enforcement > Discharge
Permits > State Water Quality Certifications

HN10[↓] Reviewability, Jurisdiction & Venue

Under the Warren-Alquist State Energy Resources Conservation and Development Act, Pub. Resources Code, § 25000 et seq., only the decisions of the California Energy Commission on any application for certification of a site and related facility are subject to exclusive review in the California Supreme Court, Pub. Resources Code, § 25531, subd. (a), and other courts are deprived of jurisdiction only of a case or controversy concerning a matter which was, or could have been, determined in a proceeding before the Commission. § 25531, subd. (c). A National Pollutant Discharge Elimination System (NPDES) permit decision by a regional water board is not a certification decision. Conversely, under the NPDES permit program, neither certification proceedings, nor findings the Commission may make in connection with such proceedings, can result in the issuance or renewal of an NPDES permit; only the State Water Board and the regional water boards may issue or renew such permits. Hence, a challenge to the issuance or renewal of an NPDES permit is not a case or

52 Cal. 4th 499, *499; 257 P.3d 81, **81; 128 Cal. Rptr. 3d 658, ***658; 2011 Cal. LEXIS 8117, ****1

controversy concerning a matter which was, or could have been, determined by the Commission.

Environmental
Law > ... > Enforcement > Discharge
Permits > State Water Quality Certifications

HN11[↓] Judicial Review, Reviewability

Nothing in the Warren-Alquist State Energy Resources Conservation and Development Act, Pub. Resources Code, § 25000 et seq., states or implies that where a thermal powerplant has concurrently sought both a renewal from the Regional Water Board of its National Pollutant Discharge Elimination System permit, and a California Energy Commission certification to install additional generating capacity, the regional water board's decision, normally reviewable in the superior court pursuant to the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 et seq., is suddenly subject to the exclusive-review provisions of the Warren-Alquist Act. There is no basis for reading such a requirement into the latter statute.

Administrative Law > Judicial
Review > Remedies > Mandamus

Administrative Law > Judicial
Review > Remand & Remittitur

HN12[↓] Remedies, Mandamus

See Code Civ. Proc., § 1094.5, subd. (e).

Administrative Law > Judicial
Review > Remedies > Mandamus

Administrative Law > Judicial
Review > Remedies > Mandamus

Administrative Law > Judicial
Review > Remand & Remittitur

HN14[↓] Remedies, Mandamus

Properly understood and interpreted, Code Civ. Proc., § 1094.5, subs. (e) & (f), impose no absolute bar on the use of prejudgment limited remand procedures. Moreover, when a court has properly remanded for agency reconsideration on grounds that all, or part, of the original administrative decision has insufficient support in the record developed before the agency, the statute does not preclude the agency from accepting and considering additional evidence to fill the gap the court has identified.

Administrative Law > Judicial
Review > Remedies > Mandamus

Governments > Legislation > Expiration,
Repeal & Suspension

HN15[↓] Remedies, Mandamus

On its face, Code Civ. Proc., § 1094.5, subd. (f), indicates the form of final judgment the court may issue in an administrative mandamus action. Section 1094.5, subd. (f), states that the last step the trial court must take in the proceeding is either to command the agency to set aside its decision, or to deny the writ. Nothing in § 1094.5, subd. (f), purports to limit procedures the court may appropriately employ before it renders a final judgment. Code Civ. Proc., § 187, broadly provides that whenever the California Constitution or a statute confers jurisdiction on a court, all the means necessary to carry that jurisdiction into effect are

also given; and in the exercise of this jurisdiction, if the course of proceeding be not specifically pointed out by the California Code of Civil Procedure or the statute, any suitable process or mode of proceeding may be adopted which may appear most conformable to the spirit of the Code. Section 1094.5, subd. (f), does not specifically point out the prejudgment procedures to be followed in an administrative mandamus action, nor do its terms prohibit the court from adopting a suitable process or mode of proceeding when addressing the issues presented. § 187. Hence, nothing in § 1094.5, subd. (f)'s language suggests an intent to limit or repeal § 187 for purposes of administrative mandamus actions.

Administrative Law > Judicial
Review > Remedies > Mandamus

Administrative Law > Judicial
Review > Remand & Remittitur

HN16[↓] Remedies, Mandamus

Code Civ. Proc., § 1094.5, subd. (f), provides that, when granting mandamus relief, the court may order the reconsideration of the case in the light of the court's opinion and judgment. This clearly implies that, in the final judgment itself, the court may direct the agency's attention to specific portions of its decision that need attention, and need not necessarily require the agency to reconsider, de novo, the entirety of its prior action. That being so, no reason appears why, in appropriate circumstances, the same objective cannot be accomplished by a remand prior to judgment. Indeed, such a device, properly employed, promotes efficiency and expedition by allowing the court to retain jurisdiction in the already pending mandamus proceeding, thereby eliminating the potential need for a new mandamus action to review the agency's decision on reconsideration.

Administrative Law > Judicial
Review > Remand & Remittitur

Constitutional Law > ... > Fundamental
Rights > Procedural Due Process > General

HN17[↓] Judicial Review, Remand & Remittitur

Any agency reconsideration must fully comport with due process, and may not simply allow the agency to rubber-stamp its prior unsupported decision.

Administrative Law > Judicial
Review > Remedies > Mandamus

Administrative Law > Judicial
Review > Remand & Remittitur

HN18[↓] Remedies, Mandamus

Code Civ. Proc., § 1094.5, subd. (f), imposes no blanket prohibition on the appropriate use, in an administrative mandamus action, of a prejudgment remand for agency reconsideration of one or more issues pertinent to the agency's decision. To the extent Resource Defense Fund v. Local Agency Formation Com., 191 Cal. App. 3d 886, 236 Cal. Rptr. 794 (1987), and Sierra Club v. Contra Costa County, 10 Cal. App. 4th 1212, 13 Cal. Rptr. 2d 182 (1992), have concluded otherwise, those decisions are disapproved.

Administrative Law > Judicial
Review > Administrative Record > General
Overview

Administrative Law > Judicial
Review > Remand & Remittitur

Administrative Law > Judicial
Review > Remedies > Mandamus

HN19[⚡] **Judicial Review, Administrative Record**

Code Civ. Proc., § 1094.5, subd. (e), is not intended to prevent the court, upon finding that the administrative record itself lacks evidence sufficient to support the agency's decision, from remanding for consideration of additional evidence. A more reasonable interpretation, which fully honors the statutory language, is that § 1094.5, subd. (e), simply prevents a mandamus petitioner from challenging an agency decision that is supported by the administrative record on the basis of evidence, presented to the court, which could have been, but was not, presented to the administrative body.

Administrative Law > Judicial Review > Administrative Record > General Overview

Administrative Law > Judicial Review > Remand & Remittitur

Administrative Law > Judicial Review > Remedies > Mandamus

HN20[⚡] **Judicial Review, Administrative Record**

Code Civ. Proc., § 1094.5, subd. (e), merely confirms that while, in most cases, the court is limited to the face of the administrative record in deciding whether the agency's decision is valid as it stands, in fairness, the court may consider, or may permit the agency to consider, extra-record evidence for a contrary outcome, if persuaded that such evidence was not available, or was improperly excluded, at the original agency proceeding.

Administrative Law > Judicial Review > Administrative Record > General Overview

Administrative Law > Judicial Review > Remand & Remittitur

Administrative Law > Judicial Review > Remedies > Mandamus

HN21[⚡] **Judicial Review, Administrative Record**

Code Civ. Proc., § 1094.5, subd. (e), promotes orderly procedure, and the proper distinction between agency and judicial roles, by ensuring that, with rare exceptions, the court will review a quasi-judicial administrative decision on the record actually before the agency, not on the basis of evidence withheld from the agency and first presented to the reviewing court. But once the court has reviewed the administrative record, and has found it wanting, § 1094.5 does not preclude the court from remanding for the agency's reconsideration in appropriate proceedings that allow the agency to fill the evidentiary gap. To the extent the analyses in Ashford v. Culver City Unified School Dist., 130 Cal. App. 4th 344, 29 Cal. Rptr. 3d 728 (2005), and Newman v. State Personnel Bd., 10 Cal. App. 4th 41, 12 Cal. Rptr. 2d 601 (1992), are inconsistent with these conclusions, those decisions are disapproved.

Headnotes/Summary**Summary****CALIFORNIA OFFICIAL REPORTS SUMMARY**

Plaintiff, an environmental organization, filed an administrative mandamus action challenging a regional water board's issuance of a National Pollutant Discharge Elimination System (NPDES) permit. The NPDES permit authorized a powerplant to draw cooling water from a harbor and slough. The trial court denied the mandamus petition. (Superior Court of Monterey County, No. M54889, Robert A. O'Farrell, Judge.) The Court of Appeal, Sixth Dist., No. H028021, affirmed the

trial court's judgment.

The Supreme Court affirmed the judgment of the Court of Appeal. The court concluded that the trial court did not err in using an interlocutory remand to resolve perceived deficiencies in the regional water board's best technology available (BTA) finding. In compliance with the trial court's directive, the board engaged in a full reconsideration of the BTA issue, and gave all interested parties, including plaintiff, a noticed opportunity to appear and to present evidence, briefing, and argument pertinent to the BTA determination. The court rejected plaintiff's argument that Code Civ. Proc., § 1094.5, subd. (e), precluded the board from accepting and considering new evidence on remand absent a showing that such evidence could not have been produced at the original administrative proceeding, or was improperly excluded therefrom. The court further concluded that the board did not err by basing its BTA determination on a finding that the costs of alternative cooling technologies for the powerplant were wholly disproportionate to the anticipated environmental benefits. The board's use of this standard was proper. (Opinion by Baxter, J., with Cantil-Sakauye, C. J., Kennard, Werdegar, Chin, Corrigan, JJ., and Kitching, J.,* concurring. Concurring opinion by Werdegar, J., with Cantil-Sakauye, C. J., concurring (see p. 539).) [*500]

Electricity, Gas, and Steam § 2—Thermal Powerplants—Siting—Expedited Processing and Review of Applications.

The Warren-Alquist State Energy Resources Conservation and Development Act (Pub. Resources Code, § 25000 et seq.) mandates simplified and expedited processing and review of applications to certify the siting, construction, and modification of thermal powerplants. The act accords the State Energy Resources Conservation and Development Commission the exclusive power to certify all sites and related facilities for thermal powerplants with generating capacities of 50 or more megawatts, whether a new site and related facility or a change or addition to an existing facility (Pub. Resources Code, § 25500). When a certification application is filed, the commission undertakes a lengthy review process that involves multiple staff assessments, communication with other state and federal regulatory agencies, environmental impact analysis, and a series of public hearings (Pub. Resources Code, §§ 25519–25521). With one exception, the commission may not certify a proposed facility that does not meet all applicable federal, state, regional, and local laws (Wat. Code, § 25525). Accordingly, the issuance of a certificate by the commission is in lieu of any

* Associate Justice of the Court of Appeal, Second Appellate District, Division Three, assigned by the Chief Justice pursuant to article VI, section 6 of the California Constitution.

permit, certificate, or similar document required by any state, local or regional agency, or federal agency to the extent permitted by federal law, for such use of the site and related facilities, and supersedes any applicable statute, ordinance, or regulation of any state, local, or regional agency, or federal agency to the extent permitted by federal law (Wat. Code, § 25500).

CA(3)[↓] (3)

Electricity, Gas, and Steam § 2—Thermal Powerplants—Certification Decision—Judicial Review.

The Warren-Alquist State Energy Resources Conservation and Development Act (Pub. Resources Code, § 25000 et seq.) constrains judicial review of a State Energy Resources [*501] Conservation and Development Commission powerplant certification decision. Pub. Resources Code, § 25531, subd. (a), establishes that the Supreme Court alone has jurisdiction to review powerplant certification decisions by the commission.

CA(4)[↓] (4)

Statutes § 29—Construction—Language—Legislative Intent—Plain Meaning.

When interpreting statutes, a court begins with the plain, commonsense meaning of the language used by the Legislature. If the language is unambiguous, the plain meaning controls. Potentially conflicting statutes must be read in the context of the entire statutory scheme, so that all provisions can be harmonized and given effect.

CA(5)[↓] (5)

Electricity, Gas, and Steam § 2—Thermal Powerplants—Certification Decision—Judicial Review—Case or Controversy.

Pub. Resources Code, § 25531, subd. (a), part of the Warren-Alquist State Energy Resources Conservation and Development Act (Pub. Resources Code, § 25000 et seq.), specifies the extent of the Supreme Court's exclusive direct review jurisdiction as mandated by the act. Under § 25531, subd. (a), the decisions of the State Energy Resources Conservation and Development Commission on any application for certification of a site and related facility are subject to judicial review by the Supreme Court. Read together with § 25531, subd. (a), § 25531, subd. (c), simply confirms that no other court may review directly a certification decision of the commission, or may otherwise entertain a case or controversy that attacks such a decision indirectly by raising a matter the commission determined, or could have determined, for purposes of the certification proceeding. Section 25531 neither states nor implies a legislative intent to interfere with normal mandamus review of the actions of another agency, simply because that agency, exercising functions within its exclusive authority, has independently decided an issue the commission also must or might have addressed for its own purposes.

CA(6)[↓] (6)

Pollution and Conservation Laws § 5—Porter-Cologne Act—NPDES Permit—Judicial Review—Administrative Mandamus.

Under the federal Clean Water Act of 1977 (Pub.L. No. 95-217 (Dec. 27, 1977) 91 Stat. 1566), any facility that discharges wastewater into a navigable water source must have an unexpired permit, conforming to federal water quality standards, in order to do so. Only the State Water Resources Control Board or a regional water board may issue a federally compliant discharge permit; such a decision is entirely outside, and independent of, the State Energy Resources Conservation and Development Commission's authority. Under the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.), judicial review of the

decisions of these agencies, including those to grant or renew National Pollutant Discharge Elimination System permits, is by mandamus in the superior court.

[*502] CA(7)[↓] (7)

Pollution and Conservation Laws § 5—NPDES Permit—Judicial Review—Jurisdiction—Case or Controversy.

Under the Warren-Alquist State Energy Resources Conservation and Development Act (Pub. Resources Code, § 25000 et seq.), only the decisions of the State Energy Resources Conservation and Development Commission on any application for certification of a site and related facility are subject to exclusive review in the Supreme Court (Pub. Resources Code, § 25531, subd. (a)), and other courts are deprived of jurisdiction only of a case or controversy concerning a matter which was, or could have been, determined in a proceeding before the commission (§ 25531, subd. (c)). A National Pollutant Discharge Elimination System (NPDES) permit decision by a regional water board is not a certification decision. Conversely, under the NPDES permit program, neither certification proceedings, nor findings the commission may make in connection with such proceedings, can result in the issuance or renewal of an NPDES permit; only the State Water Resources Control Board and the regional water boards may issue or renew such permits. Hence, a challenge to the issuance or renewal of an NPDES permit is not a case or controversy concerning a matter which was, or could have been, determined by the commission.

CA(8)[↓] (8)

Electricity, Gas, and Steam § 2—Thermal Powerplants—Certification Decision—Judicial Review—NPDES Permit.

Nothing in the Warren-Alquist State Energy

Resources Conservation and Development Act (Pub. Resources Code, § 25000 et seq.) states or implies that where a thermal powerplant has concurrently sought both a renewal from the Regional Water Board of its National Pollutant Discharge Elimination System permit, and a State Energy Resources Conservation and Development Commission certification to install additional generating capacity, the regional water board's decision, normally reviewable in the superior court pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.) is suddenly subject to the exclusive review provisions of the Warren-Alquist Act. There is no basis for reading such a requirement into the latter statute.

CA(9)[↓] (9)

Administrative Law § 110—Judicial Review—Administrative Mandamus—Evidence—Remand.

Properly understood and interpreted, Code Civ. Proc., § 1094.5, subds. (e) & (f), impose no absolute bar on the use of prejudgment limited remand procedures. Moreover, when a court has properly remanded for agency reconsideration on grounds that all, or part, of the original administrative decision has insufficient support in the record developed before the agency, the statute does not preclude the agency from accepting and considering additional evidence to fill the gap the court has identified.

[*503] CA(10)[↓] (10)

Administrative Law § 99—Judicial Review—Administrative Mandamus—Final Judgment.

On its face, Code Civ. Proc., § 1094.5, subd. (f), indicates the form of final judgment the court may issue in an administrative mandamus action. Section 1094.5, subd. (f), states that the last step the trial court must take in the proceeding is either to command the agency to set aside its decision, or to deny the writ. Nothing in § 1094.5, subd. (f),

purports to limit procedures the court may appropriately employ before it renders a final judgment. Nothing in § 1094.5, subd. (f), purports to limit procedures the court may appropriately employ before it renders a final judgment. Code Civ. Proc., § 187, broadly provides that whenever the California Constitution or a statute confers jurisdiction on a court, all the means necessary to carry that jurisdiction into effect are also given; and in the exercise of this jurisdiction, if the course of proceeding is not specifically pointed out by the Code of Civil Procedure or the statute, any suitable process or mode of proceeding may be adopted which may appear most conformable to the spirit of the code. Section 1094.5, subd. (f), does not specifically point out the prejudgment procedures to be followed in an administrative mandamus action, nor do its terms prohibit the court from adopting a suitable process or mode of proceeding when addressing the issues presented. Hence, nothing in § 1094.5, subd. (f)'s language suggests an intent to limit or repeal § 187 for purposes of administrative mandamus actions.

CA(11)[↓] (11)

Administrative Law § 99—Judicial Review— Administrative Mandamus—Remand.

Code Civ. Proc., § 1094.5, subd. (f), provides that, when granting mandamus relief, the court may order the reconsideration of the case in the light of the court's opinion and judgment. This clearly implies that, in the final judgment itself, the court may direct the agency's attention to specific portions of its decision that need attention, and need not necessarily require the agency to reconsider, de novo, the entirety of its prior action. That being so, no reason appears why, in appropriate circumstances, the same objective cannot be accomplished by a remand prior to judgment. Indeed, such a device, properly employed, promotes efficiency and expedition by allowing the court to retain jurisdiction in the already pending mandamus proceeding, thereby

eliminating the potential need for a new mandamus action to review the agency's decision on reconsideration.

CA(12)[↓] (12)

Administrative Law § 99—Judicial Review— Administrative Mandamus—Remand— Reconsideration—Due Process.

Any agency reconsideration must fully comport with due process, and may not simply allow the agency to rubberstamp its prior unsupported decision.

[*504] CA(13)[↓] (13)

Administrative Law § 99—Judicial Review— Administrative Mandamus—Remand— Reconsideration.

Code Civ. Proc., § 1094.5, subd. (f), imposes no blanket prohibition on the appropriate use, in an administrative mandamus action, of a prejudgment remand for agency reconsideration of one or more issues pertinent to the agency's decision. (Disapproving to the extent inconsistent: Resource Defense Fund v. Local Agency Formation Com. (1987) 191 Cal.App.3d 886 [236 Cal.Rptr. 794], and Sierra Club v. Contra Costa County (1992) 10 Cal.App.4th 1212 [13 Cal.Rptr.2d 182].)

CA(14)[↓] (14)

Administrative Law § 103—Judicial Review— Administrative Mandamus—Remand—Evidence.

Code Civ. Proc., § 1094.5, subd. (e), is not intended to prevent the court, upon finding that the administrative record itself lacks evidence sufficient to support the agency's decision, from remanding for consideration of additional evidence. A more reasonable interpretation, which fully honors the statutory language, is that § 1094.5, subd. (e), simply prevents a mandamus petitioner

from challenging an agency decision that is supported by the administrative record on the basis of evidence, presented to the court, which could have been, but was not, presented to the administrative body.

CA(15)[↓] (15)

Administrative Law § 103—Judicial Review— Administrative Mandamus—Remand—Evidence.

Code Civ. Proc., § 1094.5, subd. (e), merely confirms that while, in most cases, the court is limited to the face of the administrative record in deciding whether the agency's decision is valid as it stands, in fairness, the court may consider, or may permit the agency to consider, extra-record evidence for a contrary outcome, if persuaded that such evidence was not available, or was improperly excluded, at the original agency proceeding.

CA(16)[↓] (16)

Administrative Law § 103—Judicial Review— Administrative Mandamus—Remand—Evidence.

Code Civ. Proc., § 1094.5, subd. (e), promotes orderly procedure, and the proper distinction between agency and judicial roles, by ensuring that, with rare exceptions, the court will review a quasi-judicial administrative decision on the record actually before the agency, not on the basis of evidence withheld from the agency and first presented to the reviewing court. But once the court has reviewed the administrative record, and has found it wanting, § 1094.5 does not preclude the court from remanding for the agency's reconsideration in appropriate proceedings that allow the agency to fill the evidentiary gap. (Disapproving to the extent inconsistent: Ashford v. Culver City Unified School Dist. (2005) 130 Cal.App.4th 344 [29 Cal.Rptr.3d 728], and Newman v. State Personnel Bd. (1992) 10 Cal.App.4th 41 [12 Cal.Rptr.2d 601].)

[*505] CA(17)[↓] (17)

Electricity, Gas, and Steam § 2—Thermal Power Plant—NPDES Permit—Best Technology Available—Alternative Cooling Technologies—Wholly Disproportionate—Standard.

In a case in which a regional water board issued a National Pollutant Discharge Elimination System permit allowing a thermal powerplant to draw cooling water from a harbor and slough, the board did not err by basing its best technology available determination on a finding that the costs of alternative cooling technologies for the powerplant were wholly disproportionate to the anticipated environmental benefits.

[Manaster & Selmi, Cal. Environmental Law & Land Use Practice (2011) ch. 33, § 33.81; 12 Witkin, Summary of Cal. Law (10th ed. 2005) Real Property, §§ 889, 893, 896; 8 Witkin, Cal. Procedure (5th ed. 2008) Extraordinary Writs, § 325.]

Opinion by: Baxter [*506]

Opinion

[**84] [***662] **BAXTER, J.**—Voices of the Wetlands, an environmental organization, filed this administrative mandamus action in the Monterey County Superior Court to challenge the issuance, by the California Regional Water Quality Control Board, Central Coast Region (Regional Water Board), of a federally required permit authorizing the Moss Landing Power Plant (MLPP) to draw cooling water from the adjacent Moss Landing Harbor and Elkhorn [**85] Slough.¹ The case,

¹ In the case title in this court, and hereafter in our discussion, we refer to Voices of the Wetlands, the mandamus petitioner, as “plaintiff.” (See Cal. Style Manual (4th ed. 2000) § 6:28, pp. 230–231.) The mandamus petition named as respondents the State Water Resources Control Board (State Water Board) and the Regional Water Board. In the case title in this court, and hereafter as convenient in our discussion, we refer to these parties as “defendants.” (*Ibid.*) The mandamus petition also named Duke Energy North America LLC and its subsidiary, Duke Energy Moss Landing, LLC (collectively Duke), then the MLPP’s owners, as real parties in interest. At some point, apparently during the appellate process, the MLPP changed ownership. The current owner is Dynegy Moss Landing LLC (Dynegy), [****4] an entity unrelated to Duke. Dynegy has filed all pleadings and briefs in this court as the MLPP’s owner and as real party in interest. As Duke’s successor in

now more than a decade old, presents issues concerning the technological and environmental standards, and the procedures for administrative and judicial [****3] review, that apply when a thermal powerplant, while pursuing the issuance or renewal of a cooling water intake permit from a regional water board, also seeks necessary approval from another state agency, the State Energy Resources Conservation and Development Commission (Energy Commission), of a plan to add additional generating units to the plant, with related modifications to the cooling intake system.

Against a complex procedural backdrop, we will reach the following conclusions:

First, the superior court had jurisdiction to entertain the administrative mandamus petition here under review. We thus reject the contention of defendants and the real party in interest that, because the substantive issues plaintiff seeks to raise on review of the Regional Water Board’s decision [****5] to renew the plant’s cooling water intake permit were also involved in the Energy Commission’s approval of the plant expansion, statutes applicable to the latter process placed exclusive review jurisdiction in this court.

[*507]

Second, the trial court did not err when, after concluding that the original record before the Regional Water Board did not support the board’s finding on a single issue crucial to issuance of the cooling water intake permit, the court deferred a final judgment, ordered an interlocutory remand to the board for further “comprehensive” examination of that issue, then denied mandamus after determining that the additional evidence and

interest, Dynegy is entitled to continue the action in Duke’s name (*Code Civ. Proc.*, § 368.5), and Dynegy has not moved to substitute itself as a formally named party (see *Cal. Rules of Court*, rule 8.36(a)). Accordingly, to maintain title symmetry with the Court of Appeal decision, and to facilitate tracking and legal research by the bench, bar, and public, we have retained Duke in the case title in this court as the real parties in interest and appellants. (See Cal. Style Manual, *supra*, § 6:28, p. 230.) As the context dictates, our discussion hereafter refers variously to Duke, Dynegy, or “real party in interest” (singular or plural), or “the MLPP’s owner.”

analysis considered by the board on remand supported the board's reaffirmed finding.

Third, recent United States Supreme Court authority confirms that, when applying federal Clean Water Act of 1977 (CWA; Pub.L. No. 95-217 (Dec. 27, 1977) 91 Stat. 1566) standards [***663] for the issuance of this permit, the Regional Water Board properly utilized cost-benefit analysis, and in particular a “wholly disproportionate” cost-benefit standard, to conclude that the MLPP's existing cooling water intake design, as upgraded to accommodate the plant expansion, “reflect[ed] the *best technology available* for minimizing [****6] adverse environmental impact.” (CWA, § 316(b), codified at 33 U.S.C. § 1326(b), italics added (hereafter CWA section 316(b)).)

We decline to address several other issues discussed by the parties. For instance, plaintiff insists the Regional Water Board violated CWA section 316(b) by approving compensatory mitigation measures—a habitat restoration program funded by the MLPP's owner—as a means of satisfying the requirement to use the best technology available (BTA). The legal issue whether section 316(b) allows such an approach is certainly significant (see Riverkeeper, Inc. v. U.S. E.P.A. (2d Cir. 2007) 475 F.3d 83, 110 (*Riverkeeper II*); Riverkeeper, Inc. v. U.S. E.P.A. (2d Cir. 2004) 358 F.3d 174, 189–191 (*Riverkeeper I*)), and it has not been finally resolved.

However, the trial court found, as a matter of fact, that the Regional Water Board had not directly linked the habitat restoration [**86] program to its BTA determination. The Court of Appeal concluded that the trial court's no-linkage finding had substantial evidentiary support. Here, as in the Court of Appeal, defendants and real party in interest decline to pursue the legal issue, urging only that the trial court's factual finding should not be disturbed. [****7] As so framed, the issue presented is case and fact specific, and involves no significant question of national or statewide

importance. Accordingly, we exercise our discretion not to consider it. (See Cal. Rules of Court, rule 8.516(b)(3).) By so proceeding, we expressly do not decide whether compensatory mitigation and habitat restoration measures can be components of BTA, and we leave that issue for another day.

Finally, in its briefs on the merits, plaintiff advances issues it did not raise in its petition for review. Plaintiff now insists the evidence in the administrative record does not support the Regional Water Board's finding that the costs [*508] of alternative cooling technologies would be “wholly disproportionate” to their environmental benefits. Plaintiff also urges that even if the board properly considered compensatory restoration measures as a means of satisfying BTA, the record does not support its determination that the habitat restoration project it approved was sufficient to offset the environmental damage caused by the MLPP's cooling system.

These issues are case and fact specific, did not factor into our decision to grant review, and do not currently appear to be matters [****8] of significant national or statewide interest. Again, therefore, we decline to address them.

Accordingly, we will affirm the judgment of the Court of Appeal.

FACTS AND PROCEDURAL BACKGROUND

The MLPP, in operation under various owners for nearly 60 years, sits at the mouth of Elkhorn Slough, an ecologically rich tidal estuary that drains into Monterey Bay between the cities of Santa Cruz and Monterey. As a thermal powerplant, the MLPP uses superheated steam to generate electricity. The plant's cooling system appropriates water from Moss Landing Harbor, and water from the adjacent slough is also drawn into the system. The MLPP has traditionally employed a once-through cooling system, in which water continuously passes from the source through the plant, then back into the

source at a warmer temperature. The thermal effects of the cooling system aside, [***664] the intake current kills some aquatic and marine life by trapping larger organisms against the intake screens (impingement) and by sucking smaller organisms through the screens into the plant (entrainment).²

HNI[↑] Under the CWA, the MLPP must have a National Pollutant Discharge Elimination System (NPDES) permit in order to draw cooling water from the harbor and slough. The discharge of a “pollutant” from a “point source” into navigable waters may only occur under the terms and conditions of such a permit, which must be renewed at least every five years. (33 U.S.C. §§ 1311, 1342(a), (b).) In California, NPDES permits, which must comply with all minimum federal clean water requirements, are issued under an EPA-approved state water quality control program [***10] administered, pursuant to the [*509] Porter-Cologne Water Quality Control Act (Porter-Cologne Act; Wat. Code, § 13000 et seq.), by the State Water Board and the nine regional water boards. (*Id.*, §§ 13372, 13377; see 33 U.S.C. § 1342(b); 40 C.F.R. §§ 123.21–123.25 (2011); 39 Fed.Reg. 26061 (July 16, 1974); 54 Fed.Reg. 40664–40665 (Oct. 3, 1989).)

In 1999, Duke applied to the Energy Commission for approval of Duke's plan to modernize the MLPP by adding two new 530- [**87] megawatt gas-fired generators. These new units would supplement the two 750-megawatt generators, units 6 and 7, already in operation, and would replace units 1

through 5, older generators that were no longer being used. Pursuant to the Warren-Alquist State Energy Resources Conservation and Development Act (Warren-Alquist Act; Pub. Resources Code, § 25000 et seq.), the siting, construction, or modification of a thermal powerplant with a generating capacity in excess of 50 megawatts must be certified by the Energy Commission. (*Id.*, §§ 25110, 25120, 25500.) As set forth in greater detail below, the commission's certification must be consistent with all applicable federal laws (*id.*, §§ 25514, subd. (a)(2), 25525), and is “in lieu of [***11] any permit, certificate, or similar document required by any state, local or regional agency, or federal agency to the extent permitted by federal law” (*id.*, § 25500).

Concurrently with its Energy Commission application, Duke applied to the Regional Water Board for renewal of its NPDES permit—which was due to expire in any event—and to include therein terms and conditions consistent with operation of the new generators. In both applications, Duke proposed various modifications to the design and operation of the existing once-through cooling system, both to accommodate the new generators, and to minimize aquatic and marine mortality resulting from cooling water intake operations.³ However, the proposal did not contemplate [***665] conversion of the plant to either a closed-cycle or a dry-cooling system (see fn. 2, *ante*).

In order to renew the plant's NPDES permit, the Regional Water Board was required, among other

² Alternative cooling technologies exist, particularly including closed-cycle and dry-cooling systems. A closed-cycle system uses a holding [***9] basin, reservoir, or tower to retain, cool, and continuously recycle a single supply of cooling water within the plant. Such a system requires renewal from an outside water source only to replace evaporation loss. Dry cooling eliminates the need for cooling water, instead employing air as the cooling medium. These designs substantially reduce or eliminate impingement and entrainment damage, as compared to a once-through water cooling system, but they may produce their own adverse environmental effects, and converting an existing powerplant from a once-through system to closed-cycle or dry-cooling technology involves significant additional expense.

³ As the Regional Water Board's order issuing the NPDES permit explained, the MLPP had two cooling water intake stations, one which served the currently operational units 6 and 7, and the other, then inactive, which had served the retired units 1 through 5. Under the MLPP proposal, this latter station would be reactivated to serve the proposed new generators. Changes in [***12] the design and operation of the existing once-through cooling system would be employed to reduce impingement mortality, including alterations in the angles of the intake screens, the use of finer mesh on the screens, reductions in cooling water intake velocity made possible by the design of the new generators, and the elimination of a 350-foot tunnel in front of the intake screens.

things, to determine, under section 316(b) of the CWA, that “the location, design, construction, and capacity of [the MLPP’s] cooling water intake structures reflect[ed] the best technology available for minimizing adverse environmental impact [(i.e., BTA)].” (33 U.S.C. [*510] § 1326(b); see *id.*, §§ 1316(b)(1)(A), 1342(b)(1)(A).) In the year 2000, when the MLPP’s Energy Commission and Regional Water Board applications were pending, there were no federal regulations in place directing permitting agencies how to apply the BTA standard. When lacking regulatory guidance for applying the CWA’s NPDES permit standards, including section 316(b)’s BTA standard for cooling water intake structures, agencies were expected to exercise [****13] their “best professional judgment” on a case-by-case basis. (See, e.g., *Entergy Corp. v. Riverkeeper, Inc.* (2009) 556 U.S. 208, 213 [173 L.Ed.2d 369, 129 S.Ct. 1498, 1503] (*Entergy Corp.*); *National Resources Defense Council v. U.S. E.P.A.* (9th Cir. 1988) 863 F.2d 1420, 1425.)

The Energy Commission and Regional Water Board proceedings went forward concurrently, and were coordinated to a significant degree. As noted by the Court of Appeal, “the [Energy] Commission and the [Regional Water Board] formed a Technical Working Group (TWG) made up of representatives from various regulatory agencies, the scientific community, and Duke The TWG worked to design biological resource studies and then validate the results of those studies.’ ”

On October 25, 2000, after full agency review and opportunity for public comment, the Energy Commission approved the application for certification and authorized construction of the MLPP modernization project. Under the federal-compliance provisions of the Warren-Alquist Act, the commission addressed the BTA issue. In this regard, the commission determined that design alternatives to Duke’s proposed modifications of the MLPP’s cooling intake system either would not significantly [****14] reduce environmental

damage to the source of cooling water, or were economically infeasible, and that the proposed [**88] modifications represented the most effective economically feasible alternative considered. The commission thus concluded that this proposal represented BTA for purposes of section 316(b) of the CWA, though it “recommend[ed]” that, prior to each five-year renewal of the NPDES permit, the Regional Water Board require the plant’s owner to provide an analysis of “alternatives and modifications to the cooling water intake system 1.) which are feasible under [the California Environmental Quality Act] and 2.) [which] could significantly reduce entrainment impacts to marine organisms.”

As a separate condition of certification, the Energy Commission specified that the MLPP’s owner would provide \$ 7 million to fund an Elkhorn Slough watershed acquisition and enhancement project. The commission concluded that compliance with “existing and new permits, including the . . . NPDES . . . permit[,] will result in no significant water quality degradation.” Finally, the commission entered a formal finding that the conditions of certification, if implemented, would “ensure that the project [****15] will be designed, sited, and operated [***666] in conformity with applicable local, regional, state, and federal laws, [*511] ordinances, regulations, and standards, including applicable public health and safety standards, and air and water quality standards.”

On October 27, 2000, after similar full procedures, the Regional Water Board issued its revised Waste Discharge Requirements Order No. 00-041 (Order No. 00-041), which included NPDES permit No. CA0006254, applicable to the MLPP. The stated purpose of the order was to permit, pursuant to conditions and limitations specified in the order, the “discharge of industrial process wastewater, uncontaminated cooling water and storm water from the [MLPP].”

In finding No. 48 of its order, the Regional Water Board addressed CWA section 316(b)’s BTA

mandate, as required for issuance of the permit. The order recited that the powerplant “must use BTA to minimize adverse environmental impacts caused by the cooling water intake system. *If the cost of implementing any alternative for achieving BTA is wholly disproportionate to the environmental benefits to be achieved, the Board may consider alternative methods to mitigate these adverse environmental impacts. In [****16] this case the costs of alternatives to minimize entrainment impacts are wholly disproportionate to the environmental benefits.* However, Duke Energy will upgrade the existing intake structure for the new units to minimize the impacts due to impingement of larger fish on the traveling screens, and will fund a mitigation package to directly enhance and protect habitat resources in the Elkhorn Slough watershed” (Italics added.)

In finding No. 49, the Regional Water Board set forth the required cooling system modifications and the environmental results to be expected therefrom. Subsequent findings detailed the features of the habitat enhancement program to be funded by a \$ 7 million deposit from the powerplant's owner.

No person or entity sought administrative or judicial relief to stop or stay construction or operation of the plant additions and modifications under the terms and conditions of the Energy Commission's certification order, nor was any other form of judicial review of the commission's order pursued. The project to install the two new generating units at the MLPP, with attendant modifications to the cooling intake system, has since been constructed, and has been in operation [****17] since 2002.

Meanwhile, plaintiff did file with the State Water Board an administrative appeal of the Regional Water Board's Order No. 00-041. On June 21, 2001, the State Water Board rejected the appeal.

On July 26, 2001, plaintiff filed the instant petition for administrative mandamus (Code Civ. Proc., § 1094.5 (section 1094.5)) in the Monterey [*512] County Superior Court (No. M54889). The petition

claimed that the Regional Water Board had failed to comply with the CWA, in that the October 2000 NPDES permit issued to Duke did not satisfy the BTA requirement of section 316(b) of that statute. The prayer for relief asked that Order No. 00-041, issuing the permit, be set aside. However, plaintiff did not seek injunctive or other relief to halt, delay, or suspend the operative effect of the 2000 [**89] NPDES permit while the mandamus challenge was pending.⁴

Defendants and real parties in interest demurred to the petition, asserting, among other [***667] things, lack of subject matter jurisdiction, in that the claims for [****18] relief concerned matters determined by the Energy Commission, whose decisions the Warren-Alquist Act insulates from review by the superior court. The commission, as amicus curiae, filed a supporting memorandum. The trial court overruled the demurrers. Duke sought a writ of mandate in the Court of Appeal, Sixth Appellate District, to challenge this decision. (*Duke Energy Moss Landing v. Superior Court*, June 12, 2002, H024416.) The Court of Appeal summarily denied mandate.

The superior court then considered plaintiff's claims on the merits. On October 1, 2002, after a hearing, the court issued its intended decision. In this tentative ruling, the court rejected finding No. 48 of the Regional Water Board's Order No. 00-041—the board's determination that the MLPP's cooling water system satisfied BTA—concluding that this finding was not supported by the weight of the evidence. The intended decision proposed to order issuance of a peremptory writ of mandate, directing the board “to conduct a thorough and comprehensive analysis of [BTA] applicable to the [MLPP].” However, the intended decision specified that “[n]othing in this decision compels an interruption in the ongoing plant operation

⁴The 2000 NPDES permit here at issue expired in 2005. We are advised that the MLPP's cooling system is currently operating under an administrative extension of this permit. (See 40 C.F.R. § 122.6 (2011).)

[****19] during the ... board's review of this matter.”

On October 29, 2002, after receiving initial objections from real parties in interest, the court designated the intended decision as the statement of decision and ordered plaintiff to prepare a proposed judgment for review and signature. Plaintiff submitted a proposed judgment granting a peremptory writ of mandate and setting aside the challenged NPDES permit.

Defendants and real parties in interest objected that a judgment setting aside the permit would conflict with the intended decision's proviso that no interruption in current plant operations was being ordered, and would require the Regional Water Board to start the NPDES permit process over from “square one.” These parties submitted an alternative proposed judgment that [*513] granted the peremptory writ and remanded to the board “for further proceedings in [the board's] discretion that are consistent with this Judgment and the Statement of Decision,” again specifying that nothing in the judgment compelled an interruption in ongoing plant operations pending the board's review.

Ultimately, on March 7, 2003, the court issued an order which (1) stated that finding No. 48 was not supported by the weight of the evidence, [****20] (2) remanded Order No. 00-041 to the Regional Water Board “to conduct a thorough and comprehensive analysis with respect to Finding No. 48,” and (3) directed the board to advise the court when it had completed its proceedings on remand “so that the [c]ourt may schedule a status conference.” Plaintiff's petition for mandate in the Court of Appeal, seeking to set aside the March 7, 2003, order (*Voices of the Wetlands v. Superior Court* (Apr. 18, 2003, H025844)) was summarily denied.

On remand, the Regional Water Board issued a notice soliciting written testimony, evidence, and argument from the parties—including, for this purpose, both plaintiff and the Energy Commission—as to (1) what alternatives to once-

through cooling were effective to reduce entrainment, (2) the costs, feasibility, and environmental benefits of such alternatives, and (3) whether the costs of any such alternatives were wholly disproportionate to their environmental benefits. The parties, and the board's staff, thereafter submitted voluminous materials in conformity with the notice.

On May 15, 2003, the Regional Water Board held a public hearing on the issues specified in the remand order. Plaintiff [***668] participated in [****21] the hearing. The parties had the opportunity to summarize their evidence, cross-examine witnesses, and present closing arguments. Members of the public in attendance were also allowed to comment. The board members' discussion indicated a [**90] majority view that closed-cycle cooling, despite its ability to reduce entrainment, would actually have adverse effects on air and water quality and would reduce plant efficiency, and that more expensive cooling alternatives were not justified by their environmental benefits, given the overall good health of the adjacent marine habitat after 50 years of plant operations. These considerations, the board majority concluded, supported the original determination that the costs of alternatives to the MLPP's once-through cooling system were wholly disproportionate to the corresponding environmental benefits. By a four-to-one vote, the board approved a motion declaring that, for the reasons specified in the foregoing discussion, “Finding [No.] 48 in NPDES order 00041 is supported by the weight of the evidence.”

[*514]

Plaintiff filed an administrative appeal of the Regional Water Board's decision on remand. The State Water Board summarily denied the appeal on grounds [****22] that it failed to “raise substantial issues that are appropriate for review.”

On October 15, 2003, plaintiff filed a second superior court mandate petition (*Voices of the Wetlands v. California Regional Water Quality*

Control Bd. (Super. Ct. Monterey County, No. M67321)), attacking the Regional Water Board's resolution on remand on multiple grounds. On July 21, 2004, acting on the petition at issue here, No. M54889, the court issued a statement of decision resolving the postremand issues the parties had agreed remained open. In pertinent part, the court ruled that (1) the board's limitation on the scope of the remand issues complied with the court's remand order, (2) in deciding whether finding No. 48 had sufficient support, the court could consider the new evidence developed on remand, (3) plaintiff was correct that mitigation measures could not be considered in determining BTA (citing *Riverkeeper I, supra*, 358 F.3d 174), but the board had not used the \$ 7 million Elkhorn Slough habitat restoration plan as a "substitute" for selecting BTA, and the board's BTA determination "[did] not rest on that plan as the basis for its [BTA] finding," and (4) the board on remand conducted "a sufficiently [****23] comprehensive analysis of the potential technological alternatives" to once-through cooling, "and the record contains a realistic basis for concluding that the existing modified [cooling] system provides [BTA] for the [MLPP]."

On August 17, 2004, the court entered judgment denying a peremptory writ of mandate in No. M54889. On the parties' stipulation, the court thereafter entered an order of dismissal with prejudice in No. M67321.

Plaintiff appealed in No. M54889, urging that the trial court erred in ordering an interlocutory remand, and in denying mandate to overturn the NPDES permit on grounds that the Regional Water Board had improperly determined BTA. Defendants and real parties in interest cross-appealed on the issue whether the superior court had jurisdiction to entertain the mandamus petition.

Meanwhile, in July 2004, the EPA finally promulgated regulations setting BTA standards for the cooling systems of existing powerplants. (69 Fed.Reg. 41576 (July 9, 2004); see 40 C.F.R. §

125.90 et seq. (2011) (Phase II regulations).⁵ As explained [***669] in greater detail below, the Phase II regulations established national performance standards based on the impingement and [*515] entrainment mortality [****24] rates to be expected from closed-cycle cooling (see fn. 2, *ante*). However, the regulations allowed existing facilities to meet those standards by alternative cooling system technologies, or, where reliance on such a technology alone was less feasible, less cost effective, or less environmentally desirable, by using restoration measures as a supplementary aid to compliance. A facility could also obtain a site-specific determination of BTA based on performance "as close as practicable" to the national standards, where, in the particular case, the costs of strict compliance would be "significantly greater" than those considered by the EPA director when formulating the regulations (the "cost-cost" alternative), or than the environmental benefits [**91] to be expected (the "cost-benefit" alternative). (40 C.F.R. suspended § 125.94 (2011).)

In 2007, while the instant appeal was pending, the United States Court of Appeals for the Second Circuit issued its decision in *Riverkeeper II*, addressing the Phase II regulations.⁶ The *Riverkeeper II* court concluded that these regulations were invalid [****25] under section 316(b) of the CWA insofar as they permitted the use of (1) cost-benefit analysis (as opposed to stricter cost-effectiveness analysis)⁷ and (2) compensatory restoration measures for purposes of determining BTA. (*Riverkeeper II, supra*, 475 F.3d 83, 98–105, 108–110, 114–115.)

⁵The EPA had previously issued regulations governing BTA for the cooling systems of new powerplants (Phase I regulations).

⁶In *Riverkeeper I, supra*, 358 F.3d 174, the same court of appeals had previously considered challenges to the Phase I regulations.

⁷Thus, *Riverkeeper II* concluded that CWA section 316(b)'s BTA standard does allow selection of the least costly technology "whose performance does not essentially differ from the performance of the best-performing technology whose cost the industry reasonably can bear." (*Riverkeeper II, supra*, 475 F.3d 83, 101.)

Thereafter, the Court of Appeal for the Sixth Appellate District unanimously affirmed the trial court judgment in this case. The Court of Appeal concluded that (1) the superior court properly entertained the mandamus petition; (2) the court did not err by ordering, in advance of a final judgment, an interlocutory remand to the Regional Water Board; (3) the board properly considered new evidence on remand; (4) section 316(b) of the CWA does not permit the use of compensatory [****26] restoration measures as a factor in establishing BTA (citing *Riverkeeper II*), but substantial evidence in the administrative record supports the trial court's determination that the board did not employ mitigation measures as “ ‘a substitute for selecting the best technology available’ ”; (5) the board could properly conclude that BTA did not require the implementation of cooling technologies whose costs were “wholly disproportionate” to their environmental benefits; and (6) the administrative record substantially supports the trial court's ultimate determination that, in the MLPP's case, the costs of alternative technologies to once-through cooling were wholly disproportionate to the expected environmental results.

[*516]

Plaintiff sought review, raising three contentions: (1) section 316(b) of the CWA does not permit a cost-benefit analysis, such as the Regional Water Board's “wholly disproportionate” standard, in determining BTA; (2) the board improperly accepted compensatory restoration measures—specifically, the \$ 7 million Elkhorn Slough habitat enhancement program—as a factor in achieving BTA; and (3) the trial court improperly ordered an interlocutory remand after finding insufficient [****27] evidence to support the board's BTA finding. In its answer to the petition for review, Dynegy [***670] urged that if review was granted, we should conclude the superior court lacked subject matter jurisdiction, because the BTA determination was subsumed in the Energy Commission's powerplant certification, as to which review was solely in this court.

We granted review and deferred briefing pending the United States Supreme Court's resolution of the then pending petitions for certiorari in *Riverkeeper II*. The high court subsequently granted certiorari. In April 2009, the court issued its decision in *Entergy Corp.*, resolving certain of the issues addressed by the court of appeals in *Riverkeeper II*. Our discussion below proceeds accordingly.

DISCUSSION ⁸

A. Superior court jurisdiction.

HN2[↑] CA(1)[↑] (1) Pursuant to the Porter-Cologne Act, decisions and orders of the Regional Water Board, including the issuance and renewal of NPDES permits, are reviewable by administrative appeal to the State Water Board, and then by petition for administrative mandamus [**92] in the superior court. (§ 1094.5; Wat. Code, §§ 13320, 13330.) In the mandamus proceeding, the superior court is obliged to exercise its independent judgment on the evidence before the administrative agency, i.e., to determine whether the agency's findings are supported by the weight of the evidence. (§ 1094.5, subd. (c); Wat. Code, § 13330, subd. (d).)

Plaintiff pursued these avenues of relief. Nonetheless, defendants and Dynegy, joined by the Energy Commission as amicus curiae, urge at the outset that the superior court lacked jurisdiction to entertain plaintiff's petition for mandate in this case. The trial court and the Court of Appeal rejected this contention. We do so as well.

[*517]

CA(2)[↑] (2) The jurisdictional argument is based

⁸ The Energy Commission has filed an amicus curiae brief urging, in support of defendants and Dynegy, that the Regional Water Board's permit decision was properly reviewable only in this court. An amicus curiae brief in support of plaintiff has been jointly filed by the North Coast Unified Air Quality Management District, the Northern Sonoma County Air Pollution Control District, the South Coast Air Quality Management District, and the San Diego County [****28] Air Pollution Control District.

on HN3 the Warren-Alquist Act, which mandates simplified and expedited processing and review of applications to certify the siting, construction, and modification [****29] of thermal powerplants. [***671] The Warren-Alquist Act accords the Energy Commission “the exclusive power to certify all sites and related facilities” for thermal powerplants with generating capacities of 50 or more megawatts, “whether a new site and related facility or a change or addition to an existing facility.” (Pub. Resources Code, § 25500; see also *id.*, §§ 25110, 25119, 25120.) HN4 When a certification application is filed, the commission undertakes a lengthy review process that involves multiple staff assessments, communication with other state and federal regulatory agencies, environmental impact analysis, and a series of public hearings. (*Id.*, §§ 25519–25521.) With an exception not relevant here, the commission may not certify a proposed facility that does not meet all applicable federal, state, regional, and local laws. (*Id.*, § 25525.) Accordingly, “[t]he issuance of a certificate by the commission shall be in lieu of any permit, certificate, or similar document required by any state, local or regional agency, or federal agency to the extent permitted by federal law, for such use of the site and related facilities, and shall supersede any applicable statute, ordinance, or regulation [****30] of any state, local, or regional agency, or federal agency to the extent permitted by federal law.” (*Id.*, § 25500.)

HN5 CA(3) (3) The Warren-Alquist Act also constrains judicial review of an Energy Commission powerplant certification decision. Between 1996 and 2001, the statute provided that review of such a decision was exclusively by a petition for writ of review in the Court of Appeal or the Supreme Court. (Pub. Resources Code, former § 25531, subd. (a); Pub. Utilities Code, § 1759, subd. (a).)⁹ An emergency amendment to Public

Resources Code section 25531, subdivision (a), effective in May 2001, establishes that this court alone now has jurisdiction to review powerplant certification decisions by the commission. (Pub. Resources Code, § 25531, subd. (a), as amended by Stats. 2001, 1st Ex. Sess. 2001–2002, ch. 12, § 8, pp. 8101–8102.)

Subdivision (c) of Public Resources Code section 25531 further provides that HN6 “[s]ubject to the right of judicial review of decisions of the [Energy] [***518] [C]ommission,” as set forth in subdivision (a), “no court in this state has jurisdiction to hear or determine any case or controversy concerning any matter which was, or could have been, determined in a proceeding before the commission, or to stop or delay the construction or operation of any thermal powerplant except to enforce compliance with the provisions of a decision of the commission.”

Defendants [****32] and Dynegy urge as follows. Under the particular circumstances of this [***93] case, the fundamental issue presented—whether the MLPP's once-through cooling water intake system satisfied BTA for purposes of section 316(b) of the CWA—is one which “was, or could have been” (Pub. Resources Code, § 25531, subd. (c)), and indeed, had to be, determined in the certification proceeding before the Energy Commission. In order to certify the proposed expansion of the MLPP, the commission was required to find, and did find, that the project, including the intended modifications to the MLPP's cooling intake system, conformed to all applicable local, state, and federal

Code section 25531, subdivision (a), adopted as part of the Warren-Alquist Act in 1974, originally [****31] provided that review of powerplant siting decisions by the Energy Commission would be the same as for Public Utility Commission decisions granting or denying certificates of public convenience and necessity for powerplants. (Stats. 1974, ch. 276, § 2, pp. 501, 532.) In 1996, Public Utilities Code section 1759, subdivision (a), was amended to allow review of Public Utilities Commission decisions either by this court or by the Court of Appeal. (Stats. 1996, ch. 855, § 10, p. 4555.) The effect, under then unamended Public Resources Code section 25531, subdivision (a), was to establish similar review for Energy Commission powerplant siting certifications.

⁹ Adopted as part of the Public Utilities Act in 1951, Public Utilities Code section 1759, subdivision (a), originally provided for exclusive Supreme Court review of the Public Utility Commission's decisions and orders. (Stats. 1951, ch. 764, § 1759, p. 2091.) Public Resources

laws, including section 316(b). Hence, the “case or controversy” advanced by plaintiff “concern[s] a matter” within the commission's purview, and was thus subject to the Warren-Alquist Act's exclusive-review provisions, with which plaintiff did not comply.

Plaintiff makes the following response: Entirely aside from the plant expansion project, the MLPP cannot operate its cooling water intake system without a federally required, time-limited NPDES permit. Under both federal and state law, only the State Water Board and the regional water [****33] boards have authority in California to issue or renew such permits. Although the MLPP's NPDES permit renewal process coincided with its Energy Commission certification proceedings, and the two matters were significantly coordinated, it is the Regional Water Board's decision to renew the NPDES permit, not the Energy Commission's certification of the plant expansion, that is the subject of this “case or [***672] controversy.” The Porter-Cologne Act thus provides for mandamus review by the superior court of the Regional Water Board's permit decision.

Indeed, plaintiff emphasizes, such a conclusion in this case does not thwart the Warren-Alquist Act's purpose to expedite the certification of new powerplant capacity. Plaintiff notes that it never sought to stop, delay, or suspend the construction and operation of the MLPP expansion project in conformity with the Energy Commission's certification, including the approved modifications to the cooling water intake system, and the project has long since been implemented.

CA(4)[↑] (4) Applying well-established principles of statutory construction, we conclude, as did the Court of Appeal, that plaintiff has the better argument. HN7[↑] [*519] When interpreting statutes, we begin with [****34] the plain, commonsense meaning of the language used by the Legislature. (E.g., *Ste. Marie v. Riverside County Regional Park & Open-Space Dist.* (2009) 46 Cal.4th 282, 288 [93 Cal. Rptr. 3d 369, 206 P.3d

739].) If the language is unambiguous, the plain meaning controls. (*Ibid.*) Potentially conflicting statutes must be read in the context of the entire statutory scheme, so that all provisions can be harmonized and given effect. (*San Leandro Teachers Assn. v. Governing Bd. of San Leandro Unified School Dist.* (2009) 46 Cal.4th 822, 831 [95 Cal. Rptr. 3d 164, 209 P.3d 73].)

Here, however, there is no actual conflict. Under the plain language of the two statutory schemes, as applicable to this case, each agency—the Regional Water Board and the Energy Commission—had exclusive jurisdiction in a discrete area of thermal powerplant operations, and a distinct provision for judicial review applied in each case. Under the Warren-Alquist Act, the commission had sole authority to certify, i.e., to grant general permission for, the MLPP's proposal to install and operate additional generating capacity, and to modify other plant systems as necessary to accommodate this expansion. There is no question, under the unambiguous language of the Warren-Alquist Act, that the [****35] commission's certification order was subject to judicial review in this court alone. Plaintiff did not seek judicial review of the commission's certification decision, and that determination has long since become final and binding.

However, as defendants and Dynegy concede, regardless of any plans for new generating capacity that might involve the Energy Commission, a federal law, the CWA, obliged the MLPP to have in effect at all times a valid NPDES permit in order to cycle cooling water from Elkhorn Slough and Moss Landing Harbor in and out of the plant. The Porter-Cologne Act assigns the exclusive authority to issue, renew, and modify such permits to the State Water Board and the regional water boards. This statute further [**94] plainly specifies that these agencies' decisions are reviewable by mandamus in the superior court. Plaintiff mounted such a judicial challenge to the NPDES permit renewal granted to the MLPP by the Regional Water Board.

Defendants and Dynege note that the Warren-Alquist Act requires the Energy Commission, before issuing a powerplant certification, to find conformity with all “applicable local, regional, state, and federal standards, ordinances, or laws.” (Pub. Resources Code, § 25523, subd. (d)(1); [****36] see also *id.*, § 25514, subd. (a)(2).) Hence, these parties insist, the issue underlying this litigation—whether the MLPP’s cooling water intake system, with its proposed modifications, satisfied BTA for purposes of the CWA—is a “matter” which, in this particular instance, “was, or could have been, determined” by the Energy Commission (Pub. Resources Code, § 25531, subd. (c)) [****673] as a [*520] necessary component of its decision to certify the plant expansion. Accordingly, the argument runs, only this court had “jurisdiction to hear or determine any case or controversy concerning [that] matter.” (*Ibid.*)

We are not persuaded. When the judicial review provisions of the Warren-Alquist Act, as set forth in Public Resources Code section 25531, are read in context, the meaning of subdivision (c)’s critical phrase “any case or controversy concerning any matter which [****674] was, or could have been, determined in a proceeding before the [Energy] [C]ommission” is unmistakably clear.

CA(5)[↑] (5) We must analyze the words of subdivision (c) of Public Resources Code section 25531 in conjunction with subdivision (a) of the same section. HN8[↑] Subdivision (a) specifies the extent of this court’s exclusive direct review jurisdiction [****37] as mandated by the Warren-Alquist Act. Under subdivision (a), “[t]he decisions of the [Energy] [C]ommission *on any application for certification of a site and related facility* are subject to judicial review by the Supreme Court of California.” (Italics added.) Read together with subdivision (a), subdivision (c) simply confirms that no other court may review directly a *certification decision* of the commission, or may otherwise entertain a “case or controversy” that attacks *such a decision* indirectly by raising a “matter” the commission determined, “or could

have ... determined,” *for purposes of* the certification proceeding. Section 25531 neither states nor implies a legislative intent to interfere with normal mandamus review of the actions of *another* agency, simply because that agency, exercising functions within *its* exclusive authority, has independently decided an issue the commission also must or might have addressed for its own purposes.

The Energy Commission did find, in connection with the MLPP’s certification application, that the cooling system modifications proposed in connection with the expansion project satisfied the CWA’s BTA requirement. But the commission made this finding only [****38] to support its decision, under the Warren-Alquist Act, to certify the proposed expansion. If plaintiff had challenged this certification on grounds the commission’s BTA finding was improper, the “case or controversy concerning [that] matter” (Pub. Resources Code, § 25531, subd. (c)) could only have proceeded in accordance with the Warren-Alquist Act.

However, despite the interagency cooperation on the MLPP’s expansion application, and the agencies’ agreement that the plant’s cooling system satisfied BTA, the fact remains that only the Regional Water Board had authority, under the Porter-Cologne Act, and by EPA approval for purposes of the CWA, to determine the BTA issue *as necessary for renewal of the plant’s federally required NPDES permit.*

[*521]

[****675] Defendants and Dynege concede this exclusive administrative authority of the Regional Water Board. Nonetheless, they imply that the board’s BTA finding was ratified, adopted, and subsumed in the Energy Commission’s certification decision. Such is not the case. By law, each agency made an independent BTA determination, based on its distinct and separate regulatory function. Had the two agencies disagreed about BTA, the Energy Commission might still [****39] have been able to certify the plant expansion, but it could not have

overruled or countermanded a decision by the Regional Water Board to deny or condition an NPDES permit renewal [****95**] on grounds the plant's cooling system did not satisfy BTA.

It follows that, by attacking only the Regional Water Board's decision to renew the plant's federally required NPDES permit, plaintiff has not raised a "case or controversy concerning any matter which was, or could have been, determined in a proceeding before the [Energy] [C]ommission." (Pub. Resources Code, § 25531, subd. (c).) Hence, plaintiff's lawsuit, limited to an examination of the propriety of the permit renewal, is not affected by the judicial review provisions of the Warren-Alquist Act.

Defendants and Dynege point out that under the Warren-Alquist Act, "[t]he issuance of a certificate by the [Energy] [C]ommission" for the siting, construction, or expansion of a thermal powerplant "shall be in lieu of any permit, certificate, or similar document required by any state, local or regional agency, or federal agency to the extent permitted by federal law, for such use of the site and related facilities, and shall supersede any applicable statute, [******40**] ordinance, or regulation of any state, local, or regional agency, or federal agency to the extent permitted by federal law." (Pub. Resources Code, § 25500.) Under this provision, a commission certification clearly supplants and supersedes all state, county, district, and city permits and approvals that would otherwise be required for the siting, construction, and expansion of a thermal powerplant.

CA(6)[↑] (6) But Public Resources Code section 25500 acknowledges, as it must, the supremacy of *federal* law. **HN9**[↑] Under the CWA, a federal statute, any facility that discharges wastewater into a navigable water source, as the MLPP has always done, must have an unexpired permit, conforming to federal water quality standards, in order to do so. Pursuant to the regulatory approval of a "federal agency," the EPA, only the State Water Board or a regional water board may issue a federally

compliant discharge permit; such a decision is entirely outside, and independent of, the Energy Commission's authority. Under the Porter-Cologne Act, judicial review of the decisions of these agencies, including those to grant or renew NPDES permits, is by mandamus in the superior court.

[***522**]

Defendants and Dynege nonetheless insist that [******41**] the NPDES permit at issue here is a *state*, not a federal, permit, as to which federal law requires no particular avenue of review beyond minimum standards of due process. Hence, these parties urge, the state agency's decision is entirely subject, within the limits of due process, to the state's own preferences for judicial review. Accordingly, they assert, California may conclude, and has concluded, that when the issuance of a wastewater discharge permit is linked to a powerplant certification proceeding, the Warren-Alquist Act's "one-stop shopping" requirement of exclusive review by this court prevails over the review provisions that would otherwise apply, under the Porter-Cologne Act, to decisions of the State Water Board and the regional water boards.

The contention lacks merit. It is true, as these parties observe, that the CWA does not directly delegate to a state agency the authority to administer the federal clean water program; instead, it allows the EPA director to "suspend" operation of the federal permit program in individual states in favor of EPA-approved permit systems that operate under those states' own laws in lieu of the federal framework. (33 U.S.C. § 1342(b); see [******42**] Shell Oil Co. v. Train (9th Cir. 1978) 585 F.2d 408, 410.) But the distinction is of little moment for our purposes. The state-administered program must conform to federal standards, and it must be approved by a federal agency, the EPA. In California, the EPA has approved a program under which the federally required permits are issued and renewed, not by the Energy Commission, but solely by the State Water Board and the regional water boards. (54 Fed.Reg. 40664-40665 (Oct. 3, 1989); 39 Fed.Reg. 26061 (July 16, 1974); Wat. Code, §

13377.)

CA(7)^(↑) (7) Defendants and Dynegy suggest that, even if this is so, federal law does not prohibit resort to the Warren-Alquist Act's restrictive provisions for judicial review in cases where, as here, a proceeding for issuance or renewal of an NPDES permit coincides with a powerplant certification proceeding before the Energy Commission. Perhaps not. But **HN10**^(↑) under the Warren-Alquist Act itself, only “[t]he decisions of the [Energy] [C]ommission [****96**] *on any application for certification of a site and related facility*” are subject to exclusive review in this court (Pub. Resources Code, § 25531, subd. (a), italics added), and other courts are deprived of jurisdiction [******43**] only of a “case or controversy concerning [a] matter which *was, or could have been*, determined in a proceeding before the commission” (*id.*, subd. (c), italics added).

As we have seen, an NPDES permit decision by a regional water board is not an Energy Commission certification decision. Conversely, under California's EPA-approved NPDES permit program, neither commission certification proceedings, nor findings the commission may make in connection with such proceedings, can result in the issuance or renewal of an NPDES permit; only [***523**] the State Water Board and the regional water boards may issue or renew such permits. Hence, a challenge to the issuance or renewal of an NPDES permit is not a “case or controversy concerning [a] matter which was, or could have been, determined” by the commission. (Pub. Resources Code, § 25531, subd. (c).)

HN11^(↑) **CA(8)**^(↑) (8) Nothing in the Warren-Alquist Act states or implies that where a powerplant has concurrently sought both a renewal from the Regional Water Board of its NPDES wastewater discharge permit, and an Energy Commission certification to install additional generating capacity, the regional water board's decision, normally reviewable in the superior court pursuant to [******44**] the Porter-Cologne Act, is

suddenly subject to the exclusive-review provisions of the Warren-Alquist Act. We see no basis for reading such a requirement into the latter statute.¹⁰

¹⁰Dynegy alludes to the portion of Public Resources Code section 25531, subdivision (c) which states that “[s]ubject to the right of judicial review [in this court] of decisions of the [Energy] [C]ommission, no court ... has jurisdiction ... to *stop or delay* the construction *or operation* of any thermal powerplant except to enforce compliance with ... a decision of the commission.” (Italics added.) Dynegy implies that because the superior court was thus deprived of authority to enforce any NPDES permit ruling it might make by “stop[ping] or delay[ing]” the wastewater discharge “operation[s]” of the MLPP, it must therefore have been deprived of all jurisdiction to entertain a challenge to the ruling. Like the Court of Appeal, we conclude we need not, and we do not, directly address whether the superior court had “stop or delay” authority, because no such stoppage or delay was sought or ordered in this case. But we do have serious doubts about Dynegy's premise. We have explained that under federal and California [******45**] water quality laws, all industrial facilities, including thermal powerplants, that discharge wastewater into navigable water sources may only do so under the terms of valid NPDES permits. The State Water Board and the regional water boards have exclusive authority and responsibility to issue, renew, and administer such permits, and a powerplant certification by the Energy Commission cannot operate “in lieu” (Pub. Resources Code, § 25500) of a properly issued, federally required NPDES permit. Review of a decision of the State Water Board or a regional water board is by mandamus in the superior court, which court, upon proper evidence and findings, may command the agency to “set aside [its] order or decision,” and direct the agency “to take such further action as is specially enjoined upon it by law.” (Code Civ. Proc., § 1094.5, subd. (f).) Of course, the agency's compliance with such an order withdraws the federal and state legal authority for the plant's wastewater discharge “operation[s].” Moreover, if the State Water Board or a regional water board perceives a “threatened or continuing” violation of the permit provisions, it may require the Attorney General to seek direct injunctive [******46**] relief against the violator. (Wat. Code, § 13386.)

Construed literally, the no “stop or delay” provision of Public Resources Code section 25531, subdivision (c), would entirely swallow these provisions as applied to thermal powerplants; it would *never* allow a superior court to prevent the illegal wastewater activities of such a plant “except to enforce compliance with ... a decision of the [Energy] [C]ommission”—an agency which, *even in connection with a powerplant certification*, has no direct authority over wastewater discharge violations, or the issuance, renewal, or administration of NPDES permits.

Fairly read in context, and properly harmonized with the requirements of federal and state water quality laws, the cited portion of Public Resources Code section 25531, subdivision (c), like the rest of the section, operates only with respect to “decisions” *properly*

[*524]

[***676] Defendants and Dynege stress that the purposes of the Warren-Alquist Act, including its “one stop” permit process and its provision for exclusive judicial review, are to [**97] consolidate the state's regulation of electrical generation and transmission facilities, and to expedite the operative effect of powerplant certifications by the Energy Commission. (See, e.g., Pub. Resources Code, § 25006; County of Sonoma v. State Energy Resources Conservation etc. Com. (1985) 40 Cal.3d 361, 368 [220 Cal. Rptr. 114, 708 P.2d 693]; Public Utilities Com. v. Energy Resources Conservation & Dev. Com. (1984) 150 Cal. App. 3d 437, 453 [197 Cal. Rptr. 866].) Superior court jurisdiction in this case, they urge, defeats these statutory aims.

However, as we have explained, a federal law, the CWA, requires all industrial facilities, including thermal powerplants, that discharge wastewater into navigable water sources to have in effect unexpired NPDES permits authorizing such discharge. This requirement is independent of the Energy Commission's certification, under California law, of an application to locate, construct, or expand such a powerplant. As defendants and Dynege concede, a state statute, the Porter-Cologne [****48] Act—specifically approved by the federal agency responsible for authorizing state administration of the CWA's requirements—assigns the issuance and renewal of NPDES permits exclusively to the State Water Board and the regional water boards. Although the Energy Commission must make a general finding, before issuing a powerplant certification, that the project conforms to all applicable local, regional, state, and federal laws, such a certification cannot contravene, subsume, encompass, supersede, substitute for, or operate in

*within the purview of the Energy Commission, i.e., powerplant certifications. The subdivision precludes any court except this court from “stop[ping] or delay[ing]” the “operation” of a thermal powerplant insofar as such “operation” is authorized by the Energy Commission's decision, under the Warren-Alquist Act, to certify [****47] the plant's siting, construction, or expansion.*

lieu of, the federally required NPDES permit.

The Porter-Cologne Act provides that review of NPDES permit decisions by the State Water Board or the regional water boards is in the superior court. No provision of either the Porter-Cologne Act or the Warren-Alquist Act states or suggests that these review provisions are altered simply because an NPDES permit issuance or renewal proceeding took place concurrently, or in connection, with a certification proceeding for the same powerplant. Hence, we have no basis to conclude that the purposes of the Warren-Alquist Act are impaired by recognizing superior court jurisdiction under the circumstances of this case.

For [****49] these reasons, we conclude that the superior court had subject matter jurisdiction of the instant mandamus proceeding.

[*525]

[***677] B. *Interlocutory remand.*

Plaintiff urges that under section 1094.5, once the trial court found insufficient evidence to support the Regional Water Board's finding No. 48 (the BTA finding), the court had no choice but to render a final mandamus judgment directing the board to set aside its Order No. 00-041, renewing the MLPP's wastewater discharge permit. The court thus erred, plaintiff insists, when it instead (1) retained jurisdiction pending an interlocutory remand to the board for reconsideration of finding No. 48; (2) allowed the board to take new evidence and reaffirm its finding; then (3) denied mandamus relief after concluding that the administrative record, as augmented on remand, supported the board's determination. We conclude that no error occurred.

Plaintiff bases its argument on two portions of section 1094.5—subdivisions (e) and (f). Subdivision (e) provides that HN12[↑] “[w]here the court finds that there is relevant evidence that, in the exercise of reasonable diligence, could not have been produced or that was improperly

excluded at the hearing before [the [****50] agency], it may enter judgment as provided in subdivision (f) remanding the case to be reconsidered in the light of that evidence; or, in cases in which the court is authorized by law to exercise its independent judgment on the evidence, the court may admit the evidence at the hearing on the writ without remanding the case.” Subdivision (f) states that HN13[↑] “[t]he court shall enter judgment either commanding respondent [(the agency)] to set aside the order or decision, or denying the writ. Where the judgment commands that the order or decision be set aside, it may order the reconsideration of the case in the light of the court’s opinion and judgment”

Read together, plaintiff asserts, these provisions establish that the court (1) may order the administrative agency to reconsider its decision only as part of a final judgment [**98] granting a writ of mandate; (2) in such event, must specify that the entire “case” be reconsidered; and (3) may allow the agency, upon reconsideration, to accept and consider new evidence *only* when such evidence (a) could not earlier have been produced before the agency with due diligence or (b) was improperly excluded at the initial administrative hearing.

As plaintiff [****51] observes, defendants and Dynegy do not claim that the evidence the court found wanting was unavailable at the time of the Regional Water Board’s proceedings, or that the agency improperly rejected an attempt to present such evidence. Hence, plaintiff urges, upon concluding that the board’s BTA finding was not supported by the weight of the evidence then contained in the administrative record, the trial court was required to enter a final judgment granting the requested writ of mandamus and overturning the agency’s permit renewal order in its entirety.

[*526]

CA(9)[↑] (9) We conclude, however, that, HN14[↑] properly understood and interpreted,

subdivisions (e) and (f) of section 1094.5 impose no absolute bar on the use of prejudgment limited remand procedures such as the one employed here. Moreover, when a court has properly remanded for agency reconsideration on grounds that all, or part, of the original administrative decision has insufficient support in the record developed before the agency, the statute does not preclude the agency from accepting and considering additional evidence to fill the gap the court has identified.

CA(10)[↑] (10) To determine the meaning of these provisions, we must first examine their words, which [****52] have remained unchanged since section 1094.5 was adopted over six decades ago. (Stats. 1945, ch. 868, § 1, pp. 1636–1637.) The statutory language simply does not support the arbitrary and restrictive [***678] [***679] construction plaintiff advocates. HN15[↑] On its face, subdivision (f) of section 1094.5 indicates the form of *final judgment* the court may issue in an administrative mandamus action. Unremarkably, subdivision (f) states that the last step the trial court shall take in the proceeding is either to command the agency to set aside its decision, or to deny the writ. The trial court here followed that mandate; it issued a final judgment denying a writ of mandamus.

As defendants and Dynegy observe, nothing in subdivision (f) of section 1094.5 purports to limit procedures the court may appropriately employ *before* it renders a final judgment. A more general statute covers that subject. Code of Civil Procedure section 187, adopted in 1872, broadly provides that whenever the Constitution or a statute confers jurisdiction on a court, “all the means necessary to carry it [(that jurisdiction)] into effect are also given; and in the exercise of this jurisdiction, if the course of proceeding *be not specifically [****53] pointed out* by this Code or the statute, *any suitable process or mode of proceeding may be adopted* which may appear most conformable to the spirit of this Code.” (Italics added.)

Subdivision (f) of section 1094.5 does not

“specifically point[] out” the prejudgment procedures to be followed in an administrative mandamus action, nor do its terms prohibit the court from “adopt[ing]” a “suitable process or mode of proceeding” when addressing the issues presented. (Code Civ. Proc., § 187.) Hence, we find nothing in subdivision (f)'s language that suggests an intent to limit or repeal Code of Civil Procedure section 187 for purposes of administrative mandamus actions. (See, e.g., *Ste. Marie v. Riverside County Regional Park & Open-Space Dist.*, *supra*, 46 Cal.4th 282, 296 [implied repeals disfavored].)

Extrinsic aids to interpretation do not persuade us otherwise. The limited available legislative history of section 1094.5 does not suggest the Legislature's intent to limit the application of Code of Civil Procedure section 187, [*527] as it might appropriately apply in administrative mandamus actions, or to categorically confine the mandamus court only to postjudgment remands. (See, e.g., Cal. Dept. of Justice, Inter-Departmental Communication to Governor re Sen. Bill No. 736 (1945 Reg. Sess.) June 7, 1945, pp. 1–3; Legis. Counsel, Rep. on Sen. Bill No. 736 (1945 Reg. Sess.) June 9, 1945, pp. 1–2.)

Decisions have long expressed the assumption that the court in a mandamus action has [**99] inherent power, in proper circumstances, to remand to the agency for further proceedings prior to the entry of a final judgment. (See, e.g., *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.3d 68, 81 [118 Cal. Rptr. 34, 529 P.2d 66] (*No Oil*) [professing no “question” of trial court's power in traditional mandamus to order interlocutory remand to agency for clarification of findings]; *Keeler v. Superior Court* (1956) 46 Cal.2d 596, 600 [297 P.2d 967] [noting there is “no question” of a court's power under Code Civ. Proc., § 187 to remand, prior to a final mandamus judgment, for further necessary and appropriate agency proceedings; “aside from” court's power under § 1094.5 to enter judgment remanding for consideration of evidence not available, or improperly excluded, in original

agency proceeding, “such a power to remand” prior to judgment “also exists under the inherent powers of the court”]; *Garcia v. California Emp. Stab. Com.* (1945) 71 Cal. App. 2d 107, 114 [161 P.2d 972] [****55] [in original mandamus action, Court of Appeal, without issuing final judgment, remanded for further agency proceedings after finding that evidence in administrative record was insufficient to support denial of unemployment [***680] benefits].) In *Rapid Transit Advocates, Inc. v. Southern Cal. Rapid Transit Dist.* (1986) 185 Cal. App. 3d 996 [230 Cal. Rptr. 225] (*Rapid Transit Advocates*), an administrative mandamus action governed by section 1094.5, the Court of Appeal, citing *No Oil* and *Keeler*, expressly upheld the trial court's order continuing the trial and remanding for clarification of the agency's findings. (*Rapid Transit Advocates, supra*, at pp. 1002–1003.)

We perceive no compelling reason why the Legislature would have wished to categorically bar interlocutory remands in administrative mandamus actions. Though its arguments have varied somewhat, we understand plaintiff to raise two basic objections to such a procedure.

First, plaintiff insists, the purpose of an administrative mandamus suit is to determine, once and for all, whether an agency has acted “without, or in excess of jurisdiction,” in that the agency “has not proceeded in the manner required by law, the order or decision is not supported by the findings, [****56] or the findings are not supported by the evidence.” (§ 1094.5, subd. (b).) If the agency's action, as originally presented for review, is found defective by these standards, plaintiff urges, that action must simply be set aside, and the administrative process—assuming further proceedings are appropriate at all—must begin anew. Plaintiff contends the instant trial court violated these [*528] principles by withholding final judgment on the validity of the Regional Water Board's NPDES permit determination while allowing the agency to reconsider, and justify, a single finding the court had deemed insufficiently

supported.

Second, plaintiff seems to suggest, a limited prejudgment remand raises the danger of a sham proceeding, in which interested parties are denied the opportunity to argue or present evidence, and the agency simply concocts a post hoc rationalization for the decision it has already made. Such concerns appear paramount in two Court of Appeal decisions that expressly disagreed with *Rapid Transit Advocates*, *supra*, 185 Cal. App. 3d 996, and broadly asserted that section 1094.5 bars interlocutory, as opposed to postjudgment, remands in administrative mandamus proceedings. (*Sierra Club v. Contra Costa County* (1992) 10 Cal.App.4th 1212, 1220–1222 [13 Cal. Rptr. 2d 182]; [****57] *Resource Defense Fund v. Local Agency Formation Com.* (1987) 191 Cal. App. 3d 886, 898–900 [236 Cal. Rptr. 794] (*Resource Defense Fund*)).

CA(11)[↑] (11) But considerations of fairness and proper agency decisionmaking do not justify the absolute prohibition for which plaintiff argues. Significantly, **HN16**[↑] subdivision (f) of section 1094.5 provides that, when granting mandamus relief, the court may “order the reconsideration of the case *in the light of the court's opinion and judgment.*” (Italics added.) This clearly implies that, in the final judgment itself, the court may direct the agency's attention to specific portions of its decision that need attention, and need not necessarily require the agency to reconsider, de novo, the entirety of its prior action. That being so, no reason appears why, in appropriate circumstances, the same objective [**100] cannot be accomplished by a remand prior to judgment. Indeed, such a device, properly employed, promotes efficiency and expedition by allowing the court to retain jurisdiction in the already pending mandamus proceeding, thereby eliminating the potential need for a new mandamus action to review the agency's decision on reconsideration.

CA(12)[↑] (12) We agree with plaintiff, and with the courts in *Sierra* [****58] *Club v. Contra Costa*

County and *Resource Defense Fund*, that **HN17**[↑] any agency reconsideration must fully comport with due process, and may not simply allow the agency to rubberstamp [***681] its prior unsupported decision. Indeed, the judgments in *Sierra Club v. Contra Costa County* and *Resource Defense Fund* could have been based solely on the conclusions of the Courts of Appeal in those cases that the particular agency decisions on remand suffered from such flaws.¹¹

[*529]

However, a limited interlocutory remand raises no greater inherent danger in these regards than does a final judgment ordering limited reconsideration, as expressly authorized by subdivision (f) of section 1094.5. No fundamental concerns about fair, sound, and complete agency decisionmaking impose the need for a categorical bar on such prejudgment remands.

¹¹ Thus, in *Resource Defense Fund*, a case involving the California Environmental Quality Act (CEQA), the trial court ordered an interlocutory remand to allow a city council to supply *missing* findings in support of an annexation approval. The order simply provided that the court would enter judgment after the council's action, or the expiration of 60 days. The Court of Appeal noted that this sparse and abbreviated procedure raised “serious questions of due process: it effectively precluded any possible challenge to the sufficiency of the evidence to support the new findings” and “fostered a *post hoc* rationalization” (*Resource Defense Fund*, *supra*, 191 Cal. App. 3d 886, 900.) In *Sierra Club v. Contra Costa County*, the trial court [****59] determined that an environmental impact report (EIR), required by CEQA, was inadequate because it failed to fully analyze, and the county board of supervisors had thus failed to fully consider, less environmentally damaging alternatives to a massive residential development approved by the board. The court nonetheless denied the mandamus relief requested by opponents of the development, “ ‘with the exception that the County should administratively make further findings on alternatives.’ ” (*Sierra Club v. Contra Costa County*, *supra*, 10 Cal.App.4th 1212, 1216.) The board then adopted supplemental findings. Promptly thereafter, the court found the EIR, as so augmented, to be “ ‘legally adequate in all respects,’ ” whereupon the court discharged the alternative writ and entered judgment for the county. (*Id.*, at pp. 1216–1217.) Besides finding that this procedure did not satisfy the specific requirements of CEQA, the Court of Appeal stressed that, as was the case in *Resource Defense Fund*, the trial court's procedure raised serious questions of due process by insulating the board's supplemental findings “from any meaningful challenge.” (*Sierra Club v. Contra Costa County*, *supra*, at p. 1221.) [****60]

CA(13) [↑] (13) Accordingly, we are persuaded that **HN18** [↑] subdivision (f) of section 1094.5 imposes no blanket prohibition on the appropriate use, in an administrative mandamus action, of a prejudgment remand for agency reconsideration of one or more issues pertinent to the agency's decision. We reject plaintiff's contrary argument. To the extent the Courts of Appeal in *Resource Defense Fund* and *Sierra Club v. Contra Costa County* concluded otherwise, we will disapprove those decisions.

We are further convinced that the interlocutory remand in this case was not employed, or conducted, improperly. Under the circumstances presented, the trial court's choice to utilize this device was eminently practical. Plaintiff's mandamus petition challenged only a single, discrete facet of the lengthy and complex NPDES permit order—the order's treatment of the BTA issue. [****61] The trial court ultimately concluded that a single finding on this issue—finding No. 48—lacked evidentiary and analytic support. Confronted with this situation, the trial court reasonably concluded it need not, and should not, enter a final judgment vacating the entire permit pending further consideration of that issue.

Such a judgment, even if it included an order narrowing the issues, would have required a new permit proceeding and, most likely, a new mandamus action to review the resulting decision. In the interim, the MLPP's authority to use the cooling system essential to its electrical generation operations [*530] would be cast in [***682] doubt. Instead, the court reasonably decided it could achieve the necessary further examination of the BTA issue by postponing a final judgment pending [**101] the Regional Water Board's focused reconsideration of that matter. The court thus properly exercised its inherent authority to adopt a “suitable process or mode of proceeding” in aid of its jurisdiction. (*Code Civ. Proc.*, § 187.)

Moreover, unlike the procedures at issue in *Resource Defense Fund* and *Sierra Club v. Contra*

Costa County, the instant remand was not unfair, and it produced no mere post hoc rationalization [****62] by the agency. On the contrary, in compliance with the trial court's directive, the Regional Water Board engaged in a full reconsideration of the BTA issue, and gave all interested parties, including plaintiff, a noticed opportunity to appear and to present evidence, briefing, and argument pertinent to the BTA determination.

Nor was the Regional Water Board's finding on remand insulated from meaningful review. Plaintiff was able to pursue, and did pursue, its statutory right to seek an administrative appeal of the board's BTA finding on remand, and then was allowed, in the resumed judicial proceedings, a full opportunity to dispute the foundation for that finding.

For all these reasons, we find no error in the trial court's use of an interlocutory remand to resolve perceived deficiencies in the Regional Water Board's BTA finding.

We similarly reject plaintiff's argument that subdivision (e) of section 1094.5 precluded the Regional Water Board from accepting and considering new evidence on remand absent a showing that such evidence could not have been produced at the original administrative proceeding, or was improperly excluded therefrom. We do not read subdivision (e) to impose such [****63] a limitation under the circumstances presented here.

As explained above, subdivision (e) of section 1094.5 provides that “[w]here the court finds that there *is relevant evidence*” (italics added) which could not with reasonable diligence have been produced, or was improperly excluded, in the administrative proceeding, the court may remand the case “to be reconsidered in the light of *that evidence*.” (Italics added.) To the extent this language is ambiguous, plaintiff extracts the most radical interpretation—that when a court, for whatever reason, directs or authorizes the agency to reconsider its prior decision, in whole or in part, the agency is always confined to the evidence it

previously received, with the exception of evidence the court determines was unavailable, or wrongly excluded, in the original administrative proceeding.

But the precise circumstances of this case illustrate why plaintiff's construction makes little sense. The instant trial court found that the Regional [*531] Water Board's finding No. 48 was *not sufficiently supported* by the original administrative record. The only possible cure for such a deficiency is the agency's reconsideration of its decision *on the basis of additional [****64] evidence*. Plaintiff's construction of subdivision (e) of section 1094.5 would categorically preclude the court, except in narrow circumstances, from authorizing the agency to reach a better considered and better supported result *on a sufficient record*. Unless those narrow exceptions applied, any reconsideration at all would thus simply be futile; the very flaw the court had found could not be remedied.

Yet section 1094.5 contains no other indication that the Legislature intended such a constraint on the scope of an agency reconsideration directed or authorized by the court. Indeed, subdivision (f) broadly provides that when the court directs the agency decision to be set aside, it “may order the reconsideration of the case in the [***683] light of the court's opinion and judgment ... but the judgment shall not limit or control in any way the discretion legally vested in the [agency].” The implication is plain that if, as here, the court finds the administrative record *insufficient* to support the original agency determination, it may order reconsideration *in the light of that judicial finding*—i.e., a reconsideration in which the agency may entertain all the additional evidence necessary [****65] to support its new decision.

Moreover, had the instant trial court simply vacated the Regional Water Board's issuance of the NPDES permit in this case, the MLPP's owner could, should, and would simply have commenced a new permit proceeding before the board. Plaintiff does not suggest that, in such a new proceeding, the [**102] board would be limited to the evidence it

had considered before, plus only previously unavailable or improperly excluded evidence. On the contrary, the board would have been empowered to receive and consider, *de novo*, all evidence pertinent to its decision whether to issue the requested permit. Accordingly, there is no reason to conclude the board lacks such authority when directed or ordered by the court to reconsider an insufficiently supported decision.

Albeit with little analysis, a number of decisions have expressed the unremarkable principle that, when an agency determination is set aside for *insufficiency of the evidence* in the administrative record, the proper course is to remand to the agency for further appropriate proceedings—presumably the agency's consideration of additional evidence as the basis for its decision on reconsideration. (See, e.g., *Fascination, Inc. v. Hoover* (1952) 39 Cal.2d 260, 268 [246 P.2d 656]; [****66] *La Prade v. Department of Water & Power* (1945) 27 Cal.2d 47, 53 [162 P.2d 13]; *Carlton v. Department of Motor Vehicles* (1988) 203 Cal. App. 3d 1428, 1434 [250 Cal. Rptr. 809].)

[*532]

CA(14)[↑] (14) Accordingly, we are persuaded that HN19[↑] section 1094.5, subdivision (e) is not intended to prevent the court, upon finding that the administrative record itself *lacks* evidence sufficient to support the agency's decision, from remanding for consideration of additional evidence. A more reasonable interpretation, which fully honors the statutory language, is that subdivision (e) simply prevents a mandamus petitioner from challenging an agency decision that *is* supported by the administrative record on the basis of evidence, presented to the court, which could have been, but was not, presented to the administrative body.

This interpretation adheres most closely to the literal words of section 1094.5, subdivision (e). As noted, the subdivision provides that when the court determines there “is relevant evidence” meeting the statutory criteria, it may remand to the agency for consideration of “that evidence,” or, in cases where

the court is authorized to weigh the evidence independently, the court may “admit *the evidence*” (italics added) in the judicial proceeding [****67] itself. Read most naturally, this language contemplates a situation in which a party to the mandamus action has actually proffered to the court specific evidence not included in the administrative record. Subdivision (e) provides that the court may remand for agency consideration of *such evidence*, or may consider the evidence itself, only if *that evidence* could not reasonably have been presented, or was improperly excluded, at the administrative proceeding.

CA(15)[↑] (15) Thus, HN20[↑] subdivision (e) of section 1094.5 merely confirms that while, in most cases, the court is limited to the face of the administrative record in deciding whether the agency's decision is valid as it stands, in fairness, the court may consider, or may permit the agency to consider, extra-record evidence for a contrary outcome, if persuaded that such evidence was not [***684] available, or was improperly excluded, at the original agency proceeding. (See No Oil, supra, 13 Cal.3d 68, 79, fn. 6 [in administrative mandamus action, “the court reviews the administrative record, receiving additional evidence only if that evidence was unavailable at the time of the administrative hearing, or improperly excluded from the record”].)

The limited available [****68] legislative history of Senate Bill No. 736 (1945 Reg. Sess.), in which section 1094.5 was adopted, is consistent with this view. The Department of Justice advised the Governor that the bill was designed to settle areas of confusion which had arisen about judicial review of administrative decisions, and would, as “a most important consideration, ... permit the court to remand administrative proceedings for further consideration by the administrative agency in cases where relevant evidence was not available or was wrongfully excluded from the administrative hearings *so that the administrative agency, rather than the court, may finally determine the whole proceeding and the court may in turn actually*

*review the administrative [**533] action. The latter consideration accords both to the administrative agency and the reviewing court their primary functions and the opportunity of carrying out the legislative intent in authorizing the administrative agency to conduct and determine its own proceedings.”* (Cal. [**103] Dept. of Justice, Inter-Departmental Communication to Governor re Sen. Bill No. 736 (1945 Reg. Sess.) June 7, 1945, p. 1, italics added.)

This explanation indicates an intent to provide that [****69] where the reviewing court learns of evidence the agency should have considered, but did not or could not do so for reasons beyond the control of the participants in the administrative proceeding, the court may give the agency, the appropriate primary decision maker, the opportunity to include this evidence in its determination, subject to the court's limited review of the resulting administrative record for abuse of discretion. Nothing suggests, on the other hand, that the court is powerless to allow reconsideration by the agency, with such additional evidence as the agency may find appropriate, when the court finds, in the first instance, that there is not enough evidence in the original administrative record to support the agency's decision.

The decisional law also generally supports our conclusion. Courts have most frequently applied subdivision (e) of section 1094.5 simply to determine whether and when an agency decision may be challenged on mandamus with evidence outside the administrative record.¹² On the

¹²E.g., Sierra Club v. California Coastal Com. (2005) 35 Cal.4th 839, 863 [28 Cal. Rptr. 3d 316, 111 P.3d 294] (in administrative mandamus action challenging coastal zone permit, evidence proffered by mandamus petitioner, which was not part of administrative record, that coastal commission members did not personally review final EIR before granting permit, could not be considered); State of California v. Superior Court (1974) 12 Cal.3d 237, 257 [115 Cal.Rptr. 497, 524 P.2d 1281] (in administrative mandamus action challenging coastal zone permit, mandamus petitioner was not entitled to propound interrogatories to determine whether coastal commission denied fair hearing by receiving, and relying upon, secret prehearing testimony by commission staff);

other [***685] hand, our research has disclosed only two decisions holding or suggesting that section 1094.5 [*534] precludes a remand for new evidence when, as happened here, the trial court [****70] finds that the existing administrative

Eureka Citizens for Responsible Government v. City of Eureka (2007) 147 Cal.App.4th 357, 366–367 [54 Cal. Rptr. 3d 485] (in administrative mandamus action by neighborhood organization challenging city's allowance of nonconforming school playground, court could not consider mandamus petitioner's proffer of correspondence to and from city officials, not included in administrative record, as evidence of school's "ongoing land use [****71] violations"); *Pomona Valley Hospital Medical Center v. Superior Court* (1997) 55 Cal.App.4th 93, 101–109 [63 Cal. Rptr. 2d 743] (under § 1094.5, subd. (e), discovery to obtain evidence that administrative hearing was not fair is permissible only if evidence sought is relevant and could not, with reasonable diligence, have been presented in administrative proceeding); *Fort Mojave Indian Tribe v. Department of Health Services* (1995) 38 Cal.App.4th 1574, 1591–1598 [45 Cal. Rptr. 2d 822] (expression of expert opinion that postdates administrative proceeding is not truly "new" evidence of "emergent facts" which would justify remand, at mandamus petitioner's behest, under § 1094.5, subd. (e)); *Elizabeth D. v. Zolin* (1993) 21 Cal.App.4th 347, 355–357 [25 Cal. Rptr. 2d 852] (in administrative mandamus action challenging suspension of driver's license on ground of licensee's seizure disorder, mandamus petitioner could obtain remand to Department of Motor Vehicles (DMV) under § 1094.5, subd. (e) for consideration of physician's declaration, which postdated DMV hearing, that disorder was being well controlled by medication); *Armondo v. Department of Motor Vehicles* (1993) 15 Cal.App.4th 1174, 1180 [19 Cal. Rptr. 2d 399] (in mandamus action challenging administrative suspension of driver's [****72] license based on breathalyzer results, court properly excluded, absent showing that § 1094.5, subd. (e) exception applied, petitioner's proffered evidence that local crime laboratory was not licensed to use particular breathalyzer model); *Tovota of Visalia, Inc. v. New Motor Vehicle Bd.* (1987) 188 Cal. App. 3d 872, 881–882 [233 Cal. Rptr. 708] (car dealer seeking mandamus review of administrative discipline could introduce evidence outside administrative record on issue of appropriate penalty only if such evidence could not, with reasonable diligence, have been presented in administrative proceeding); *Windigo Mills v. Unemployment Ins. Appeals Bd.* (1979) 92 Cal. App. 3d 586, 596–597 [155 Cal. Rptr. 63] (administrative mandamus petitioner may introduce evidence beyond administrative record if such evidence relates to events that postdate agency proceeding); see also *Western States Petroleum Assn. v. Superior Court* (1995) 9 Cal.4th 559, 564 [38 Cal. Rptr. 2d 139, 888 P.2d 1268] (evidence outside administrative record was not admissible in traditional mandamus action to determine, under Pub. Resources Code, § 21168.5, a provision of CEQA, whether the agency's decision constituted a "prejudicial abuse of discretion," either because the agency " [did] not proceed[] in [****73] a manner required by law," or because its decision was not supported by "substantial evidence").

record simply fails to support the agency's original determination.

Thus, in *Ashford v. Culver City Unified School Dist.* (2005) 130 Cal.App.4th 344 [29 [**104] Cal. Rptr. 3d 728] (*Ashford*), the Court of Appeal held that except under the circumstances specifically set forth in subdivision (e) of section 1094.5, there was no ground for a remand to give a public employer a second chance to provide additional evidence in support of the original, inadequately founded, administrative decision to terminate an employee. (*Ashford, supra*, at pp. 350–354.) Similarly, in *Newman v. State Personnel Bd.* (1992) 10 Cal.App.4th 41 [12 Cal. Rptr. 2d 601] (*Newman*), the Court of Appeal concluded that the trial court erred when, after finding insufficient evidence in the administrative record to support the medical termination of a California Highway Patrol (CHP) employee, the court remanded for further proceedings. In the Court of Appeal's view, subdivision (f) of section 1094.5 prevented a remand for agency reconsideration when the agency had failed to reach a result substantially supported by the evidence. The Court of Appeal stated that the CHP had failed in its burden to prove grounds for the employee's dismissal, and was [****74] "not now entitled to a second opportunity to establish its case." (*Newman, supra*, at p. 49.)

Ashford and *Newman* illustrate circumstances in which due process principles entirely separate from section 1094.5 may preclude successive administrative proceedings. It may well be, as *Ashford* and *Newman* suggested, that there should be no second chance to muster sufficient evidence [***686] to impose administrative sanctions on a fundamental or vested right, such as the right against dismissal from tenured public employment except upon good cause. [**535]

But we find no such categorical bar in section 1094.5 itself. The quasi-judicial administrative proceedings governed by this statute include a wide variety of matters, including applications for

permits and licenses, that have nothing to do with disciplinary or punitive sanctions. Here, as plaintiff concedes, even if the instant trial court had vacated the MLPP's NPDES permit renewal for lack of evidence, the plant could, should, and would have begun anew the process for obtaining this permit, essential to the continuation of its electrical generation operations. In this new proceeding, the Regional Water Board could, should, and would have considered all evidence [****75] relevant to its permit decision, regardless of whether that evidence had been presented in the prior proceeding. No reason appears to construe section 1094.5 to preclude such new evidence when the court, having found insufficient record support for the agency's decision, remands for reconsideration of that matter.

CA(16)[↑] (16) In sum, **HN21[↑]** section 1094.5, subdivision (e), promotes orderly procedure, and the proper distinction between agency and judicial roles, by ensuring that, with rare exceptions, the court will review a quasi-judicial administrative decision on the record actually before the agency, not on the basis of evidence withheld from the agency and first presented to the reviewing court. But once the court has reviewed the administrative record, and has found it wanting, section 1094.5 does not preclude the court from remanding for the agency's reconsideration in appropriate proceedings that allow the agency to fill the evidentiary gap. To the extent the analyses in *Ashford* and *Newman* are inconsistent with these conclusions, we will disapprove those decisions.

Here, the trial court found that the administrative record did not support one finding by the agency in support of its issuance of a [****76] permit essential to the permittee's operations. Hence, the court acted properly by remanding to the agency for additional evidence and analysis on this issue. No error occurred.

C. “Best technology available” under CWA section 316(b).

As indicated, finding No. 48 of the Regional Water

Board's order issuing the MLPP's 2000 NPDES permit renewal addressed the requirement, under CWA section 316(b), that “the location, design, construction, and capacity of cooling water intake structures reflect the best technology available for minimizing adverse environmental impact.” (33 U.S.C. § 1326(b).) In this regard, the board determined that “[i]f the cost of implementing any alternative for achieving BTA is wholly disproportionate to the environmental benefits to be achieved, the Board may consider alternative [**105] methods to mitigate these adverse environmental impacts.” The board further found that, though the MLPP's existing once-through cooling system would be modified and upgraded in certain respects to minimize adverse impacts on aquatic life, [*536] proposed alternatives to this basic system were “wholly disproportionate to the environmental benefits.” After complying, on remand, with the superior court's [****77] directive to analyze the available technologies more closely, the board confirmed finding No. 48, and the superior court denied mandamus.

As we have noted, shortly before the superior court issued its final judgment, the EPA promulgated the Phase II regulations applying CWA section 316(b)'s BTA standard to *existing* electric powerplants. [***687] (69 Fed.Reg., *supra*, p. 41576; 40 C.F.R. § 125.90 et seq. (2011).) The Phase II regulations did not follow the approach of the Phase I regulations, which had required *new* powerplants either to adopt closed-cycle cooling systems or to achieve comparable environmental performance—i.e., up to 98 percent reductions in impingement and entrainment mortality relative to typical once-through systems. (69 Fed.Reg., *supra*, pp. 41576, 41601, 41605.) The EPA declined to impose such a stringent requirement on existing powerplants because it concluded that conversion to closed-cycle systems was impossible or economically impracticable for many existing facilities, that such conversions could have adverse impacts on the environment and on the plants' production and consumption of energy, and that

other, less costly technologies could approach the environmental benefits [****78] of closed-cycle systems. (*Id.*, at p. 41605.)

Instead, therefore, the Phase II regulations set national performance standards requiring an existing facility to reduce impingement and entrainment mortality rates by 60 to 95 percent compared to the rates estimated to arise from a typical once-through system at the site. (40 C.F.R. suspended §§ 125.93, 125.94(b)(1), (2) (2011).) The regulations provided alternative means of achieving compliance, based on a range of available technologies the EPA had determined were “commercially available and economically practicable.” (69 Fed.Reg., *supra*, pp. 41576, 41602.)

The Phase II regulations also allowed a powerplant to seek and receive a site-specific variance from the standards. Such a variance could be obtained by establishing that the plant's costs of literal compliance would be “significantly greater” than (1) the costs the EPA had considered in setting the performance standards or (2) “the benefits of complying” with the standards. (40 C.F.R. suspended § 125.94(a)(5)(i), (ii) (2011).) If a variance was granted, the plant would be required to employ remedial measures that yielded results “as close as practicable to the applicable [****79] performance standards.” (*Ibid.*)

While the instant appeal was pending, the Second Circuit addressed the Phase II regulations in *Riverkeeper II*. The federal court held that while section 316(b) of the CWA allows consideration of extreme forms of economic burden or unfeasibility, the Phase II regulations were invalid under [*537] section 316(b) insofar as, among other things, they determined BTA, or allowed such a site-specific determination, based on mere cost-benefit analysis—i.e., a simple comparison between the expense of a particular cooling system technology and its expected environmental benefits. (*Riverkeeper II, supra*, 475 F.3d 83, 98–105, 114–115.) Nonetheless, the Court of Appeal in this case

subsequently upheld the Regional Water Board's “wholly disproportionate” determination, concluding that it was not foreclosed by *Riverkeeper II*.

On review in this court, plaintiff, relying heavily on *Riverkeeper II*, renewed its argument that the Regional Water Board had employed a cost-benefit analysis forbidden by CWA section 316(b). At the time we granted review, petitions for certiorari were pending in *Riverkeeper II*. The United States Supreme Court thereafter granted certiorari and rendered [****80] its decision in *Entergy Corp. Entergy Corp.* reversed *Riverkeeper II*, unequivocally holding that “the EPA *permissibly* relied on cost-benefit analysis in setting the national performance standards and in providing for cost-benefit variances from those standards as part of the Phase II regulations. The Court of Appeals' reliance in part on the agency's use of cost-benefit [**106] analysis in invalidating the site-specific cost-benefit variance provision [citation] [****688] was therefore in error, as was its remand of the national performance standards for clarification of whether cost-benefit analysis was impermissibly used [citation].” (*Entergy Corp, supra*, 556 U.S. 208, 226 [129 S. Ct. 1498, 1510], italics added.)

In our view, this holding clearly disposes of plaintiff's general claim that CWA section 316(b) prohibited the Regional Water Board from premising its BTA finding on a comparison of costs and benefits. Though the Regional Water Board's 2000 decision to renew the MLPP's NPDES permit preceded the Phase II regulations, and was not based upon them, there is no reason to assume the Regional Water Board, using its “best professional judgment” in the preregulatory era, was forbidden to apply a form [****81] of analysis the United States Supreme Court has determined was properly employed in subsequent regulations interpreting the statute at issue.

Moreover, a portion of the majority's opinion in *Entergy Corp.*, though dictum, undermines plaintiff's further contention that the particular cost-

benefit standard employed by the Regional Water Board—i.e., whether the costs of alternatives to the MLPP's once-through cooling system were “wholly disproportionate” to the expected environmental benefits—was improper.

In his concurring and dissenting opinion in *Entergy Corp.*, Justice Breyer had asserted that, while he agreed some form of cost-benefit analysis was [*538] permissible under CWA section 316(b), the EPA had failed to explain why, in the Phase II regulations, it had abandoned its traditional “wholly disproportionate” standard in favor of one allowing site-specific variances where the costs of compliance were merely “ ‘significantly greater’ ” than the anticipated benefits to the environment. (*Entergy Corp.*, *supra*, 556 U.S. 208, 236 [129 S. Ct. 1498, 1515] (conc. & dis. opn. of Breyer, J.).)

In response, the majority noted that the issue raised by Justice Breyer had no bearing on the basic permissibility [****82] of cost-benefit analysis, “the only question presented here.” Nonetheless, the majority remarked, “It seems to us ... that the EPA's explanation was ample. [The EPA] explained that the ‘wholly out of proportion’ standard was inappropriate for the existing facilities subject to the Phase II rules because those facilities lack ‘the greater flexibility available to new facilities for selecting the location of their intakes and installing technologies at lower costs relative to the costs associated with retrofitting existing facilities,’ and because ‘economically impracticable impacts on energy prices, production costs, and energy production ... could occur if large numbers of Phase II existing facilities incurred costs that were more than “significantly greater” than but not “wholly out of proportion” to the costs in the EPA's record.’ [Citation.]” (*Entergy Corp.*, *supra*, 556 U.S. 208, 222, fn. 8 [129 S. Ct. 1498, 1510, fn. 8].)

CA(17)[↑] (17) The clear implication is that the “wholly disproportionate” standard of cost-benefit analysis—the very standard employed by the Regional Water Board in this case—is *more stringent* than section 316(b) of the CWA requires

for existing powerplants such as [****83] the MLPP. Rather, the *Entergy Corp.* majority suggested, the EPA was free, having “ampl[y]” explained and justified its choice, to select for such facilities a more lenient “significantly greater” standard of economic and environmental practicality. Under these circumstances, we discern no basis to hold that the board erred by basing its BTA determination on a finding that the costs of alternative cooling technologies for the MLPP were “wholly disproportionate” to the anticipated environmental benefits. We conclude [***689] that the board's use of this standard was proper.¹³ [*539]

[**107] DISPOSITION

The Court of Appeal's judgment is affirmed. To the extent the Court of Appeal decisions in *Ashford v. Culver City Unified School Dist.*, *supra*, 130 Cal.App.4th 344, *Sierra Club v. Contra Costa County*, *supra*, 10 Cal.App.4th 1212, *Newman v. State Personnel Bd.*, *supra*, 10 Cal.App.4th 41, and *Resource Defense Fund v. Local Agency Formation Com.*, *supra*, 191 Cal. App. 3d 886, are inconsistent with the views expressed herein, those decisions are disapproved.

¹³Following the *Riverkeeper II* decision, the EPA withdrew the Phase II regulations (72 Fed.Reg. 37107–37109 (July 9, 2007)), and they have not been reissued. We have taken judicial notice that in May 2010, seeking to fill the regulatory vacuum, the State Water Board adopted a Statewide Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (2010 Power Plant Cooling Policy). Under this policy, the State Water Board, rather than the regional water boards, will issue all NPDES permits to affected powerplants. Thermal powerplants with once-through cooling systems will be required, by specified [****84] compliance dates, to reduce intake flow rates to mandated levels, or to adopt other operational and/or structural controls to achieve commensurate reductions in impingement and entrainment mortality. In the interim, affected plants must adopt mitigating measures to control impingement and entrainment damage.

Several powerplant owners, including Dynegey, have filed a petition for mandate challenging the 2010 Power Plant Cooling Policy. (*Genon Energy, Inc. v. State Water Resources Control Board* (Super. Ct. Sacramento County, Oct. 27, 2010, No. 2010-80000701).)

Cantil-Sakauye, C. J., Kennard, J., Werdegar, J., Chin, J., Corrigan, J., and Kitching, J.,” concurred.

Concur by: Werdegar

Concur

WERDEGAR, J., Concurring.—I fully concur in the majority opinion. I write separately only to point out a limitation on the scope of our decision today.

The majority correctly holds that Code of Civil Procedure section 1094.5, governing the procedure to be followed in adjudicating petitions for writ of administrative mandate, does not preclude a trial court from ordering an interlocutory remand requiring agency reconsideration of one or more specific findings or decisions; nor is the agency precluded, under this statute, from considering new evidence on such a remand. (Maj. opn., *ante*, at pp. 529–530.) Because the remand order at issue in this case related to compliance with a provision of the federal Clean Water Act of 1977 (33 U.S.C. § 1326(b)) rather than to compliance with the California Environmental Quality Act (CEQA; Pub. Resources Code, § 21000 et seq.), the majority has no occasion here to consider whether a trial court may, similarly, order remand for reconsideration of an agency decision for compliance with CEQA without issuing a writ of mandate.

Public Resources Code section 21168.9, subdivision (a) [****86] provides that if a court finds a public agency's finding or decision to have been made in violation of CEQA, “the court shall enter an order that includes one or more of the following” mandates. The statute specifically outlines the scope of the mandate to be issued, including as necessary that the agency void its findings [*540] and decisions, take any actions

required to come into compliance with CEQA, and in the meantime suspend any part of the project at issue that might cause an adverse environmental effect. (Pub. Resources Code, § 21168.9, subd. (a)(1)–(3).) [***690] Balancing these commands with protections against an overbroad writ, the statute limits the order to “only those mandates which are necessary to achieve compliance with this division and only those specific project activities in noncompliance with this division,” provided the noncomplying portion of the decision or finding is severable from the complying portion. (*Id.*, subd. (b).) The order is to be made by “peremptory writ of mandate,” and the trial court is to retain jurisdiction “by way of a return to the peremptory writ” to ensure agency compliance. (*Ibid.*)

Consequently, while CEQA challenges are often brought through a petition [****87] for administrative mandate under Code of Civil Procedure section 1094.5, CEQA contains its own detailed and balanced remedial scheme, offering protections for both agencies and those challenging agency action under CEQA. I do not read the majority's analysis of the administrative mandate procedure in this non-CEQA case as speaking to the procedures to be followed when an agency's action is found to have violated CEQA.

Cantil-Sakauye, C. J., concurred.

EXHIBIT F
LOS ANGELES COUNTY FLOOD
CONTROL DISTRICT CODE
(EXCERPT)

16.01 Title.

This Chapter shall be known as the "The Los Angeles Region Safe, Clean Water Program" ordinance.

(Ord. 2018-0044 § 1, 2018.)

16.02 Purpose.

This ordinance is adopted to achieve the following purposes and directs that the provisions hereof be interpreted in order to:

- A. Impose a Special Parcel Tax upon Parcels of property within the boundaries of the District at the rate of two and one-half (2.5) cents per square foot of Impermeable Area, except as exempted, to be used for the purposes set forth herein.
- B. Provide funding for Programs and Projects to increase Stormwater and Urban Runoff capture and reduce Stormwater and Urban Runoff pollution in the District, including Projects and Programs providing a Water Supply Benefit, Water Quality Benefit, and Community Investment Benefit.

(Ord. 2018-0044 § 1, 2018.)

16.04 Expenditure Plan.

The District shall expend all Special Parcel Tax revenues consistent with the expenditure plan contained in this section.

- A. The District shall use the Special Parcel Tax revenues to pay the costs and expenses of carrying out Projects and Programs to increase Stormwater or Urban Runoff capture or reduce Stormwater or Urban Runoff pollution in the District in accordance with criteria and procedures established in this Chapter and Chapter 18 of this code. Projects and Programs funded by the revenues from the Special Parcel Tax may provide a Water Supply Benefit, Water Quality Benefit, and Community Investment Benefit. The District shall allocate the revenues derived from the Special Parcel Tax as follows:
 - 1. Ten percent (10%) shall be allocated to the District for implementation and administration of Projects and Programs, and for the payment of the costs incurred in connection with the levy and collection of the Special Parcel Tax and the distribution of the funds generated by imposition of the Special Parcel Tax in accordance with the criteria and procedures established in this Chapter.
 - 2. Forty percent (40%) shall be allocated to Municipalities within the District, in the same proportion as the amount of revenues collected within each Municipality, to be expended by those cities within the cities' respective jurisdictions and by the County within the unincorporated areas that are within the boundaries of the District, for the implementation, operation and maintenance, and administration of Projects and Programs, in accordance with the criteria and procedures established in this Chapter.
 - 3. Fifty percent (50%) shall be allocated to pay for the implementation, operation and maintenance, and the administration of Projects and Programs implemented through the Regional Program, including Projects and Programs identified in approved regional plans such as stormwater resource plans developed in accordance with Part 2.3 (commencing with section 10560) of Division 6 of the Water Code, watershed management programs developed pursuant to waste discharge requirements for municipal separate storm sewer system (MS4) discharges within the coastal watersheds of the County, issued by the Los Angeles Regional Water Quality Control Board, and other regional water management plans, as appropriate, in accordance with the criteria and procedures established in this

Chapter and Chapter 18 of this code. Funds allocated to the Regional Program shall be distributed among the nine (9) Watershed Areas in proportion to the funds generated in each Watershed Area.

- B. The District, and Municipalities within the boundaries of the District, may use the funds from the Special Parcel Tax to finance bonds issued by the District or Municipalities so long as the bond proceeds are used for Projects and Programs that are eligible for funding under the SCW Program.

(Ord. 2019-0042 § 2, 2019; Ord. 2018-0044 § 1, 2018.)

16.08 Special Parcel Tax Rate.

- A. Commencing the fiscal year 2019-20, an annual special parcel tax in the amount of two and one-half (2.5) cents per square foot of Parcel Impermeable Area, is hereby imposed upon all Parcels located within the District, except as provided in Section 16.09 of this Chapter. All revenues from the Special Parcel Tax shall be used to fund Projects and Programs consistent with the expenditure plan as set forth in Section 16.04 of this Chapter, and to fund the costs incurred in connection with the levy and collection of the tax and distribution of the funds.
- B. All laws and procedures regarding exemptions, due dates, installment payments, corrections, cancellations, refunds, late payments, liens and collections for the secured roll ad valorem property taxes shall be applicable to the collection of the Special Parcel Tax. The secured roll tax bills shall be the only notices required for the levying of the Special Parcel Tax. The Auditor-Controller shall place the Special Parcel Tax on the secured tax roll for the initial fiscal year 2019-20, and for subsequent fiscal years. The Treasurer shall collect the Special Parcel Tax for the initial Fiscal Year 2019-20, and for subsequent fiscal years, on the tax roll at the same time and in the same manner, and subject to the same penalties as the ad valorem property taxes fixed and collected by or on behalf of the County. The County shall be entitled to deduct its reasonable costs incurred in collecting the Special Parcel Tax before such tax is remitted to the District, including all costs incurred in connection with the levy and collection of the tax and distribution of the funds.
- C. The District shall establish and administer an appeals process to address and correct errors in the levy of the Special Parcel Tax. Parcel owners or any other person or entity subject to the Special Parcel Tax may seek review of the amount of their tax on the following grounds:
1. Mathematical error in the calculation of the tax; or
 2. Significant discrepancy between the assessed and the actual Impermeable Area.
- D. The Auditor-Controller shall file a report with the Board by no later than January 1, 2021, and by January 1 of each year thereafter, stating the amount of funds collected pursuant to this ordinance. The report may relate to the calendar year, fiscal year, or other appropriate annual period, as the Auditor-Controller may determine, and may be incorporated into or filed with the annual budget, audit, or other appropriate routine report to the Board.
- E. Nothing in this ordinance shall limit a Parcel owner's ability to pass through the Special Parcel Tax to a tenant, subject to all applicable rent control ordinances, contractual provisions in the specific lease, federal subsidized housing requirements, and other applicable laws.

(Ord. 2018-0044 § 1, 2018.)

Re: Auditor-Controller's Authority to File Test Claim for the Los Angeles County Flood Control District

Dear Ms. Halsey:

This letter is submitted in support of the Los Angeles County Auditor-Controller's authority to submit the Test Claim for the Los Angeles County Flood Control District.

2 Cal. Code Reg. §1183.1(a)(5) provides that an "officer with authority delegated by the governing body by ordinance or resolution may file on behalf of a special district." That is the case here. Section 3 of the Los Angeles County Flood Control Act provides that "The . . . county auditor . . . shall be ex officio officers, assistants, deputies, clerks and employees respectively of said Los Angeles County Flood Control District, and shall respectively perform, unless otherwise provided by said board of supervisors, the same various duties for said district as for said Los Angeles County without additional compensation in order to carry out the provisions of this act."

Accordingly, under the Flood Control Act, the Auditor-Controller has been delegated the authority to perform the same acts for the Flood Control District that it performs for the County itself. Section 1183.1(a)(1) recognizes that the County Auditor-Controller is authorized to file a test claim on behalf of the County and thus the Auditor-Controller, having been delegated the authority to perform the same duties for the Flood Control District, is authorized to file a test claim for the District.

Cal Uncod Water Deer, Act 470 § 3

Deering's California Codes are current through Chapter 175 of the 2022 Regular Session.

Deering's California Codes Annotated > WATER—UNCODIFIED ACTS (§§ 1 — 28) > ACT 470 Los Angeles County Flood Control Act (1915 ch 755) (§§ 1 — 23)

§ 3. Board of supervisors; Rules and regulations; Ex officio officers, assistants; Adoption, certification, recordation and publication of ordinances, etc.

The Board of Supervisors of Los Angeles County shall be, and they are hereby designated as, and empowered to act as, ex officio the board of supervisors of said Los Angeles County Flood Control District, and said board of supervisors is hereby authorized to adopt reasonable rules and regulations to facilitate the exercise of its powers and duties herein set forth.

The county counsel, county clerk, county assessor, county tax collector, county auditor, director of personnel, and county treasurer of the County of Los Angeles, and their successors in office, and all other officers of said Los Angeles County, their assistants, deputies, clerks and employees, shall be ex officio officers, assistants, deputies, clerks and employees respectively of said Los Angeles County Flood Control District, and shall respectively perform, unless otherwise provided by said board of supervisors, the same various duties for said district as for said Los Angeles County without additional compensation in order to carry out the provisions of this act. The district shall reimburse the county for all costs and expenses incurred by reason of the performance of said duties, including the duties performed by members of the board of supervisors, for the district.

All ordinances, resolutions and other legislative acts for said district shall be adopted by said board of supervisors and certified to, recorded and published, in the same manner except as herein otherwise expressly provided, as are ordinances, resolutions or other legislative acts for the County of Los Angeles.

COMMISSION ON STATE MANDATES

Mailing List

Last Updated: 10/14/22

Claim Number: 22-TC-01

Matter: California Regional Water Quality Control Board, Los Angeles Region, Order No. R4-2021-0105

Claimants: County of Los Angeles
Los Angeles County Flood Control District

TO ALL PARTIES, INTERESTED PARTIES, AND INTERESTED PERSONS:

Each commission mailing list is continuously updated as requests are received to include or remove any party or person on the mailing list. A current mailing list is provided with commission correspondence, and a copy of the current mailing list is available upon request at any time. Except as provided otherwise by commission rule, when a party or interested party files any written material with the commission concerning a claim, it shall simultaneously serve a copy of the written material on the parties and interested parties to the claim identified on the mailing list provided by the commission. (Cal. Code Regs., tit. 2, § 1181.3.)
